A number of the most successful men in mercantile life in America have frequently told me that they did not know of a single firm where one man's individuality was stamped so strongly on it as in the case of my own business. This has been told me so often that I am beginning to believe it myself. I know for a fact that for more than thirty years no one has been responsible for

EVERY SUCCESS, EVERY FAILURE,

but myself. Then again, every year for the last twenty-five years, I have received dozens, in fact, hundreds of letters, asking me to put my photo in my next year's Seed Book. Well, here it is, from a photograph taken in 1908, at the time of my fiftieth birthday. My friends who do not know me personally, now know better the man they have sent their orders to for so many years.

Yours always to command,

Wears. When haule

IT has been years since the Maule Seed Book contained an introduction. I do not believe that introductions sell seeds, nor that 10 per cent. of the people read them. Many years ago when I always had a page of "blow" the first thing in my catalogue, I headed one of them

"Coat Off, Sleeves Rolled Up,"

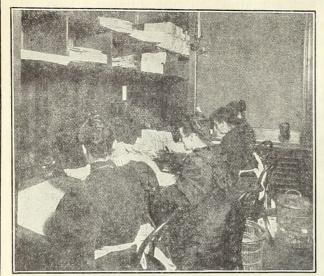

and that illustrates my position right now. To be candid, it is a fact that over 450,000 of the best gardeners in America know just how good, or bad, Maule's Seeds are because they have tried them. I cannot tell them anything about Maule's Seeds, so this is written for the other fellow. For the past ten years this business has increased from 5 to 15 per cent. each year, with one exception. Ten years ago I published as many Seed Books as I do now, and spent \$10,000 more annually in newspaper advertising, so that with no increase in catalogues, much less advertising, the Maule Seed business has almost doubled in that time, for which I have to thank the 450,000 friends and fellow gardeners who know Maule's Seeds. I do not claim that Maule's Seeds are the best that grow, that would be ridiculous; there are other good people in this business besides myself, and I am willing to admit it, but I do claim there are no better seeds than During the past season I have increased my facilities so as to handle \$150,000 extra business; on this account I have enlarged this book, also increased my advertising, and as last year the Maule Seed business was by many thousand dollars the best in its history, I hope for at least 25 per cent. increase all around in 1910, and am prepared to handle it promptly.

I Want Kicks.

If you send me an order and everything is not entirely satisfactory I want you to let me know. Your money back if you want it; nothing has ever paid me so well as a prompt adjustment of all just claims—it is good business. All through this book you will find some interesting facts, figures and photographs relating to the Maule Seed business. I am blowing my own horn this year, as it seems to be the fashion. In conclusion, I hope for a trial order, no matter how small, from every new reader of this book (last year I had over 35,000 orders for 25 cents or less, so you see a small order does not surprise me). I also want to thank all my old friends for their wonderful loyalty and the many kind words spoken for Maule's Seeds for so many years, and I wish them all prosperity and happiness for 1910.

THIS IS WHERE THE STAMPS ARE PUT ON YOUR PACKAGE IF IT GOES BY MAIL.

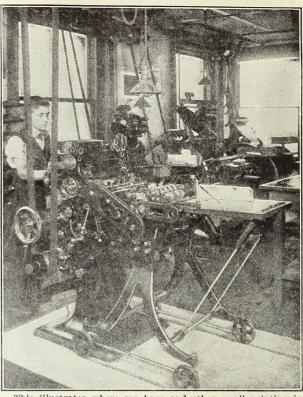

THIS IS WHERE YOUR ORDER FOR POTATOES IS FILLED.

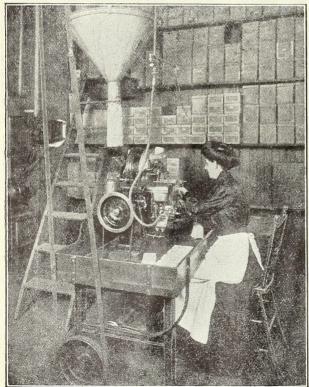

Some Labor-Saving Machinery.

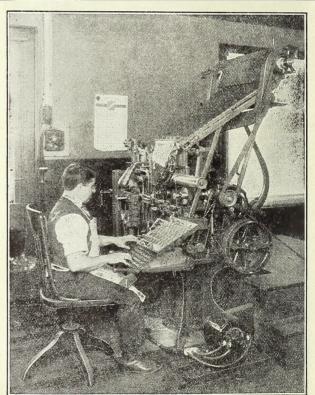

The Adding Machine illustrated above mechanically adds up all the cash received each day and balances the cash besides; it does the work of three men. Twenty years ago my mail was often not opened until ten o'clock at night; in 1909 my mail was opened and cash balanced never later than five o'clock.

This illustrates where my bags and other small printing is executed. The Harris Press in the foreground printed last summer 12,600 catalogue wrappers per hour. This book was wrapped in one of them. It enables me in the shortest possible time to print seed packets by the thousands an hour.

The above illustration shows my Bag-Filling Machine. With this machine and the young lady operator. 25,000 to 40,000 bags per day are mechanically filled and pasted. Ten expert girls could not fill as many bags as this machine in one day.

The above illustration is a Type-Setting Machine, which enables us to set type in a hurry. This page has been set with it. It cost \$3.500 in 1901, is as good as ever today, and has cost less than \$100 in repairs since it was first purchased.

offer no confusing discounts, no free books, nor trial packages; but each and every customer may select their own premium on the basis of

50 CENTS WORTH EXTRA IN PACKETS FOR EVERY DOLLAR REMITTED FOR PACKETS AND OUNCES ONLY

I wish to call the attention of my customers to the fact that this discount does not apply to quarter pounds, half pounds, pounds, pints, quarts, pecks or bushels, nor does it apply to plants, bulbs, small fruits or trees. On completion of your order add the total amount sent for seeds by the packet and ounce, and for each one dollar remitted for seeds in these quantities, you may select your own premium on the basis of fifty cents worth of extra packets for each dollar remitted.

SPECIAL.—Your premium of 50 cents extra on each dollar remitted for packets and ounces must be selected in packets only.

\$1,000 in Cash Prizes for Club Orders

THIS MAKES THE TWENTY=NINTH CONSECUTIVE YEAR I HAVE OFFERED CASH PRIZES FOR CLUB ORDERS.

For 1910 the cash prizes will be awarded as follows:

For the largest club	150.00	40 Prizes
For the fourth largest club	75.00	IN ALL
For the fifth largest club		VALUE
For the next ten largest clubs, each	15.00	\$1,000.
For the next ten largest clubs, each For the next ten largest clubs, each		φi,υυυ.

Last year the smallest club order receiving a prize amounted to \$44.25. This year I am prepared to guarantee a prize to every club raiser sending me on or before July 1st., club orders amounting to \$50.00 or more; so that all club raisers sending me club orders amounting to \$50.00 or over are sure of a \$5.00 prize, and it may possibly amount to \$10.00, as a club order for \$63.33 last season took a \$10.00 prize.

To compete for these prizes the club raiser must mention on

cash club prizes; otherwise it will not be counted July 1, 1910.

I have decided to count everything, not only seeds by the packet and ounce, but seeds by the bushel, peck, pound, quart, pint, as well as plants, bulbs, seed potatoes, etc. In fact, everything listed in this catalogue will be counted this year toward these cash prizes. On this account I expect all my old club raisers to take an unusual interest in the competition, and I trust the clubs will be larger than ever. A single afternoon's work has frequently secured a good prize for many of my customers. Remembering this fact, also the fact that everything is counted this year in competition for these prizes, I hope all my old club raisers will start to work with a will.

Bear in mind that to compete for these prizes you must mention on each and every order sent in that it is in competition for the cash club prizes, otherwise the order will not be counted July 1, 1910, when the premiums are to be awarded.

A list of last year's club prize winners will be mailed on each and every order that it is sent me in competition for the application to anyone who sent me a club order last season.

Here is a letter received last year; it speaks for itself.

L. L. Higgins, Sunnyside, Wash.—I am very agreeably surprised to receive yours with draft for \$200, first prize for club orders for 1909. While I have planted and induced others to use your seeds for many years past, it was done because your seeds always gave the best of satisfaction, and not with a view of winning prizes; however, the prize is, I assure you, highly appreciated, especially this season, as our crops of truck are rather short owing to the cool weather we had in this section. I think I shall be in shape to take many orders for your seeds the coming season, and wish to thank you again for the prize, and your very courteous treatment.

No Market Gardener

in the United States or Canada whose annual order exceeds Ten Dollars, should fail to have my special wholesale price list, which will be mailed free to all who will apply for it who are raising truck for sale. It will prove a money-saver. Prices are right, goods are right, and as hundreds of my market gardener friends have remarked: "Once a customer for Maule's Seeds always a customer." I am sure you will say the same. If you are a market gardener you had better send a postal card request for it today.

ieneral List of Vegetables.

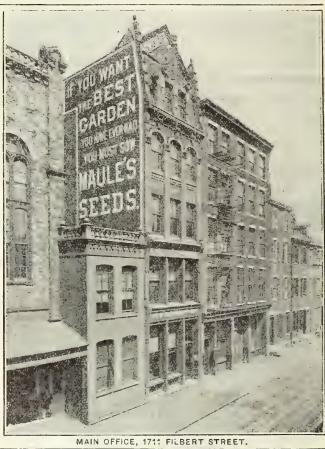

cial pages devoted to Novelties, which are generally found in orders for 20 and 25 pounds from a single customer were not most seed catalogues. I have discovered that my customers prefer to have all the various varieties of Cabbage, Onion, Asters, Pansies, etc., etc., grouped together, for in this manner they can be referred to more readily. Nevertheless, although there are no special novelty pages, this Seed Book is without doubt the greatest catalogue of Specialties ever published by an American seed firm. Everything worth growing, old or new, will be found listed; novelties of my own, as well as those of other houses at home and abroad. My greatest Specialties, as my old friends well know, are those I have offered for many years; for instance Maule's Earliest of All Tomato has been a leader for eighteen years; sales for the last two years of 15 cent packages amounted to 41,490 packets, an

New readers of this Seed Book will notice there are no spe-| average of over 20,000 packets a year, and in larger quantities uncommon. In the spring of 1909 I sold to growers in Sunnyside, Wash., alone, 110 pounds of this tomato for their own planting. Is this not a point worth noting? Many of my competitors boom a variety for four or five years, then drop it; the leaders in this book are in many cases 10 to 20 years old. My Perfection Muskmelon was first named and introduced by me in 1884, yet last year at \$5.00 per pound I hardly had enough seed to go round. Look up other catalogues; the new "Creations" of 1900, that had full pages then, in many cases will have a very few lines in 1910. This is one reason why I can so emphatically announce-

Your Money Back if Not Satisfied.

MAULE BUILDING, MARKET & EIGHTEENTH STREETS.

MY 4-LEAF CLOVER GUARANTEE.

MY 4-LLAF CLUVER GUARANIEL.

I. SAFE ARRIVAL.—I grarantee that all goods sold by me shall reach my customers in good order.

II. MONEY INSURED.—I guarantee to bold myself responsible for the safe arrival of all remittances sent me by post office order, Craft, check or registered letter.

III. FREE BY MAIL.—I guarantee to deliver all garden and flower seeds, except at prices quoted by the quart, peck, bushel. 100 pounds, or barrel, free of all charges.

IV. AS REPRESENTED.—I guarantee my seeds to be just as represented. If they prove otherwise, I will refill the order free of charge, or return your money; but it must be understood I do not guarantee the crop under any circumstances.

For Your Own Protection Remember

In sending an order always write your name and address with especial care, giving the name of the post office, county and state. If your freight or express office is different from post office, do not fail

Write all remarks and communications on a sheet of paper separate from the order. Please use the order sheet enclosed in this catalogue or else use a sheet of paper separate from your letter. Sign order as well as letter with name and address.

Remit money by Bank Draft or by Express or Post Office Money Order, or else be sure to register your letter. On all amounts of \$1.00 or over purchase your money order or register your letter at my expense. I take postage stamps the same as cash.

WAREHOUSE USED TO STORE SURPLUS STOCKS OF MAULE'S SEEDS.

Asparagus.

My trade in Asparagus Roots has grown at a tremendous rate for the last five years. I have in mind one customer in New York State who started some years ago with an order for 5,000 roots, two years afterwards he ordered 10,000 more, the next year was followed with an order for 30,000 or 40,000, and I recently had another order from him for almost 50,000 roots. The reason for this extensive planting of asparagus is undoubtedly from the fact that there has been shipped into the New York market every year for the past five or six years almost double the quantity each year that had been shipped the previous year, and notwithstanding this enormous increase in the production, it does not make any difference where the market may be, whether Chicago, New York, Philadelphia or Boston, the price has not depreciated. In other words, the growers secured in the spring of 1909 in almost every case as high prices for their increased crops as they received five years ago. This means only one thing, and that is that the consumption has increased as fast as the production, and if anything the profit per acre is today larger than it was five or six years ago, when a grower who had an asparagus patch of five or ten acres was thought to be a big man in the business, while today a patch of anywhere from 50 to 100 acres is not uncommon. This increase has not only occurred in the East; but on the Pacific Slope, especially in the Sacramento Valley, more and more people are every year becoming interested in growing asparagus, and are making big money by doing so. The thing that deters many people is the fact

that when they plant good strong one-year-old roots it takes two or three years waiting before returns begin to come in; but when they do begin to come in they invariably pay a
big return on the money invested. In (this connection I BARR'S PHILADELPHIA MAMMOTH.
would say that the size and consequent market value of the stalks is influenced more by the
amount of space allotted to each plant than by any other single circumstance, and for this reason I consider wide planting the only sensible and safe course for the market grower. Some of my most successful growers make the rows six feet apart, with three or four feet distance between the plants. Even then the roots completely fill the soil, and interlock between the wide rows. Planting at this distance admits of cultivation both ways. The least distance that should be given in a bed expected to yield fine, large stalks for many years, is five feet by two, requiring

between 4,000 and 5,000 plants to the acre; nothing can be gained by planting closer. One hundred plants thus set in good soil will furnish an abundant supply of "grass" for a large family.

If you desire to raise your own roots, which adds another year or two of waiting, I would say that one ounce of seed in drills should produce in the neighborhood of 400 plants. The seed before sowing should be well soaked in water.

The two varieties I particularly recommend are my Giant Argenteuil and Palmetto. But at the same time, Barr's Philadelphia Mammoth is also a most excellent sort, and very popular in the vicinity of Philadelphia; while to those desiring a white asparagus, Columbian Mammoth

A great many people consider this the most profitable asparagus on the market; one reason is that it seems to be disease proof, and where other varieties have been susceptible to the asparagus disease, Palmetto has continued to yield big paying crops. This variety at the New Jersey Agricultural Experient station proved to be the best out of eight varieties planted; the cash returns one year being over \$300 more per acre than returns from Barr's Mammoth. It is of Southern origin, but suitable for North also. Earlier than Conover's. Pkt., 5 cents; oz., 10 cents; ½ lb., 20 cents; lb., 60 cents. ROOTS. 1-year-old, 100 by mail, \$1.00; 2-year-old, 100 by mail, \$2.00, postpaid. By express or freight, not prepaid, 1-year-old, 75 cents per 100; \$5.00 per 1,000; \$45.00 per 10,000; 2-year-old, \$6.00 per 1,000.

Giant Argenteuil.

The seed which I offer is a selection from imported French stock. My strain is an improvement upon the original. In the South it is regarded as superior to Palmetto, and I recommend it with great confidence to Northern growers. One experienced grower says that Argenteuil is as much larger than Palmetto as Palmetto is larger than Conover's. It has a place of its own in the New York and Boston markets, and sells for \$1.00 to \$2.00 more per dozen bunches than the best of old sorts. The illustration herewith is taken from an average bunch prepared for selling in the market.

Pkt., 5 cts.; oz., 10 cts.; ½ lb., 30 cts.; lb., \$1.00.

ROOTS. 1-year-old, 100 by mail, \$1.00; 2-year-old, 100 by mail, \$2.00, postpaid. By express or freight, not prepaid, 1-year-old, 75 cents per 100; \$5.00 per 1,000; \$4.00 per 10,000.

Barr's Philadelphia Mammoth.

It throws strong, well developed shoots the entire season, and always commands top notch prices in the discriminating Philadelphia market. At three years old Barr's Mammoth has yielded at the rate of \$500 per acre.

Pkt., 5 cts; oz., 10 cts., ½ lb., 20 cts.; lb., 60 cts.

ROOTS. 1-year-old, 100 by mail, \$1.00; 2-year-old, 100 by mail, \$2.00, postpaid. By express or freight, not prepaid, 1-year-old, 75 cents per 100; \$5.00 per 1,000; \$45.00 per 1,000; 2-year-old, \$6.00 per 1,000.

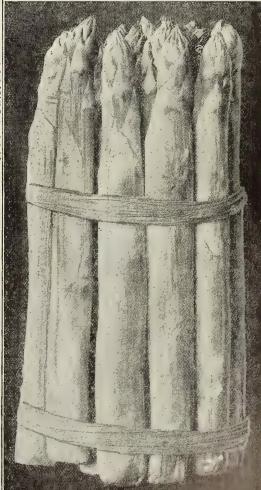

Columbian Mammoth White.

Has white shoots which stay white, but not so white as when introduced some years ago.

Pkt., 5 cts.; oz., 10 cts.; ½ lb., 20 cts.; lb., 60 cts.

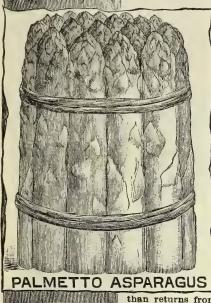

ROOTS. 1-year-old, 100 by mail, \$1.00; 2-year-old, 100 by mail, \$2.00, postpaid. By express or freight, not prepaid, 1-year-old, 75 cents per 100; \$5.00 per 1,000; 2-year-old, \$6.00 per 1,000.

D. M. Jones, Gastonia, N. C.—I was more than pleased with the out-turn of the seed ordered of you last sesson and have a very fine asparagus bed from the two-year-old roots which were shipped me at the same time.

GIANT ARGENTEUIL ASPARAGUS.

BUSH BEANS-Green Pod.

CULTURE.—Beans are rather tender, and should not go into the open ground until danger of frost is over. Of bush beans use 1 quart to 275 feet of drill; 1½ bushels to acre. Of pole beans use 1 quart to 200 hills; 10 to 16 quarts per acre. Cover bush beans 2 inches; pole beans 1 inch. Sow bush beans in drills 2 to 4 feet apart; pole beans in hills 4 feet each way. Good corn land is in condition for growing a crop of beans. Limas delight in soil that is made very rich by liberal manuring.

Earliest Improved Valentine.

My improved strain of this famous old reliable green podded bush bean is ready for the basket in 35 to 38 days. As now perfected it has full, meaty round pods, which possess beauty, tenderness and superior flavor. It is an ideal snap short bean, and one that always sells well in the market. My Earliest Improved is now the most prolific and profitable bean of its kind on the American market, and for years has been one of the most popular beans in my list for both home or market.

Packet, 10 cents; pint, 25 cents; quart, 40 cents, postpaid. By express or freight, not prepaid, qt., 25 cts.; 4 qts., 85 cts.; pk., \$1.50; bu., \$5.50.

Giant Podded Valentine.

The introducer claims it is earlier than any other green podded bean, and that it is more prolific. Pods round. Of excellent flavor and stringless.

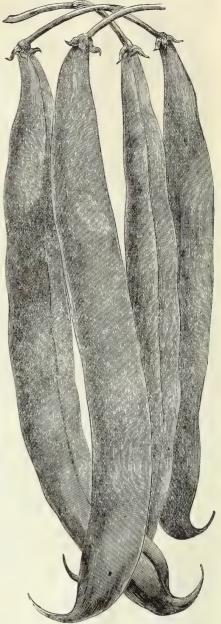

Packet, 10 cents; pint, 25 cents; quart, 45 cents, postpaid. By express or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.00; pk., \$1.75; bushel, \$6.50.

Stringless Green Pod.

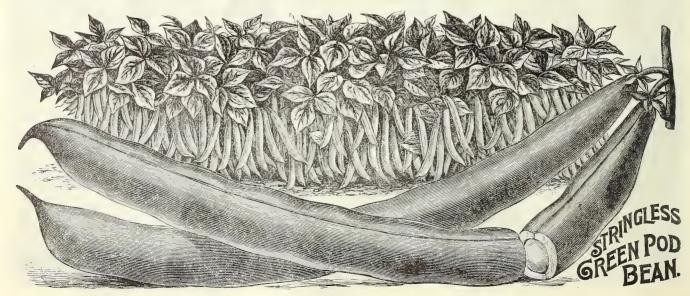

The Stringless Green Pod is now one of the most popular bush beans in America. In point of earliness it ranks among the first, in quality it is excelled by none, and in bearing ability it stands without a rival. It is unquestionably one of the greatest green pod beans to date. As to brittleness of pod, the point suggested by its name, its merit is so high that its enthusiastic friends claim it is the only stringless bean.

The pods are round, fleshy and nearly straight; are borne in abundance through a long season, beginning early. They are $5\frac{1}{2}$ to $6\frac{1}{2}$ inches in length, light green in color, very tender, and of highest and best flavor. They remain long in edible condition, and the plant or bush bears continuously for weeks. This bean is unexcelled for home use, and will be found very profitable for market. It has already taken great hold with market gardeners, on account of its heavy cropping ability.

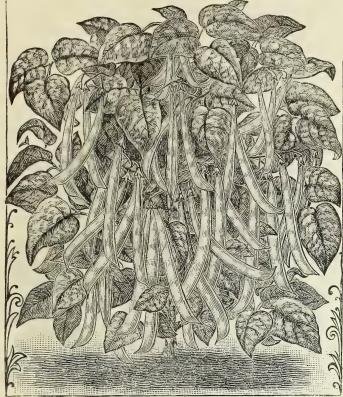

Packet, 10 cents; pint, 30 cents; quart, 50 cents, postpaid. By express or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.10; pk., \$2.00; bushel, \$7.50.

GIANT PODDED VALENTINE BEAN.

Three Good Green Pod Bush Beans. Bountiful.

BOUNTIFUL BEAN.

An extra early green snap bean of fine table qualities. The plant is remarkably handsome and of thrifty growth, and is practically rust proof. It is very hardy, extremely early, very prolific and bears continuously for several weeks. The pods are of large size, broad, flat, extra long, very uniform in shape, solid, meaty, absolutely stringless and of delicious flavor. Desirable both for home use and the market. Packet, 10 cts.; pint, 25 cts.; quart, 45 cts., postpaid. By ex. or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.00; pk., \$1.75; bu., \$6.00.

Black Valentine.

A very hardy and productive green podded bush bean, with strong vigorous bush. In season a little later than my Earliest Improved Valentine, and producing its round pods much longer, straighter and less fleshy, but very handsome, solid, tender and of fine flavor. Very productive, making an attractive appearance on the market. Recommended for both the market or home garden. Packet, 10 cts.; pint, 30 cts.; quart, 50 cts., postpaid. By express or freight, not prepaid, quart, 35 cents; 4 quarts, \$1.10; peck, \$2.00; bushel, \$7.50.

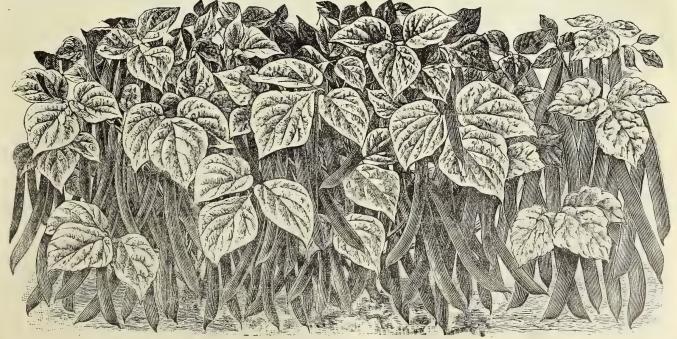

Purchase your money order at my expense.

BLACK VALENTINE BEAN

Full Measure.

This new round podded bush bean bears long, round, green pods, always solid and stringless, is exceedingly prolific. The pods are of an attractive green color, 5 inches long, firm, tender and remain fit for use many days after maturity. The plant is of a handsome, stiffly erect growth with dark green foliage, very prolific and practically blight proof. Good for both home or market gardeners use. Packet, 10 cents; pint, 25 cents; quart, 45 cents, postpaid. By express or freight, not prepaid, quart, 30 cents; 4 quarts, \$1.10; peck, \$2.00; bushel, \$7.00.

FULL MEASURE BEAN.

HODSON GREEN POD BEAN

BEST OF ALL.

This green pod bean is very largely grown in the vicinity of New Orleans, and is also grown with success and profit in more northern latitudes. It has very long, glossy pods, almost twice the length of the old Valentine The pods are fleshy, succulent, and of good flavor. It is medium early and very prolific. Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts., postpaid. By express or freight, not prepaid, qt., 20 cts.; 4 qts.; 75c.; pk., \$1.25; bu., \$4.50.

IMPROVED YELLOW SIX WEEKS.

A favorite variety. The green pods are thick and meaty. The seeds, when fully ripe, are yellow, hence the name. It is stringless until the pod attains full size. Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By ex. or freight, not prepaid, qt., 25 cts.; 4 qts., 85 cts.; pk., \$1.50; bu., \$4.75.

DWARF HORTICULTURAL.

An excellent green podded sort, good as a snap short in the green state, or for use shelled. Pkt., 10 cts.; pt., 25 cts.; qt., 45 cts., postpaid. By express or freight, not prepaid, qt., 30 cts.; 4 qts.; \$1.00; pk., \$1.75; bu., \$6.50.

LONGFELLOW.

This perfectly round, green podded bean is tender and prolific, having no strings whatever except when the pods are very old. It is an ideal snap bean, of great prolificness, maturing very early. Pods are frequently over 6 inches long. Pkt., 10 cts.; pt., 25 cts.; qt., 45 cts., postpaid. By ex. or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.00; pk., \$1.75; bu., \$6.50.

The Hodson Green Pod is a remarkably prolific snap bean and like the Hodson Wax, is an exceptionally strong and robust grower. Many of the plants measure 21/2 feet in height, often producing fifty to sixty long, straight, oval shaped pods to the single plant. It is an enormous yielder, unaffected by rust or blight. The green pods when picked young are entirely stringless. Of good table quality, it is particularly desirable for main or late crop in the home or market garden. The yield from this bean averages 10 to 15 per cent, heavier than any other green pod variety. One grower picked 135 bushels from a planting of 5 quarts. Withstands adverse weather conditions to a remarkable degree. Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By ex. or fgt., not prepaid, qt., 25 cts.; 4 qts., 85 cts.; pk., \$1.50; bu., \$5.00.

EXTRA EARLY REFUGEE.

A green podded bush bean that is very widely known. It is an early form of the famous old Late Refugee or Thousand-to-One, maturing two weeks in advance of that sort. A standard bush bean for home and market. Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts., postpaid. By ex. or fgt., not prepaid, qt., 20 cts.; 4 qts., 75 cts.; pk., \$1.25; bu., \$4.50.

ROUND POD REFUGEE OR 1000 TO 1.

Very popular in many sections; enormous yielder of straight green pods, tender and of excellent table qualities; one of the best for main crop. Pkt., 10c.; pt., 20c.; qt., 35c., postpaid. By ex. or freight, not prepaid, quart, 20 cts.; 4 qts., 75 cts.; pk., \$1.25; bu., \$4.50.

BEST OF ALL BEAN.

H. L. Clark, Doxey, Okla.—I desire to show my appreciation of our dealings with each other, by saying I have been a constant user of your seeds since I received my first order of you, some 10 years ago, as they are far superior to anything I ever obtained from any company. I have always found everything perfectly true to name and almost every seed planted brings forth a strong, hardy plant. Please accept my hearty congratulations, not for honesty alone, but for the great care and skill in selecting out the very best that could be obtained anywhere or by any firm. Please accept a hearty handshake. Best wishes to you.

J. H. Williams, Schenectady, N. Y.—I have been using your seeds, bulbs, etc., for five years; have been in contests with —, —, and other seeds, but yours have always given better satisfaction than any others. The flowers are of superior beauty, and there are more seeds in the packages. Your dahlias and coleus from seed this year were something grand.

Mrs. W.A. T. Murrey, Wills Point, Tex.—I like the change in your catalogue

Mrs. W. A. T. Murrey, Wills Point, Tex.—I like the change in your catalogue very much; it is much more convenient in selecting seeds. Have wondered why you didn't have it so arranged before. Want to say a good word in behalf of your seeds. My father ordered your seeds 15 or 20 years and was always pleased with

them. I have always ordered Maule's Seeds since I have been married (9 years) and am well pleased with them, always find them true to name and they come up and grow well. Ordered seed for my neighbors several years ago, and had I the time could get up a large club order every spring.

Mrs. Z. A. Webb, Dukedom, Tenn.—Accept our thanks for all past orders. I shall always send where I know the seeds are true to name. Last year I divided my order because I thought another firm was so much cheaper, and they certainly were cheap, as I never saw such a mixed lot of seed. I said I would always, from that time on, patronize a man that was reliable, as it is a saving in the long run. The only trouble I have in selecting your seeds is the many good kinds, I cannot decide between them.

Francis M. Salsberry, Calcutta, O.—The seeds we had from you in 1908 proved all O. K. We had the finest garden in this section of the country, and other gardeners complained of everything burning and drying up; but we never had a better garden. We made from just our vegetables over \$1500.00, and everyone that saw them said we had the finest crop they ever saw. I told them we got the seeds from Wm. Henry Maule.

LONGFELLOW BEAN

BURLINGAME MEDIUM FIELD BEAN.

Ealiest, hardiest, most productive and most profitable field bean in America; the favorite of the leading bean farmers in Central New York. It averages 40 bushels per acre. It ripens early, and in a wet season remains sound and healthy where other varieties rust and spot. The ripened seed is pearly white, and is much handsomer than other sorts, conse-

nancomer chan other sorts, consequently, commands top prices.

Pkt., 10 cts.; pint, 20 cts.; quart, 35 cts., postpaid. By express or freight, not prepaid, quart, 20 cts.; 4 qts., 75 cts.; pk., \$1.25; bu., \$4.50.

C. G. DuMond, Walton, N. Y.—We sowed seeds from two or three different houses the past season alongside of yours, and yours were far superior; in fact our vegetables were fine, better than we could have expected, as the season was exceedingly dry. To show you how good the vegetables were we raised from your seeds, my father and I took in premiums from the Delaware Valley Agricultural Fair \$150.75 in cash from vegetables grown from your seeds. from your seeds.

J. M. Johnson, Winnsboro Texas.—Your Immensity Lettuce is the finest I ever grew.

Wax or Yellow Pods.

MAULE'S WINGOLD WAX BUSH BEAN.

Might be called Maule's Improved Butter Wax.

MAULE'S WINGOLD WAX BEAN.

First offered in 1906 as "Nameless Wax." When the originator of this bean offered it to me, I hesitated some time before listing it, as I thought there were already enough wax beans on the market; but his earnestness and my trials of the bean, so impressed me with its merits that I finally decided to offer it. That it is a great acquisition there is now no question. It is absolutely stringless, with beautiful, round,

yellow pods that will sell at sight « on any market stall. It is free from spots or disease of any kind, and from several years' experiments matures much earlier than I expected. With one accord, all my friends who tried it seem to think it the coming wax sort, especially in view of the fact that it is so absolutely rust proof, so remarkably hardy, and so wonderfully productive.

Packet, 15 cents; pint, 40 cents; quart, 75 cents, postpaid. By express or freight, not prepaid, quart, 60 cents; 4 quarts, \$2.00.

New Hodson Wax Bush Bean.

A new and entirely distinct type of wax bean. Produces a healthy growth of foliage, resists rust and blight, and is remarkably prolific, with long, straight, handsome, light yellow oval-shaped pods, somewhat resembling Wardwell's Kidney Wax. The pods are brittle and tender, and of fine texture; if picked when young are entirely stringless. Its good qualities and remarkable productiveness make it one of the best late or main crop wax beans for home garden or market.

Packet, 10 cents; pint, 25 cents; quart, 45 cents, postpaid. By express or freight, not prepaid, quart, 30 cents; 4 quarts, \$1.10; peck, \$2.00; bushel, \$7.00.

Pencil Pod Black Wax Bush Bean.

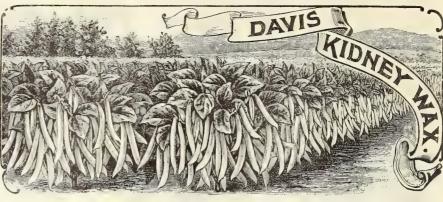

This new bush bean is most enthusiastically praised by all who have grown it. Its beautiful yellow, straight pods are from 5 to 7 inches long, well rounded, meaty and deeply saddle-backed. They are always solid, brittle and entirely stringless. The plants grow about 15 inches high with an abundance of large, heavy foliage, under which will be found an enormous crop of magnificent straight, golden yellow pods. I list it with every confidence that it will please my customers.

Packet, 10 cents; pint, 30 cents; qt., 50 cts., postpaid. By express or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.50. BLACK WAX BEAN.

PENCIL POD

DAVIS KIDNEY WAX.

A wax podded variety, with kidney shaped white seeds. The high claims which I made for it in 1895, when introducing it to the public, have been abundantly verified. It is handsome, prolific and profitable, and not excelled by any of the wax sorts. It is of strong growth, and holds its long, straight pods well above the ground. The pods are of a clear, waxy white color, and are more conspicuous than the foliage itself when the bush is in full bearing. Pods plump, full and entirely rust proof, or as nearly so as any bean may be. It is of extremely high table quality, and is adapted to thome use or market, and is not excelled for canning. Packet, 10 cents; pint, 25 cents; quart, 45 cents, postpald. By express or freight, not prepaid, quart, 30 cents; 4 quarts, \$1.00; peck, \$1.75, bushel, \$6.50.

WARDWELL'S KIDNEY WAX BEAN

Wardwell's Kidney Wax.

The Market Gardener's Favorite.

Many progressive gardeners will have no other than Wardwell's Kidney Wax Bean. In the South especially an enormous acreage is annually planted, with great profit to the growers. It is one of the best, earliest and most hardy of the wax sorts. The medium sized plant becomes loaded with long, broad and flat, beautiful waxy colored pods, which are stringless and of a rich, luscious flavor, and are exceedingly brittle; the dried beans are of a distinct kidney shape. I cannot recommend it too highly to market gardeners, as although several other varieties have tried to supplant it, Wardwell's still holds its own in many sections of the country. A great favorite for shipping, the home market and famly garden.

Packet, 10 cts.; pint, 25 cts.; quart, 45 cts., postpaid. By express or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.00; pk., \$1.75; bu., \$6.50.

New Stringless White Wax.

A very hardy and productive yellow pod bush bean. The pods are straight and flat of a bright lemon yellow color, medium size, brittle, meaty and entirely stringless. The plant is of sturdy, upright growth heavily adden with handsome wax pods and continues in bearing for a long period. Can be used for both a snap or shell bean as the beans are large and white, making it desirable for canners, home or market gardeners. Packet, 10 cts.; pint, 25 cts.; quart, 45 cts., postpaid. By express or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.00.

Prolific Black Wax.

An improved strain of the old Black Wax; a atronger grower, with longer, straighter and rounder pods, and twice as prolific. Its handsome, yellow, fleshy, stringless pods commend it for both home and market purposes. Packet, 10 cents; plnt, 25 cents; quart, 45 cents, postpaid. By express or freight, not prepaid, quart, 30 cents; 4 quarts, \$1.00; peck, \$1.75; bushel, \$6.50.

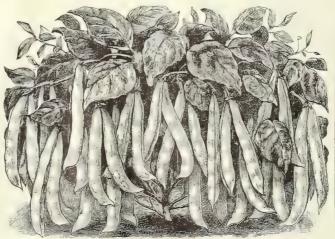

Jones Stringless Wax.

Is certainly one of the most desirable wax beans introduced for many years, and I cheerfully recommend It to all my customers as a sort sure to please, and give entire satisfaction at all times and under all conditions. It is a yellow podded bush bean with white seed. The pods are round and plump, and attain a length of 5 to 7 inches. They are thick and fleshy, and as handsome in the basket as could be desired. The pod is perfectly stringless. Beans are of prime table quality, either green or dry. Packet, 10 cts.; pint, 30 cts.; quart, 50 cts., postpaid. By express or freight, not prepaid, quart, 35 cts.; 4 qts., \$1.25; peck, \$2.25; bushel, \$8.50.

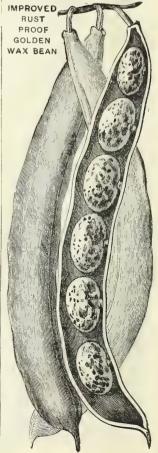

Improved Rust Proof Golden Wax.

This is a decided improvement on the old Golden Wax. In fact, I no longer catalogue Golden Wax, on account of its great liability to rust or spot; but this strain is almost wholly free from such defect. Improved Rust Proof Golden Wax has far more vigor than its parent, and hence its name. The pods are flat and succulent, and are borne in great profusion, and I commend it to the public as a superior wax bush bean. The average size, shape and appearance of both pod and seed are shown in the illustration. Cooking quickly as snaps, shelling well when green, and of the highest quality in either way.

Packet, 10 cents; pint, 25 cents.; quart, 45 cents, postpaid. By express or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.00; pk., \$1.75; bu., \$6.50.

JONES STRINGLESS WAX BEAN.

Pods of

The

Silver

Bean.

Imperial Wax or Golden Crown.

This remarkable new bush bean has long golden pods. The pods are round, plump and perfectly stringless. The seeds are white, and their color makes them sell quickly in the ripe or dry state. Its enormous yield, fine table quality and freedom from string place it in the front rank, and make it of peculiar value to the private grow-er, the market gardener and the canner. The vine is of the bush type, with strong and vigorous growth, with the load of pods carried well above the soil. In addition to this, spikelets are thrown out above the foliage, which in turn produce pods, thus adding materially to the total yield of the plant. Imperial is very early, free from rust and blight, and produces marketable pods very quickly. It ripens so early that it can be harvested before the late August rains. Pkt., 10 cts.; pt., 30 cts.; qt., 50 cts., postpaid. By express or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.25; pk., \$2.25.; bu., \$8.50.

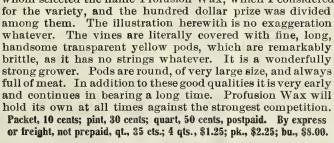

IMPERIAL WAX OR GOLDEN CROWN BEAN.

Maule's Profusion Wax.

A Winner Every Time on the Table, on the Market Stall and in the Cash Returns it Makes the Grower. You Certainly Need it in Your 1910 Garden.

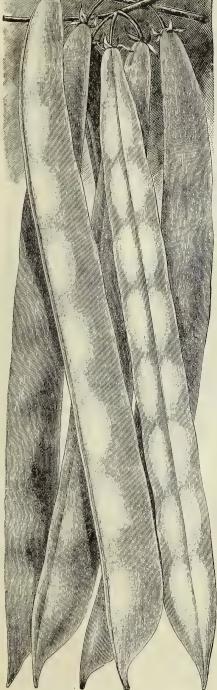

First offered in 1903. 30,000 packets were distributed free for trial among my customers, who, without a single exception, were delighted, not only with its wonderful productiveness, but also with its fine flavor and handsome appearance. I offered in my 1903 catalogue \$100 in cash prizes for a suitable name for Profusion Wax Bean. More than 10,000 names were suggested by my customers, six of whom selected the name Profusion Wax, which I considered the most appropriate

The Silver Bean.

The pods are of a beautiful silvery color, and are borne in great profusion. They are sweet and tender. I predict that this bean will become popular, as it shows vigor of vine as well as good quality, and the pods thus far show no disposition to spot. Pkt., 10cts.; pt., 25 cts.; qt., 45 cts., postpaid. By express or freight, not prepaid, quart, 30 cts; 4 quarts, \$1.10; peck, \$2.00.

MAULE'S PROFUSION WAX BEAN.

DX 0 4 3 7 3 1

Pole Beans.

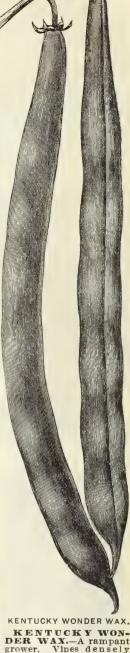

MAULE'S NOXALL.—This green pod bean for a period of 60 years had been grown in one family to the exclusion of all others. Some 20 or 22 years ago one of my growers married into this family, and in addition to securing a wife also secured a few of these beans. Noxall is a very sure cropper, even in bad seasons, giving large crops when other sorts have been an entire failure. Pods are long, round and tender; excellent for planting among corn, exceptionally good for either snap or shelled beans. Packet, 10 cts.; pint, 30 cts.; quart, 50 cts., postpaid. By express or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.25; peck, \$2.25.

SCARLET RUNNER.—An old favorite; used both as string and shelled beans. Vines strong, rapid growers; often used for ornamenting porches and trellises. Flowers brilliant scarlet. Blooms from early summer until late in fall. Pkt., 10c.; pt., 30c.; qt., 50c., postpaid. By ex. or fgt., not prepaid, qt., 35.; pk., \$2.25.

GOLDEN CLUSTER. — Produces beautiful yellow pods 6 to 8 inches long, in clusters of four to six. Tender and stringless. Commences to bear ten days later than the earliest dwarf wax beans and yields until frost. Pkt., 10 cts.; pt., 30 cts.; qt., 55 cts., postpaid. By ex. or fgt., not prepaid, qt., 40 cts.; 4 qts., \$1.40; pk., \$2.50.

SHOLE PICKING SHOLE POL

KENTUCKY WONDER WAX.

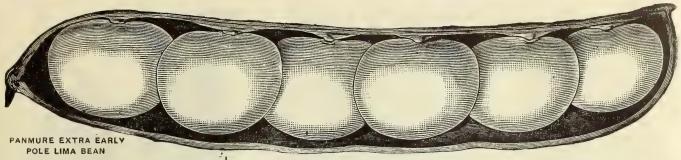

KENTUCKY WONDER WAX.—A rampant
grower. Vines densely
laden with a solid mass of
long, very thick, meaty,
deeply saddle-backed, yellow pods, entirely stringless. Pkt., 10c.; pt., 30c.;
qt., 55c., postpaid. By
ex. or fgt., not prepaid,
qt., 40 cts.; 4 qts., \$1.40;
pk., \$2.50; bushel, \$9.00.

WHITE CREASEBACK.—The pods are of
a light green color, about
six inches long, stringless,
perfectly round, with a
crease in the back. Early
and of most excellent quality. Pkt., 10c.; pt., 25c.;
qt., 45c., postpaid. By
ex. or fgt., not prepaid,
qt., 30 cts.; 4 qts., \$1.10;
peck, \$2.00; bu., \$7.50.

GOLDEN CARMINE.—
The nods are stringless,

GOLDEN CARMINE .-GOLDEN CARMINE.—
The pods are stringless, mottled and streaked with bright carmine color on the bright yellow. Packet, 10 cts.; pint, 30 cts.; qt., 50 cts., postpaid. By ex. or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.50.

2 GRAND LIMAS SALEMED MA. IMPROVILIMA LARGE KING GARDEN

Panmure Extra Early Pole Lima.

This pole lima bean is from California, which State has, of recent years, become known as the greatest lima bean district in the world. It represents the careful selection for many years of one of the best growers of lima beans I know of. By selecting the earliest pods year after year he has secured a bean that is positively two weeks earlier than any other. Beans are as large as the ordinary large lima, pods containing five and six beans. It comes in bearing early in July and bears right up to frost. It is so good that I have decided to put the name of my New Jersey trial grounds to it. At Panmure, tested alongside of thirty other varieties, it proved one to two weeks earlier than the earliest of them. Packet, 15 cts.; pt., 40 cts; qt., 75 cts., postpaid. By express or freight, not prepaid, qt., 60 cts.; 4 qts., \$2.00; peck, \$3.50.

Maule's Evergreen Pole Lima.

For a number of years a market gardener near Philadelphia has been experimenting with lima beans, with the idea of breeding a bean that would retain the green color of the bean when dry. I have watched his experiment for several years with a great deal of interest, and at last at a big price secured some of the seed, and grew the product of same at Panmure. I must say it is a strong, robust, vigorous grower, very productive, and the dry bean retains the green color longer than any other variety I know of. Hence its name, Evergreen. Every market gardener knows what a desirable characteristic this is in a bean, and when we add to it unusual productiveness and superb quality, we have a lima bean that is as near perfection as possible. Packet, 10 cents; pint, 40 cents; quart, 75 cents, postpaid. By express or freight, not prepaid, quart, 60 cents; 4 quarts, \$2.00; peck, \$3.50.

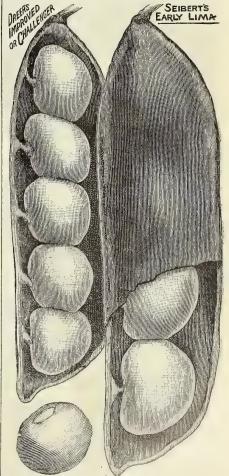

KING OF THE GARDEN LIMA.—This is the grand old standard market and family sort. It is no longer a new bean, but one of the best for main crop. It is vigorous in growth and immensely productive. The vine begins to produce pods near the foot of the pole, and the bearing season continues without interruption until frost. The pods are large, numerous and well filled, and the beans are of mammoth size. The handsome pods often attain a length of five, six, seven or even eight inches, with five or six full and perfectly formed beans in each pod. Pht., 10 cts.; pt., 25 cts.; qt., 45 cts., postpaid. By ex. or freight, not prepaid, qt, 30 cts.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.50.

SEIBERT'S EARLY LIMA.—After Panmure Extra Early the earliest of the pole limas and one of the best for practical farmers and truckers who wish to be first in the market. It is the result of careful selection and high breeding, with three ends in view, namely: Earliness, a green bean and a thin pod. It is of large size and excellent quality; a tender and succulent bean for either home or market. Packet, 10 cts.; pt., 25 cts.; qt., 45 cts., postpaid. By express or freight, not prepaid, quart, 30 cts.; 4 qts., \$1.10; peck, \$2.00; bu., \$7.50.

SALEM IMPROVED LARGE LIMA.—
This is a selected strain of the large pole lima, but so distinctly superior to the lima beans with which most of my customers are familiar. It is one of the most prolific lima beans on the market, as well as one of the best in table quality. The pods are borne in clusters, often with five or six large beans in a pod. It ripens shortly after Selbert's Early, and bears until frost. Pkt., 10c.; pt., 25c.; qt., 45c., postpaid. By ex. or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.00.

Challenger Lima, Thorburn's Lima, Potato Lima, etc. This is a bean of rather peculiar shape, being thick and plump rather than flat and oval. It is a very "meaty" bean, of excellent flavor and high table quality. The beans are delicious. When green they nearly equal the ordinary large lima bean in size, but are thicker, sweeter and more tender. They remain green the pod a long time after maturing. The pods, which are borne in clusters, average four or five inches in length, and each pod contains four or five thick beans, squared at the ends by pressure. The beans are easily shelled. Pkt., 10 cts.; pt., 30 cts.; qt., 50 cts., postpaid. By ex. or freight, not prepaid, qt., 35 cts.; 4 qts., §1.10; peck, \$2.00; bushel, \$7.50.

CAROLINA, OR SIEVA. — (The Butter Bean of the South.) This pole lima grows quickly, matures early and is immensely productive and bears continuously throughout the season. Pkt, 10 cts.; pt, 25 cts.; qt., 45 cts., postpaid. By ex. or freight, not prepaid, qt., 30c.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.50.

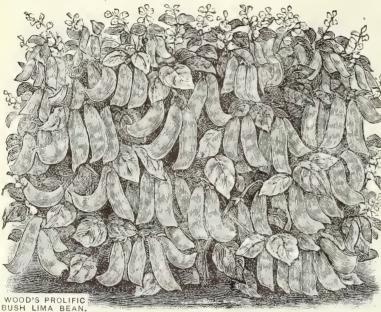

Fordhook Bush Lima.

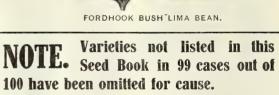

The only stiffly erect bush form of the popular "Potato" Lima. Both pods and beans are twice the size of Dreer's Bush Lima and more than half again as large as the Challenger Pole Lima.

Fordhook Bush Lima is altogether unique. Nothing like it has ever been seen before. Of strong, erect, true bush-like growth (never prostrate or running), the bushes average 20 to 30 inches in height by 20 to 24 inches across the top. The foliage is of heavy texture and very dark green in color. The stalks that produce the blossoms are thrown out from the lateral and main stalks; the pods are borne in "clusters" of from four to eight. The pods resemble those of the Dreer's Bush Lima, but average more than double the size, measuring from 4 to $5\frac{1}{2}$ inches long, about $1\frac{1}{4}$ inches wide, by as much as three-fourths of an inch thick. The pods contain three to five large beans with an average of four.

Fordhook Bush Lima is fully 333 per cent. heavier cropper, and, therefore, is bound to entirely displace the Kumerle (Dreer's or Thorburn's) Bush Lima. In season it is from four to six days earlier.

Packet, 10 cents; pint, 35 cents; quart, 60 cents, postpaid. By express or freight, not prepaid, quart, 45 cents; 4 quarts, \$1.50; peck, \$2.75; bushel, \$10.00.

This is a handsome, early and very prolific type of the original bush lima bean. The claim is made that it is the most valuable improvement introduced since the first bush lima made its appearance. Of fine table quality.

Packet, 10 cents; pint, 30 cents; quart, 50 cents, postpaid. By express or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.25; peck, \$2.25; bu., \$8.00.

Burpee's Bush Lima.

A dwarf or bush form of the large climbing lima. The pods and seeds are of full lima size. The strain which I control is of uniformly dwarf or bushy habit. The plant grows 18 or 20 inches high, and has an erect branching stem. The common yield is from 50 to 200 marketable pods per plant. The size and luscious flavor of the bean are exactly the same as with the climbing lima types. Sow in rows 3 feet apart and thin to 20 inches.

Packet, 10 cents; pint, 30 cents; quart, 50 cents, postpaid. By express or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.25; peck, \$2.25; bu., \$8.00.

Henderson's Bush Lima.

The earliest of the bush limas; two weeks earlier than any of the climbing limas. It is small in size, but of high table merit, and in favor with housekeepers on account of its delicious flavor and great productiveness. It bears until frost, and a small patch will supply a family. Its bearing ability was demonstrated some years ago. A prize plant carried 323 well developed pods.

Packet 10 cents alor 30 constraints and some statement of the productive statement of the produ

Packet, 10 cents; pint, 30 cents; quart, 50 cents, postpaid. By express or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.25; peck, \$2.25; bu., \$8.00.

Dreer's Bush Lima.

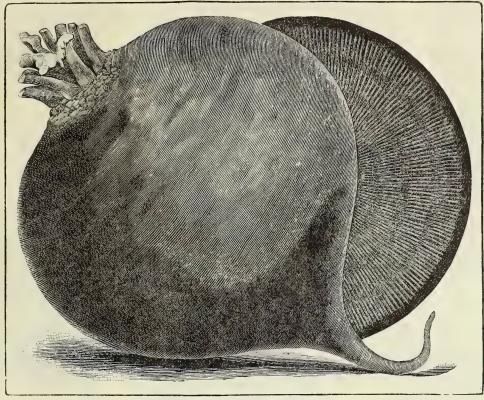

This is a dwarf form of the Dreer or Challenger pole lima, intermediate in size between Burpee and Henderson. It is a thick meaty bean, of extra good flavor and high food value. The plant grows 12 to 18 inches high, and the bush form of growth is well established. It is very productive, the pods being short and thick. Packet, 10 cts.; plnt, 30 cts.; qt., 50 cts., postpaid. By express or freight, not prepaid, qt., 35 cts.; 4 qts., \$1.25; peck, \$2.25; bushel, \$8.00.

BURPEE'S BUSH LIMA BEAN.

under glass, in February or March, and transplant to open ground in March or April. Seed for main crop may be sown as soon as ground can be gotten in proper condition. For table beets sow in drills 18 to these apart, and thin to stand 3 to 4 inches apart in the rows. Use 1 ounce to 100 feet of drill, and cover lightly; 5 to 6 lbs. per acre. The

CULTURE.—For earliest use and market sow seed of any round sort inder glass, in February or March, and transplant to open ground in darch or April. Seed for main crop may be sown as soon as ground and turnip shaped beets are best for spring and summer; the half long kinds for winter. Make successional plantings. For sugar beets and mangels make the rows 2½ to 3 feet apart, and sow 6 to 8 pounds an be gotten in proper condition. For table beets sow in drills 18 Beet tops are much used for greens, and frequently form a profitable

MAULE'S BLOOD TURNIP BEET.

Maule's Blood Turnip Beet.

(The Best of Them All.)

Beets may come and beets may go, but this old standby still retains its position at the head of my list, and for years the square inches of catalogue space occupied by illustrations and descriptions of this variety have been by all odds one of the most profitable in my whole Seed Book. Last year I sold 14,333 separate 10-cent packets of this beet. To 4,804 other customers I sold an ounce package. I doubt if so many packets and ounces of any beet introduced last year by other seedsmen were sold at retail to so many different customers. I first gave prominent notice to Maule's Blood Turnip Beet in my catalogue for 1889; the sales then were large, but today, 20 years later, they are three times greater than ever. A consistent steady demand from the same people year after year for from 10 to 25 pounds of this variety should be sufficient inducement for every gardener to know that in planting Maule's Blood Turnip, they are planting as good a turnip beet as can be found the world over, and a variety that owing to its small top makes it especially desirable for bunching. Maule's Blood Turnip Beet is very early, nearly as early as Egyptian, and greatly surpasses that variety in flavor. The color is a rich dark red, and shape is globular. It is free from side or fibrous roots, being always smooth. It is excellent for forcing for a main spring or summer crop, or for use in winter, as it is a good keeper. It always cuts and cooks a rich, dark blood red; is tender, sweet and crisp, and is in every way the standard sort for the market or home gardener. Has made a good crop seven weeks from sowing. In fact, Maule's Blood Turnip Beet has long been regarded as the standard of excellence by more than 30,000 successful gardeners who plant it every year and year after year.

Packet, 10 cents; ounce, 15 cents; quarter pound, 40 cents; pound, \$1.50; 10 pounds, \$12.50, postpaid.

Maule's Alpha Beet.

Maule's Alpha Beet is ready for market in 40 to 45 days from date of sowing. It is what I call a finely made-up beet, as shown in the illustration. It is turnip shaped, with a dispodice planting, though this beet, in common with all others, shown in the illustration. It is turnip shaped, with a disposition to deepen to the half-long type; though by no means a half-long beet. It is deeper than Crosby's Egyptian, with more body and more value. The shape of the beet indicates

matures most quickly when given plenty of room, say 4 or 5 inches in the row. It has a rich, sweet flavor when cooked, and is tender and free from fibre or toughness. It is, in fact, strong individual traits. The flesh is of a dark crimson color, by all odds, one of the best extra early table or market beet's

within my knowledge.

Maule's Alpha Beet is worthy of universal trial by gardeners. It is good for the table and good for market, and will at once win public favor by reason of its earliness and its excellence.

Packet, 10 cents; ounce, 20 cents; 1 pound, 50 cents; pound, \$1.75.

LUCULLUS. NEW SWISS CHARD OR SILVER BEET.

This grand new and distinct variety is a great acquisition. The stalks are as thick and broad as rhubarb. The plants grow to a height of from 2 to 21/2 feet, and the stalks are from 10 to 12 inches long below the leaf and 11/2 inches broad. These stalks are delicious when cooked and should be served in the same manner as asparagus. The

leaf portion is heavily crumpled or savoyed and is very crisp and tender. The leafy por-tion of the foliage is cooked and served in the same manner as spinach. The leaves and stalks, being served as separate vegetables, afford two distinct dishes from the same plant at one time.

Also see page 22.

LUCULLUS SWISS CHARD.

Maule's Market King Beet.

While traveling in the County of Essex, England, I stumbled on Market King by chance, and was immediately impressed with it. So much so that after considerable trouble I succeeded in procuring a few cwt. of the seed. Planted in my trial grounds at Briar Crest, as well as at Panmure Seed Gardens, my experience with it is such as to warrant me in saying it is worthy of a place in every American garden.

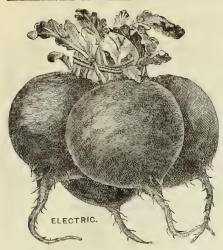

MAULE'S ALPHA BEET.

Market King is a quick grower and soon reaches maturity; but though an early beet it is an excellent keeper. The solidity, fineness and firmness of its bright red flesh make it one of the best keeping varieties.

On the points of flavor and table quality I would lay especial emphasis, for it is an ideal beet for household use. It can be used at all stages of growth, and it is almost needless to say that a sweet and succulent beet like this is sure to become a market favorite.

The shape and solidity of Market King favor extra heavy cropping, and I introduce it to my customers in the full expectation that it will be both profitable and popular. Except for my knowledge of its high table quality and great cropping ability, I would not give it so much prominence. Pkt., 10 cts.; oz., 15 cts.; ½ lb., 30 cts.; lb., \$1.00.

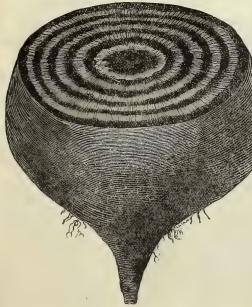

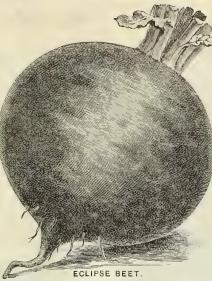

ELECTRIC. — Rich, red flesh, exceedingly tender and remarkably early. In shape almost round. The leaves are small and set close to the crown. The tap root is small, starting without a taper. It shows a maximum of edible portion with a minimum of oliage and tap root. Color very dark crimson, with rings of lighter hue. It is early, coming in with Egyptian. The flesh is delicate, rich, sugary and free from fibre. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 30 cts.; ib., 90 cts.

BASTIAN'S EARLY RED.—Early, large, fine turnip form and bright red color, zoned with lighter rings. Profitable for market or home garden. An old favorite. Pkt., 5 ets.; oz., 10 cts.; ½ lb., 25 cts.; lb., 75 cts.

CROSBY'S EGYPTIAN BEET.

ECLIPSE SEET.

ECLIPSE.—This is one of the best known of the table beets, and I have a strain of extra purity and merit, particularly noted for earliess. It is indeed high praise to say that my Eclipse beet is almost or quite as early as Egyptian, for the latter has been long accepted as the earliest of all; and Eclipse has ever been recognized as superior to Egyptian in table value. My strain has small top and is smooth, fine grained and tender, with bright red color. Many market gardeners have discarded Egyptian entirely in favor of this strain of Eclipse. Pkt., 5c.; 0z., 10c.; 1/4 lb., 25c.; lb., 75c.

EARLY BASSANO BEET

EARLY BASSANO.—A very early flat variety of beet, of high table excellence. It has white and rose colored flesh arranged in alternate rings. It is tender, julcy and sweet. The leaves are sometimes used for greens. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 25 cts.; lb., 75 cts.

PHILADELPHIA EARLY
TURNIP.—Very early, maturing but little later than Eclipse. Very rich and sugary, and highly esteemed by all who have ever sown it. Flesh is in alternate rings of light and dark pink, but boils red. It is a smooth variety, profitable for market.

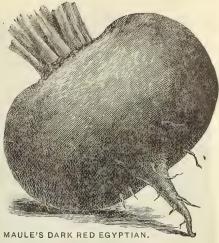

Pkt., 5 cts.; ounce, 10 cts.; ½, pound, 30 cts.; lb., \$1.00.

CROSBY'S EGYPTIAN.—A distinct improvement on the older forms of Egyptian beet. with a larger and more globular root. It is extremely early, and is smoother and of better color and quality than the original sort. In favor with market gardeners for earliest sales. I have the true strain. Packet, 5 cents; ounce, 10 cents; ½ pound, 30 cents; pound 90 cents.

EDMAND'S TURNIP.—High bred, early, good shape and small top. A standard sort of well established merit, long and favorably known all through the eastern part of the United States. Well adapted to forcing, to the home garden and to market. Handsome, round shape and deep blood color. Packet, 5 cts.; ounce, 10 cts.; ¼ pound, 25 cts.; pound, 75 cts.

Mrs. Allina C. Richard, Rockport, Ind.—I will say that your seeds are all that is claimed for them. The Blood

Mrs. Allina C. Richard, Rockport, Ind.—I will say that your seeds are all that is claimed for them. The Blood Turnip Beet excels anything of the kind that I ever planted.

MAULE'S DARK RED EGYPTIAN.—
The Egyptian beet is one of the most popular varieties among market gardeners for forcing purposes. Justly or unjustly it is considered to be the earliest of all. It certainly will bear close planting in the valuable space under glass or in a warm garden in early spring. It is turnip shaped, and when young is crisp and tender. In color it is dark red. To gardeners having a preference for Egyptian, I offer the best strain of seed now on the market. Packet, 5 cts.; onnce, 10 cts.; ¼ pound, 25 cts.; lb., 75 cts.

PHILADELPHIA EARLY TURNIP BEET.

EDMAND'S TURNIP BEET.

MAULE'S MARKET GARDENERS'. (The Great All Season's Beet.)

MAULE'S MARKET GARDENERS'. (The Great All Season's Beet.)

HALF-LONG BLOOD.—An excellent main crop beet; a great favorite as a field sort. It combines good table quality with highest stock feeding value. It is a large cropper and reliable winter keeper. The root is more tapering than the turnip shaped beets, and reaches deeper into the soil. The fiesh is dark red, tender and sweet; foliage rich and dark. This standard beet is an old favorite with market men and stock owners.

Pkt., 5 cts.; oz., 10 cts.; ½ lb., 25c.; lb., 75c.

DETROIT DARK RED.—A splendid beet of a deep red color, for home or market. By far the best for canning, on account of its beauty. Small, upright tops and perfectly smooth roots. Flesh zoned with lighter and darker bands; tender and sweet. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 30 cts.; lb., \$1.00.

DETROIT DARK RED BEET.

In offer this season a particularly choice strain of Swiss Chard or Silver Beet. It seems the American people are just becoming acquainted with the desirability of having a little Swiss Chard or Silver Beet, or, as it is sometimes called, Sea Kale Beet, in their garden. This beet is grown for its leaves only. The middle of the leaf or midrib is cooked and served like asparagus. The other portions of the leaf may be used like spinach. The seed should be sown in spring, in drills, a foot apart. This beet does not make a large root, but is a delicious summer vegetable when cut young and used for "greens." Packet, 5 cents; ounce, 10 cents; 4 pound, 25 cents; pound, 75 cents.

Maule's Market Gardeners'.

Always Good. Never Past Its Prime.

This grand beet is one of the best on my list for general cultivation by market gardeners and farmers. Makes a very rapid growth from the start, often larger than Egyptian, age for age. It continues to grow for a long period, making a heavy root for autumn or winter use. Only one sowing is necessary to produce early beets for market and a main crop for winter use. The quality is first-rate at all periods of growth, whether the beet weighs a quarter of a pound or six pounds. It is a good keeper and may be used all winter. When cooked, it is of a beautiful, dark red color throughout, and of unsurpassed table quality. The illustration shows the exact shape of the Market Gardeners' beet. It is symmetrical in form and of decidedly handsome appearance. There are but few fibrous roots and the top is small. It should appeal strongly to business gardeners and to everybody wanting an all seasons table beet.

Packet, 10 cents; ounce, 15 cents; 1/2 pound, 40 cents; pound, \$1.50.

CARDINAL.—I picked up this excellent variety in England, in 1895. It has proven a worthy introduction. Ready for market six weeks from sowing. The shape is well shown in the illustration, from a photograph. The flesh is dark crimson, changing into rings of a lighter color, very tender and of delicate flavor. When cooked it is of a beautiful, solid crimson, and of rich, sugary flavor, entirely free from fibre. Packet, 10 cts.; ounce, 15 cts.; ¼ pound, 30 cts.; pound, \$1.00.

MAULE'S IMPROVED LONG RED.—Next to Market King this is the best long red beet on the market, being of unexcelled quality for table and live stock. It has yielded twelve tons to the acre. In color it is rich carmine, and in quality it is sweet and tender. In rich ground it may be sown with advantage in July or August, as a second crop. It will not be injured by the October frosts and will produce a great abundance of first-class root food for winter. No other beet can take its place. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 25 cts.; lb., 75 cts.

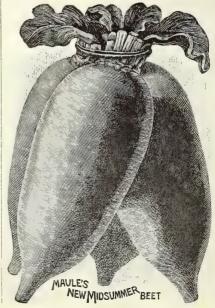

The roots are deep red in color, and always symmetrical and smooth. The flesh is of a rich, dark red color. In quality it is sweet, crisp and tender, and it is an enormous cropper. It is a heavy beet without being hard to pull. It never becomes woody, and is always good for table use or stock food, whether pulled young or old. Packet, 5 cents; ounce, 10 cents; ½ lb., 30 cents; lb., 90 cents. The roots are deep red

Mrs. J. T. Borland, Exeter, Neb.—I think the new order of listing is an improvement. What else can one expect of Maule's improving all the

Jasper M. Shaver, Albany, Mo.—I like the catalogue much better this year than last. Took too much time the way it was arranged before, and, you know, time is money nowadays.

Sugar Beets and Mangel Wurzels.

IMPERIAL SUGAR KLEIN WANZLEBEN

GIANT HALF SUGAR MANGEL.—
This new mangel is white, with a rose top; flesh white. It is one of the most profitable for stock feeding on account of wonderful cropping quality and for the superior amount of its sugar. In a comparative trial with Lane's Imperial Sugar Beet the acre yields were 30 tons and 70 tons, in favor of Giant Half Sugar. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 20 cts.; pound, 45 cts.; 5 pounds, \$2.00.

MAULE'S CHAMPION YELLOW GLOBE.—Yellow flesh, fine globe shape. A splendid keeper. Pkt., 5c.; oz., 10c.; ½ lb., 15c.; lb., 40c.; 5 lbs., \$1.75.

IMPERIAL SUGAR BEET.—Best beet for stock feeding purposes. Of easy and cheap production, with rich sugary quality. The crop has reached 30 tons per acre, and single specimens have weighed 35½ pounds. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 20 cts.; lb., 45 cts.; 5 lbs., \$2.00.

K LE IN WANZLEBEN SUGAR BEET.—Best beet for sugar making, and largely planted for that purpose. Eighteen tons of sugar have been made from 100 tons of these beets. Highly recommended as a winter food for milch cows. Pkt., 5c.; oz., 10c.; ¼ lb., 20c.; lb., 45c.; 5 lbs., \$2.00.

Mangel Wurzels.

Mangel Wurzels.

JUMBO MANGEL.—This grand Mangel is the finest of its class; the very best long red mangel wurzel beet in cultivation. It has produced over sixty tons to the acre. Not coarse grained, even when attaining the great weight of fifty pounds, and a most excellent winter feed for cattle and sheep. My cash premium, a few years ago, of \$50 for the heaviest Jumbo Mangel produced a specimen weighing 91 pounds. Heaviest Jumbo Mangel produced a specimen weighing 91 pounds. Heaviest cropper of all. Pkt., 5c.; oz., 10c.; ½ lb., 20c.; lb., 45c.; 5 lbs., \$2.00.

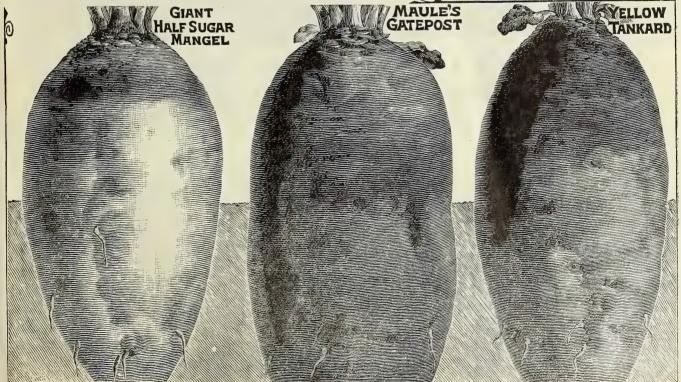

MAULE'S GATEPOST.—One of the finest of Yellow Mangels. My \$50.00 offer for the best specimen produced a record of 39 pounds. Crop has reached 2,500 bushels per acre. Unequaled for dairy, being nutritive and unexcelled for feeding to milch cows. Flesh rich deep yellow at all times. Pkt., 5c.; oz., 10c.; ½ lb., 20c.; lb., 45c.; 5 lbs., \$2.00.

YELLOW TANKARD.—In high esteem for dairy use. Flesh solid yellow; no white rings. Early and a heavy cropper. Will bear close planting. Pkt., 5c.; oz., 10c.; ½ lb., 20c.; lb., 45c.; 5 lbs., \$2.00.

GHANT YELLOW INTERMEDIATE.—Makes a large, magnificent root, growing half above the ground and easily lifted; an enormous cropper and good keeper. It is of even shape, with smooth skin. Flesh firm and sweet. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 15 cts.; pound, 40 cts.; 5 pounds, \$1.75.

MAMMOTH PRIZE LONG RED.—Best mangel for deep soil; large size; wonderfully productive and of superior quality. One customer produced a specimen weighing 61 pounds. Pkt., 5c.; oz., 10c.; ½ lb., 15c.; ib., 40c.; 5 lbs., \$1.75.

There is no question of the fact that my select strains of all the varieties of cabbage I offer, have had more to do with making a reputation for Maule's Seeds in the last 33 years than any other one variety of vegetable, except possibly onion.

CULTURE.—The cabbage is a gross feeder, and well repays heavy manuring and high culture. It succeeds best on well drained soil. The plants are started in frame or seed bed, and afterward transplanted. Seed for early cabbages may be started in autumn in a cold frame, or in an acre. Set the plants 2½ to 3½ feet apart each way.

Maule's First Early Cabbage.

A flat headed rival of the famous Wakefield. Produces fine, solid, good sized heads, fit for market 70 to 90 days from sowing the seed.

This splendid and profitable extra early flat-head cabbage was first introduced in 1901. During the last nine years it has fully sustained its reputation for commercial value, as well as for extreme earliness; all the reports received concerning First Early is that it is even earlier than anticipated.

Its shape, habit of growth and general aspect are well shown in the illustration. It can safely be planted as close as Wakefield and is a sure header. It excels Wakefield and all other early cabbages in solidity of head; in fact, the am glad to announce this year my crop, while not an extrahead is as hard as a stone. It is a choice market sort on ordinarily large one, is very much better, and I will be able

bage in appearance, being handsome in color and general uniformity. No wonder the buyers of early cabbages select these attractive heads when displayed on the market stalls. Almost anybody would pick out one of these solid flat heads in preference to a round or pointed headed variety.

As my friends well know, last year I had a very small crop of Maule's First Early Cabbage, so much so that I could not offer it in larger quantities than by the ounce. I account of both shape and quality. It is a beautiful cab- to fill all orders my friends send me, at the following prices:

Packet, 15 cents; half ounce, 30 cents; ounce, 50 cents; quarter pound, \$1.50; pound, \$5.00.

Norman Reed, Hendersonville, N. C.—Maule's First Early Cabbage fine—hard to beat. I had Maule's Earliest Tomatoes 10 days before my neighbors had any. Phoebe Wright, Rachet, W. Va.—My garden for 1908 stood the drought very well. I had better tomatoes than any of my neighbors, and my cucumbers and cabbage did exceedingly well; in fact all seeds received from you were a success. E. B. Scruggs, Montvale, Va.—Your Maule's First Early Cabbage I planted last year was the finest cabbage I ever raised.

E. M. Lipsey, Greenville, Tex.—I like Maule's Seeds, for I always have a good garden when I plant them. I had cabbage last year headed up as large as a 10-quart pall, when my neighbor never had any even commence to head. I had Maule's Drumhead and Genuine Surehead and First Early. They were all the finest I ever saw raised here. Also Maule's Earliest of Tomatoes were fine; also the Revenue Cow Peas. I was well pleased with all the seeds I ordered from you last year.

Wm. H. Hathaway, Cameron, Pa.—My garden was good last summer, considering the dry weather. I raised cabbage from your Marblehead Mammoth that weighed 16 to 24 pounds, while none of our neighbors had any cabbage, on account of the dry weather. Also raised watermelon from seed of the Alabama Sweet—one that would lay on a bushel basket and was a good heavy one. Also had fine caulflower and the biggest beets. Your Heavy Cropping Rutabaga beats anything I ever saw—five made a bushel.

H. A. Deason, Jasper, Ala.—I now have cabbage in my garden (Feb. 13th) grown from Maule's Surchead seed, and have had plenty for home all winter. No better cabbage in the world. I plant Maule's Seed all the time.

Hubbard Clarke, Varner, Ark.—Your First Early Cabbage beats all for earliness and solidity of head; your Enormous Tomato was commended by every one for size and flavor; in fact, I had the finest garden in this section of the country.

Early Cabbages.

Earliest Express.

I first introduced this cabbage in 1887. With First Early it holds the place as the earliest cabbage in cultivation, as it has produced fair sized, marketable heads in 80 days from the sowing of the seed. It is a few days earlier than Etampes. There are few loose leaves, and almost every plant forms a head. It can be planted close, and yields a large crop. This is the earliest of the many early cabbages of the catalogues, Packet, 10 cts.; ounce, 25 cts.; ¼ pound, 75 cts.; pound, \$2.50.

Maule's Prize Wakefield.

This cabbage has been for many years the leading early cabbage This cabbage has been for many years the leading early cabbage in America. The main difficulty has been to get a perfectly satisfactory and reliable strain of seed. Buyers will find in Maule's Prize Wakefield the genuine article. I grow the seed on Long Island, in soil and climate perfectly suited to the purity and vigor of choice Wakefield stock. It has few outer leaves, and in compactness and regularity my strain cannot be surpassed. The thick stout leaves and compact health the leaves to the best sort for years and yearly setting. and compact habit makes it the best sort for very early setting. It frequently matures inside of 100 days from sowing.

Packet, 10 cts.; ounce, 35 cts.; ¼ pound, \$1.00; pound, \$3.50.

Earliest Etampes.

It is ten days to two weeks earlier than any other excepting Express and First Early. It forms a fine, hard, pointed head, of extra quality. It has a short stem, and grows close to the ground, and by reason of having so few outer or loose leaves the plants may be set $1\frac{1}{2}$ feet apart, in rows $2\frac{1}{2}$ feet apart; sometimes even closer. The seed may be sown under glass in March and set out in time to produce marketable heads of cabbage by the

first of June. Packet, 10 cents; ounce, 25 cents; 1/4 pound, 60

This is another old and famous type of early cabbage, but as in the case of Wakefield the main difficulty is to get a strain of seed representing the highest grade of excel-

lence Such a strain will be found in Maule's Winningstadt. It is almost as early as Wakefield. The heads are slightly larger, of the proper cone-shaped form, and of best quality. It is a sure header, even where other sorts may fail, and seems to be less liable to the attack of

the cabbage worm than many other varieties.

Pkt., 10c.; oz., 25c.; 1/4 lb., 60 cts.; lb., \$2.25.

All Head Early. It has proved itself to be adaptable to a wide

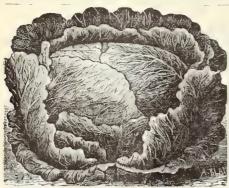

range of both soil and climate, and is well worthy of recognition as a standard American sort. It is a money maker for gardeners. It is the earliest of large cabbages, being at least a week in advance of any of the strains of Early Summer. In significant is one third because the Summer. In size it is one-third larger than Early Summer. The deep, flat heads are remarkably size and color. The introuniform in shape, ducer called it a "thoroughbred," and I believe it is fully deserving of the name. Good quality and tenderness are marked features. It is suitable for growth in spring and early summer, or for use as a winter sort. The compact habit of growth of All Head Early cabbage renders close planting feasible. The introducer named 3 feet allows for over 9.500 plants nor age of which of

Packet, 10 cents; ounce, 30 cents; ½ pound, 85 cents; pound, \$3.00.

MAULE'S SEEDS have not been supplied to dealers or merchants to sell again since 1889. If wanted they must be ordered from Philadelphia or through some one who is making up a club order in your neighborhood.

ALL HEAD EARLY CABBAGE

Second Early or Summer Cabbages.

MAULE'S EARLY FLAT DUTCH CABBAGE.

Maule's Early Flat Dutch.

An excellent second early cabbage, producing large, solid heads of uniform shape, flattened on top as shown in the illustration. Fully developed heads frequently measure 10 to 12 inches across and weigh 12 to 15 pounds each. It also is fine grained and of dainty flavor. It succeeds everywhere, but seems particularly suited to the South, as it has strong heat resisting qualities. Packet, 5 cents; ounce, 30 cents; ½ lb., 85 cents lb., \$3.00.

Early Spring.

A first early cabbage with all the merits of Early Summer; ready to cutassoonas Maule's Prize Wakefield. Early Spring cabbage often attains a weight of 5 pounds. Plants may be set 2l inches apart in the row. Growth is uniform; head round, slightly flattened. The stem is short, extending but a little way into the head. The plant is finely bred, the leaves presenting no coarse features. Adapted to family garden or market. The flavor is very good. Pkt., 10c.; oz., 30c.; ½ lb., 85c.; lb., \$3.00.

EARLY SPRING CABBAGE.

Early Summer.

This valuable cabbage matures ten days or two weeks after Maule's Prize Wakefield, with heads of uniformly round, flattened form, as shown in the illustration. The heads are very compact and solid, and of double the weight of Maule's Prize Wakefield. It is one of the best of the large, early cabbages, and is exceedingly valuable for the market gardener, as it has short outer leaves, adapting it for close planting. I offer strictly first-class Long Island grown seed. Pkt., 10c.; oz., 30c.; 1b., \$3.00.

Fottler's Improved Brunswick.

Short stemmed. A very fine summer or early fall variety; the earliest of all the large, hard heading varieties of Drumhead cabbage. It is of dwarf, compact growth, the flat head resting almost directly on the soil. The outer leaves grow closely about the head. The heads are quite thick and uniformly solid. It is a very reliable header, and under good cultiva-

tion will attain a weight of 15 pounds. Packet, 10 cts.; ounce, 25 cts.; ½ pound, 75 cts.; pound, \$2.50.

Extra Early Summer Savoy.

A savoy cabbage with a large pointed head, very early and of upright growth. Can be planted closely. Rich green savoyed leaved. Heads rich yellowish green, tender and crisp. It is very distinct from all other savoys and is a sure header. Good for either the home garden or early market. Packet, 10 cents; ounce, 30 cts.; ½ pound, \$5 cts.; pound, \$3.00.

ARLY SUMMER CABBAGE

Charleston Wakefield.

An Improved and Larger Form of Jersey Wakefield. True Type.

The Wakefield, with its pointed heads, held the leading place among early cabbages for several decades, out of sheer merit; and it is still in favor with all market gardeners. It has the serious shortcomings of being small in size and light in weight, but is so reliably early and so genuinely good that nothing can wholly supersede it or drive it out of the markets.

The Charleston Wakefield is an Improved and larger form of Maule's Prize Wakefield. It requires rather more time to reach maturity, but it yields fully twice the crop of the original Wakefield cabbage. It is about a week or 10 days later than its parent, and comes along in a close succession to the earliest cabbage crop. It is a strain which cannot be profitably overlooked by any gardener, whether it is intended for a private garden or to be sent to market. All the market gardeners near the great Eastern cities plant Charleston Wakefield for second early cabbage, and there is no better second early sort. It has a less pointed head than its ancestor.

Charleston Wakefield is a good keeper and may be planted as a second crop, to mature in the autumn, if desired. It is a first rate shipper, and in great favor with everybody who knows it. I recommend it highly. Packet, 10 cts.; ounce. 35 cts.: ¼ pound, \$1; pound, \$3.50.

CHARLESTON WAKEFIELD CABBAGE.

If you want the highest price per ton in car lots vou must plant Maule's Seed of this cabbage.

DANISH BALL HEAD CABBAGE.

2.500 cars at least of my Danish Ball Head Cabbage are sold every fall and winter in **New York City** at top prices.

DANISH BALL HEAD.

The Cabbage that is Swelling the Bank Account of Thousands of my Customers Every Year. My Strain of this Seed is Simply Unsurpassed.

The wide and unfailing popularity of the Danish Ball Head cabbage is simply wonderful. It seems to adapt itself to all soils and conditions.

The leading characteristics of Danish Ball Head cabbage are: First, that it is a sure header; second, that it is of unapproachable solidity and weight; third, that it is an extra good keeper; and fourth, that it is a good seller.

It is a medium to late cabbage, but is generally grown as a late crop. It is sure to head, the heads being round, hard and extremely heavy, though not extra large. It can be grown in close quarters, on account of its compact habit. As to its keeping qualities, it comes out of the pit in March or April as fresh as when put in, and with absolutely no waste. It is popular in the markets of all the large cities.

I regret to say my seed crop of genuine Danish Ball Head this year is as short as my XX Golden Self-Blanching Celery, in fact, almost a failure. Beware of seed offered at low prices.

Packet, 10 cents; half ounce, 30 cents; ounce, 55 cents; quarter pound, \$1.50; pound, \$5.50.

A Good Early and a Good Late Cabbage.

GLORY OF ENKHOUSEN CABBAGE

Glory of Enkhousen.

An Early Danish Cabbage of Superior Merit.

A great many of my customers who grow Danish Ball Head Cabbage largely, wrote me last spring asking why I did not list the Glory of Enkhousen Cabbage. This inquiry naturally made me look into the matter, and I this year list it for the first time, having procured my stock from the originator. This new Cabbage, Glory of Enkhousen, originated in Holland; in season it is very early, in fact as early as the Early Flat Dutch, with heads frequently twice as large, and weighing three times as much. The large sized, ball shaped heads are very firm and solid, leaves being fine ribbed are exceedingly tender. It is a dwarf and compact grower, allowing close planting; in fact some of its enthusiastic admirers claim it will yield more tons per acre than any other variety on account of close planting. It looks as if this cabbage would be extremely popular with the market gardeners generally, and especially with those who use my select strain of Danish Ball Head and who have a trade for Danish cabbage early in the season. Headquarters stock.

Packet, 15 cts.; ½ oz., 35 cts.; oz., 60 cts.; ¼ lb., \$1.75; lb., \$6.00.

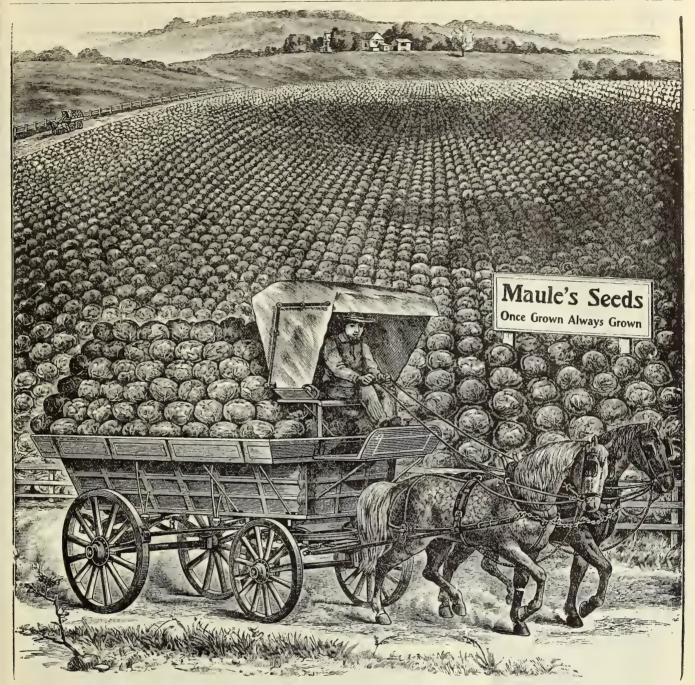

The Celebrated Lupton Cabbage.

A Grand Leading Main Crop Sort of my Introduction. The Only Real Rival of the Famed Surehead.

The Lupton cabbage began its career in 1888, on the eastern end of | healthy development. The leaves are broad and well filled out to Long Island, in an extensive cabbage growing district. The originator, whose name the cabbage bears, is undoubtedly the largest grower of first-class cabbage seed in America and every prominent seed firm in the country considers him an authority on this important subject. Lupton has some of the best traits of Surehead, with the size and general shape of Maule's Prize Flat Dutch, but is several days earlier than the latter. Its growth is particularly strong and vigorous. Its color is a dark bluish green, indicating robust constitution and

their juncture with the stem. The stem is short, and broad under the head, but tapers almost to a point where it enters the ground. The head is thick and flat, with the outer leaves covering it well across the centre. It is very large, solid, and of the most excellent quality and flavor, without any features of coarseness, the veins and ribs being well developed, but not prominent. My seed is, of course, all grown by the originator.

Packet, 10 cts.; ounce, 35 cts.; 1/4 pound, \$1.00; pound, \$3.50.

Maule's Genuine Surehead Cabbage.

All Head and Always Sure to Head.

I watch with great care all the new cabbages, and test them at Briar Crest and Panmure, but I still think that Surehead for main crop will do the most good for the most people. No other cabbage in America today has all the merits of Maule's Genuine Surehead.

People who have never sown Maule's Surehead do not know what good cabbage is. The Surehead is the greatest and most profitable cabbage ever introduced, that has, for such a long term of years, maintained so wide a popularity. This is proved by the testimony of over 100,000 planters, in all sections of the country, representing all conditions of soil, elevation, climate and cultural treatment. I can truthfully repeat the statements made in former catalogues, that while and is a variety certain to give satisfaction.

no serious complaints, even in isolated cases, have ever been made against this justly celebrated cabbage, thousands of tongues and pens are ready to tell of its worth. Hence, I say again, if you want a cabbage all head and always sure to head, you will find it in Maule's Genuine Surehead.

Maule's Surehead is a cabbage of the general type of Prize Flat Dutch and Prize Drumbead, with the same large, deep, somewhat flattened head, and the same high qualities; but somewhat finer in texture and with less spread of leaves. It is a late variety, with head as large as Flat Dutch. It is almost absolutely uniform in growth. The heads are firm and hard, and the cabbage keeps well, is a splendid shipper,

Packet, 10 cents; ounce, 35 cents; quarter pound, \$1.00; pound, \$3.50.

🏲 N. B.—I am frequently asked how it is that two firms can so prominently claim the origin of Surehead. When Mr. W. Atlee Burpee was a member of our firm, back in 1877, this cabbage was first named and introduced. On his retirement from our firm, the following year, to start the firm of W. Atlee Burpee & Co., his right to claim the origin of Surehead Cabbage was never questioned.

THREE DESIRABLE CABBAGES—All Money Makers.

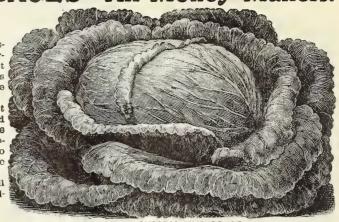

SUCCESSION CABBAGE.

This cabbage is one of the Henderson introductions, and is unquestionably an excellent variety. It is a large sort, with a flat head, maturing in midsummer. It can be brought to perfection in the hottest weather, or may be used as an autumn or winter crop. The heads average ten to twelve inches in diameter, but are frequently larger. The average weight per head is about twelve pounds.

The introducers say of this cabbage: "We consider it one of our most valuable contributions to horticulture. It would be classed as a second early variety, coming in a few days later than Early Summer, but it is superior to that variety. It is of nearly double the size, and is absolutely true to its type under all conditions. In addition to this, it has no tendency whatever to run to seed. * * It is so finely bred and so true type that in a field of twenty acres every head appears alike.'

It is a very handsome cabbage in make up and habit of growth, as well es high bred in quality. Indeed, the introducers are justified in regarding Succession as a true and individual type of cabbage.

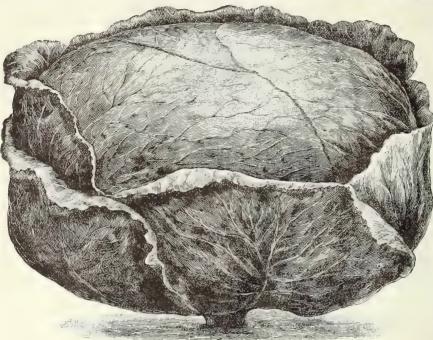

Packet, 10 cts.; ounce, 35 cts.; 1/4 pound, \$1.00; pound, \$3.50.

SUCCESSION CABBAGE.

MAULE'S PRIZE DRUMHEAD.

Sureness in heading and regularity in growth have placed this at the top of the list, and I have no fear of using words of praise too high for its merits. It forms very large, hard, solid, flattened heads, uniform in shape and color, and of handsome appearance. It has a very short stem, and is a compact grower. Shortness of stem is so characteristic as to be associated with the very best strains of this cabbage, and the stock which I offer is thoroughbred in this and all other respects. This cabbage, like Prize Flat Dutch, has so long been an established standard that certain peculiarities have been bred into it, and have become so firmly fixed as to be necessary features of growth. It is as natural for this cabbage to form a head as to form leaves, and reports of 99 marketable heads from 100 plants are of frequent occurrence. Nobody will be disappointed in my strain of Short Stemmed Drumhead, for it represents the best principles of seed culture applied to a standard vegetable. My Prize Drumhead far surpasses the old-fashioned strains of the same name, being quicker and more certain to mature, with heads of deeper and better shape. It is a standard sort for winter keeping, and sells readily in the winter and spring markets. Pkt., 10 cts.; oz., 30 cts.; 1/4 lb., 85 cts.; lb., \$3.00.

MAULE'S PRIZE DRUMHEAD CABBAGE.

MAULE'S PRIZE FLAT DUTCH.

This cabbage is as widely grown as any other in the whole country. Continued care and critical selection have secured a perfectly true stock of seed. The heads of my Prize Flat Dutch are very large, heavy, solid, flat on top, and of a bluish green color. My strain is a low growing variety, with short stem and comparatively few outer leaves. The quality is fine and the flavor excellent, the heads being white when cut and the inside leaves crisp and tender. My seed has always been American grown, coming from the celebrated Long Island districts, and whoever purchases Maule's Prize Flat Dutch may be assured of getting the best. It is everywhere a favorite market variety. It matures slightly earlier than Prize Drumhead; perhaps three to five days sooner. Prize Flat Dutch is comparatively free from a disposition to burst, and is one of the most reliable winter keepers. I think this strain will do better under partial neglect than any other in the world, possibly excepting Surehead. It has been so long bred to a standard that the heading habit is thoroughly established as an essential part of its growth, and it will produce a head even when its size is stunted by dry weather or other adverse condition.

THE HOUSER

The Latest Cabbage of Them All.

This excellent cabbage is in very wide favor, and thousands of my friends testify to its value. It is at least two weeks later than any strain of the Late Flat Dutch type. In solidity it is almost as hard as the renowned Danish Ball Head. It is very compact in habit of growth, the leaves closely surrounding and overlapping the head. The shape and appearance are shown in the illustration.

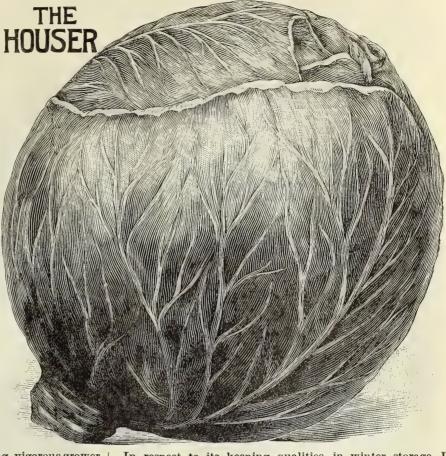

In size the Houser cabbage will average about 12 pounds at maturity, and the heads are uniformly handsome. The shape is round and deep, as indicated; and when a head cracks or bursts it is always at the stem end, which does not destroy its use for market.

In quality the Houser cabbage equals the best, being very free from the coarse ribs found in most late sorts. In fact, I would say that the Houser cabbage is very well bred, and in the careful trials and comparative tests on my experimental grounds, it has shown up excel-

lently with all other late sorts. It is a strong, vigorous grower, with ability to withstand drought better than most varieties.

Its true merit is shown by the demand for it. behaves well in the field and sells well in the market, and adapts itself to various conditions of soil and climate.

Packet, 10 cents; half ounce, 30 cents; ounce, 50 cents; quarter pound, \$1.50; pound, \$5.00.

In respect to its keeping qualities, in winter storage, I have only to say that it is perfect. Indeed, it is because the Houser is so extremely late and is such an excellent keeper that it has attained such wide popularity. I offer the original stock. Seed crop a partial failure this year.

MARBLEHEAD MAMMOTH.

This enormous cabbage excels in size all other varieties. Under high culture it has reached the enormous weight of 50 to 60 pounds per head, with a diameter equal to that of a bushel basket, while 30 pounds per head is by no means rare. If you wish to have the biggest cabbage in the whole neighborhood this is the variety to plant. The quality, moreover, is not coarse, and the flavor is delicate and excellent. It is well adapted to the South, and is considered one of the most desirable varieties of late cabbage for warm latitudes.

Packet, 10 cts.; ounce, 30 cts.; 1/4 pound, 85 cts.; pound, \$3.00.

Thos Maxwell, Cadosia, N. Y.—My cabbage was the best in years and my beans were fine. My garden was good for the hot summer.

Mrs. W. H. Barnett. Boswell, Pa.—I had the best garden in the neighborhood. I had cabbage to sell when my neighbors had none for home use. I think your

seeds are the best I ever planted.

Red Polish Short-Stemmed.

This grand red cabbage is a vigorous grower and quite hardy. The heads are of a dark red color and are extremely firm and heavy. The stem is short, and there are but few outer leaves, and it, therefore, requires only a moderate amount of room in the row. quality of the cabbage is excellent, and I feel able to recommend it highly. The outside leaves somewhat crumpled at the edges, giving the plant a pleasing and rather ornamental appearance. The well-

RED POLISH SHORT-STEMMED CABBAGE.

shaped head is shown in the illustration. Some of the smaller red cabbages have leaves so spreading as to actually require more room for growth than this one. New Red Polish is the most profitable red sort with which I am acquainted, and will prove satisfactory in all respects to grower, cook and pickle maker.

Packet, 10 cts.; ounce, 30 cts.; 1/4 pound, 85 cts.; pound, \$3.00.

THE VOLGA.

This new cabbage is a great acquisition. In a field of several acres frequently not a single plant shows any variation from a true and valuable type, as the heads are of about equal size and shape; weighing from 12 to 15 pounds each, round as a ball, measuring about 12 inches in diameter. The heads are perfectly solid and the stem does not run up into the heads nearly so far as in other sorts. Hardy and firm, making it a desirable variety for sour krout and other purposes. Heads fully two weeks earlier than any of our late growing sorts. Good for early Packet, 10 cts.; ounce, 30 cts.; ½ pound, 85 cts.; pound, \$3.00.

IMPROVED DRUMHEAD SAVOY. - The Savoy cabbages are noted for their fine and delicate flavor. The leaves are wrinkled in a peculiar and characteristic manner. The heads in this strain of Savoy are large and very compact, and of a most attractive appearance. It is an excellent winter keeper, and the most popular of this class.

Packet, 10 cts.; ounce, 30 cts.; 1/4 pound, 85 cts.; pound, \$3.00. FELDERKRAUT .- It is especially desirable in making kraut, and as extensively grown for that purpose. It is a sure header, and the

heads are very large and solid. It is hardy and thrives well anywhere. Recommended to all desiring a pointed head variety adapted to both early and late planting. For garden use it is unexcelled.

Packet, 10 cts.; ounce, 30 cts.; ¼ pound, 85 cts.; pound, \$3.00.

MAMMOTH RED ROCK.—The hardiest and largest heading red cabbage in cultivation, heads often weighing 12 pounds each. cropper. Successful Long Island growers prefer this to all other red cabbages. True seed of Red Rock has been scarce for years, as it is a

shy seeder; but I have harvested a fair crop of the genuine article. Packet, 10 cents; ounce, 35 cents; 1/4 lb., \$1.00; lb., \$3.50.

IMPROVED DRUMHEAD SAVOY CABBAGE

FELDERKRAUT CABBAGE

MAMMOTH RED ROCK CABBAGE

CULTURE.—Same as cauliflower, which BROCCOLI. it very much resembles.

EARLY ANGIERS. — Hardier and far more easily grown than cauliflower. Heads always large, handsome and of delicate flavor. Pkt., 15c.; 2 pkts., 25c.; 2z., \$1.
PURPLE CAPE.—Large heads of purplish brown color, always very close and compact, and of superior flavor.

Packet, 10 cents; ounce, 30 cents; ¼ pound, \$1.00. BRUSSELS SPROUTS. A variety of cabbage producing small heads or knobs along the stem. Very popular in some markets. Culture.—Excessive stem growth should be avoided by planting in good but not extra rich soil. Sow seed in

April in the open ground, and set in rows 3 feet apart, BR. SPROUTS. 18 inches apart in row. Sowing in June will produce a late autumn crop of sprouts. Break leaves from stem to aid formation of heads. 1 ounce of seed yields 4,500 plants.

IMP. BRUSSELS SPROUTS.-The plants grow about 21/2 ft. high, producing excellent, compact, solid sprouts, which remain firm for a long time. A sure cropper. Packet, 5 cts.; ounce, 15 cts.; ¾ pound, 40 cts.; pound, \$1.50.

NEW HALF DWARF PARIS MARKET.—This is the most popular Brussels Sprouts on the Parislan market, scarcely exceeding 2 feet in height. It is of straight habit, with a slight purplish tinge on the leaf stalks and sometimes on the sprouts themselves when young. The latter are flattened at the top and perfectly round when fit for use; very hardy and productive, and from personal experience I can recommend it as really the best Brussels Sprouts I know of. Packet, 10 cts.; ounce, 20 cts.; 34 pound, 50 cts.; pound, \$1.75.

NEW HALF DWARF PARIS MARKET BRUSSELS SPROUTS.

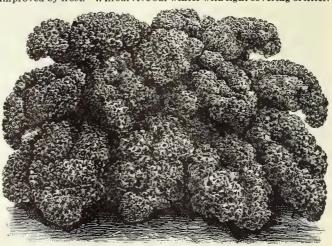

GOLLARDS. Of particular in the South. Of particular value collard forms a mass of leaves on a tall stem. Improved in flavor by frost.

CULTURE.—Sow like cabbage. Transplant when a few weeks old. Set a foot apart in rows. Cultivate frequently. Sow seed in June, July and August. One ounce of seed will give 4,000 plants. TRUE GEORGIA.—The well known standard variety used exclusively for greens. Good green food for fowls. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00.

A vegetable of the cabbage tribe, with a thick, glob-CULTURE.—Sow in drills in garden or field, and thin out to 6 inches apart in the row. An ounce of seed will be enough for 300 feet of row. IMPROVED IMPERIAL.—Small tops, but extra large roots, producing a heavy crop. Pkt., 10c.; oz., 25c.; ¼ lb., 60c.; lb., \$2.25. LARGE WHITE .- Pkt., 5c.; oz., 10c.; 1/4 lb., 30c.; lb., \$1.00.

Borecole or German Greens. A headless variety of cabbage, very hardy and in some cases handsome. Delicate as food. CULTURE.—See cabbage. Start in frame or border, and transplant to field. Use 1/4 pound of seed to acre; packet for small gardens. Kales are improved by frost. Will survive our winter with light covering of litter.

EMERALD ISLE KALE.

EMERALD ISLE KALE.

Of medium height, with long, well-curled green leaves, and is one of the handsomest kales ever developed. Its graceful leaves are unmarked by frost, and present a bright, cheerful appearance until covered by the snow. Emerald Isle Kale is quite hardy, and will be found of great practical value for both food and ornamental purposes.

Packet, 10 cts.; cunce, 20 cts.; ½ pound, 40 cts.; pound, \$1.50.

DWARF SIBERIAN .- A large plain leaved variety, of a low or spreading habit, with grayish green leaves which are only slightly curled at the edge. Extremely hardy. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 75 cents.

DRUMHEAD .- Entirely distinct, heart being similar in shape to the Drumhead cabbage, which makes it especially desirable. Its broad leaves, which are largely composed of the midrib, and its branches are considered by many people fully equal, when cooked, to asparagus, Its close heads give it a very distinct appearance. Packet, 10 cents; ounce, 20 cents; 1/4 pound, 40 cents; pound, \$1.50.

DWARF GREEN CURLED .- Remarkably tender and delicate in flavor. Leaves rich green and very curly. Hardy. Packet, 5 cents; ounce, 10 ets.; 1/4 pound,

25 cts.; pound, 75 cts.

TALL GREEN CURLED SCOTCH. - Grows about 2 feet high, with an abundance of dark green leaves. which are very curly and wrinkled. So hardy as to be able to withstand the winters in the Middle States without protection.
Pkt., 5 cts.; oz., 10 cts.;

1/4 lb., 25 cts.; lb., 75 cts.

DWARF GREEN CURLED KALE.

CAULIFLOWER.

A splendid money crop where soil is rich and climate cool and damp. | Pin or tie the leaves together after the head or flower has begun to CULTURE.—Same as cabbage. Sometimes the seed is sowed in September, and the young plants wintered over, to save time in spring. | will produce about 3,500 plants if carefully managed.

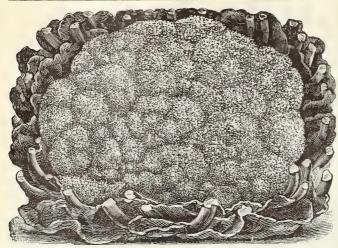

Maule's Prize Earliest Cauliflower.

For many years I have taken particular pride in supplying my customers with this strain of seed, which in all cases is equal and in many cases better than they can procure anywhere in this country or abroad. I flatter myself that I have been successful, as the demand for Maule's Prize Earliest Cauliflower keeps constantly growing, and reports come from every one sowing this seed that it is the earliest, finest and handsomest cauliflower they have ever seen. Whether for forcing under glass, or growing in the open ground, and whether planted early or late, it is surest header of them all. It is very dwarf and compact in habit of growth, like the Snowball, and can be planted as close as 18 inches each way for forcing or where space is limited. Maule's Prize Earliest is particularly desirable for forcing under glass, while in my open air trials every plant has frequently produced a head, excelling all other varieties in earliness, size and quality. To give some idea of the demand for this variety would say that to a single grower I sold more than \$550.00 worth of the seed last season. Now I have some disagreeable news to report; for years my seed has been grown especially for me in Denmark; this year the crop is very short, consequently I am compelled to advance my price considerably. The trouble has been, however, that for years past I have always sold this seed too cheap.

Packet, 50 cents; quarter ounce, \$3.00; ounce, \$10.00; quarter pound, \$30.00; pound, \$100.00.

N. B. This naturally seems like a high price to charge for cauliflower seed no matter how good it is; but so confident am I this seed will please you that, when you harvest your crop, if it does not come up to my recommendation. I will refund the amount you have paid me for the seed. You are to be both judge and jury.

DRY WEATHER CAULIFLOWER.

Dry Weather Cauliflower.

Especially Adapted to Resist Drought. Reaches Perfection When Ordinary Sorts Fail.

This new strain originated in Denmark, but has been fully tested in America with the most happy results. I offered it in 1901 for the flist time, and am well satisfied with its behavior. It produces a iarge, solid, pure white head, maturing a little later than Maule's Prize Earliest. It is in all respects a first-class cauliflower, but is especially and peculiarly adapted to dry situations and to resisting the effects of droughts. It will not thrive in poor soil or under bad treatment, as like all other cauliflowers it requires manure and culture; but it will succeed with less rainfall than any other variety within my knowledge. It will also do well in moist or wet seasons, making heads equal to the best; but it is in dry seasons that its merits appear to best advantage, and I am confident that it will extend the culture of this delicious vegetable into locations in which it is practically unknown. Packet, 25 cents; 1/4 ounce, \$1.50; ounce, \$5.00; 1/4 pound, \$15.00.

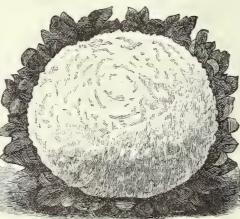

Maule's Always Heads Cauliflower.

The name well illustrates the strongest characteristic of this cauliflower, that in season and out of season it can always be depended upon to make a head. I secured it from one of the most expert cauliflower growers in Denmark, who for many years has considered "Always Heads" absolutely head and shoulders above every other cauliflower. as he has raised 99 heads 8 to 10 inches across from every 100 plants year after year. He resides in a district where hundreds of acres of Snowball and Earliest Dwarf Erfurt are annually grown, and has always been able to secure top market prices for his entire product, besides being equally as early in the market. I am not prepared to say it is better than Maule's Prize Earliest, but consider it nearly as good.

Packet, 20 cents; 1/4 ounce, \$1.25; ounce, \$4.00; 1/4 pound, \$12.00.

G. N. Zehnduer, Arcota Cal. — Must say that your seeds are the best I have ever planted. Your Dry Weather Cauliflower was fine. I won a prize at our Fair several weeks ago. All my vegetables were fine.

AUTUMN GIANT CAULIFLOWER.

Mrs. P. J. Staats, Bound Brook, Tex.—Our garden was fine. I have used Maule's Seeds for a number of years and find them true to name. Maule's Dry Weather Cauliflower was fine; every plant formed a bead and one plant had three heads.

Earliest Dwarf Erfurt.

This is a first-class cauliflower, and next to my Prize Earliest and Snowball is the best and surest to head. It would be a leader, except for the two especially fine types above mentioned. As it is, it finds special favor in many sections. Pkt., 20 cts.; 1/4 oz., \$1.00; oz., \$3.00.

Early Snowball.

One of the most popular standard sorts. It belongs to the same group of cauliflowers as Maule's Prize Earliest and stands next to it in point of earliness and excellence. Produces heads 9 inches across in this latitude by June 10th, and under good treatment every plant Extra Early Paris.

Very early, producing a good, white head. Head is large, solid and compact. It is frequently used in forcing.

Packet, 10 cts.; ½ ounce, 40 cts.; ounce, 75 cts.; ½ pound, \$2.25.

Early London.

This is an early variety, sure to head, and excellent in every way. Packet, 10 cts.; ½ ounce, 40 cts.; ounce, 75 cts.; ½ pound, \$2.25.

Autumn Giant.

This is a large variety, with fine, well-proportioned heads. The heads are so well protected by the foliage as to remain a long time fit for use. will produce a head. Packet, 25 cts.; % ounce, \$1.25; ounce, \$4.00. Packet, 10 cts.; % ounce, 40 cts.; ounce, 75 cts.; % pound, \$2.25.

R. A. Bliss, Corcoran, Cal.

"Enclosed please find copy of our local paper, the Corcoran Journal; the items marked in red pencil refer to some plants of your Dry Weather Cauliflower, which I gave Mr. Rider. The last rain we had in the spring was the end of April. The plants were watered when set out, but not afterward; they were hoed once. Then the weather got so hot, with cutting dry winds, that he gave them up, and the poor things struggled along until the fall rains (which were very light) when they proceeded to make heads to some purpose. My own plants were irrigated a little, so made small but very perfect heads during the summer; the rest made heads in the fall, and when you realize that the mercury sometimes reached 117½ in the shade here last

summer, you will admit they deserve all the praise one can give them. I have always had fine seeds from you, fertile and true to name."

Corcoran Journal, Jan. 28, 1909.

"S. D. Rider has some of the finest specimens of cauliflower on his place near town that we have seen this season; some of the heads weigh 14 pounds and are unusually well formed. The plants from which they grew were not planted until late in May, hence the results obtained were all the more creditable."

Mrs. Edgar Abrams, East Rockaway, N. Y.—In regard to Maule's Seeds I must say that my garden did splendidly all through the drought. Far better than I could have hoped. But what I consider the best of all is your Always Heads Cauliflower; every plant headed.

Mrs. M. E. Burleson, Lincoln, New Mex.—Maule's Seeds did fine. Everything I planted from Maule's Seeds did great, especially the cabbage and cauliflower. Thos. J. Denny, Arcola, III.—Your seeds always do very well. Cauliflower headed in spite of dry weather. Rev. E. Snyder, Harmony, N. J.—Neighbors say "My garden was the best anywhere around." Cauliflower seed produced the finest heads I ever raised, Mrs. E. E. Logsdon, Twin Falls, Idaho.—One pound of Eureka Extra Early Potatoes yielded 48 pounds. Dry Weather Cauliflower O. K. Alpha Beet fine. Radishes solid, some weighed 3 pounds each.
Mrs. C. H. Younger, Kirkland, Wash.—I had good success with your seeds last year, especially your cauliflower.

cauliflower.

GARDEN CARROTS.

CULTURE.—Sow in drills. Cover ½ to 1 inch deep, and press soil about seed; afterward thin plants to 2 inches. Use 2 to 3 pounds of seed to acre; 1 ounce to 600 feet of drill. Make rows 12 to 18 inches apart. The smaller carrots are also grown under glass, to supply the winter markets. Use well rotted manure, as fresh manure makes root crops branch too much. If near a good market, make several plantings. Carrots do not demand excessively rich soil, and often do well on land where a clover sod had been plowed under the year before.

Extra Early Parisian Forcing Carrot.

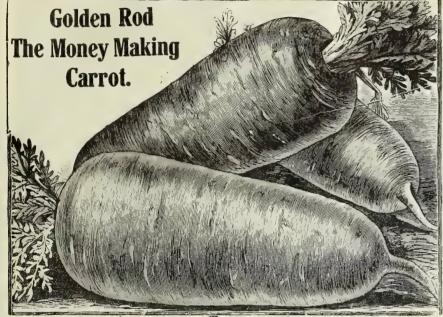

This carrot is one of such quick growth that I think a good name for it is the radish carrot, for it certainly matures as quickly as a radish. The root is formed much quicker than the well known French Forcing carrot. It has a very fine neck and a rather hollow crown. Leaves are short and erect, and while small are quite sufficient for early bunching, good for forcing under glass or outdoors. It has been the first carrot on the Parisian market for a number of years and I can highly recommend it to all my customers who desire a small, early, delicious carrot that will mature as soon as many varieties of radish, but must be sown in very rich soil.

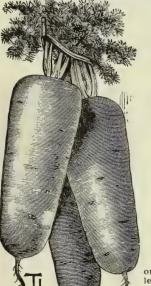

Packet, 10 cents; ounce, 20 cents; 1/2 pound, 60 cents; pound, \$2.00.

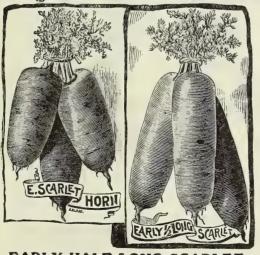

Maule's Golden Rod Carrot.

This new carrot is an intensified Danvers, suited to both table and stock. It is a half long, stump-rooted carrot, somewhat deeper in color than Danvers and a heavier cropper. The root is smooth, uniform and handsome, entirely free from core with sweet and tender flesh. It never becomes stringy nor shows rings. Highly recommended both for table use and stock feeding, and especially desirable for market gardeners and amateurs who wish to grow something choice in quality. With ordinary good treatment Golden Rod will yield close to 40 tons to the acre. Thousands of testimonials in favor of Golden Rod have already reached me, and I am sure it is worthy of universal trial. Packet, 10 cents; ounce, 15 cents: pound, 40 cents; pound, \$1.25.

EARLY HALF LONG SCARLET.

This stump rooted variety is coreless. The flesh is of a bright orange color. It is early, has a smooth skin, and is most excelent for table use. A good variety for both home and market gardens. It will mature in comparatively shallow soil.

Packet, 5 cts.; ounce, 10 cts.; 1/4 pound, 30 cts.; lb., 90 cts.

EARLY SCARLET HORN.

A variety of carrot long and favorably known to all growers. It is not large, but is often used for early crop. It is sometimes used for forcing. Considered by many people to be the best early table sort. The flesh is fine grained and the color a deep orange. It has small tops, and grows well in shallow soil. It matures 8 to 10 days sooner than Long Orange. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 30 cts.; lb., 90 cts.

THE CHANTENAY or MODEL.

This variety is a very productive one. It has an extra large shoulder, is easily dug, and is desirable in all respects. It is a stump rooted sort, very smooth, fine in texture and of a beautiful, rich, orange color. For table use it is by many considered to be the best of all, both on account of shape and quality. The flesh, when cooked, is very tender.

Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, 90 cents.

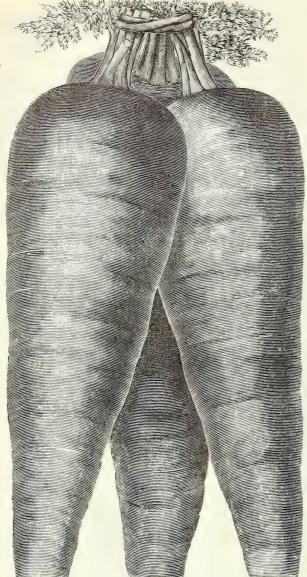

OXHEART.

This carrot is a splendid sort. In length 10 comes between Early Scarlet Horn and Half Long Scarlet. It runs fully 3 to 4 inches in diameter, and specimens have been raised measuring over 7 inches in diameter. In quality it is extra good, and will prove satisfactory for home use and profitable for market. Oxheart can be easily pulled, which makes the harvesting of this variety quite inexpensive. If you want an early, handsome, ready selling carrot, this sort will suit you. As it will yield as heavy a crop as the Danvers, with this advantage, that it can be grown thicker and can be raised on stonier land. Packet, 5 cts.; oz., 10 cts.; ¼ lb., 30 cts.; lb., 90 cts.

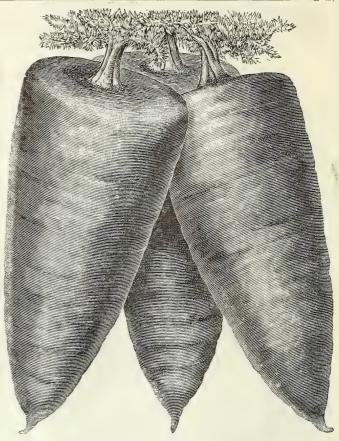

M. F. McAlister, Wadington, Cal.—I raised 2½ acres of the finest carrots ever raised on a farm from Maule's Seeds. They were Golden Rod, Improved Short White and Mastodon.

Short White and Mastodon.

M. A. Vickery, Smiths Basin, N. Y.—The seeds I ordered of you were the finest I ever saw grow. The Oxheart Carrots especially; I had carrots that measured 1½ inches across; also your Market Gardeners' Beets; I never saw such beets; they were very large and not stringy, very brittle and nice. Also my Golden Self-Blanching Celery; never had seed come any better; had a fine lot of celery. I sold about \$200.00 worth, although I lost quite a lot on account of dry and hot weather. Can say I had as fine a garden as I ever saw.

MAULE'S IMPROVED LONG ORANGE CARROT.

MAULE'S DANVERS CARROT.

Maule's Danvers Carrot.

This variety is well adapted to all soils and sections, and some years leads my whole list in number of orders. It is half long in shape, almost cylindrical, somewhat stump rooted, and of rich, dark orange color. I claim that it will yield greater bulk and weight for a given length of root than any other carrot now grown. Over 40 tons per acre of Maule's Danvers have been grown, and a yield of 25 to 30 tons per acre is not uncommon. Grown extensively by market gardeners for bunching and makes a handsome appearance on the market stalls; of the finest quality. One of the most profitable sorts grown, which makes it a widely popular and successful carrot. Packet, 10 cents; ounce, 15 cents; ½ pound, 30 cents; pound, 90 cents.

Maule's Improved Long Orange.

Mine is, I think, the strongest and purest strain of the well-known Long Orange carrot on the market. The roots are of large size, and are smooth, fine grained and in all respects superior. Except in soil treated to raw stable manure, which makes all root crops rough, this carrot is always well formed. The color is deep orange, as indicated by the name. Enormous crops can be grown under good culture, particularly in a deep, light soil. Packet, 10 cents; ounce, 15 cents; 4 pound, 30 cents; pound, 90 cents.

Lobberich's Agricultural.

Considered the best field carrot ever offered to American farmers. It is of a rich orange color, stump rooted, and grows to a very large size. I introduced it some years ago at the personal suggestion of a leading French seedsman, and have received countiess testimonials of its great availability and worth. It has proved to be a most valuable carrot for stock feeding, and in my own comparative trials it far outyields other sorts. It is remarkably free from toughness; while in its young state it may be used for culinary purposes, as it cooks sweet and tender. Packet, 5 cents.; oz., 10 cents; ½ 1b., 30 cents; 1b., 90 cents.

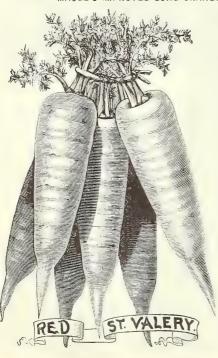

Red St. Valery.

Originated in France, where it is a popular variety. Rich, deep orange in color; large and handsome. Very straight roots, broad at the top, often 2½ to 3 inches across, and 10 to 12 inches long. Very little foliage for the size of the roots. Superior for table and desirable for stock. Yields heavy crops in rich, light soil.

Pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 30 cts.; lb., 90 cts.

LOBBERICH'S

FIELD CARROTS.

CULTURE.—Carrots are excellent for stock, especially for horses. Sow any time before July 1, half an inch below the surface, in rows 24 to 30 inches apart. Thin to 6 inches in the row. Two pounds of seed to the Store in winter the same as turnips.

NEW LONG LEMON STUMP-ROOTED CARROT.

NEW LONG LEMON STUMP. NEW LONG LEMON SALE AND ROOTED.—Suitable for table use or for stock. A heavy yielder, one of the best carrots grown. Pkt., 10c., oz., 15c., ½ lb., 30c.; lb., \$1.

MASTODON CARROT.

MASTODON CARROT.

MASTODON.—Grows a short heavy root, suited for shallow soils. The flesh is white, very sweet crisp and soild. A very prolific carrot; one of the best for stock. Packet, 5 ets.; ounce, 10 ets.; 1/4 pound, 25 ets.; pound, 75 ets.

IMPROVED SHORT WHITE CARROT.

IMPROVED SHORT WHITE.

—A comparatively new half-long carrot, extremely heavy at the shoulder, and an enormous cropper. The crown is light green in color, but below ground the root is pure white, both skin and flesh. One of the most profitable field carrots that can be grown. Root smooth and flesh rich, solid and crisp; excellent flavor. Pkt., 5c., 10. 11. 11. 20c. 11. 11. 20c. crisp; excellent flavor. Pkt., 5c oz., 10c.; 1/4 lb., 30c.; lb., \$1.00.

LARGE WHITE BELGIAN.

Attains a length of one foot, standing one-third out of the soil. Rather coarse in flesh, but a heavy yielder and easily harvested. Flesh and skin white. Pkt., 5c.; oz., 10c.; ½ lb., 25c.; lb., 75c.

LARGE YELLOW BELGIAN.

—Like Large White Belgian. except in outside color; green above ground and yellow below. Pkt., 5c.; oz., 10c.; ½ lb., 25c.; lb., 75c.

Maule's Seeds Resist Drought.

Some people do not understand why, in a period of drought, Maule's Seeds keep on growing. The reason is simply because of their strong germinating quality, and this trait is so set in their character that the letters I receive from customers praising my seeds for growing all through the dry weather is something phenomenal. I publish herewith a few samples from more than 25 different States:

Mrs M. H. West, Rosalia, Wash.—Although the weather has been very dry and unfavorable for raising garden, our garden raised from your seeds was splendid. By far the best in the neighborhood. I cannot say enough in favor of Maule's seeds.

Nannie Reed, Logan, W. Va.—I have planted your seeds for 27 years without one single failure. The drought of this year had but little effect on them. Maule's seeds beat all.

J. W. Walpole, Farmington, Utah.—I find Maule's seeds always reliable. Had good crops this year, although the season has been so dry.

Mrs. Jennie D. Miller, Godley, Texas.—Have had a fine garden this year as well as others. I always plant Maule's seeds and therefore never fail, wet or dry.

L. R. Bailey, Boyd's Creek, Tenn.—Your seeds have given me perfect satisfaction for the last 10 years. My garden has stood the drought and done well this year.

Mrs. A. M. Kelly, Lead, S. Dak.—Your seeds grew splendidly in spite of the drought. Maule's seeds always grow. I am done bothering with other people's seeds. Maule's seeds are the best always.

John H. Spencer, East Greenwich, R. I.—I planted seed from several different eedsmen. Yours resisted the severe drought and hot weather of the past summer seedsmen. Yours re the best of them all.

Wm. Anderson, Confluence, Pa.—My garden was away ahead of others that did not plant Maule's seeds. Considering the drought my garden was first-class.

Mrs. C. C. Chenhall, Mazle, Oklahoma.—I can say I had a good garden this year. Drought did not hurt garden stuff. I have planted Maule's seeds for years and always have a good garden.

Mrs. John Sears, Cottage Grove, Ore.—Our garden was excellent, considering the dry weather; in fact, was the admiration of all who saw it.

J. Smith, 7502 Hinsman Road, Cleveland, Ohio,—I cannot speak too highly of the quality of your seeds. I am sure I was very well pleased with the results I had from your seeds as I was the first in the field with my vegetables in spite of the dry weather we had.

Miss Roxie Smith, Marathon, N. Y.—Our garden was the best garden of our neighborhood. Maule's seeds are the best of any seeds to stand the drought. Three cheers for Maule's seeds, the best of all seeds.

G. L. Dempsey, Fallon, Nev.—Season considered, my garden was very good. Your seeds did better than those gotten from other houses.

J. J. Hale, Luna, New Mexico.—Maule's seeds are the best we have in this climate. They stand drought and resist the cold better than any other seeds.

Guy King, Ormond, N. J.—I am sending you abunch of radishes grown from your seeds in the open, planted May 4th, and had them on the table May 2tst. Everything else you sent me is growing like a house afte. I consider this the greatest record for radishes known, when you consider we have had cold rains, snow, etc.

record for radishes known, when you consider we have had cold rains, show, etc. P. F. Hollywood, Claumont, N. H.—The seeds purchased from you in 1908 germinated fine and gave me good crops, for all it was so dry.

Mrs. Simon Cody, La Platte, Neb.—I have used Maule's seeds for 13 years and have found them the best seeds to plant, wet or dry seasons. It makes no difference with the seeds, they get there just the same.

Mrs. Anna M. Bowman, Amoret, Mo.—I must say that your seeds were very satisfactory. Had a splendid garden, resisting the drought wonderfully.

E. F. Stowits. Midland, Mich.—Your seeds didn't fail even in this dry year. Burlingame Medium Beans I got of you last spring excited the wonder of all.

F. W. Brodhead, Royalton, Minn.—I can say that Maule's seeds withstood the drought fine. My garden did well.

Philip C. Wentworth, New Bedford, Mass.—This season was the dryest ever known in the latitude of my Maine farm, but both vegetable and flower gardens were a perfect success. I used Maule's seeds exclusively.

Mrs. John W. Fieber, Albion, Ill.—I had good luck with all your seed. Had a fine garden for such a dry year. The Earliest of All Tomatoes cannot be beat.

H. W. Crouse, Lossntville, Ind.—Your seeds did exceedingly well—stood drought well and produced well. Consider them the best seeds I have ever tried.

John Beggs, Franklin, Idaho.—I have bought seeds of you a great many years and they always do well and have done splendid all through this dry season.

Thos. C. W. Bassett, Sharon, Conn.—My garden planted with Maule's seeds has been the best for several years, although the hose has not been used.

J. A. Packard, Riverside, Cal.—We had no rain from March to October and still Maule's seeds grew fine. Of course I irrigate every 15 days. My garden was not much better than some others, because they used Maule's seeds too.

Grover Smither, Ozark, Ark.—I had a good garden from the seeds I ordered from you. The seed I got elsewhere did no good at all. Your seed stood the drought fine. My watermelons and popcorn were fine.

Frederick Fuller, Story City, Iowa.—I have used Maule's seeds for 20 years and find them all as represented. My garden is the best of its size in Story City. Seeds came up and grew to maturity all right. We had a very dry time in June and July.

Bert Ross, Ford, Ky.—I bought my seeds from you last year, and, of course, had the finest garden in this section, although it was extremely dry all summer. I saved seed from some of the nicest Panmure All Heart Watermelon, as they are undoubtedly the finest melons for this section I have seen. The Netted Gem Cantaloupe I got from you last year were also the finest flavored ones raised here.

aloupe I got from you last year were also the finest flavored ones raised here.

Fred. C. Wolfe. West I eyden. N. Y.—Notwithstanding the unfavorable weather Maule's seeds have proven very satisfactory to us. Our garden has given us an abundance of vegetables of fine quality. Much pleased with your manner of dealing.

Christ. Kleinknecht. Evansville, Ind.—Had very good success with Maule's seeds. It seems that Maule's seeds grow as well in dry as in moist weather.

W. A. Rushton. Applegate. Cal.—In spite of dry season we had the best garden in our neighborhood. Maule's seeds will grow when all others fail.

Alice E. Abbott. Middlebury, Conn.—Seeds received from you did fine; could not have done better in spite of the drought and all drawbacks. Your asters were the finest I ever saw.

finest I ever saw.

Mrs W. H. Jordan, Chillicothe. Mo.—I join with many others in saying that Maule's seeds are the best and most drought-resisting I have ever used, and that is for 20 years. My garden this year was certainly good considering the drought.

H. R. Bay, Harlan, Iowa.—Notwithstanding the dry weather we had a fine garden. All the vegetables we wanted and some to spare our less fortunate neighbors. Your Success tomatoes were the finest in the country.

Jno. Q. Strouse, Tumwater. Wash.—High express charges only keep me from ordering all my seeds from Maule, But if I knew that we would have another summer like the last one it would pay me one hundred fold to pay these charges, as Maule's seeds are drought proof.

Seymour Spencer, Seneca Falls, N. Y.—Your seeds proved satisfactory in every way. We had the finest garden around. The grass seed came up fine and the lawn is beautiful in spite of the drought.

John H. Gilliss, Mt. Airy, Md.—I had the finest vegetables in the neighborhood—the largest onions from your seed I ever saw—4 inches in diameter. I don't see that the drought affected my garden at all.

CELERY. CULTURE.—Celery seed is slow to germinate, and ample time must be given. Sow thinly; cover lightly. Keep constantly moist. Count on about 7,500 plants per ounce of seed, or ½ pound per acre. When the seedling plants are 3 inches high they should be

clipped at the top, to favor stocky growth, or else transplanted. Celery is mostly grown under flat culture, without trenches, in rows 3 to 5 feet apart. For home use celery is often grown in double rows, 10 inches apart, without trenching, and banked for winter storage just where it grows, without lifting.

Golden Self-Blanching Gelery.

It may be an interesting statement to my friends and customers that this page of my catalogue for the last 4 years has brought in more dollars than any other page in this book, but this is readily explained. From the Atlantic to the Pacific almost all the largest and best celery growers are depending on me for their supply of this seed.

No better illustration of the superior quality of my XX Golden Self-Blanching can be found than the fact that 6 years ago, my total sales of the seed of Maule's XX Selected Strain Golden Self-Blanching Celery in the State of Caliifornia amounted to less than 50 pounds; for the last 3 years I have supplied seed to all the largest concerns in that State shipping celery to the Eastern markets. Such facts as these should not fail to impress every grower who has not already tried my selected strain, with its superior qualities. Golden Self-Blanching Celery is undoubtedly the most popular and profitable celery in cultivation today. It is always in demand where good celery is appreciated. It gives the largest return for the labor. In quality it ranks with the highest. It is equally in favor with the amateur and market gardeners. It is dwarf to half dwarf, growing about 18 to 20 inches in height, wonderfully stocky, very heavy, perfeetly solid, of delicate flavor and a good keeper. Added to these points is its great distinctive feature of being almost literally self-blanching. During the season last year from 20 to 30 carloads per day of this celery grown from my XX Selected Strain seed were shipped from California to the Eastern markets, even as far east as Boston. In the Philadelphia, Chicago and New York markets it commands the very highest prices, and my customers, particularly those in the San Joaquin River section realized more than \$300 per acre in net profit on every acre they planted.

I now take up the serious side of the situation, and that is this: My crop of XX Selected Golden Self-Blanching Celery seed the past year was the shortest I have ever known, only a little over 13 per cent. of what I expected. Every ounce of seed I sell is French grown, and in France is where the failure occurred. I cannot use American grown, particularly California grown seed at any price; my trade won't stand for it, and I

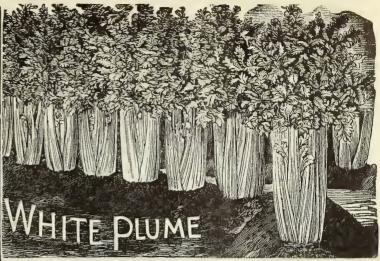

maule's XX selected strain golden self-blanching celery. cannot blame them, as I consider American grown seed of this variety absolutely worthless. I have in store at this writing 1683 pounds of this French grown seed which I have supplied my customers with for so many years; I do not know where I could get another grain of seed of equal quality for love or money, and this must do my trade for this year. I have been very frank and explained the situation fully, at the same time I am willing to sell this seed at only \$2.00 per pound advance on last year's prices as long as my supply holds out. I feel, however, I must stand by and protect my large customers who have stood by me year after year, so write at once for special prices on ten pounds or more. At even \$7.00 per pound I may not have enough to go round.

Prices of Maule's XX Selected Strain Golden Self-Blanching Celery for 1910:
Packet, 15 cents; half ounce, 40 cents; ounce, 75 cents; quarter pound, \$2.00; pound, \$7.00; postpaid.

A CALIFORNIA FIELD OF MAULE'S XX SELECTED STRAIN GOLDEN SELF-BLANCHING CELERY.

Perfected White Plume Celery.

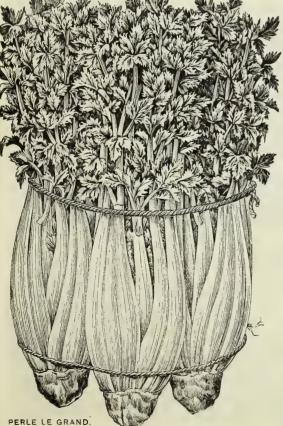

(XX Selected Strain.)

This magnificent celery is improving from year to year under high culture and careful selection. It is a truly beautiful type. No other celery naturally turns white upon reaching maturity. All others require blanching with boards or with earth. The Golden Self-Blanching naturally turns yellow, but this one turns white. Not only does the stem whiten, but the leaf itself, especially every inner leaf, assumes the attractive white color. This makes the White Plume Celery one of the most showy ornaments that can be put upon the Thanksgiving or Christmas dinner table. As to succulence, crispness and quality, the Perfected White Plume is all that can be desired of a white celery. Packet, 10 cents; ounce, 40 cents; \(\frac{1}{4}\) pound, \$1.10; pound, \$4.00.

PERLE LE GRAND. — Very handsome and stocky, of close growing, upright habit, with a golden heart. The flavor is sweet. The stalk is large in girth and heavy in weight, giving the bunches an exceedingly handsome appearance. It may be used early or late, as it blanches easily. An excellent winter keeper. Packet, 10 cents; ounce, 25 cents; pound, 75 cents; pound, 82.50.

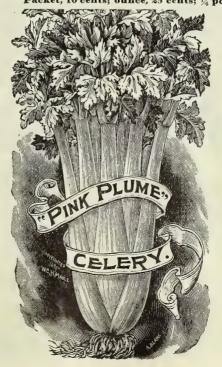

DWARF GOLDEN HEART.—A reliable half dwarf sort quite similar to Crawford's. It is a famous celery, a strong grower, and a good winter keeper. Packet, 10 cents; ounce, 25 cents; pound, 75 cents; pound, \$2.50.

NEW GIANT PASCAL.—This choice celery partakes of the sweet, nutty flavor of Golden Self-Blanching, of which it is an offspring. The height is about two feet. The stalks are thick, solid and stringless, and almost as brittle as glass; fewer in number than in ordinary kinds of celery, but making full weight by reason of width, thickness and succulence. I do not think the color of any celery is better described by the word ivory than this one. It blanches easily and keeps well. Packet, 10 cents; ounce, 25 cents; pound, 75 cents; pound, \$2.50.

PINK PLUME.—This is one of the most beautiful and best flavored of all the celeries. It is solid, crisp and nutty. Vigorous in growth and not likely to rust. It blanches with almost as little trouble as White Plume. Extremely popular for table decorations on account of its beauty and nutty flavor.

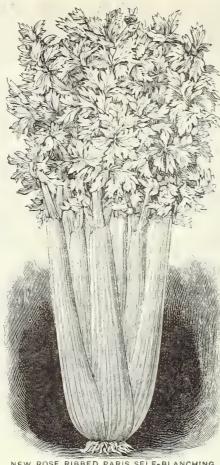

Pkt., 10 cts.; oz., 40 cts.; ¼ lb., \$1.10; lb., \$4.00.

NEW ROSE RIBBED PARIS SELF - BLANCH -ING .- The most beautiful of all pink celer-A sport of the celebrated Golden Self - Blanching, and equal to that variety in all respects. It has the light golden yellow color of its parent. and blanches with the same ease, differing only in the bright rose ribs. A good keeper. Height, 15 to 18 inches. One of the most truly desirable of the new celeries, especially for domestic use, as it is one of the most ornamental things ever put on the Thanksgiving or Christmas dinner table. Packet, 10 cents; ounce, 30 cents; pound, 85 cents; lb., \$3.00.

BOSTON KET.-An old standard celery of widely known excellence. It is a vigorous grower, with dark green leaves, attaining a medium height. blanches quite easily, and when ready for market or table makes a good appearance, and is crisp, tender and fine fla-vored. It is a good and reliable winter keeper. Packet, 5 cts; ounce, 25 cts.; 1/4 pound, 75 cts.; pound, \$2.50.

NEW ROSE RIBBED PARIS SELF-BLANCHING.

WINTER QUEEN .- Probably the most desirable winter celery ever introduced, keeping until March, April and even May if desired. It is short, stout, thick and heavy, with double the amount of heart of any other celery, a habit of growth which gives it truly remarkable value. The leaves blanch to beautiful creamy white, and are firm and solid. The flavor is sweet, nutty and delicious, leaving nothing to be desired. It bunches up handsomely, and presents an attractive appearance on the market stall. Winter Queen is a close compact

grower, and will prove to be a garden favorite. It is a dwarf or half-dwarf celery, of about the same size as Gold-en Self-Blanching. It has, in fact, many of the traits of the Golden Self-Blanching, but is of a deep green color, and far better keeper. It has become the most popular of all as a late winter keeper

Packet, 10 cts.; oz., 30 cts.; 4 lb., 85 cts.; lb., \$3.00.

KALAMAZOO. - The same as Dwarf Large Ribbed or Solid Ivory. half-dwarf white celery largely grown in Michigan. Solid, compact, strong of growth, easily blanched and an excellent winter keeper. Its fa-mous name should insure it a universal trial.

Packet, 5 cts.; oz., 25 cts.; 41 b., 75 cts.; lb., \$2.50.

FIN DE SIÉCLE.-A fine selection from Schumacher. A large, hard, solid and crisp winter keeper, of immense size; with firm golden yellow heart. Sweet, nutty flavor and a good shipper. A very popular variety for winter use. Packet, 5 cts.; ounce, 25 cts.; ¼ pound, 75 cts.; pound, \$2.50.

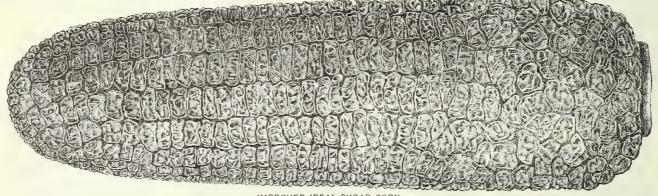

WINTER QUEEN CELERY

CELERIAC. Turnip rooted celery; an excellent thing in its way. It is used for flavoring, and is in wide demand. Culture is the same as celery, except that it requires no hilling. Is early and smooth. Pkt., 5 cts.; oz., 15 cts.; 1/4 lb., 40 cts.; lb., \$1.50.

weet or Sugar

CULTURE.—Sweet corn always does well on sod land, or where clover | shallow culture. Leave three stalks to the hill, and make successional has been turned down. Plant when danger of frost is over, in hills 2x3 feet, or 3x4 feet, according to variety.

plantings until nearly mid-summer. Use one quart for 600 hills; six to Give frequent and continued eight quarts per acre. Cover seed with an inch of soil.

IMPROVED IDEAL SUGAR CORN.

An Improved Ideal Sugar Corn.

The originator of Maule's Ideal Early Corn, Mr. Ball, has been trying or three days later. When you harvest your crop, you have Stowell's for years to develop a variety of corn that would equal Ideal in earliness and other good qualities, and also be a true sugar corn. My Ideal Early Corn, offered on the opposite page, is simply delicious in flavor, and preferred by many to every other sugar corn, but is not a true sugar corn. This is the result of Mr. Ball's experiment:

"When I first originated the Maule's Ideal Early Corn I knew I had produced a money maker for the market gardener that would beat anything in its line in existence, but I was not satisfied. I started with the Early Ideal as one of its parents, using Stowell's Evergreen and late Mammoth for crossing. I tried these crosses for four years without success; but in my seventh year's trial I noticed a stalk exactly like Ideal Early, equally as early, which produced an ear like Evergreen. I carefully preserved this and planted it by itself, carefully watching results, which were more than satisfactory, for in this the third year since I first discovered this remarkable ear, it still holds its type. exactly like Ideal Early in growth of stalk, almost sucker proof, and only two

cious quality; therefore I suggest its name should be Ideal Evergreen."

This new corn, in foliage, general productiveness and characteristics, resembles very much Maule's Ideal Early Corn, but is sweeter and at the same time two or three days later. I bought all of this corn Mr. Ball raised, paying him \$14.00 per bushel, which amounted to only 10 bushels, too small a quantity to offer in the regular way, so I am going to give a packet of this corn to every customer who may order as much as \$1.00 worth of the Maule's Ideal Early Corn offered on the opposite In other words, if you order \$1.00 worth of Maule's Ideal Early Corn when ordering your other seeds, and mention you would like to have it, we will send you a packet of Improved Ideal free of charge. This corn is not for sale and cannot be procured in any other way. I want reports of the comparative tests of these two corns, and will be very much obliged to all my friends who send reports to reach me before October 1, 1910.

Maule's Ideal Early Corn

Do you want delicious corn on your table the 4th of July? Then this is what you need.

This is what Mr. Ball the originator has to say about it:

"About eight years ago I received a small packet of early sweet corn from a friend, which proved to be in the same class as the Earliest of All sugar corns, considerably larger, and best of all contained a sweetness equal to most of our

best true sugar varieties.

"As soon as the ear began to show the flower, I selected the most promising stalks and cut out those remaining. These selected stalks were carefully watched as they developed, and by a careful system of carrying the pollen of plants showing different individual qualities, from one stalk to another, thus combining size, shape and earliness of ear, I succeeded in obtaining wonderful results, besides imparting vitality to the seed that is astonishing. It has the power of germination under conditions when all others have failed, and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness.

"I have produced in this new sweet corn a variety which stands alone, as a money maker. It is as large as Stowell's Evergreen.' The fodder will average 6 feet; no small item to a farmer; and as a proof of its quality and sweetness, I had a continuous call for 'Ideal' from the wealthiest and most fashionable residents of the surrounding suburban towns. In earliness, anyone growing this corn will have the crop marketed and the money in his pocket before any of the

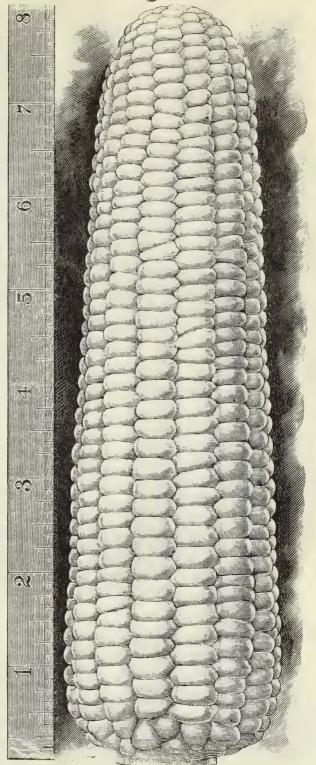

early sugar corns are ready.

"This season sugar corn had been a glut on the market, selling as low as 25 cents per hundred, but by planting Ideal, I was enabled to produce from less than one acre sixty hundred ears, which sold at wholesale at \$1.50 per hundred, besides selecting nearly thirty bushels for seed. It adapts itself to any kind of soil, either sand or heavy clay. It will pay handsomely for every pound of manure given it.

"It should be planted not closer than 3 feet each way, if soil is very rich; $3x3\frac{1}{2}$ would be better. Do not let the ears get over ripe. Make small cuts about 3 inches from end of ear with sharp knife before cutting, to ascertain if in edible condition, as it is somewhat deceiving until one gets accustomed to its growth."

The illustration herewith is from a photograph of an average ear full 8 inches long. It speaks for itself.

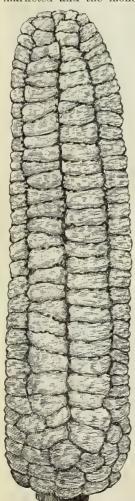

Packet, 15 cts.; pint, 35 cts.; quart, 60 cts.; 2 quarts, \$1.00, postpaid. By express or freight, not prepaid, quart, 40 cts.; 4 quarts, \$1.10; peck, \$2.00.

MAULE'S IDEAL EARLY CORN

Golden Bantam Sweet Corn.

This is a new very early corn from Massachusetts. My old friend, Mr. E. L. Coy, says it impressed him as the sweetest and most tender corn he had ever tasted. It is deep yellow in color and very early, entirely different from the old Early Orange and much earlier. Can be planted thickly, and with me every stalk had from 2 to 3 perfect ears. The introducer says that on count of the firm substance of the cured grains it can be planted earlier than any other true sweet corn. Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By exp. or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.00; pk., \$1.75.

GOLDEN BANTAM CORN.

Kendel's Early Giant Sweet Corn.

The ears measure 8 to 10 inches long and have 10 to 18 rows of grains. The majority of the ears are 12 rowed. The kernels are pure white, and are very sweet, tender and palatable. Kendel's Early Giant is a prolife variety, and matures its ears in from 60 to 72 days, depending on location and character of soil. On warm, sandy land the ears are ready in 60 days. The large, well filled and highly palatable ears command a quick sale in any market where there is a demand for really choice early sweet corn. The illustration shows the general characteristics of the ear, excepting the size, which is much reduced.

or freight, not prepaid, quart, 30 cts.; 4 qts., 85 cts.; peck, \$1.50.

Metropolitan Sweet Corn.

This fine new sweet corn matures just after First of All, and is one of the best of the intermediate varieties. It is truly a fine type of early or second-early sweet corn. The strong stalks are five feet high, each stalk bearing one or two ears about 9 inches long, with 10 or 12 rows of grains. One of the best of the true early or intermediate sweet corns. It has a thick husk, and is practically free from smut and worms on my grounds. It will prove to be an admirable sweet corn for table or market; particularly good for market or shipping.

Packet, 10 cts.; pint, 25 cts.; quart, 40 cts., postpaid. By express or freight, not prepaid, quart, 30 cts.; 4 qts., \$1.00; peck, \$1.75. or freight, not prepaid, quart, 30 cts.; 4 qts., 85 cts.; peck, \$1.50.

Maule's XX Sweet Corn.

All who plant Maule's XX want it again and again. It has won a national name and fame. It is fit for the table in 9 or 10 weeks from planting, and of most delicious, sweet and sugary flavor. It remains long in edible condition. The stalk grows 5 to 6 feet in height. It produces 12 rowed to 16 rowed ears as large as Stowell's Evergreen (9 to 10 inches). It grows well in midsummer, and may be sown as late as July 5 to 15. In flavor it has no superior, and in productiveness it is simply remarkable. I first offered this corn in 1888, and for 20 years before that time it had been the favorite sweet corn of the late Mr. Alfred Rose, of N. Y., and grown by him to the exclusion of all other sorts.

Packet, 10 cts.; pint, 25 cts.; quart, 40 cts., postpaid. By express or freight, not prepaid, quart, 30 cts.; 4 qts., 85 cts.; peck, \$1.50.

Early Champion Sweet Corn.

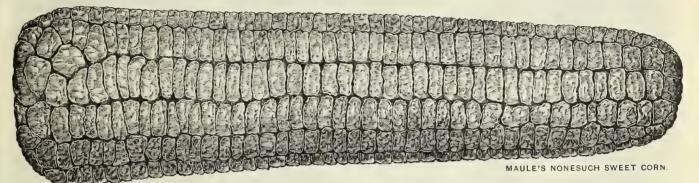

This is a second-early variety. It is quite new, but is already popular. The ears usually have 12 rows of beautiful milk-white grains, which remain tender and sweet for a long period. It matures just after First of All, and has a large and handsome ear for so early a variety. It is an extremely valuable sort for market and home purposes, as it is truly sweet, with far more sugar than the Cory.

Packet, 10 cts.; pint, 25 cts.; quart, 40 cts., postpaid. By express

who desire to be first in market. It may be planted quite closely, on or freight, not prepaid, quart, 30 cts.; 4 quarts, 75 cts.; peck, \$1.25.

FIRST OF ALL.-Reaches maturity from two to seven days sooner account of the comparatively small size of the stalks. It is the earliest than Cory, and I can confidently recommend it. It produces larger table corn, and brings double the price that better corns command ears than Cory and more to the stalk, and will prove a boon to gardeners later. Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By express

MAULE'S NONESUCH. Best Main Crop for Truckers.

I introduced this prolific second-early corn in 1892. It is tender and sweet, and of extra high table quality. It almost always yields two perfect ears to the stalk, the ears being 9 to 12 inches long, compactly filled with grains from end to end. Ears ready for use a few days later

than Mammoth White Cory, but much larger. and deliciously sweet. Ears are 12-rowed, and the tips are always filled out. Stalks of great vigor, about 6 feet high. It is a pink-cobbed va-

riety, and preferred by many people on that account.

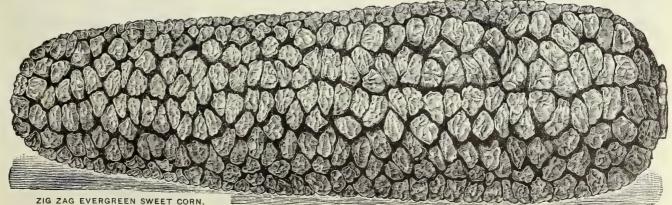

Packet, 10 cents; pint, 25 cents; quart, 40 cents, postpaid. By express or freight, not prepaid, qt., 30 cts.; 4 qts., 85 cts.; pk, \$1.50.

COUNTRY GENTLEMAN SWEET CORN

COUNTRY GENTLEMAN, or IMPROVED SHOE PEG. is a midseason sweet corn. The ears are of quite large size, and frequently three on a stalk. The grains are irregularly set on the ear. The cob is remarkably small, giving great depth to one compressed press or freight, not prepaid, qt., 30 cts., 4 qts., \$1.00; pk, \$1.75,

For delicious flavor and sweetness none surpass this variety grains. I recommend it especially to private or market gardeners or for choice retail trade. Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By ex-

ZIG ZAG EVERGREEN.-This corn is the sweetest and most i but the arrangement on the cob is entirely different; so peculiar, in

tender variety ever introduced, possibly excepting the Shoe Peg types. fact, as to give the corn its name. Two perfect ears to the stalk, invar-It is medium to late. It matures about eight days ahead of Stowell's lably. Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By express Evergreen; the kernels are shaped like those of Stowell's Evergreen; or freight, not prepaid, quart, 30 cts.; 4 qts., 85 cts.; peck, \$1.50.

PREMO SWEET CORN

BLACK MEXICAN.-One of the most sugary and delicious of all the sweet corns. The grains when first perfected are pure white, and are then at their best for table use. Pkt., 10c.; pt., 20c.; qt., 35c., postpaid. By ex. or freight, not prepaid, qt., 25 cts.; 4 qts., 75 cts.; pk., \$1.25.

STOWELL'S EVERGREEN.-Every market gardener in the land knows this grand old sweet corn. It is in high esteem for main crop or late use. Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts., postpaid. By express or freight, not prepaid, qt., 25 cts.; 4 qts., 75 cts.; pk., \$1.25.

WHITE EVERGREEN, - The stalks are of a strong, vigorous growth, 6 to 7 feet high. Ears are very large, well filled to the tip, with long slender grains of the purest whiteness and most delicious flavor. Pkt., 10c.; pt., 20c.; qt., 35c., postpaid. By ex. or freight, not prepaid, qt., 25 ets.; 4 qts., 75 ets.; pk., \$1.25.

WHITE MEXICAN. - This variety combines with a white grain all the good qualities of sweetness and flavor so prominent in the Black Mexican. One of the very earliest. The ears are medium size. Pkt., 10c.; pt., 20c.; qt., 35c., postpaid. By ex. or freight, not prepaid, qt., 25 cts.; 4 qts., 75 cts.; pk., \$1.25.

2 Good Sweet Corns.

One the very earliest. The other the very latest.

PREMO SWEET CORN.

This strictly new sweet corn is ready before any of the old sorts. Not only is it earlier than Adams and Cory, but the ear is larger and the grains sweeter. Its average period of reaching maturity is from 56 to 60 days. The new Premo matures 4 or 5 days ahead of Cory or Adams. This is a very important gain of time, especially in view of the fact that Premo is a superior corn, with larger and sweeter ears and of better appearance. The ear of Premo is from 5 to 7 inches long, and of fine shape for a first early sort. I therefore confidently recommend it to all gardeners for trial, being sure that its earliness and table quality will speedly bring it into favor. Packet, 10 cts.; pint, 25 cts.; qt., 40 cts., postpaid. By ex. or freight, not prepaid, quart, 30 cts.; 4 qts., 85 cts.; peck, \$1.50.

MAULE'S IMPROVED GIANT SUGAR CORN.

Largest Late Variety. Very Sweet.

The originator of this grand strain, one of the most successful market gardeners in the Northwest, claims it to be the largest and best sweet corn grown, and any one desiring sugar corn producing ears of immense size, which are at the same time of delicious flavor, will do well to give this Improved Giant a thorough trial. It is late. The stalks are comparatively short, and so thick and strong they stand up well against storms and rains. The ears are frequently 12 inches or more in length, and of proportionate thickness, well formed and exceedingly handsome. The Prize ear, four years ago, measuring 12½ in. long, was sent in by John H. Westgate, Bernards Crossing, N. Y., who secured the \$50.00. In sweetness, succulence, depth of grain and fine table quality Maule's Improved Giant will be found hard to beat. It is perfection itself for home use. In choice retail markets extra price can readily be obtained for it. The illustration is taken from a photograph of a medium sized ear, which I must admit was about as perfect an ear of sugar corn as it has been my fortune to see. I recommend it to private or market gardeners and canners. Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By ex. or fgt., not prepaid, qt., 30 cts.; 4 qts., 85 cts., pk., \$1.50.

MAMMOTH WHITE CORY .- The ears are very handsome, with no openings between the rows at the base. Grains large and white and of remarkably good quality for such an early sort. Excellent for home or market gardeners.

Packet, 10 cts.; pint, 25 cts.; quart, 40 cts., postpaid. By express or freight, not prepaid, quart, 30 cents; 4 quarts, 85 cts.; peck, \$1.50.

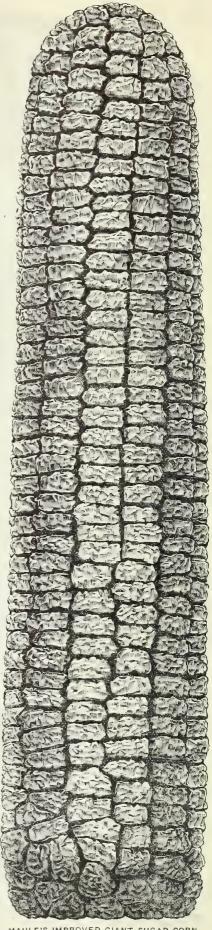

ADAMS' EXTRA EARLY .- Not so sweet nor as early as Premo, but decidedly more hardy. welcomed on the table if pulled promptly after reaching maturity. The grains are tender and white, and the ear presents a fair and attractive appearance. In general demand by truckers and market gardeners. Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts., postpaid. By ex. or fgt., not pre-paid, quart, 20 cts.; 4 qts., 60 cts.; peck, \$1.00.

EVERBEARING.-It follows Maule's XX in maturity. It invariably makes two ears to the stalk. Quality excellent. Packet, 10 cents; pint, 20 cents; quart, 35 cents, postpaid. By express or freight, not prepaid, quart, 25 cents; 4 quarts, 75 cents; peck, \$1.25.

EGYPTIAN.—This is one of the latest of all the sweet corns; ten days later than Stowell's Evergreen. It is large both in stalk and ear. In quality it is delicious, being sweet and ten-The ear remains long in the green state. Packet, 10 cts.; pint, 20 cts.; quart, 35 cts., postpaid. By express or freight, not prepaid, qt., 25 cts.; 4 qts., 85 cts.; pk., \$1.50.

Sugar Corn for Green Forage.

For cutting in the green state, for summer forage, sweet corn is superior to any of the ordinary field corns. I recommend it especially to dairymen, for use during July, August and September, when pasturage is affected by dry weather. It forms a cheap and wholesome feed Packet, 10 cents; pint, 20 cents; for cows. quart, 30 cents, postpaid. By express or freight, not prepaid, quart, 20 cents; 4 quarts, 45 cts.; peck, 75 cts.; bushel, \$2.50.

MAULE'S IMPROVED GIANT SUGAR CORN.

MAPLEDALE & PROLIFIC

POP GORNS.

MAPLEDALE PROLIFIC.—The most prolific pop corn. The ears are very often 8 or 10 inches long, well filled with bright, handsome, white grains. The stalk is of vigorous growth, reaching a height of 6 feet. This corn for popping is altogether unsurpassed. The popped grains are of delicious flavor.

Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By express or freight, not prepaid, qt., 25 cts.; 4 qts., 75 cts.; pk., \$1.25.

QUEEN'S GOLDEN.—This is perhaps the handsomest of all the pop corns when on the ear, surpassing all others in size and color. It pops perfectly white. Produces four to six ears on a stalk.

Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By express or freight, not prepaid, qt., 25 cts.; 4 qts., 75 cts.; pk., \$1.25.

RED BEAUTY.—The grains are dark red, of great depth, and in shape resemble the White Rice. It is early and very productive. It is ready to pop four months from planting.

Pt., 10 cts.; pt., 25 cts.; qt., 40 cts., postpaid. By express or freight, not prepaid, qt., 25 cts.; 4 qts., 75 cts.; pk., \$1.25.

SILVER LACE.—A pop corn well named. Its tenderness when popped highly recommends it. Grows five to six feet high, producing three or four ears to the stalk. The ears are of good appearance, five or more inches long, with smooth, round, white grains.

Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts., postpaid. By express freight, not prepaid, qt., 20 cts.; 4 qts., 75 cts.; pk., \$1.25.

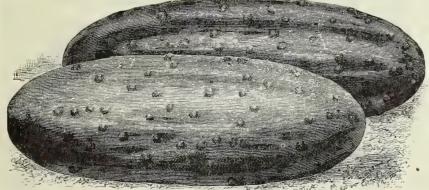

MONARCH WHITE RICE POP CORN.

MONARCH WHITE RICE.—My strain is an improvement, with larger ears. Six ears on a stalk is not arare occurrence. The grains are sharply pointed, and the ear is a handsome one.

Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts., postpaid. By express or freight, not prepaid, qt., 20 cts.; 4 qts., 75 cts.; pk., \$1.25.

CULTURE.—Flourish best in a rich, warm, moist loam. Sow when danger of frost is over, in hills 4 or 5 feet each way. As the young plant has many enemies sow thickly half an inch deep, and thin out finally to three or four plants to the hill. Use one ounce of seed to 75 hills; two to three pounds to the acre. Gather cucumbers (by cutting, not tearing) every day or every other day. Leave none to ripen if you want a full crop. Use Buhach to keep down bugs

MAULE'S EXTRA EARLY CUCUMBER.

Maule's Extra Early Cucumber.

First for the Table, Market and Pickling.

This widely popular cucumber is a cross between Early Russian and Green Prolific. It has become a general favorite. It has the earliness of one parent and the high quality and remarkable prolificness of the other. It always grows uniformly, and is seldom too large for pickling. The vines are of extra vigorous growth, with leaves of a dark green color, and produce an abundance of fruits.

Its extreme earliness is, however, its greatest recommendation, making it inval-able. On account of its earliness and its very high quality makes it a good variety for both home and market gardens.

Packet, 10 cents; ounce, 15 cents; 1 pound, 40 cents: pound, \$1.50.

Mrs. J. W. Roden, Elk Grove, Cal.—The seeds I purchased of you last year were a great success, especially the tomato and cucumber seeds; I can highly recommend them to anybody.

mend them to anybody.

Mrs. O. J. Alderman, Galva, Ill.—This is the twentieth year I have sent orders to you and have always found your seeds, plants and bulbs the very best.

G. W. Haight, Shelby, Mich.—Our garden grown this year from Maule's seeds has resulted in prize winning vegetables, and the finest for size, quality and purity of collection of any in this section. We are pleased to speak in high commendation of your garden seeds.

Mrs. Andy Hufford. Francesville, Ind.—My order sent for this spring arrived all right. Seeds are up and my garden looks nice as far as Maule's seeds go. I have some alongside of Maule's that I bought at the store, and everybody notices the difference—Maule's plants are so much stronger, bigger and nicer every way; all planted same time. I cannot make garden without Maule's seeds; have used them 24 years and always have a fine garden and truck patch.

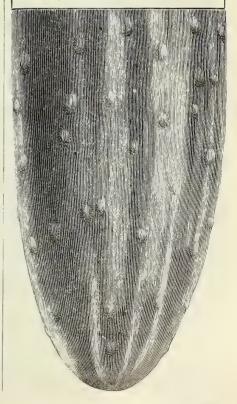

W. H. Scrope Morrison Va.—Have bedvery good re-

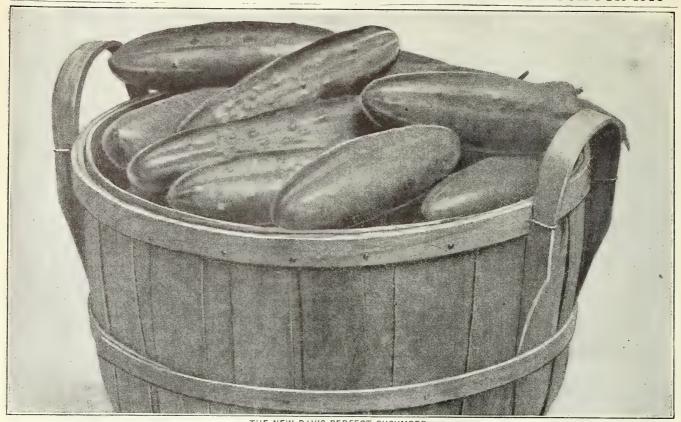

W. H. Scrope, Morrison, Va. — Have had very good results this year. Your Davis Perfect Cucumber is fine. I took the finest into Newport News this summer.

FORDHOOK FAMOUS CUCUMBER.

This new extra long White Spine cucum-ber produces perfectly smooth, very dark green, handsome straight fruit, measuring 12 to 17 Inches long. They are always solld, flesh being a greenish white, firm, crisp and of most delicious flavor. It is a great cropper and fruit is full of flesh with but few seeds. At Panmure, where I had more than two acres of Fordhook Famous, it excited the admiration of all visitors, fruit being of such a beautiful green, and so long and symmetrical. Packet, 10 cts.; ounce, 20 cts.; 1/4 pound, 50 cts., pound, \$1.75.

THE NEW DAVIS PERFECT CUCUMBER.

The New Davis Perfect Cucumber

Plant the Davis Perfect, and you will raise in the open ground, cucumbers that will sell in any market at same price as the high priced hot house forcing cucumbers.

Mr. Davis needs no introduction; as the originator of the Davis Wax Bean and Grand Rapids Forcing Lettuce, he has a reputation as a market gardener for knowing what is what, second to none. Mr. Davis has for years been forcing cucumbers under glass for the Chicago and Detroit markets, and it has been his ambition to produce a cucumber that would be as handsome in appearance and sell as well grown in the ordinary way in the open ground. He has at last succeeded in perfecting a cucumber that bears anything I have ever seen; Davis Perfect is bound to become the most popular cucumber both for forcing under glass and growing outside, for the following reasons:

First. It has an ideal shape, and the handsomest color of

all cucumbers.

Second. It is a type of the most perfect size.

Third. Eating qualities surpass anything I have ever tried. Fourth. It is almost seedless one-third of its length from the stem end, and the seeds when it is in slicing condition are so small and tender that they are unnoticed.

Fifth. It is enormously productive, in fact, beats anything I have ever tried.

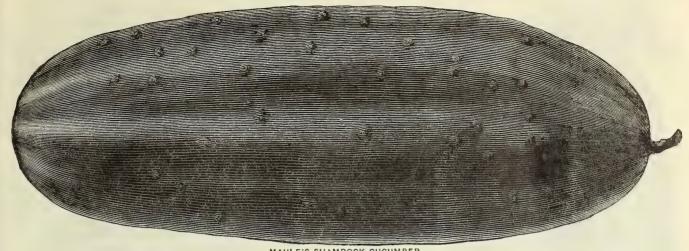

Sixth. It does not change its dark, rich color when grown outdoors; in fact, it resembles a hothouse cucumber so closely that dealers cannot tell the difference, and are willing to pay as much for it as the hothouse production. Mr. Davis has and every grower, whether for hor tried every strain of new cucumber that has been introduced in the last few years; while a number of them have

been very good, he is frank in saying that his cucumber beats anything he has ever tried, and other growers in Grand Rapids are of the same opinion. The facts boiled down are simply these: I believe this is the greatest cucumber ever introduced and it is bound to be a second control of the same opinion. introduced, and it is bound to become popular everywhere when it is known. Local market gardeners in Grand Rapids, Mr. Davis' home, who make a specialty of growing cucumbers under glass, have tried in vain to get this seed to sow in the open ground. It will be a big money maker for anyone engaged in growing cucumbers in the open ground, for Mr. Davis could have sold the cucumbers represented in this seed crop for more than double the price of any outdoor grown cucumber on the market. Mr. Davis gold Davis Perfect for \$1.00 a bushel, both in the Grand Rapids market and Chicago, at the same time the best of the other outdoor grown cucumbers were bringing 40 to 50 cents. The dealers who handled these cucumbers for Mr. Davis wanted him to ship them in large quantities, as they could sell at \$1.00 all he could send them, no matter how large the quantity. It stands to reason a cucumber that can be grown outdoors and resembles a hot house cucumber so closely that the trade will pay the same price they are raying for the hot house product is worth a great deal, and it is. I predict the greatest sale any cucumber novelty has ever had for the new Davis Perfect, and every grower, whether for home consumption or for market, to be abreast of the times, must plant this variety.

Packet, 10 cents; ounce, 20 cents; quarter pound, 50 cents; pound, \$1.75, postpaid.

Hundreds of Letters Have Come to Hand Like This One.

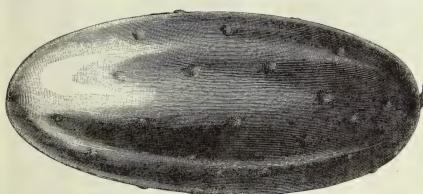

Victoria Coscia, Momphis, Tenn.—We wish to express our thanks for yield more cucumbers than any other kind that we have ever tried, the seeds we bought of you last year, as they have given us perfect satisfaction; in fact, we had better crops than ever before. We used your New Davis Perfect. Have also give them a fair test and find they will ber Seed, which please send me at your earliest convenience.

MAULE'S SHAMROCK CUCUMBER.

MAULE'S SHAMROCK CUCUMBER.

There are many varieties of White Spine Cucumber for which this characteristic of being always green has been claimed; but, as a rule, they have all been found wanting. The originator of Shamrock has this to say: "Some years ago growing two acres of cucumbers for pickles, I found three cucumbers that were green while the rest were yellow. I cut these three cucumbers and found them dead ripe. I saved the seed and planted it the next year by itself, growing some for pickling, and found it O. K. I found that a few turned partly yellow when ripe. These I discarded and planted the seed again from a green cucumber with a perfect result. The cucumber is dark green, good shape, about like Jersey pickle, turns light green when dead ripe. It is a good table cucumber and is the best for all market gardeners, as it keeps green so long. I am willing to stand by every claim, and if there is another such cucumber I do not know of it." It is needless to say that Shamrock, if it does as well the country over as it has done where it originated, and on my trial grounds, will make a name for itself everywhere. Packet, 10 cts.; ounce, 15 cts.; quarter pound, 40 cts.; pound, \$1.50.

EXTRA EARLY WHITE SPINE OR CYCLONE CUCUMBER.

Extra Early White Spine or Cyclone Cucumber.

A variety of recent introduction; an extra early strain of white spine cucumber which is desirable for its extreme earliness, wonderful prolificness and uniformity of size shape, color and excellent flavor. Valuable to plant for both home or early market. Listed last year for the first time in the Maule Seed Book.

Packet, 10 cents; ounce, 15 cents; † pound, 40 cents; pound, \$1.50.

KLONDIKE CUCUMBER.

Its good qualities are its extreme earliness and prolificness. Very hardy, resisting unfavorable weather conditions; very dark green color, attractive shape and is a good size for slicing cucumbers. It is also quite firm when small and is excellent for pickling. A most profitable sort for shipping to distant markets.

Packet, 10c.; ounce, 15c.; pound, 40c.; pound, \$1.50.

KLONDIKE CUCUMBER.

ONE THING WORTHY OF ATTENTION is this fact: In many catalogues you will find testimonials from Mr. Smith, of Ohio; Mr. Jones, of New York, or Mr. Robinson, of Wisconsin.

Now with no other data it would be pretty hard in as large a State as Obio to locate Mr. Smith. The same may be said of Mr. Jones, of New York, and Mr. Robinson, of Wisconsin. Please note the testimonials in this book and other publications of mine give my customers' full names (not their initials) and post office addresses. A word to the wise is sufficient. In writing any of them please enclose stamp for reply.

MAULE'S EARLY WHITE SPINE.—This cucumber cannot be praised too highly. It is nothing more nor less than an extra fine type of what is unquestionably the best and most widely grown variety in 'America. It is unsurpassed as a table and market sort, and is also used for pickling. No other kind exceeds it in productiveness, and it is equally good for forcing under glass or growth in the open air. I have a record of where a single hill of three vines produced over 500 cucumbers during the season. The fruit is from 5 to 7 inches long and 2 to 3 inches in diameter. Color, a beautiful light green. This illustration shows most accurately the fine shape this cucumber attains. Packet, 10 cents; ounce, 20 cents; 4 pound, 40 cents; pound, \$1.50. MAULE'S EARLY WHITE SPINE.

Meigra spinia

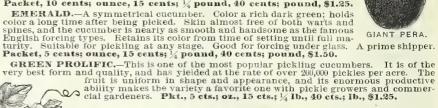

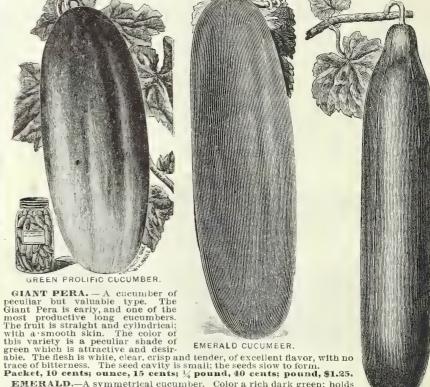

The Cumberland Cucumber.

The Cumberland was originated by Mr. Coy, who writes me: "We consider it the best of our productions, and expect to see it at the head of the list. We honestly believe it is the best pickling cucumber ever produced." I can with pleasure endorse everything Mr. Coy has to say about his new cucumber. It is a good variety; prolific, tender. crisp, and particularly handsome in appearance. Pkt., 10 cts.; oz., 15 cts.; 10, 40 cts.; 1b., \$1.25.

GREEN PROLIFIC CUCUMBER.

MAULE'S IMPROVED LONG GREEN

MAULE'S IMPROVED LONG GREEN.—This fine cucumber grows from 12 to 16 inches or more in length, and is of superior quality. The young fruits are very largely used for pickling, and it is a standard sort for that purpose. Full sized cucumbers are in high favor for makting he so-called sweet pickles. Vines are strong growers, and the fruit

is always produced in great abundance, making it one of the most productive varieties in cultivation. I have an improved and very excellent strain, which has for many years been decidedly popular with thousands of my customers.

Packet, 10 cts.; ounce, 15 cts.; ½ pound, 40 cts.; pound, \$1.50.

NICHOL'S MEDIUM GREEN.—A handsome variety, in shape between Early White Spine and Long Green. Worthy of a high place in the list of pickling sorts, and second to none for sticing when mature. Useful for forcing. Color dark green. Flesh crisp and tender. Size medium. Always straight and smooth, and uniform in appearance. Grown largely for supplying pickle factories. Packet, 5 cts.; ounce, 15 cts.; 4 pound, 40 cts.; pound, \$1.25.

WESTERFIELD'S CHICAGO PICKLING.—This variety is preferred above all others by some of the largest pickling establishments in Chicago and elsewhere. It is one of the best for the purpose, combining almost every good quality, and being alike satisfactory to grower and pickle maker. I have a choice strain of this seed. Pkt., 5c.; oz., 15c.; ¼ lb., 40c.; lb., \$1.25.

PERFECTED JERSEY PICKLE.—A decidedly improved strain of the old reliable Jersey Pickle. It originated in the great pickle growing district in Burlington county, N. J., where this business is carried on to a greater extent than elsewhere in the United States. It is a choice, thoroughbred strain, producing cucumbers uniform in size, with thin skin, white flesh and few seeds; very crisp and tender in quality, and having the valuable everbearing habit largely developed. The truckers' favorite.

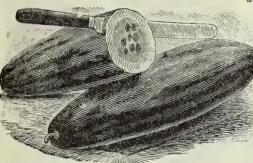

Packet, 5 cents; ounce, 15 cents; ½ pound, 40 cents; pound, \$1.25.

EARLY GREEN CLUSTER —This is a short negle green variety which

EARLY GREEN CLUSTER.—This is a short, pale green variety, which matures early. It is rather prickly and contains few seeds. The fruit is borne in clusters near the root; it is a favorite for pickling on account of its great productiveness. Pkt., 5c.; oz., 15c.; ¼ lb., 40c.; lb., \$1.25.

EARLY GREEN CLUSTER CUCUMBER.

COOL AND CRISP CUCUMBER.

THORBURN'S EVERBEARING CUCUMBER.

THORBURN'S EVERBEARING .- This is a very unique THORBURN'S EVERBEARING.—This is a very unique and highly meritorious pickling variety; meritorious because of its quality, and unique in its ability to go right on bearing, whether the ripened encumbers are picked or not. It is enormously productive and a general favorite. Fruits of every age and also blossoms may be found on a single vine and bearing continues until the coming of frost. A favorite for pickles.

Packet, 5 cts.; ounce, 15 cts.; 4 pound, 40 cts.; lb., \$1.25.

EVERGREEN. or EXTRA LONG
WHITE SPINE.

This cucumber
differs from my
Early White Spine Early White Spine in retaining a deep green color at all stages of its growth. It is long, very productive, and matures early. Its desirable color and handsome appearance make it a general favorite either.

strable color and handsome appearance make it a general favorite, either for table use, for market, or for pickling. Packet, 5 cts.; ounce, 15 cents; ½ pound, 40 cents; pound, \$1.25.

Full cultural directions are printed on every packet of Maule's Seeds.

SMALL GHERKIN

PARISIAN PICKLING CUCUMBER

PARISIAN PICKLING.—This entirely distinct cucumber is, as its name implies, of French origin, and yields beautiful miniature pickles. They are preferably picked when quite young and small, in order to preserve their peculiar appearance, as they become smoother when approaching maturity. They are deep green in color, very prickly, with flesh that is always firm and brittle. The vines are excessively productive, being covered with the curious little fruits, which make nice pickles.

Packet, 10 cents; ounce, 25 cents.

SHORT GREEN OR EARLY FRAME CUCUMBER.

SHORT GREEN OR EARLY FRAME. An old sort still in favor, and used for pickles. It is of medium size straight and handsome. At maturity is a good table cucumber. Pkt., 5 ets.; oz., 15 ets.; 1/4 lb., 40 ets.; lb., \$1.25.

SNAKE CUCUMBER

SNAKE .- This cucumber is curious as well as useful. I have seen it six feet in length, coiled like a serpent. It is an interesting thing in the garden. Packet, 10 cents.

JAPANESE CLIMBING CUCUMBER.

JAPANESE CLIMBING. All cucumbers are of trailing or creeping habit, but this one is a real climber and does best on pole or trellis. It comes into bearing quickly, and sets its fruit constantly throughout the season. The fruit is of excellent quality, of dark green color. The flesh is pure white and never bitter. My reports of this cucumber in connection with my own experience enable me to recommend it as a valuable and interesting sort.

Packet, 10 cts.; ounce, 20 cts.; 1/4 lb., 60 cts. SMALL GHERKIN,-A curious, rough, litcucumber, used exclusively for pickling, for which purpose it is in high favor.

Packet, 10 cents.; ounce, 25 cents.

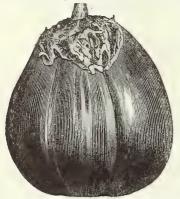

EGG PLANTS.

CULTURE.—The egg plant demands heat. Its growth should never be checked after the germination of the seed. It is best started in a hotbed, not too early in the Spring. It should not be set out while the nights are cold. The plants may be set two by three feet. Use four ounces of seed to the acre. To prevent blight and bugs use Bordeaux mixture with Paris green.

Maule's Excelsior Egg Plant.

After studying and watching this unusually fine egg plant for several years, I at last procured a stock of the seed. It is of large size and extremely good shape, being particularly adapted to slicing, as there is no waste of material. In flavor it cannot be surpassed. The hot sun does not blight the blossom, as is the case with some other sorts. It resists drought and bad weather to a wonderful degree, partly on account of its strong, upright growth. It bears its eggs or fruit well above the ground, thus escaping liability to rot. The fruit often measures 18 to 24 inches in circumference (6 to 8 inches in diameter). No market or private gardener should fail to try Excelsior Egg Plant this year. Pkt., 15 cts.; oz., 60 cts.; 1 lb., \$1.75; lb., \$6.00.

BLACK PEKIN. - A favorite egg plant. It produces handsome, nearly round, solid, fruit, weighing four to eight pounds, of good quality and maturing early. Very productive and satisfactory. Packet, 10 cents; ounce, 45 cents; 4 pound, \$1.25; pound, \$4.50.

NEW YORK IMPROVED PURPLE EGG PLANT.

NEW YORK IMPROVED PURPLE. The leading sort for home and market. Plant is a vigorous grower. Fruit large, fine and free from thorns, and produced until frost. Skin rich purple. Flesh white and of good flavor. I can highly recommend my carefully selected strain of this egg plant to market gardeners and amateurs. Packet, 10 cents; ounce. 45 cents; 1/4 pound, \$1.25; pound, \$4.50.

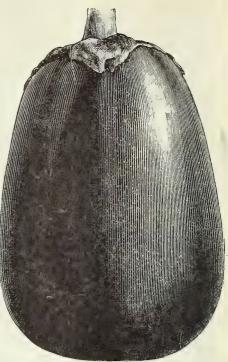

BLACK BEAUTY EGG PLANT.

Black Beauty Egg Plant.

Originated in South Jersey. It combines in itself many characteristics which are very valusble. It is very early, in fact the earliest good market variety. By this I mean it is the earliest variety that grows to a good size suitable for market. It is very desirable in color, being a jet black. Shape is well shown in illustration; average weight 2 to 3 pounds. It is dwart growing and bears its fruit close to main stem. Pkt., 15c.; oz., 60c.; 1/4 lb., \$1.75; lb., \$6.00.

BLACK PEKIN EGG PLANT.

MAULE'S EXCELSIOR EGG PLANT.

GOURDS.

CULTURE.—Gourds are tender annuals, of trailing or climbing habit. The seed should not be planted until the ground is warm. Plant in hills and cultivate as eucumbers. Leave only three or four plants in a hill, and allow the vines to ramble or train over the ground or trellis.

hills and cultivate as cucumbers. Leave only three or four plants in a hill, and allow the vines to ramble or train over the ground or trellis.

DISH CLOTH.—The peculiar lining of this valuable gourd gives it its name. The fruit grows about two feet long. The interior membrane is serviceable for a variety of household purposes, being used as a dish cloth, or sponge. The fibre is tough, elastic and durable. Start seed under glass in the North. Packet, 10 cts.

ORANGE OR TRUE MOCK ORANGE.—A good old sort, the fruit often finding its way into the family sewing basket. A beautiful and rapid climber, quickly covering trellises. Fruit the size and shape of an orange. Packet, 5 cents; ounce, 15 cents.

DIPPER.—A well known and useful gourd. When grown on the ground the stem is much curved; but on a trellis the weight of the fruit makes the stem or handle straight. This gourd is very much indemand. Packet, 10 cts.;

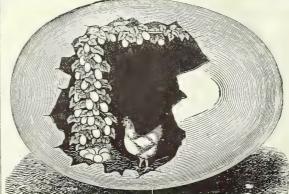

SUGAR TROUGH GOURD. Ounce, 25 cts.

SUGAR TROUGH.—A yery

SUGAR TROUGH GOURD. ounce, 2 SUGAR TROUGH. — A very large gourd, holding from 4 to 10 gallons, with a hard, thick shell, but light and durable, lasting for years. It is employed for a variety of purposes, from a bucket to hen's nest. Make hills 8 feet apart each way. Packet, 10 cents.

DIPPER GOURD.

NEST EGG GOURD.

NEST EGG.—This interesting gourd produces white fruit exactly the size and shape of a hen's egg. The matured fruit does not crack, and will serve for years as a nest egg, for use in darning stockings, or for ornamental purposes. The vine is a rapid grower, useful for covering screens or trellises. Packet, 10 cents.

HERCILES CLUB.—A very

DISH CLOTH GOURD.

HERCULES CLUB.—A very long club shaped gourd 4 to 6 feet long; white in color. Grows perfectly straight if grown on arbor or trellis. In some sections used as a vegetable. Packet, 10 cts.

as a vegetable. Packet, 10 cts.

MIXED.—In this mixture of
gourd seeds I offer all the above
mentioned sorts, so that my
friends may enjoy a number of
curious novelties by purchasing
a single packet. Packet, 10 cts.;
ounce, 25 cents.

In demand every month of the year. One of the most profitable crops grown by market gardeners.

CULTURE.—Start the seed in boxes, frames or borders, and transplant once or twice, giving a space of 7x7 inches up to moisture are demanded for best results. The lettuce is hardy, but makes little growth when the mercury is below 40°. When much above 66° the plant quickly becomes drawn out of shape. Sow shallow. One ounce will sow 300 feet of drill and furnish about 3,000 plants.

IMMENSITY LETTUCE.

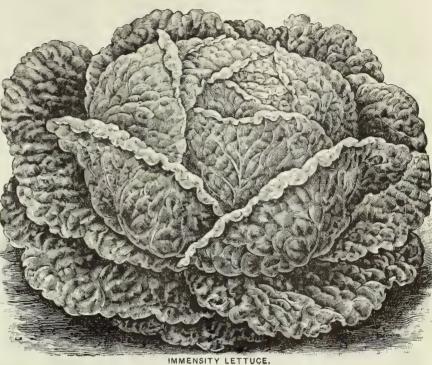

This new lettuce is claimed to be without exception the very largest lettuce in cultivation. Notwithstanding its great size it is tender, sweet and crisp. It produces a fine large, solid head, often 3 feet in circumference and 12 inches in diameter. It has great heat resisting qualities, being slow to run to seed, so that it is very reliable for a late crop when many other sorts are unfit for use. Do not be prejudiced on account of the great size of Immensity, as it is not coarse, even the outer leaves being tender. Packet, 10 cents; ounce, 25 cents; 1 pound, 75 cents; pound, \$2.50.

Harry T. Adams, Huntington, Ind.—We had very dry weather here, but my garden did well with your seeds. I can always depend on them. Have been dealing with you for 20 years, and have never had anything but what was true to name. I entered 30 articles at the Huntington County Fair. Took 20 first and 7 second premiums with vegetables grown from your seeds.

Estella J. Forbes, Draper, South Dak.—Of the seven firms from which I ordered seed last spring yours was the only one to fill out the list as ordered. All of your teeds grew.

Charles E. Haskett, Wilson, N. C.—My garden this year was very good—100 per cent. better than the gardens of any of my neighbors who do not use Maule's seeds.

J. Ed. Stewart, Philippi, W. Va.—Notwithstanding the adverse condition I succeeded in raising a very good garden. All the seeds were true to name and qualities not over estimated in catalogue. The Iceberg Lettuce was

NEW CABBAGE LETTUCE MAULE'S SUCCESS.

MAY KING LETTUCE.

The Sensational Lettuce of Germany. The Most Popular Lettuce Today in the Markets of Berlin, Leipsic, Frankfort, etc.

It has solid round heads, and will bear transportation better than almost any other variety. For early spring planting in the open ground or under glass it is unequalled. The plants grow 6 to 7 inches in diameter; the outer leaves are so closely folded, the plant is practically all head. It is hardy, as well as very early, and a quick grower. Leaves are a light green, the outer leaves slightly tinged with brown, inner leaves a bright yellow. In flavor it is particularly rich, buttery and tender. May King has certainly been highly appreciated wherever grown or tried, and is sure to become popular both in home or market gardens.

Packet, 10 cents; ounce, 25 cents; 1 pound, 75 cents; pound, \$2.50.

New Cabbage Lettuce, Maule's Success.

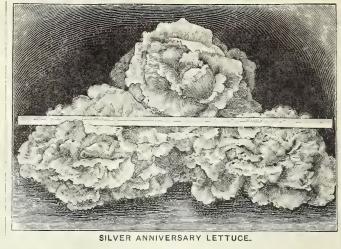

This new variety was offered in 1906 for the first time. The introducer has this to say about it: "Among the many varieties of lettuce introduced, none can claim the hardiness of Success. The hardy sturdiness of the plants adapt them for early spring planting, or cold frame culture. Planted in May it produces large, splendid yellow heads in June, continues to grow to an enormous size till beginning of July, and stands still till end of July or beginning of August before bolting to seed. From the centre to the outside solid heads are formed, packed with crisp, tender and savory leaves, slightly tinged with brownish red. Success must be planted further apart than any other variety on account of its large size. The heads, cut for market, can be kept fresh for a long time, a quality which renders it invaluable for the market gardener." I have grown a good crop of this variety and offer choice seed from originator's stock. Pkt., 10c.; oz., 20c.; 1/4 lb., 40c.; lb., \$1.50.

MAY KING LETTUCE

MAULE'S NEW GOTTE LETTUCE (WHITE SEEDED).

Maule's New Gotte Lettuce. Maule's Silver Anniversary.

A TREASURE FOR MARKET GARDENERS EVERYWHERE.

This new cabbage heading lettuce makes beautiful, round, hard heads of medium size, leaves closely set, and is extremely early, hardy and solid. The color is a beautiful yellowish green, showing no tinge of brown whatever. It is of excellent flavor, rich and buttery, and is adapted to both spring and fall use, also for forcing under glass.

Packet, 10 cts.; ounce, 25 cts.; ¼ pound, 75 cts.; pound, \$2.50

conspicuous in the garden. The leaves are crisp, tender and juicy, and of genuine lettuce flavor, qualities that will recommend it either for salads or garnishing. While one of the earliest of the early, it endures the heat of summer as well, if not better, than any other variety. It certainly is a valuable sort, and is bound to win the favor of all who plant and cultivate it, either for home or market use.

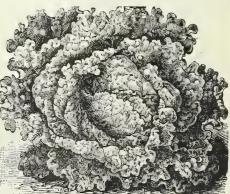

Packet, 10 cts.; ounce, 25 cts.; ¼ pound, 75 cts.; pound, \$2.50.

ICEBERG LETTUCE

THE FORTY-DAY LETTUCE

DENVER MARKET LETTUCE

ICEBERG .- Large, handsome head, of fine flavor. The light green, curly outside leaves have slightly reddish edges. The inside leaves are strongly arched, making a solid, blanched head. Very hard heading and deli-ziously crisp. Free from bitterness.

Pkt., 5c.; oz., 20c.; 1/4 lb., 60c.; lb., \$2.00.

THE FORTY-DAY LETTUCE.-A splendid lettuce of the butter head cabbage type, especially desirable for early spring and late fall, and for cold frames. Head blanches to a beautiful golden yellow; size 4 to 6 inches; very solid. Very early. Mild, sweet flavor. Pkt., 5c.; oz., 15c.; ½ 1b., 40c.; 1b., \$1.50.

DENVER MARKET .- An early head lettuce, with beautiful Savoy-like leaves. large and solid, of light green color, and slow to run to seed. The leaves are curled and crimped in a manner peculiar to this variety. It is much in demand by market gardeners. Pkt., 5c.; oz., 15c.; 1/4 lb., 40c.; lb., \$1.50.

EARLY PRIZE HEAD .- This lettuce forms a large, tender, crisp, loose head of bright green crimped leaves tinged with browish red, of superior flavor, long remaining sweet and slow to run to seed. It is well adapted to forcing and to open air culture, being quite hardy. Packet, 5 cts.; ounce, 15 cts.; 1/4 pound, 40 cts.; pound, \$1.50.

MAULE'S PHILADELPHIA BUTTER .- A main reliance in the great markets of this city. Solid heads of large size; white, tender, crisp and of good flavor. Very hardy, well adapted to culture in cold frames in winter; also suitable for forcing or for open air culture.

Packet, 5 cts.; ounce, 15 cts.; 1/4 pound, 40 cts.; pound, \$1.50.

Maule's Improved Hanson Lettuce.

In table quality this lettuce is perfection itself. It is wholly free from bitter taste, having a sweet and rich flavor, even to the outer leaves. It remains long in good table condition after reaching maturity, and resists heat and drought well, and is very slow to run to seed. Its ability to remain sweet and tender is one of the leading characteristics; in fact, this feature distinguishes Maule's from the ordinary stocks of Hanson.

It is a perfect open air lettuce in all respects. It is hardy and may be set out in earliest spring or grown late in the fall. Every year increases the already wide demand for my strain of Improved Hanson, and no lettuce has a wider American popularity than this hard heading cabbage lettuce.

Packet, 10 cts.; ounce, 20 cts.; \(\frac{1}{4}\) pound, 60 cts.; pound, \$2.00.

Joel McDonnell, Pottsville, Pa.—I have never succeeded in raising any lettuces that equaled Maule's Improved Hanson.

Mrs. Wm. Platt, Phillipsburg, N. J.—Your seeds have given perfect satisfaction.
My garden was fine, especially the White Plume Celery and Big Boston and BlackSeeded Simpson Lettuce and Lima Beans and all I planted.

Mrs. Agnes Boyer, Carlisle, Pa.—The seeds I got from you last year did very well, considering the drought, and I had one head of lettuce that measured 53 inches in circumference, the largest I ever raised; and the flower seed was also fine.

CRISP-AS-ICE LETTUCE.

Crisp-as-Ice Lettuce.

A beautiful lettuce of the cabbage type. The solid heads are of medium size, and the leaves are so tender and brittle as to have suggested the name bestowed upon it. The head has a rich yellow heart. The leaves are thick and glossy, somewhat curled, of a good and attractive green color, variegated with bronze. Crisp-as-Ice cannot be overestimated or overpraised for home use in spring and summer or late in the fall.

Pkt., 10 cts.; oz., 20 cts.; \(\frac{1}{4}\) lb., 40 cts.; lb., \$1.50.

Maule's Rosette Lettuce.

Rosette is pale green in color, almost yellow on top. The outer leaves are very much rounded in outline, with a few broad, coarse crimpings, and not nearly so pale in color as the leaves which form the head. It is regular in shape, and the head forms quickly. It is slow to run to seed. It is not the largest lettuce on the market in spread of leaves, but in actual crop it out-yields many larger sorts. I have been in receipt of hundreds of letters praising my Rosette Lettuce in highest terms.

Pkt.. 10 cts., oz.; 25 cts.; \(\frac{1}{4}\) lb., 75 cts.; lb., \(\frac{9}{2}.50\).

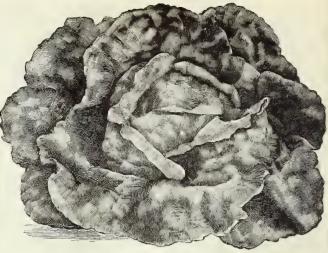

MAULE'S ROSETTE LETTUCE.

MAULE'S UNRIVALED LETTUCE.

Maule's Unrivaled Lettuce.

This new lettuce might well be called an Improved Big Boston, hence this is a very appropriate position for it in this Seed Book, especially as it is rapidly coming into favor with market gardeners in sections where the Big Boston does well. Its usefulness and value are identically the same as Big Boston, but it is preferred by market gardeners, because of its being a solid green color with no brownish tinge at the border of the leaves; its heads are larger and of better appearance than Big Boston, and in my opinion it is more desirable. No friend of the Big Boston should fail to give Maule's Unrivaled at least a trial in 1910. Pkt., 10c.; 0z., 25c.; ½ lb., 75c.; lb., \$2.50.

BIG BOSTON LETTUCE.

Big Boston Lettuce.

A Great Favorite with my Trucking Friends.

After Hanson about the Best Seller in my Entire List.

There is no question that this large cabbage lettuce is constantly gaining in popular favor in all sections of the country, whether grown in the open ground for summer and fall use in frames for use in early spring, or for forcing in the greenhouse during the winter. Its large, compact white heads, which are always crisp and tender, are attractive either upon the market stall or on the table. My strain of seed is carefully grown and is the best that can be had. It is recommended to all home and market gardeners desiring a fine, big, crisp and tender cabbage lettuce.

Packet, 10 cts.; ounce, 25 cts.; ¹/₄ pound, 75 cts.; pound, \$2.50.

THREE SUPERIOR

Perfected Salamander.

A popular summer variety. Remains long in head without running to seed and stands a great amount of heat without burning. Its good size heads are compact and tender; creamy white inside and of that desirable rich buttery flavor, outer leaves bright green. One of the most satisfactory heading lettuces for outdoor planting for both market or home garden. Pkt., 10c.; oz., 20c.; ½ lb., 40c.; lb.; \$1.50.

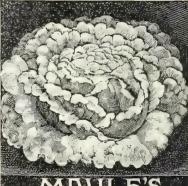

All Seasons.

An excellent variety for growing in midsummer. It is medium to large in size and of an attractive appearance, having large broad leaves of a light grayish green color. The inner leaves are beautifully bleached a rich golden yellow, extremely solid heads, never spotted nor brownish, sure heading, very slow to run to seed, tender and mild in flavor.

Pkt., 10c.; oz., 20c.; 1/4 lb., 60c.; lb., \$2.00.

CABBAGE LETTUCES

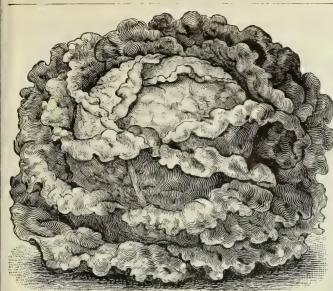

MAULE'S New Hothouse

Maule's New Hothouse.

A fine forcing variety for winter and early spring use. The largest and best plain leaf variety for forcing; adapted for hothouses and hotbeds or outdoor sowing early in the spring. Sure to head and not liable to rot in the heart. Large size, outer leaves medium green color, with well bleached heads, quality excellent, sweet and very buttery in flavor.

Pkt., 10 cts.; oz., 50 cts.; 1/4 lb., \$1.50.

SINCE 1889 Maule's Seeds have not been sold to dealers, consequently, very few seedsmen offer my Prizetaker Onion as "Maule's Prizetaker" or any other vegetable of the many I have introduced in the last 30 years under the name of "Maule's." But what does happen in many cases, some of the best things I have put before the American public are often listed in other catalogues under different names; for instance: Maule's Perfection Muskmelon, which I named and introduced in 1884, is today likely more generally known as Princess than under its true name, viz: Perfection. I cite this one instance in order to demonstrate the fact that there are too many seedsmen in this country who secure, through their customers, some of my specialties, and not being as conversant with Maule's Seeds as they should be, think they have gotten hold of a brand new sort, whereas, as a matter of fact, I have been offering the same variety for years.

STUBBORN SEEDER OR IMPROVED PERPIGNAN LETTUCE.

Stubborn Seeder or Improved Perpignan.

Slowest variety going to seed, sometimes failing altogether in that respect, and is, consequently, held in high esteem by gardeners. Forms large, solid heads of superb quality, and resists drought and heat well. Valuable for home use or market. It is white seeded; a grand lettuce for summer. Pkt., 10 cts.; oz., 20 cts.; ¼ lb., 60 cts.; lb., \$2.50.

GIANT CRYSTAL HEAD LETTUCE

Giant Crystal Head.

A loose-headed lettuce of high table merit, for open-air culture or forcing. Leaves yellowish green; growth compact. May be set as closely as 6x6 inches. A quick grower and good shipper. Stands a week or more before shooting to seed. Free from rot.

Packet, 5 cts.; ounce, 15 cts.; 1/4 pound, 40 cts.; pound, \$1.50.

Grand Rapids. A Money Maker.

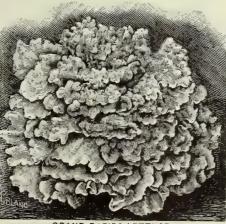

Very popular with New York market gardeners. Of crisp, delicious flavor. On account of its handsome appearance is always a rapid seller on the market stall. Its upright habit admits of very close planting.

Packet, 5 cts.; ounce, 20 cts.; 1/4 pound, 60 cts.; pound, \$2.00.

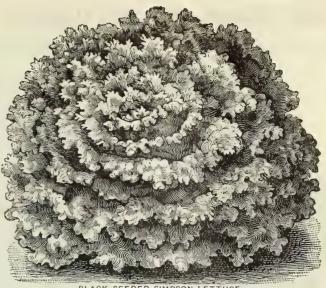

is one of the best. It is about 8 inches high. It is early, crisp, and very tender. Packet, 5 cts.; oz., 15 cts.; ¼ lb., 40 cts.; lb., \$1.50.

DWARF WHITE HEART COS LETTUCE

GRAND RAPIDS LETTUCE.

BLACK-SEEDED SIMPSON LETTUCE

Black-Seeded Simpson.

The best of the non-heading lettuces. An old and popular standard sort, of large size and highest quality. It is light colored, with inner leaves almost white; good for forcing under glass or for spring and early summer culture in the open air. Resists heat and remains long in edible condition. I can recommend my strain of Black Seeded Simpson to anyone desiring a first class lettuce.

Packet, 10 cts.; ounce, 20 cts.; 1/4 pound, 40 cts.; pound, \$1.50.

NEW YORK OR WONDERFUL LETTUCE.

New York or Wonderful.

Excellent for mid-summer; one of the best for resisting heat. large, well blanched, crisp, tender and sweet. Slow to run to seed. A popular cabbage-headed sort with extra good table quality.

Packet, 5 cts.; ounce, 20 cts.; 1/4 pound, 60 cts.; pound, \$2.00.

Byron Clark, Batavia, Iowa.—My garden was the best in the neighborhood and your seeds proved as usuat to be all right. I have used your seeds off and on since 1878 and they have never failed me yet, although I garden on a small scale.

Dwarf White Heart Cos.

Cos lettuce is served exclusively in European hotels. White Heart

White Heart

White Heart

J. Wesley Griffin, Warsaw, Ky.—The vegetables grown from seed purchased of you last spring are creating quite a stir among the hill farmers near Warsaw. Isold them lots of plants of Maule's Success Tomato and Surehead Cabbage, which have produced wonderful crops. Those planted in our garden are doing likewise.

All the Year Round.

Good for spring or fall planting and winters over well. Bears the heat of mid-summer; also valuable for forcing. One of the best for market.

Packet, 5c.; oz., 15c.; 1/4 lb., 40c.; lb., \$1.50. MIXED LETTUCE .- 12 to 15 sorts-early and

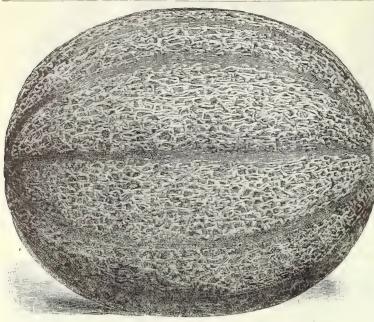

late. Pkt, 5 cts.; oz., 15 cts.; 1/4 lb., 40 cts.

Fred. C. Spearl, 207 Gist Street, Pittsburg, Pa.—Your garden seeds are the best I ever planted. Maule's Phila-delphia Butter Lettuce is fine.

MUSKMELONS OR CANTALOUPES.

CULTURE.—Plant seed in hills 4 to 6 feet apart each way, after danger of frost is over. Use well rotted manure in the hills. Insert seeds

just under surface of soil: I ounce to 50 hills; 2 to 3 pounds to acre. A light, warm soil is best, but there are varieties of melons well adapted to loamy and even heavy ground, if well drained. In hoeing draw the soil well up to the plants. Fight bugs with tobacco dust, Slug Shot, air slaked lime, land plaster or buhach.

MAULE'S SELECT ROCKY FORD MUSKMELON.

The following letter was received by me last l'ebruary from a seedsman of Anna, Ill.:—

"We are in receipt of yours of the 2-1 stating, that you understand we claim to be handling your seeds and have been doing so for years; in reply to same we beg to state there is certainly a misunderstanding in some way. The fact is this: we have been selling seeds for years, and have always tried to transact our business in a perfectly honest manner and have succeeded by so doing; now with regard to selling your seeds, if a customer should come in to-day and ask for your seeds, we should certainly furnish them to him and not only yours, but the same circumstance would apply to any seed dealer in the U.S. There has hardly been a year in several but what we have sold some of your seeds; now do not think for a second your seeds better than some of your competitors, for we do not. However we have more respect for our customers, also for our competitors than tell them we do not believe your seeds are as good as some others. We first try to sell our customers the seeds we have in stock, explaining to them the quality, etc., then if they insist on some others we simply tell them we will get them for them and do. We have seen letters from you to gardeners stating your seeds are not sold to dealers, and some of the best customers we have were made by such erroneous statements, as we have sent and got your seeds, with your tags and seals on the sacks, packages, etc."

Maule's Select Rocky Ford Muskmelon.

(Green flesh.) In this Rocky Ford Melon I offer my customers a strain of seed grown for me by one of the very best, if not the best, growers of melons in Rocky Ford, Colo. The seed is saved from a field in which not a single melon has been sold, in other words only the best and choicest melons have been retained for seed. These melons if shipped to the Eastern markets would have brought the highest prices, consequently the seed I offer costs me an unusually high price. This strain of Rocky Ford is equal to any small green fleshed melon now on the market, and between ourselves while this is the best green fleshed, Bowman's Gold Coin offered below is the best Salmon fleshed variety of this character.

I have less than 1,000 pounds of this special strain of Maule's Select Rocky Ford on hand, but as long as it lasts will be glad to furnish it to my customers at the following reasonable prices:

Packet, 10 cents; ounce, 15 cents; ¼ pound, 40 cents; pound, \$1.25; 5 pounds, \$5.00, by mail, postpaid.

Now the facts are that Maule's Seeds have not been sold to dealers to sell again at a profit for more than 20 years; but if a dealer wishes to purchase Maule's Seeds to accommodate his customers, he can of course do so, at our regular catalogue price; but the customer could send and get the seeds direct from us as cheap as his dealer can obtain them.

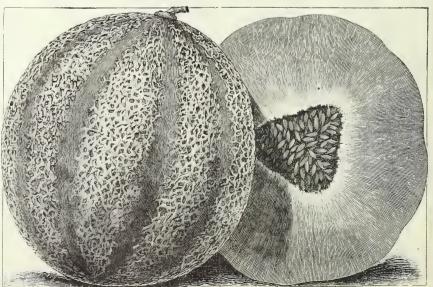

Then again I have several hundred customers on my books who are regular dealers in seeds of other brands, but for their own planting send to me for their supply of seeds for their gardens every year. All of these dealers would be glad to sell. Maule's Seeds instead of the others they are handling, but naturally cannot afford to handle anything on which there is no profit. So that if any dealer in your town attempts to sell you Maule's Seeds, be very careful, for I assure you he is paying me the same price as you would have to pay, and there would be no profit to a dealer in doing this.

BOWMAN'S NEW GOLD COIN MUSKMELON.

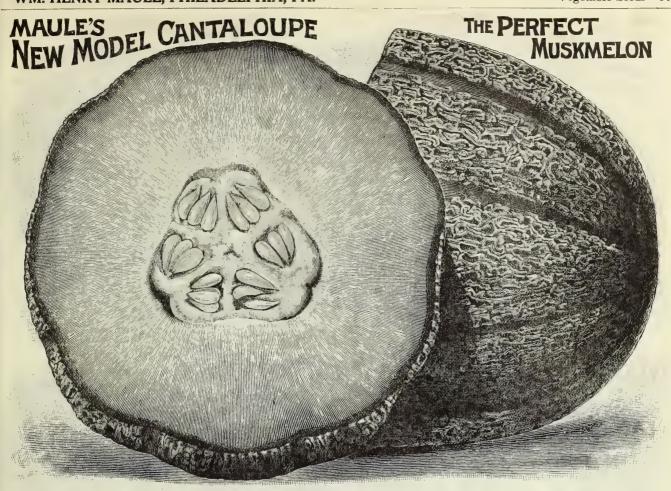

(Salmon flesh.) Gold Coin first offered in 1906; was first called to my attention by Mr. T. Greiner, the Garden Editor of The Practical Farmer, a weekly agricultural journal, that I really think has done more for the benefit of American horticulture and agriculture than any other publication in this country. Mr. Bowman first discovered this melon nine years ago, in a patch of Emerald Gem, on his grounds in Niagara County, New York. It is supposed to be a cross between that variety and Anne Arundel or Acme. Careful selection of seed has brought it to its present perfection. The following is Mr. Bowman's description of it: "My melon is earlier than the Paul Rose by 10 days. It is two or three times as large, and a great deal more netted. of lighter skin, wider ribbed, of deeper flesh and better quality. It also yields twice as many bushels to the acre. The specimens run from round to oblong, often both on the same vine, some of the specimens weighing 6 to 7 pounds. Paul Rose, Miller's Cream, or any other melon I ever saw, is not to be compared with it in quality or general value.'

In Gold Coin I consider I have found what we have all along been looking for, a melon equal to the Emerald Gem in quality, and a better shipper.

Packet, 10 cents; ounce, 20 cents; ¼ pound, 50 cents; pound, \$1.75.

BOWMAN'S NEW GOLD COIN MUSKMELON.

Spicy Green Flesh. Small Seed Cavity.

Prodigious Cropper.

THE FAMOUS MUSKMELON MAULE'S MODEL

A Melon of Distinguished Pedigree. High Bred at Every Point.

(Green flesh.) A paragon of merit-in size, shape, netting, appearance, aroma, flavor, depth of flesh, smallness of seed cavity, cropping ability and shipping quality. It leaves nothing to be desired.

Maule's Model was bred by Mr. Morgan, of Gloucester county, N. J., an

expert in his line. Its parents were Netted Gem and Pineapple, with a second hybridizing with one of its parents. This was followed by six years of careful selection. The result was a melon of wide local celebrity, and one which commanded exclusive prices in several great cities.

Maule's Model is an early melon, maturing in South Jersey the last of July to the first of August. It is larger than Rocky Ford, the average weight being somewhat above two pounds. It has an ideal shape for a fashionable market. The flesh is green. The interior seed cavity is small, and of triangular or prismatic shape, the seeds being few.

As a table melon Maule's Model cannot be surpassed. In delicacy and ent names. Send to headquarters for the genuine.

quality of flavor it is unexcelled by any variety on my list. The flesh is deep and firm, extending from the rind almost to centre of the melon.

Maule's Model bears transportation well, and can be carried to distant cities without injury. One of Mr. Morgan's main markets was over 300 miles from his farm, and the melons always stood the journey per fectly, and would have traveled a thousand miles just as easily.

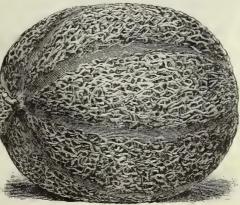

Maule's Model has every good quality possessed by the Rocky Ford with the added value of being more productive. It will show the effects of long continued drought, in common with all forms of vegetation, but does not seem to lose its strength while lying dormant under a scorching sun. Upon the coming of rain it responds at once in the way of continued growth and abundance of fruit.

Maule's Model is now sold all over the U.S. under a half dozen differ-

Packet, 10 cents; ounce, 25 cents; quarter pound, 75 cents; pound, \$2.50.

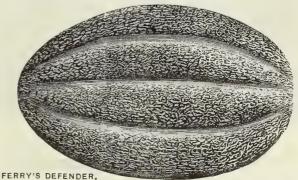

PETOSKEY OR PAUL ROSE.

(Salmon flesh.) This extra fine melon is a hybrid between Osage and Netted Gem, larger than Osage Gem, with deeper flesh. is the thickest fleshed yellow or salmon colored musk melon within my knowledge. It is small in size, slightly elongated in shape, and of delightful flavor. Notwithstanding its thin rind

PETOSKEY OR PAUL ROSE MUSKMELON

Petoskey is a good shipper and fine melon for market purposes Packet, 5 cts.; ounce, 15 cts.; 1/4 pound, 40 cts.; pound, \$1.25.

FERRY'S DEFENDER MUSKMELON.

(Orange flesh.) One of the best of the orange-fleshed sorts. Of medium size, somewhat elongated, well netted and of pleasing appearance. flesh is edible almost to the rind. The inside color is alittle darker than Osage, and is richer in flavor, and the meion bears transportation well.

Packet, 5 cts.; ounce, 15 cts.; 1/4 pound, 40 cts.; pound, \$1.25.

Nelon that Nelon that has made Rockyford, Colo. famous

Maule's Netted Gem or Rocky Ford Muskmelon.

In Favor for a Quarter of a Century as a Paying Sort for Home and Market.

> (Green flesh.) This delicious early melon is known everywhere. Of medium size, weighing 11/4 to 11/2 pounds. The flesh is deep and thick, and light green in color, except next the seeds, where it inclines towards yellow. The flavor is exceedingly fine. The skin is green, regularly ribbed and thickly netted. It is a firm, solid melon, and will carry in perfect condition for a week or more after its removal from the vine. It is a heavy cropper, and is in wide favor as a market melon. Indeed, its ability to bear transportation without breaking down has made it one of the most profitable of crops, and explains why it is so universally grown. It has many local names. In New Jersey it is known as Netted Gem, Golden Jenny and Golden Gem. In Colorado it has the name of Rocky Ford from a locality where it grows in great abundance and perfection, and from whence it is shipped all over the country, even to Philadelphia and other large Eastern cities. I have the original strain of this celebrated melon, seed being grown with the utmost care as to purity.

Packet, 5 cents; ounce, 15 cents; 1/4 pound, 40 cents; pound, \$1.25.

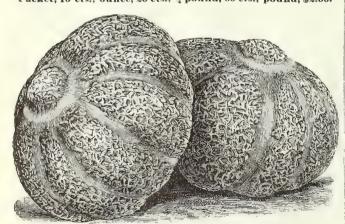

(Green flesh.) I call it Honey from the fact that 66 of my customers suggested this name, in competition for a \$100 prize, and it was very gratifying to me to know that so many felt compelled on account of its sweet, delicious flavor to call this new Maule's Honey muskmelon is of melon Honey. medium size, weighing 3 to 4 pounds on an average. It is distinctly and evenly ribbed and moderately netted. Globe shape and somewhat flattened at the stem and blossom end. Its exterior color is a peculiar shade of green, quite unlike any other muskmelon. The flesh is green, inclining to yellow. The spicy flavor is as distinct and characteristic as it is sweet and pleasing. The flesh is both deep and firm, the edible portion almost touching the rind, and remarkably juicy. At Panmure my field of these melons was a sight to behold, and everyone who tasted

them remarked that Honey was certainly the proper name for so deliclous a melon. A splendid melon whether grown for market or home. Packet, 10 cts.; ounce, 20 cts.; 1/4 pound, 60 cts.; pound, \$2.00.

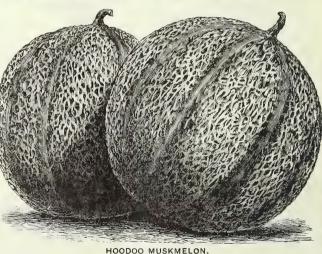

MAULE'S HONEY MUSKMELON.

NORFOLK BUTTON MUSKMELON

Norfolk Button Muskmelon.

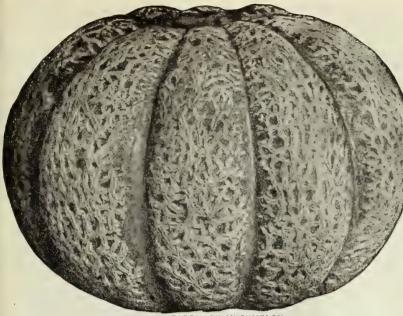

An extra early type of the Jenny Lind, of the same size, but earlier to reach maturity, and hence more valuable. green flesh and characteristic sweetness and spiciness of the parent.
The market gardeners and farmers at Norfolk, Virginia, have for some years made money with this splendid strain of Jenny Lind, and it became so well known and so famous as to require a distinctive title. Packet, 10 cts.; ounce, 25 cts.; ¼ pound, 75 cts.; pound, \$2.50.

Hoodoo Muskmelon.

(Orange flesh.) This new melon bred and named by Mr. Paul Rose, the melon specialist, who claims it to be an ideal basket and crate melon. The melons are of medium size, round, heavily netted, flesh very thick. of rich orange color, handsome appearance and of the sweetest flavor. Average weight of melon 1½ pounds. The seed cavity is small and the rind is very tough, making it a good shipper; its vine is a vigorous grower and a heavy cropper. A good medium sized melon for both home or market gardener. Seed direct from headquarters stock.

Packet, 10 cts.; ounce, 20 cts.; ½ pound, 60 cts.; pound, \$2.00.

NEW FORDHOOK MUSKMELON.

NEW FORDHOOK.

(Orange flesh.) This new melon is a cross between Emerald Gem and the Prize Jenny Lind. It resembles the Prize Jenny Lind in shape. The vine is a strong vigorous grower, branching freely and frequently setting five to nine melons close to the hill. The melons grow very even and regular in size and attractive in appearance; slightly flattened at both stem and blossom ends. The shape is shown in the illustration. They are roughly netted, the skin showing between the nettings being emerald green. The flesh is very thick, color an attractive deep orange and of a delicious flavor. Remarkably early and a good shipper. A good medium sized melon for both home and market garden. The Fordhook Melon came through the past season with flying colors, and it is certainly going to make a name for itself with all growers of fine melons, who desire a small orange fleshed variety. It will be planted in 1910 more largely than ever. Seed direct from headquarters stock.

Pkt., 10 cts.; oz., 25 cts.; 1 lb., 75 cts.; lb., \$2.50.

Burrell's Gem.

The most popular salmon fleshed melon in the leading restaurants of New York and Philadelphia last summer.

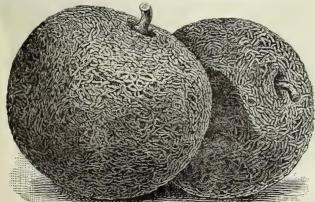

NEW ICE KING MUSKMELON.

NEW ICE KING.

(Whitish green flesh.) An extra large cantaloupe often growing to weigh upward of 30 lbs. Of pale straw color when ripe, rather smooth skin, but sometimes slightly netted. Deeply ribbed; flesh nearly 4 inches thick, whitish green color, of fine texture, possessing a peculiar spicy aromatic flavor, found in no other meion. Always firm, sweet and refreshing. For preserving, especially for cooking down into butter (like apple butter) for winter use, I know of no fruit that can beat it. Shape round, medium early, extra prolific, vigorous growth; often bearing continuously until frost.

Packet, 10 cts.; ounce, 25 cts.; 4 pound, 75 cts.; pound, \$2.50.

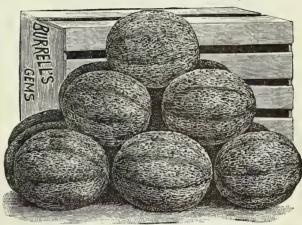

MAULE'S SUPERIOR MUSKMELON.

MAULES SUPERIOR.

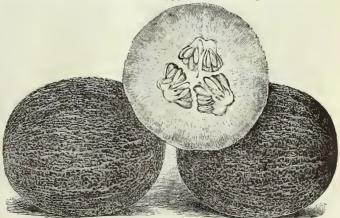

(Green flesh.) This excellent early muskmelon, which I introduced, now holds a permanent place in public esteem. It ripens about the same time as Jenny Lind, but is rather larger than that variety. Its shape and appearance are shown in the illustration. The vine is very prolific, frequently producing five to seven melons. The quality is unsurpassed, and it is a perfect shipper. The fruit is never known to crack or rot at the blossom end.

Packet, 5 cts.; ounce, 20 cts.; ¼ pound, 60 cts.; pound, \$2.00.

(Salmon flesh.) For a market where the orange fleshed musk melons are in demand; they bring much the highest prices. It has a tough thin rind, well arched ribs; covered with a closely laced and interlaced gray netting. Shape quite elongated; flesh of a reddish orange, very thick, fine grained and spicy. The melons average about 2½ lbs., with an average size of 6 inches long, 4½ inches thick, and will crate more evenly than any other melon grown.

Packet, 10 cts.; ounce, 20 cts.; ½ pound, 40 cts.; pound, \$1.50.

IMPROVED WATTER'S SOLID NET ROCKY FORD MUSKMELON.

Improved Watter's Solid Net Rocky Ford. Improved Watter's Solid Net Rocky Ford.

(Green fiesh.) I am glad to be able to offer this season the earliest strain of Rocky Ford. About 90 per cent. of these meions are solid net as shown in the illustration. This variety sets a very heavy first crop, so that, within a few days after the first ripe meions heavy pickings are ripening. It is a most valuable sort to plant where first meions on the market is of great importance. Produces meions of even size and shape. The heavy gray netting is closely laced and very slightly ribbed. The thick flesh is light green, spicy and sweet. This variety is in demand by many of the most successful market growers. My stock is direct from headquarters, grown in Rocky Ford, Colorado.

Packet, 10 cts.; ounce, 20 cts.; 4 pound, 40 cts.; pound, \$1.50.

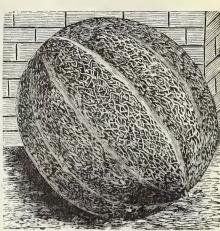

EXTRA EARLY GRAND RAPIDS. — (Orange flesh.) This extremely early musk melon, which I introduced to the American public in 1895, matures a full week earlier than any large sort, and is profitable on that account. Indeed, it is not infrequently in the market two weeks in advance of other varieties. The shape is well shown in the illustration, which is from a photograph. The flesh is orange almost to the rlnd. The skin is finely netted, and the melon is handsome in appearance and sure to attract attention in the market. I advise growers to pinch off the ends of the main shoots when two or three feet long, to encourage more abundant blossoming and earlier maturity. This practice makes the fruit heavier as well as earlier. The Grand Rapids is absolutely the earliest of all large melons, and I particularly recommend it to those whose profits depend upon being first in market.

Packet, 5 cts.; ounce, 15 cts.; ½ pound, 40 cts.; pound, \$1.50.

TIP TOP.—(Orange flesh.) This is a fine, nearly round in shape melon of such attractive appearance as to always sell quickly in the markets. It is sweet, juicy and delicious. The flesh is firm but not hard, and is edible almost to the rind. The melon is of medium to large size, evenly ribbed and moderately netted; a strong grower, heavy yielder and of handsome appearance, and is one of the best of the orange fleshed sorts. Well suited for both the home garden and the market. Particularly adapted to the West.

Packet, 10 cts.; ounce, 25 cts.; ½ pound, 75 cts.; pound, \$2.50.

CHAMPION MAR-KET.—(Green flesh.) This is the same as Starn's Favorite. It is a nearly round melon, as shown in the illus-tration, thickly netted, tration, thickly netted, and with green flesh that is deep and of good flavor. It originated with one of my New Jersey customers, Mr. E. N. Starn, who for years past has grown many acres for market. This variety is an enormous cropper, but a very shy seeder, the interior cavity being small. It is a most desirable is a most desirable melon for home or for market. It is an exceldesirable lent shipping melon. Packet, 5 cts.; ounce, 15 cts.; ½ pound, 40 cts.; pound, \$1.50.

CHAMPION MARKET MUSKMELON

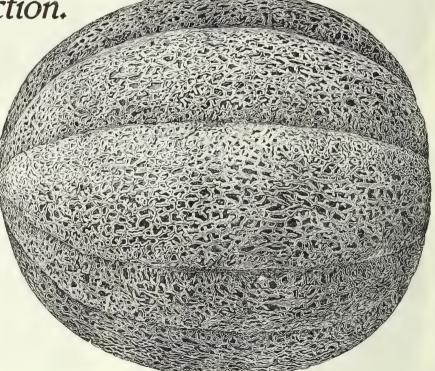

BALTIMORE OR ACME MUSKMELON

BALTIMORE.—
(Green flesh.) Also called Acme, Baltimore Citron, Baltimore Nutmeg, etc. This melon is large, showy and quite early. It is strongly netted, and has thick green flesh of rich flavor and aroma. Is popular in the hotels. Is popular in the hotels and restaurants and at the seaside resorts for its the seaside resorts for its superior table qualities. It is a well shaped and well marked melon. Pkt., 5 cts.; oz., 15 cts.; ½ lb., 60 cts.; lb., \$2.00.

Maule's Perfection.

The most delicious of all large melons. Weighs 8 to 10 pounds each, and attracts attention anywhere. Flesh from 2 to 3 inches in thickness, and in shape and general appearance it resembles the large French melons sold on the fruit stands of the large cities at \$1.00 to \$2.00 each.

(Salmon flesh.) I am very glad indeed to announce this year that I have a very fine crop of Maule's Perfection Muskmelon. Last year I hardly had enough seed to go around at \$5.00 per pound; but this season I am able to more than cut this price in half. The shape of Perfection is well shown in the illustration herewith; color of skin is a deep rich green, well ribbed and thickly netted, while the flesh is a rich salmon. The melon is nearly all flesh, the interior being very small, hardly large enough to accommodate the seed. In flavor it is simply unexcelled, and it certainly justifies its name, given by me in 1884, by its past experience and real merit. I can safely challenge any seedsman in America to produce a finer melon in flavor or appearance. It is so thick fleshed that one melon is enough for three or four people under ordinary circumstances, and in a patch of an acre or more you can find hundreds of melons that very closely resemble the large French melons sold on fruit stands. If it has a fault it is in the fact that it will not stand shipping like Rocky Ford or other similar varieties, but for the home garden or near market trade it is unsurpassed.

MAULE'S PERFECTION MUSKMELON.

Prices of Maule's Perfection for 1910 as follows: Packet, 10 cents; ounce, 20 cents; quarter pound, 60 cents; pound, \$2.00.

A. H. Gould, Elmira, N. Y. This year as sort of an experiment I used seeds from several different seedsmen, including some bought at home, and can truthfully say that yours came out best of all. Your Perfection Muskmelon was the talk of the city. I was besieged to death for melons. The largest commission house here used my melons (as far as they would go) for the firms own private use, when they were handling carloads every day from Rochester, N. Y. I could not sell the product of the Elmira bought seeds at any price, while yours sold above the market quotation.

E. D Patterson, Marion, Iowa.—The seeds were true to name, germinated excelently did well and gave me an abundant crop. My muskmelons were the best in the market.

Mrs. R. H. Bell, Knoxville, Tenn.—I raised a muskmelon that weighed 15 pounds from seed of your Maule's Perfection last year.

H. M. Hayes, Van Vleck, Texas.—My cabbage was one of the best I ever raised. Melons brought me a humming good price. I have been gardening for 8 years, Theodore F. Miller, Fairton, N. J.—Your seeds were certainly as good as could be. The Bowman's New Gold Coin Muskmelons grew fine and were extra good quality.

F. Dorsey Ensor, Fowblesburg, Md.—Your seeds which I purchased from your firm were as you represented them to be. The yield was large and perfect in quality. The Maule's Model Cantaloupe was delicious.

MONTREAL

MAULE'S PRIZE JENNY LIND MUSKMELON

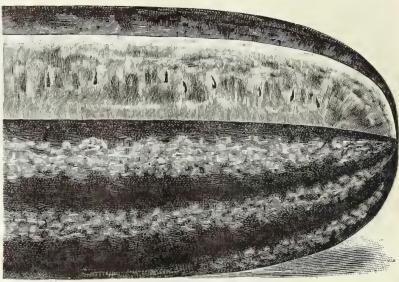

BANANA MUSKMELON.

WATERMELONS. Culture—Watermelons do best on light, well drained soils, but there are varieties adapted to heavy loams. The hills should be 8 feet apart each way, with some well rotted manure in each hill, thoroughly incorporated with the soil. Plant the seed as soon as the weather is really warm and settled. One ounce of seed will plant 30 hills; 2 or 3 pounds of seed to the acre. Allow two or three plants to remain in each hill.

PANMURE ALL-HEART WATERMELON.

is sure to excite the admiration of all lovers of fine watermelons. It is not only of superb flavor, but is all its name implies. Solid as a cannon ball, and while it has a thin rind, the skin is firm, consequently making it a good shipper. At Panmure our trial patch of about three-quarters of an acre contained more than 3,600 watermelons, of which 3,500 would have commanded the highest market price. New Jersey is a great melon district, but for miles around the neighbors drove to see the Panmure All Heart, and were astonished at its superb flavor and wonderful productiveness. Seeds are about the same size as an apple seed; but, notwithstanding this fact, the average weight of the melon is 30 to 40 pounds. The shape, size, etc., is well shown in illustration. Not a single one of my customers who grow watermelons should fail to make a trial of Panmure All-Heart this season, as it is sure to please the most exacting. I cannot recommend this Panmure All-Heart too highly for home use or for market.

Pkt., 10 cts.; oz., 20 cts.; 1 lb., 60 cts.; 1b., \$2.00.

PANMURE ALL-HEART WATERMELON.

Wonderful McIver or Sugar Melon.

The Sweetest of All.

The Sweetest of All.

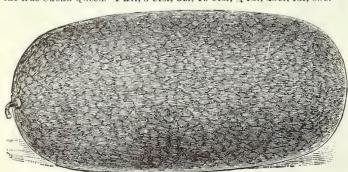

This widely famous watermelon is, I believe, the sweetest ever put before the people of this country. It is of medium size, with striped or variegated exterior, beautiful red flesh, and light colored or white seeds. The flesh is entirely stringless, and of perfect quality as to texture. The vines are strong, thrifty and prolific, and well adapted to withstand either wet weather or drought. This melon was grown for many years by Col. E. R. McIver, of South Carolina, president of his county agricultural society, and a watermelon enthusiast, and he considered it the sweetest within his knowledge. The seed came originally from the West Indies. I introduced it to the American public in my 1894 catalogue. Since that time it has been tried by many thousands of my customers, both North and South, and unlimited praise is given to it. It is well adapted to nearby markets, but is rather delicate for long freight shipment. I highly recommend Wonderful Sugar to every melon fancier.

Pkt., 5 cts.; oz., 10 cts.; ½ lb., 30 cts.; lb., \$1.00.

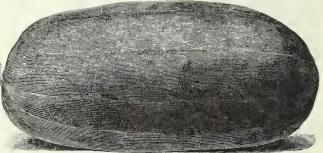

WONDERFUL MCIVER OR SUGAR MELON.

FORDHOOK EARLY.—One of the largest of the extra early varieties, and claimed to be the earliest of all. Shape nearly round. Color a medium shade of green. Flesh bright red, and of deliciously sweet flavor. The rind is sufficiently hard to make it a good shipper. Its originator, who lives in Delaware, says that this variety always matures first in competitive trials with other sorts, and may justly be regarded as the earliest of all. Pkt., 5c.; oz., 10c.; ½ lb., 30c.; lb.,\$1.00. CUBAN QUEEN.—A favorite watermelon for home and market. Exterior beautifully striped and mottled. Rind thin but firm. Flesh bright red, solid, sweet and luscious. One of the best keepers of all the watermelons, and a first rate shipper. Specimens of this splendid variety weighing 100 pounds have been grown. The Cuban Queen is a very prolific and profitable melon, and is planted extensively for market purposes. It is in equally high esteem with consumer and grower. My seed of this favorite melon is of headquarters stock, strictly pure from carefully selected melons, and I can recommend it to all wishing the true Cuban Queen. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 25c.; lb., 85c.

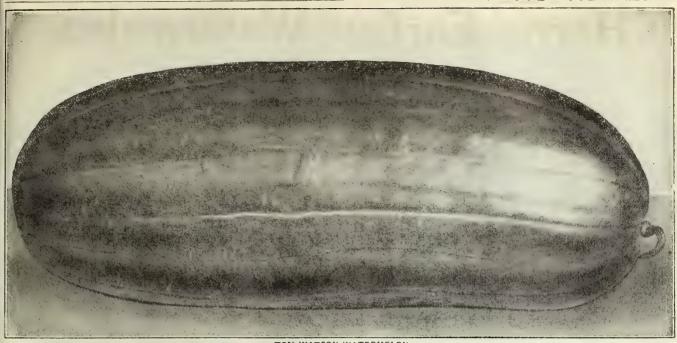

GRAY MONARCH OR LONG WHITE ICING WATERMELON

THE KLECKLEY SWEETS WATERMELON.

THE KLECKLEY SWEETS.—This high bred, delicious melon was originated in the South, by Mr. W. A. Kleckley. It is especially celebrated for its fine flavor. It is a long, oval shaped watermelon, with a dark green rind. The flesh is scarlet, very firm, and of lusticious quality and crisp texture. It is yearly becoming more widely popular. It is a good family garden melon, but the rind is rather too tender for distant shipping. It gives satisfaction almost everywhere, and I can recommend it for use both North and South. Packet, 5 cts.; ounce, 15 cts.; ½ pound, 40 cts.; pound, \$1.25. GRAY MONARCH OR LONG WHITE ICING.—The exterior color of this fine melon is a light green, though its mottled markings make it appear gray. The flesh is deep red in color, and equal or superior in quality to the old Icing from which it is derived. It differs in shape as well as in size from its parent, but lacks none of the virtues of that sweet flavored variety. Specimens of Gray Monarch weighing 60 to 70 pounds have been produced. It has become widely popular. Pkt., 5 cts.; oz., 10 cts.; ½ 1b., 30c.; 1b.,\$ 1.00. Note. When you order seeds to go by express, you to pay the transportation

NOTE. When you order seeds to go by express, you to pay the transportation charges, 10 cents may be deducted from the pound prices.

TOM WATSON WATERMELON.

Tom Watson Watermelo

the South for the Tom Watson Melon. Although comparatively a new melon it seems to be an instantaneous success in some of the very best watermelon growing sections of the country. The illustration was watermelon growing sections of the country. The illustration was taken from a melon sent into my office last summer of an average specimen of the stock my seed was being saved from; it weighed 36 pounds, and my boys at the office in sampling it, thought it about as delicious a melon as they had ever eaten. As may be seen from the cut, Tom Watson is a long green melon, which at times grows exceptionally large, often weighing from 60 to 70 pounds, and is at the same time one of the most prolific melons in cultivation. It is a most excellent shipper for long distances, although the rind is thin, the flesh is of most superb quality and intense red in color. In conclusion would say, where three or four acres were grown in 1908, in 1909 several hundred were planted, and this history repeats itself wherever Tom Watson has been introduced. I have secured a fine lot of direct headquarters seed, which I offer at the following prices

Packet, 10 cts; ounce, 20 cts.; 1/4 pound, 40 cts.; pound, \$1.50.

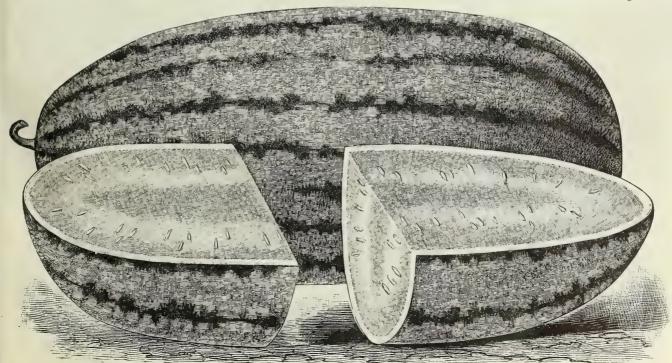

BRANCH'S IMP. GEORGIA RATTLESNAKE.

The old Rattlesnake has always been regarded as a fine melon; my improved strain is the result of careful selection by an experienced Georgia melon grower, Mr. Steiner Branch. Mr. Branch unhesitatingly claims, and I agree with him, that this is the best strain of Rattlesnake melon in existence; in quality and flavor it is not surpassed. It has a thin, tough rind, which makes it a good shipper. Flesh deep scarlet, sweet and delicious; shape oblong, striped and mottled with various shades of group as well shown in given the first product of the stripe with various shades of green, as well shown in illustration. For years the old Rattlesnake has been largely grown in the South and shipped to Northern markets, but no one who has been growing the old Rattlesnake will ever plant it again after trying Branch's Improved Strain.

Packet, 5 ets.; ounce, 10 ets.; ¼ pound, 30 ets.; pound, \$1.00.

P. B. Mundy, Harlem, Ga.—I have been planting the Tom Watson Melon for several years, and consider it the best of any of the varieties I know of for many reasons, it grows large and is very prolific, and is almost entirely free from speckled ends; it is a fine shipper. In fact, my customers prefer it in preference to the well known Georgia Rattlesnake, which is in itself a very high recommendation.

The American Fruit Union, (Car lots exclusively) Cincinnati, Ohio.—We beg to say that we consider the Watson Melon a first-class shipper, and a favorite seller We find that pound for pound they outsell the Rattlesnake and believe that taking everything into consideration the Watson is the best market melon to grow.

BRANCH'S IMPROVED GEORGIA RATTLESNAKE WATERMELON.

Harris' Earliest Watermelon.

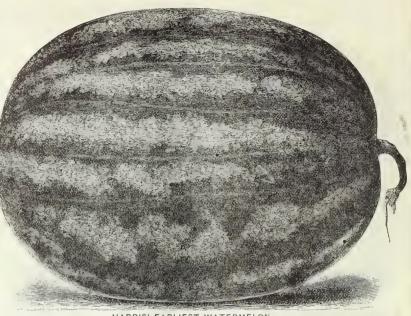

Sweetest Early Melon. Largest Early Melon. Best Shipping Early Melon.

The Harris is the earliest watermelon on the market; the sweetest early melon, the largest early melon and the best shipper in the early class. These are sweeping statements, but they are true. Moreover, the Harris will outyield any other early melon.

The general shape and appearance of the Harris are shown in the illustration. The skin is mottled with green and white. The flesh is red, sweet, juicy and crisp. The seeds are black. The weight varies all the way from 12 to 40 pounds, the average being 15 to 20 pounds. Its table quality is first-class.

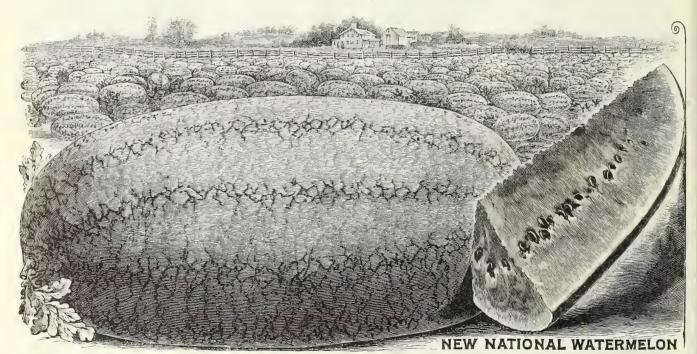

Previous to its introduction the originator, Mr. B. F. Harris, of Tennessee, wrote me as follows: "For twenty years we have been trying to find an extra early watermelon, one that we surely could depend upon, one with which we could beat all competitors, and one that would be the first on the market; and at

ceeded beyond all expectations. We are sure that we are We have never seen its equal."

last our efforts are crowned with success. We have suc-able to introduce the earliest watermelon in the world.

Packet, 10 cents; ounce, 20 cents; \(\frac{1}{4}\) pound, 40 cents; pound, \$1.50.

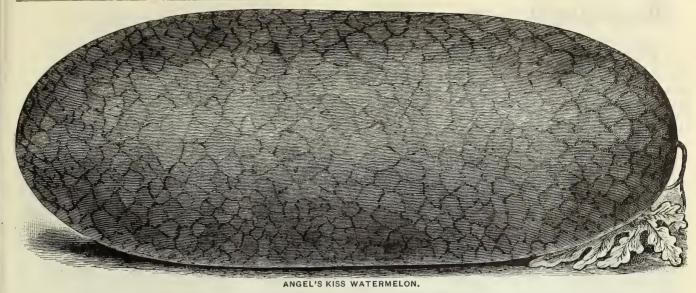

Maule's New National Watermelon.

The reason that this fine, new watermelon received the is pale, with dark markings, resembling Seminole, but with name of National was because of its proven ability to flour- markings more distinct. The flesh is brilliant red in color, ish almost anywhere, even in districts where watermelons and remarkably solid, so solid, in fact, that a 40-pound are not usually grown.

well in the North. In shape it is oblong. The outside color very tough, insuring good shipping qualities.

National watermelon does not appear to be much larger than The National is a watermelon of medium to large size and a Seminole weighing only 25 pounds. The flavor is delicious, of high table quality. It is of Southern origin, but thrives and the flesh entirely stringless. The rind, though thin, is

Packet, 10 cents; ounce, 20 cents; pound, 40 cents; pound, \$1.50.

Angel's Kiss Watermelon.

This fine watermelon originated in Texas and my attention was first | a heavy bearer of large mottled, silver gray melons with very tough directed to it on account of its most remarkable name. After giving it a thorough trial at Panmure I have come to the conclusion there is only one objection to this superb melon and that is its name. Angel's Kiss originated with one of the largest Southern melon growers who named it Angel's Kiss on account of its delicious flavor. Up to date it has only been grown to a limited extent among market growers in the State of Texas. It is entirely distinctive and a handsome melon of large oblong shape, which is well shown in the illustration herewith taken from a photograph. The flesh is bright red, solid, firm and of melting flavor. The vine is a remarkably strong vigorous grower and been grown for me by the originator and is limited.

thin rind. The melons measure from 20 to 30 inches in length, with an average weight of from 30 to 40 pounds each, ripening through and through and is one of the very earliest good melons in cultivation. It is thoroughly distinctive and the melons are most attractive; whether in the field or on the market stall, attracting attention at all times. The seed is pure white. In conclusion I would say that growers for market will find Angel's Kiss a rapid seller, a good shipper and a meion that will be called for to the exclusion of other sorts by customers after they have once sampled it. My supply of seed has

Packet, 10 cents; ounce, 20 cents; quarter pound, 60 cents; pound, \$2.00.

THE DIXIE.—A watermelon of highest quality and value. The size is large, specimens weighing 50 lbs. being not infrequent. The flesh is scarlet, very fine and extra firm. A noteworthy and very valuable feature of this watermelon is the fact that the rind, though thin is

almost impene-trable, giving it remarkable remarkable
keeping quality.
The variety is
one of the most
prolific known,
often producing
6 to 8 large melons on a single
vine. The vines
root at the joints,
and thus become and thus become more drought resisting and vigorous. Pkt., 5c.; oz., 10c.; ½ lb., oz., 10c.; ¼ 11 25c.; lb., 75c.

Deduct 10 cts. per lb. from all Garden Seeds when you order by express and you pay the transportation charges.

KOLB'S GEM.—This is a favorite among Southern growers for shipping purposes. The shape is oblong to nearly round; color and markings as indicated in the engraving. The melons weigh from 30 to 50 pounds each. The melons weigh from 30 to 50 pounds each. The rind, though thin, is tough. Flesh is bright red. Vines productive; a profitable market melon. Pkt., 5c.; oz., 10c.; 1/4 lb., 30c.; lb., 85c.

TRUE DARK ICING WATERMELON.

TRUE DARK ICING.—A nearly round watermelon, with very thin rind. The flesh is solid and sweet. An excellent shipper, notwithstanding its thin rind. I know this to be one of the most desirable melons. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; lb., 75 cts.

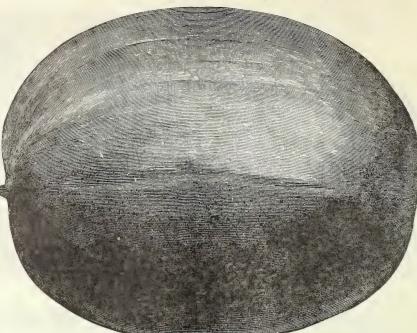

FLORIDA FAVORITE.—A beautiful melon, with dark and light green exterior. Shape oblong. Flesh bright crimson, crisp and deliciously sweet. Ripens ahead of Kolb's Gem, Ironclad or Rattlesnake. A good shipper. Sample specimens of this melon sent me from Florida always reach Philadeplhia in prime condition. Pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 30 cts.; lb., \$1.00.

Black Boulder or Black Diamond.

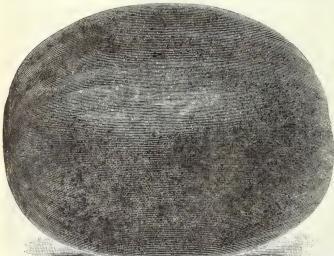

This excellent shipping watermelon, originated in New Jersey; by one of the largest melon growers. Enormously productive, reaching a mammoth size, of uniform symmetrical shape, roundish to bluntly oval, and this similarity of shape runs through the entire field. With rich, dark green, almost black skin. Flesh bright red and firm. It cuts equal to any market melon, and its shipping qualities are phenomenal, no other melon equaling it in toughness of rind; in this respect superior to Kolb's Gem, while it is fast becoming one of the leading melons for market. It is one of the best all around shipping melons.

Pkt., 5 cts.; oz., 10 cts.; \(\frac{1}{4}\) lb., 30 cts.; lb., \$1.00.

Perry Wright, Oriskany, Va,—Maule's Seeds for 1908 were the best I ever used. Every seed came up. The Angel's Kiss Watermelon was worth its weight in gold.

BLACK BOULDER OR BLACK DIAMOND WATERMELON.

This splendid market and shlpping melon, for which I had a number of calls last spring, I now list for the first time. Its fine appearance makes it a ready-seller in the market, and a popular variety for ship-pers. The rind is a deep bluish green, like that of the Duke Jones; dark red flesh, solid and sweet. The melons are rather short in form, but thick through, something like the Black Boulder, and are of large size. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00.

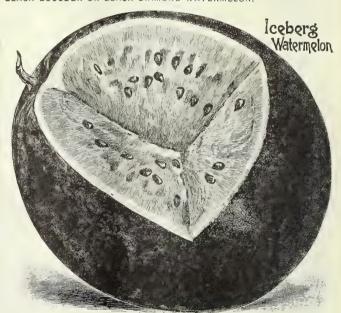

PEERLESS OR ICE CREAM. - A watermelon which I recommend for garden culture. Size medium. Color mottled green. Flesh rich scarlet and sweet; rind thin. Vine is very produc-tive. Being thin in the rind it is not so well adapted for shipping to the market. Notwithstanding that it is grown exclusively by some for that on account of its earliness. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 30 cts.; pound, \$1.00.

E. S. Scott, Mt. Airy, N. C.—The Angel's Kiss Watermelon is the finest that I ever w. I had the finest tomatoes that I ever raised—also had fine beets.

saw. I had the finest tematoes that I ever raised—also had fine beets.

J. L. Slaughter, Westminster, Md.—I am very much pleased with your seeds, and considering the drought they did exceedingly well. The Angel's Kiss Watermelon is extra fine. Maule's Seeds are good enough for me.

Mrs. Helen B. Snyder, Bellingham, Wash.—I ordered seeds of you last year, and they were fine, so I am sending you my order this year. You sent me a packet of Panmure All-Heart Watermelon, gratis, and I want to tell you that out of 14 different kinds of watermelon, it was the peer of all; in fact, after eating Panmure All-Heart Melons, the others did not taste good.

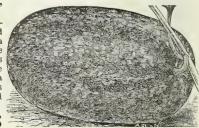

ICEBERG OR BLUE GEM.

It may be described as a distinctly improved form of the old cele-brated Kolb's Gem, which has never been excelled as a shipper. It brated Kolb's Gem, which has never been excelled as a shipper. It resembles Kolb's Gem in shape, size and appearance, but is darker in color, both outside and inside. Where it rests upon the ground it is yellow, while Kolb's Gem is white. The outside of the new melon is dark green, with lighter markings, but the general effect is dark. The flesh is deep red and very sweet. The rind is comparatively thin, but remarkably tough and not disposed to crack. I recommend Iceberg for shipment to distant markets. The excetlence of Kolb's Gem, especially as a profitable shipper, is so well known that Iceberg should at once be in very wide demand for commercial purposes. Packet. 5 cfa.: once be in very wide demand for commercial purposes. Packet, 5 cts.;

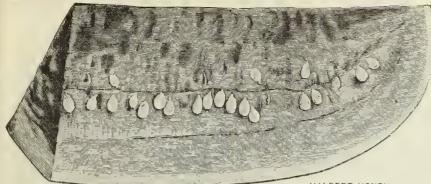

ounce, 10 cts.; ¼ pound, 30 cts.; pound, \$1.00.

PHINNEY'S EARLY. Melons of medium size and oblong shape, marked with two shades of green. The rind is thin. The red flesh is very sweet and tender. The vine is productive and a sure cropper, the melons maturing early. Adapted to Northern States.

Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, 85 cents.

PHINNEY'S EARLY WATERMELON.

HALBERT HONEY

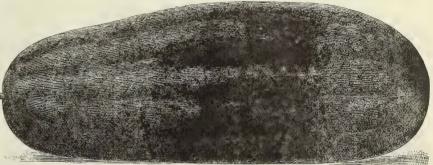

HALBERT HONEY WATERMELON.

This melon is described by the introducers as follows: Equaling in flavor and as handsome in color as the Kleckley Sweets, but more regular in form, and much more productive. Growing as long as the Kleckley Sweets, the melons are blunt both at stem and blossom end, generally free from any appearance of neck. They average 18 to 20 inches in length; 6 to 8 inches in diameter. Color of rind a clear, glossy deep green. The fiesh is a beautiful crimson, extending to within less than half an inch of the rind, which like the flesh is so tender it will not stand shipping any distance unless carefully handled. It is essentially the home melon for the home garden and for local markets. I offer direct headquarters seed that can not be surpassed. Pkt., 5 cts.; cz., 10 cts.; ¹/₄ lb., 30 cts.; lb., \$1.00.

Alabama Sweet. or Carolina Bradford.

This splendid large melon, as shown in the illustration, is oblong in shape. The tough skin is very dark green, with still darker stripes; flesh is dark red in color, fine grained, sweet and luscious, entirely free of stringness. A first class shipper; under good cultivation they grow to a very large size, frequently weighing from 30 to 60 pounds, and commanding the very highest prices in the market.

Packet, 5 cents; ounce, 10 cents; pound, 30 cents; pound, \$1.00.

ALABAMA SWEET OR CAROLINA BRADFORD WATERMELON.

MAMMUTH INUNCLAD WATERMELON

MAMMOTH IRONCLAD.

This extra large watermelon is faithfully pictured on this page. It is one of the great commercial melons. The flesh is of prime quality, always solid and never mealy. The hear large, and the flesh next to the rind is fully equal in quality to that at the centre. The flesh is of prime quality, always solid and never mealy. The heart is very formly grows to greater size with more marketable melons to the acre than any other of the extra large varieties. Ironclad will mostly resist a fall of 3 feet without fracture or even bruise, and is one of the best shippers known. It has excellent lasting qualities in the field,

THE JONES WATERMELON

remaining a month or more on the vines without injury. If taken from the patch early in October will keep until Christmas.

Packet, 5 cents; ounce, 10 cts.; ¼ pound, 30 cts.; pound, \$1.00.

THE JONES.

(DUKE JONES.)

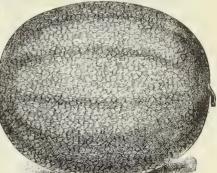

A large round, dark green, faintly striped melon, that stands shipping as well as the Kolb Gem. The flesh is a bright red, very sweet and juicy; melons often weigh 60 to 70 pounds. An excellent melon for home use as well as shipping purposes.

Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 30 cts.; lb., 85 cts.

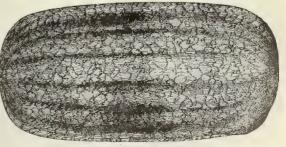

Sweet Heart.

large watermelon, nearly globular in shape, but a little longer than thick. The skin is a bright, beautiful mottled green. The flesh is red, firm, crisp, melting and exceedingly sweet. A good keeper and excellent shipper, and a good selling melon, being at tractive and of good quality. The quality continues to improve after ripening. popular as a shipping melon particularly in

Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00.

SWEET HEART WATERMELON.

SEMINOLE WATERMELON.

SEMINOLE .- A large and very productive early watermelon. Color usually gray; sometimes a light green. Flesh carmine; of good quality and flavor. The rind is very thin, but so tough as to make the melon a most excel-lent shipper. Gray and green melons borne on the same vine. One of the most popular watermelons on this page. Pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 30 cts.; lb., \$1.00.

ONIONS. A Leading Specialty for Years.

Another year I have to report a most successful crop of all | for many years past, on account of large stocks; at the same varieties of onions, except the Southport White Globe, which is again very short, as well as Large Red Wethersfield. My prices last year, as my friends well know, were very reasonable; but I am going to do even better this season; in fact, I am offering onion seed this year at lower prices than I have none, equaled by few.

time the quality may be depended upon and will be sure to please my customers who favor me with their orders. I flatter myself that my high class onion seed has made a reputation for itself wherever onions are planted, surpassed by

Culture.—Onions do best on a rich loam, previously cultivated for two years. Stiff clay and light sand are equally unfavorable. The land should be highly fertilized with well-rotted manure, complete fertilizers, etc. Fresh stable manure has a tendency to produce soft onions. Drill in 4 to 5 lbs. of seed per acre, one-half inch deep. If sets are wanted, use 60 to 80 lbs. of seed per acre. Six to ten bushels of sets will plant an incomplete though stable size onions (according to variety planted) are easily produced the first year from early spring sown seed. Culture should be frequent though shallow. The same ground may be used for onions, season after season, if well fertilized annually. Bone meal is an excellent fertilizer. Winter storage demands dryness and protection from sudden changes. Onions should never be handled while frozen.

Maule's Large Red Wethersfield.

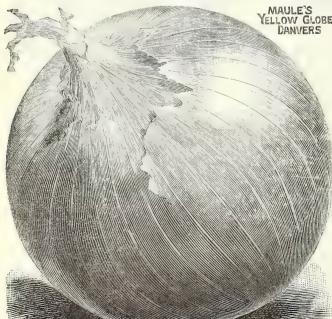

> This has been one of my leading specialties for nore than twenty years. The engraving is This has been one of my leading specialities for more than twenty years. The engraving is from a photograph. In color the skin is deep purplish red. The flesh is white, moderately grained, and of good character. One of my patrons grew 66,905 pounds of Maule's Large Red. Wethersfield onions on a single acre of ground, some years ago, in competition for a prize of \$250. Yields of 600 to 800 bushels per acre are not unusual. Onion seed value depends greatly upon the way the stock is selected and cared for, and the seed which I offer is of the earliest form, grown from hand sorted bulbs and sure to pro-duce large onions. Specimens of Maule's Large Red Wethersfield weighing one or even two pounds the first year from seed are not uncommon, and there is a noteworthy uniformity of size, scallions being unknown and is a magnificent keeper. Many strains of Red Wethersfield are offered the American public, but my careful comparative tests convince me that none surpass the one here described. It is in every way a perfect red onion for home and market purposes.

> > Packet, 10 cents; ounce, 25 cents; 1/4 pound, 70 cents; pound, \$2.25.

Maule's Yellow Globe Danvers.

My strain of Yellow Globe Danvers Onion is unsurpassed. It always attains a good size, with deep bulb and small neck. It is choice in flavor, being rather mild, and is invariably a market favorite at prices above average quotations. It frequently produces 600 bushels per acre, and capable of doing even better under extra culture. It is early and profitable, and a splendid keeper. My strain of Yellow Globe Danvers has been famous for the past quarter century in every onion growing district of the United States, and I have supplied direct to onion growers more than 200,000 pounds of the seed.

Packet, 10 cents; ounce, 15 cents; ¼ pound, 40 cents; pound, \$1.35.

YELLOW GLOBE 25 Cents

Extra Early Red.

It will succeed in cold, mucky ground, where other sorts would fail. It matures ten days sooner than the Red Wethersfield. It can be made to produce fine, marketable onions in 90 days from the sowing of the seed. It is of mild flavor, and keeps well. The color is a deep, rich red, the grain is fine and close and the onion is solid and heavy. It is hardy, reliable, and well adapted for early market. Extra Early Red will succeed almost anywhere but is peopliarly fitted for northern latitudes. ceed almost anywhere, but is peculiarly fitted for northern latitudes, where the seasons are short and cool.

Packet, 10 cts.; ounce, 20 cts.; ½ pound, 60 cts.; pound, \$2.00.

It Is a Fact Worthy of Attention

that all my prices on Onion Seed are for the seed postpaid by mail. Should you order seed and pay the transportation charges yourself, deduct 10 cents from every pound ordered.

laule's Prizetaker

I have, personally, looked in various parts of Europe and America for an onion surpassing Prizetaker in beauty, productiveness and general merit, and believe there is nothing better in the whole world, unless it be the New Commercial. Prizetaker is unexcelled either for home use or as a money maker.

Headquarters Stock can be obtained only from Wm. Henry Maule.

I named and introduced this great onion in 1888, and ever since have given it special prominence in every catalogue I have issued. Today, twenty-one years after it was named by me, it will be found prominently illustrated in almost every catalogue. Some call it Smith's Prizetaker, Brown's Prizetaker, and Robinson's Prizetaker; but no matter how many seedsmen put their names in front of Prizetaker, there is only one Prizetaker, and that is Maule's, named and introduced by me, and for five years catalogued by myself exclusively.

Prizetaker is by far the handsomest, most productive, most popular and best of all Yellow Globe Onions. It is a bright, itself a great acquisition to farmers and gardeners, and is clear straw color, and always grows to a uniform shape, which is a perfect globe. It has a very small neck, and ripens up superior Yellow Globe Onion under cultivation.

without stiffness of the neck. In market it never fails to attract attention on account of its beauty, and is sure to bring a far better price than any other onion. It is even more attractive in appearance than the large Spanish onions sold on the city fruit stands-in fact, takes the place of that variety.

My predictions made years ago, at the time of its introduction, that Prizetaker would supplant all others of its class, has long since been verified. It has attracted more attention and awakened wider and more cordial enthusiasm than any other onion ever introduced to the American public, It has proven

Packet, 10 cents; ounce, 25 cents; quarter pound, 70 cents; pound, \$2.25, postpaid.

White Welsh Onion.

WHITE WELSH ONION CULTURE.—Sow the seed thinly in rows 12 to 16 inches apart; using 8 to 10 pounds of seed per acre on rich land, preferably in the early spring, but not later than the latter part of July, so as to have plants well established before winter sets in. Plants hardy. Requires no mulching.

My old friend Mr. Greiner had this to say about this bunch onion:—"In the new bunch onion culture, I am figuring out the gross returns from one-sixth acre to be fully \$1,000, nine-tenths of it being clear profit. Fig. I shows a bunch as given in the Cyclopedia of American Horticulture. I find this onion hardy as an oak, and the suggestion of a bulb makes it suitable for a bunch onion. A bunch, such as we made them and found ready sale for them, is shown in Fig. 2.

WHITE WELSH ONION

These bunches were quite attractive and coming in a season when green stuff is scarce, extremely serviceable for the purposes of a bunch onion. We put about ten stalks to the bundle, or twice as many as found in the average bunch in the market. We could have disposed of a good many more than we had, even in our local market, and Buffalo and the smaller cities nearby would gladly have taken large quantities. Where the plants stood fairly thick in the row (as thick as we should aim to have them, and as we can get them by sowing 8 or 10 pounds of seed to the acre, on rich ground) we made four dozen bunches from 6 feet of row, the rows being 14 inches wide by 6 feet long brings one dollar, you can easily figure out that the acre rate is fully \$6,000, less than one-tenth of which goes for labor in preparing (cleaning and bunching) the product for market.

Pkt., 10 cts.; oz., 30 cts.; ½ 1b., \$5 cts.; 1b., \$3.00.

WM

My attention was first called to the Commercial Onion six or seven years ago by one of the largest growers of onions in this country, who told me that he had been for years selecting them from my original Prizetaker and breeding them down to a size that he considered more merchantable. His efforts have been rewarded by securing an onion fully as handsome as the Prizetaker in every way; of more uniform size, and whose keeping qualities were simply remarkable and decidedly superior to the parent variety. Six hundred bushels per acre have been no unusual yield, and this quantity has been frequently surpassed. Twenty-two years ago I introduced the Prizetaker onion, and in all that time I have not found a single variety that could equal, let alone surpass it, in any way, until now. I take great pleasure in offering my customers Maule's New Commercial Onion, a variety that I am satisfied will prove fully as popular and equally as desirable.

fied will prove fully as popular and equally as desirable. Pkt., 10 ets.; oz., 25 ets.; ½ lb., 75 ets.; lb., \$2.50, postpald.

CLUB AGENTS.

You have no idea how easy it is to make up a club order among your neighbors for Maule's Seeds until you have tried it. If you have been a customer for Maule's Seeds in the past, you can qualify as an agent for them. I never have agents, under any circumstances, who have not grown Maule's Seeds, as I must have as agents people who can tell their friends just how good Maule's Seeds are. Why not go after part of that \$1,000 offered on page 7? Write today if you are one of my customers for terms, and some extra catalogues.

The Southport Globe Onions.

The Southport Onions have increased wonderfully in public favor during the last five or six years, and they well deserve their popularity. In almost all markets they will invariably bring top prices. They are not only of handsome appearance, remarkable solidity and good keepers, but also fully equal in yield my best strains of other varieties, 900 bushels to the acre from seed the first year being not unusual. For years I have taken considerable pride in all three of the Southport Onions named below, and can say in perfect candor that my strain of each one of these globe onions cannot be surpassed, if equalled, in this country. I am very sorry to have to report again a shortage on Southport White Globe Onion; of the other two varieties I have an excellent supply, enough to meet all requirements; but I really have not enough Southport White Globe to go around, unless the high price I ask for it should restrict the demand.

SOUTHPORT RED GLOBE.—Seven or eight years ago my annual sales of this onion did not exceed 500 pounds; today the demand runs into the thousands. In single districts in New York and Ohio, I frequently ship 1,000 pounds of this red globe onlon annually. It is a perfect globe, skin being of a rich glossy red; flesh fine grained, white and always mild and pleasant. Like other Southport onions it is very hardy and a splendid keeper. On my trial grounds at Briar Crest last season, it showed up the best of any of the Red Globes, and was the admiration of every one who took the pains to critically examine my onion trials

Packet, 10 cents; ounce, 20 cents; 1/4 pound, 50 cents; pound, \$1.60.

SOUTHPORT WHITE GLOBE.-This onion, on account of its handsome appearance, always brings top prices in the New York City markets. It is silvery white in color, globe shaped in form, flesh of delicious flavor, and a fine keeper. My strain of Southport White is equally as desirable as that of the Southport Red and Yellow Globe. Packet, 10 cents; ounce, 30 cents; 1/4 pound, 90 cents; pound, \$3.25.

SOUTHPORT YELLOW GLOBE.—This is of the same general character as the two varieties described above, except the skin is a rich yellow, flesh of course being pure white, and of a mild and delicious flavor. It is one of the most popular of the Yellow Globe onions, and my annual sales run into thousands of pounds. These three varieties of Southport Globe onions I have carefully bred up for years, so that I am sure all my friends who entrust their orders for these onions to me will be highly delighted with their crop and the price they secure for same next fall. Bear in mind that all three of these Southport onions ripen very evenly, and on this account particuiarly are wonderful keepers

Packet, 10 cents; ounce, 20 cents; 1/2 pound, 50 cents; pound, \$1.60.

NEW CRYSTAL WHITE WAX BERMUDA ONION.

Bermuda Onions.

I believe I was the first to start the industry of growing Bermuda onions in the State of Texas. Fifteen years ago I sold, one season, about 100 pounds of this onion seed in Texas, with such success that fortunes have been made, and thousands of acres have been, and are today, planted in many parts of the South, especially in Texas. My supply is grown on the Island of Teneriffe by the very best grower of onion seed on the Island. It is shipped to me in tins, and is in every way the highest grade of seed that can be produced anywhere in the Canary Islands. All the best seed grown of Bermuda onion is raised on the Island of Teneriffe, as that is where, also, the Bermuda growers always look for their supply, there being no seed that I know of raised in quantity on the Island of Bermuda.

NEW CRYSTAL WHITE WAX .- (Teneriffe Seed.) This is the large, white flat onion that has become so very popular in the last few years in parts of the South, especially in Texas. As a rule, there is not enough seed to go round. It is very early and of extremely mild and sweet flavor. Makes an excellent shipping onion, and does well not only in the South, but also in the North.

Packet, 10 cents; ounce, 50 cents; ½ pound, \$1.50; pound, \$5.00.

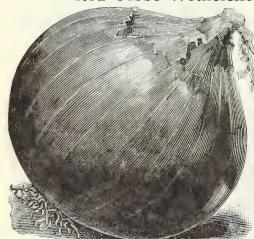

WHITE BERMUDA.—(Teneriffe Seed.) These are the immense onions which are not only grown in Bermuda to a great extent, but they are also popular in all our Southern States along the Gulf Coast. They are excellent for slicing, being of a very mild and sweet flavor, and desirable for the home garden. I know of no better strain than the seed I offer. Pkt., 10 cts.; oz., 40 cts.; 4 lb., \$1.25; lb., \$4.00.

RED BERMUDA .- (Teneriffe Seed.) This is an early pale red onion, of the same general character as the White Bermuda, except in color and that it does not grow quite so large. Pkt., 10 cts.; oz., 35 cts.; 1/4 lb., \$1.00; lb., \$3.50.

A standard market sort, very productive and profitable. Flattened in shape. The flesh is mild and good. An excellent keeper and shipper. At Philadelphia and elsewhere it is grown extensively for sets. Packet, 10 cts.; ounce, 20 cts.; ½ pound, 50 cts.; pound, \$1.75.

Red Globe Wethersfield.

RED GLOBE WETHERSFIELD ONION.

This handsome red globe onion has become very popular in the Northwest. Having had a number of calls for it, I grew a supply of the seed, and in 1904 offered it for the first time to my customers. It is the old reliable. This handsome first time to my customers. It is the old reliable, large Red Wethersfield bred to a globe shape, and while I do not consider it superior to Southport Red Globe, my customers port Red Globe, my customers will not make a mistake by giv-ing it a trial this season.

Packet, 10 cts.; ounce, 20 cts.; ¼ lb., 60 cts.; pound, \$2.00.

Round Danvers.

This is a strain originally selected from Yellow Globe Danvers, and perfected by careful breeding. Its table and market qualities are the same as those of its parent. It differs from Yellow Globe Danvers mainly in shape, being more flattened. The claim is made for it that it ripens more surely in moist situations than the globe-shaped sorts, and that it is a little earlier. It is certainly a first-class onion in yeld, flavor and keeping qualities. Pkt., 10 cts.; oz., 20 cts.; ¼ lb., 40 cts.; ib., \$1.50.

NEW ICY YELLOW ONION

ROUND DANVERS ONION.

New Icy Yellow.

This fine onion, on account of its peculiar color, I have given the name of ley Yellow. It is a very early variety for market or family use. Makes a very attractive and handsome colored yellow onion, tender, and wild and of tive and handsome colored yellow onion, tender and mild, and of fine flavor. The bulbs are large, somewhat flattened, skin pale yellow, flesh pure white. Very productive and an excellent keeper. Supply of seed is still limited.

Packet, 15 cts.; ounce, 50 cts.

Silver Skin.

Same as White Portugal, Philadelphia White, etc. A mild and pleasant onion, of somewhat flattened shape. It is very popular for family use and one of the best for pickling, also for slicing or boiling. A favorite with many when young as a salad or bunching onion; excellent or winter. Near Philadelphia this variety is largely grown for sets, and is regarded as a standard sort on account of it being hard and firm and an excellent heaver. Packet, 10 cts.; ounce, 30 cts.; 1/4 pound, 85 cts.; pound, \$3.00.

Australian Brown.

AUSTRALIAN BROWN ONION.

able feature, aside from appearance and quality, is its long keeping ability. It will literally keep for a year or more. It has developed a sudden and wide popularity in this country since its advent here, especially in the Middle West.

Packet, 10 cts.; ounce, 20 cts.; 1/4 lb., 40 cts.; pound, \$1.50.

tion hones h - 1186

Ohio Yellow Globe.

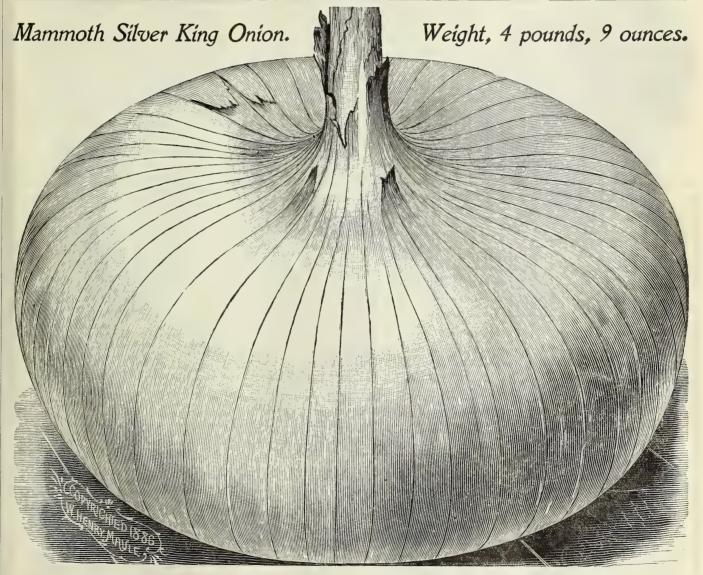

Until very recently this onion has only been known to a limited extent in parts of the State of Ohio, where it has long been considered one of the best of Globe onions. It is of handsome, bright, even vellow color, with small neck. Ripens early and all at once; the firm, solid bulbs are excellent winter keepers. It is reported that 800 bushels of Ohio Yellow Globe onions have been grown on a single aere of good land. It is especially recommended for heavy muck land on account of its early maturing qualities. My supply of this variety is particularly choice this season. Pkt., 10 cents; 02., 20 cents; 14, 16., 50 cents; 15.

MY policy of over thirty years ago, when I started in business in 1877, was the same as it is today, and I think the following extract republished from the introduction of our 1878 catalogue (published in the latter part of 1877) will be interesting, as it well illustrates the principles of the house at the present time:

"We exercise the greatest care to have all our seeds fresh and genuine, and of the highest possible excellence. We can confidently claim that for purity and reliability the seeds we offer this season are unsurpassed, and will give general satisfaction. The many flattering testimonials received from our customers this fall are ample evidence that they appreciate our honest endeavors to excel in the quality of our seeds, while our prices will compare favorably with those of any other reliable house. It is our aim to sell the best quality of seeds at moderate prices, within the reach of all, so there need be no excuse for anyone planting inferior or worthless seeds bought of venders or small retailers, who are careless as to the quality."

The above statement was made in the 1878 catalogue, a little catalogue that cost only one penny to mail, and contained fifty-one small illustrations; but that catalogue was the starting point for the establishment of this business.

Mammoth Silver King Onion.

Twenty-five years ago I started to boom this mammoth onion, and have had a wonderful demand for it in small quantities ever since, for it is acknowledged the largest white onion today, as it was 25 years ago. I do not recommend it except for the home garden, but there it always gives satisfaction, and excites the astonishment of all visitors. The skin is of a beautiful, silvery white. The flesh has a particularly mild and pleasant flavor, and is so sweet that it may be eaten raw like an apple. No other white onion attains such mammoth size, nor will any other white variety grow uniformly so large. The bulbs are of an

attractive shape, flattened, but thick, but it is a poor keeper. The average diameter of fully grown Mammoth Silver King onions is from 5 to 7½ inches. I have a record of one of these onions weighing 4 pounds and 9 ounces. Thousands of letters and postal cards have reached me containing words of the highest praise of the wonderful size, early maturity and good quality of this famous onion; and the fact that these voluntary testimonials come from all parts of the country proves the adaptability of the onion to a wide range of soil and climate.

Packet, 15 cts.; ounce, 40 cts.; 1/4 pound, \$1.25; pound, \$4.00.

SPANISH AND ITALIAN ONIONS.

ALLESSO, OF NATURAL SE

WHITE BARLETTA, THE SMALLEST ONION GROWN.
GIANT POMPEH. — A large, handsome,
reddish brown onion. Flesh pure white, very
fine grained and of remarkably mild flavor. Pkt., 5c.; oz., 20c.; 1/4 lb., 50c.; lb., \$1.75.

MAMMOTH RED TRIPOLI ONION.

NEAPOLITAN MARZAJOLA ONION.

NEAPOLITAN MARZAJOLA ONION.

NEAPOLITAN MARZAJOLA. — A large, early onion, with silvery white skin. A leader in the Italian markets and of proven merit in America. If sown early will grow to a large size the first year. A good keeper. Packet, 5 cts.; oz., 20 cts.; ½ lb., 60 cts.; lb., \$2.00.

MAMMOTH RED TRIPOLI. — A beautiful, large, flat onion, of excellent, flavor. Much like Bermuda Island Red, but less flat. Planted in Florida in October and November for early Northern markets. Packet, 5 cts.; ounce, 15 cts.; ½ pound, 40 cts.; pound, \$1.50.

EXTRA EARLY PEARL — One of the earliest white onions; of mild flavor and a good keeper. Somettmes grows 5 to 6 inches in diameter the first year from seed. Pkt., 5 cts.; oz., 20 cts.; ½ lb., 60 cts.; lb., \$2.00.

GIANT ROCCA OF NAPLES. — A globular shape onion, of reddish brown color. Tender and mild. Has attained a weight of 3½ pounds. Valuable for spring and autumn sowing. Pkt., 5c.; oz., 15c.; ½ lb., 40c.; lb., \$1.50.

GIANT GIBRALTAR ONION.

Giant Gibraltar.

This fine large onion is a beautiful globeshaped variety with a thin skin of light straw color. The flesh is white, mild and sweet, and the onion makes a large and quick growth. It is later than Prizetaker. It is excellent for fancy trade, including fruit stand display and extra choice market purposes. Pkt., 10 cts.; oz., 20 cts.; 1/4 lb., 60 cts.; pound, \$2.00.

Okra or Gumbo.

In high esteem for soups and stews. A fashionable Southern vegetable, of easy growth at the North. An annual. The pods are used when young and tender.

CULTURE.—Sow in May and June, after the ground is warm, in drills three feet apart, and thin to 10 inches apart in the rows. An ounce of seed to 100 feet of row.

KLECKLEY'S FAVORITE.—The pods average 6 ins. in length by 1½ ins. in diameter at the bottom, carrying the thickness well throughout the length. Plant grows 2½ to 3 ft. pkt., 5c.; oz., 15c.; ¼ lb., 30c.; lb., \$1.00.
PERKIN'S IMPROVED GIANT GREEN

POD.—A new Okra esteemed by canners and market gardeners. It is a great improvement on the old green podded sorts. Large hand-some green pods. Fine quality, very produc-tive. 4 to 5 ft. tall. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 20 cts.; pound, 60 cts.

DWARF GREEN.—A low growing variety. Pkt., 5c.; oz., 10c.; 1/4 lb., 20c.; lb., 50c.

LONG GREEN .- A taller variety than the preceding, bearing abundantly long pods which are ridged. Highly esteemed in the South.

Pkt., 5c.; oz., 10c.; ½ lb., 20c.; lb., 50c.

WHITE VELVET.—Pods are round and

smooth, while in other sorts the pods are ridged or square edged. Superior flavor and tenderness. It is very productive. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 20 cts.; lb., 60 cts.

ONION SETS. One of My Leaders for Many Years.

Philadelphia has long been famed, the country over, for growing the best onion sets, and I am prepared to furnish the choleest stock. Indeed, I include onion sets among my leading specialties, and spare no pains to produce them from thoroughbred seed and to keep them true to name. The peck and bushel prices on onion sets are subject to market changes. I sell all onion sets 32 lbs. to the bushel, except where noted.

YELLOW GLOBE DANVERS.—Grown from my own seed. This is one of the best onions for raising from sets. Pt., 20 cts.; qt., 30 cts.; 5 qts., \$1.25, postpaid. By ex. or fgt., not prepaid, qt., 20 cts.; pk., \$1.15; bu., \$4.00.

WHITE SILVER

WHITE SILVER SKIN.—Grown from my skin.—Grown from my best selected seed. These sets will produce onions very early in the season. Pt., 20 cts.; qt., 30 cts.; qts., \$1.25, postpaid. By express or freight, not prepaid, qt., 20 cts.; pk., \$1.25; bu., \$4.50.

LARGE RED WETH-ERSFIELD.—Grown from seed of my celebrated strain, at Panmure Seed Gardens.
One of the best red onions. Pt., 20 cts.; qt., 30 cts.;
5 qts., \$1.25, postpaid.
By express or freight,
In not prepaid, qt., 20 cts.;
pk., \$1.25; bu., \$4.50.

Onion Sets.

EGYPTIAN OR PERENNIAL TREE. pk., \$1.25; bu., \$4.50.

EGYPTIAN OR PERENNIAL TREE.—A perfectly hardy perennial onion, throwing up stalks every spring. It produces sets or small butbs at the summit of the stalk and the root also divides. It is often planted in autumn for scallions.

Pint, 20 cents; quart, 30 cents; 5 quarts, \$1.25, postpaid. By express or freight, not prepaid, quart, 30 cents; peck, \$1.00; bushel of 28 pounds, \$3.50.

POTATO ONION.—This really excellent sort multiplies by division of the parent bulb. It is a mild onion, maturing early, and is a good cropper. Does not produce seed.

Pint, 20 cents; quart, 35 cents; 5 quarts, \$1.50, postpaid. By express of freight, not prepaid, quart, 25 cents; peck, \$1.25; bushel, \$4.50.

WHITE MULTIPLIER.—Increases by division of the parent bulb, producing a cluster of small onions. Hardy, early and a good cropper. This variety does not make seed.

Pint, 20 cts.; quart, 35 cts.; 5 quarts, \$1.50, postpaid. By express or freight, not prepaid, quart, 25 cents; peck, \$1.25; bushel, \$4.50.

GIANT ITALIAN LEEK.

Sow in spring and transplant to rows a foot apart, with plants 4 inches apart in rows.

GIANT ITALIAN.—This variety gives great satisfaction Pkt., 5 cts.; oz., 16 cts.; ½ lb., 30 cts.; lb., \$1.00.

A bulbous root of the onion type, used A bulbous root of the onion type, used for flavoring Culture same as onions, except that the bulbs (sets) should be placed 2 inches under ground. When the tops turn yellow take up and dry in the shade. Sets, per Ib., 35c.; 3 lbs, \$1.00.

CULTURE.—Sow in early spring, in rows 2 to 3 feet apart, thin to 4 or 6 inches in the row. One ounce of seed will sow 2.0 feet of drill, 4 to 5 lbs. per acre in drills 2½ feet apart. Cover the seed ½ to 1 inch. Use rotted manure and fertilizer. Parsnips may be left in the ground all winter.

This new parsnip, from Portugal, will prove, I am sure, a striking and attractive novelty, as it has been many years since we have had a new parsnip. The shape is well shown in illustration (one-half nat-ural size). It is remarkably free from side roots; in fact, in this respect is about the cleanest of all parsnips. It is fine grained and of superior flavor, and if it had not been named White Lisbon might well be called an Improved Hollow Crown. Its handsome appearance would attract attention where, and I am very sure where, and I am very sure it will give the best o satisfaction to all my customers who try it. Pkt., 10 cts.; oz., 15 cts.; ¼ Ib., 30 cts.; lb., \$1.00.

Improved Half Long.

I consider this the best parsnip for market gardener or amateur. root is smooth, and the flesh fine grained and ci excellent flavor. It is excellent flavor. It is a heavy cropper. Being larger in diameter and shorter than the Long Smooth, it is harvested with less labor. Excellent for stock as well as for the table. Packet, 10 cts.; ounce, 15 cts.; ½ pound, 25 cts.; pound, 75 cts.

New Round Flat Short-Leaved Parsnip.

My friend, Mr. Ernest Benary, of Germany, a seedsman with whom many of my customers are acmany of my customers are acquainted, is putting out, this year, a new parsnip, and sends me the following description of it: "It is similar in form to the Egyptian Turnip-Rooted beet, grows very quickly, and its pure white flesh is firm and tender. On account of its very short foliage, Round Flat Short-Leaved requires considerably less room and therefore yields larger crops than the stronger less room and therefore yields larger crops than the stronger leaved sorts." I know I am perfectly safe in recommending this parsnip to my customers for trial, and have no doubt it will give satis Packet, 10 cents; faction. ounce, 25 cts.; 1/4 pound, 75 cts.; pound, \$2.50.

10 cts.; ½ pound, 25 cts.; pound, 75 cts.

DOUBLE CURLED PARSLEY

DOUBLE CURLED.—Compact; very curly and finely cut. Bright green. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 25 cts.; lb., 60 cts.

HAMBURG OR TURNIP-ROOTED.—The edible roots resemble a small parsnip, and it is esteemed for flavoring soups, stews, etc. Grown extensively by market gardeners near all large cities

Packet, 5 cts.; ounce, 10 cts.; 1/2 pound, 30 cts.; pound, \$1.00.

EANU

CULTURE.—Select warm light or sandy soil, rich in lime; if not rich in lime, the soil must be made so by using air slaked lime or land plaster. Mark out rows 8 to 4 feet apart, plant the nuts in May or June, 12 to 24 inches apart in the rows. Cover with 2 inches of soil; it is not necessary to remove the shucks or hulls before planting. Cultivate and hoe freely, keeping the soil mellow around the plants. In the fall before first, die and hong them under a shed to over Use 2 bushels. before frost, dig and hang them under a shed to cure. Use 2 bushels of seed per acre.

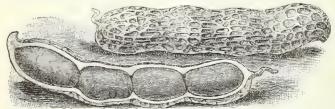

NEW MAMMOTH BUSH PEANUT.

New Mammoth Bush Peanut.

This peanut grows to an astonishing size, and does exceedingly well in the North. They make compact bushes 18 inches high, with heavy, erect stalks and large leaves. They are good producers, and of distinct appearance, as shown in illustration. The giant nuts have a thick, heavily ribbed protecting shell. On light sandy soil in the latitude of Philadelphia, they are always sure to make a good crop. Pkt., 15 cts.

Improved Ground Pea or Peanut.

Early, large and prolific, yielding fewer imperfect pods than any other kind, and producing 100 bushels per acre on medium land. With 2 or 3 kernels to the pod; large and of rich flavor. Vines average 3½ to 4 feet across, making valuable fodder for stock. Pkt., 10 cts.; pint, 25 cts.; quart, 40 cts., postpaid. By express or freight, not prepaid, quart, 30 cents; peck, 75 cents; bushel, (22 lbs) \$2.25.

EARLIEST LONG POD BUSH PEANUT.

Earliest Long Pod Bush Peanut.

Originated by one of the best peanut growers in the South, and is certainly a distinct improvement in appearance over any Southern variety now in use. Will do well on most all kinds of soil, and fill out better than any other large variety. Can be pulled up with the vine same as the old Spanish peanuts. The distinct long pods grow close and are well filled, containing 3 to 4 nuts to each pod. Very productive and of a mild, sweet flavor. Packet, 15 cts.; pint, 60 cts.; quart, \$1.00, postpaid. By express or freight, not prepaid, quart, 90 cts.

PEPPE

Peppers are used for pickling and in a variety of ways. When stuffed with chopped cabbage, mustard seed, etc., they are called mangoes.

CULTURE.—The pepper plant is tender, and must be started under glass, like egg plant. The plants should be set 1½ feet apart in rows 2 or 5 feet apart. A warm, moist soil is best, with plenty of rotted manure plowed under. An ounce of seed will produce 1,250 plants; ½ 1b. per acre.

MAULE'S NEAPOLITAN PEPPER.

Maule's Neapolitan Pepper.

The earliest of all peppers by a week I originally named to ten days. and first offered Neapolitan in 1903.

If I had not purchased my Panmure Seed Farms this pepper would still be unknown. Seven years ago my attention was attracted to the fact that a few Italian gardeners located near Panmure, were shipping peppers by the carload one to three weeks earlier than any other peppers could be shipped; and on investigation I found that for years a small settlement of Italians situated a few miles from my farm had been shipping these peppers to market and realizing thousands of dollars. With our trials of other peppers, Neapolitan proved itself to be two weeks earlier than any other. When, in addition to this fact, we had good size and mild, piquant flavor, I decided I had secured a money maker. Plants are of strong growth, very stocky, and peppers are borne erect, averaging the size of the illustration. Flesh is very thick and fruit is pale green turning to a brilliant red color. If my customers want peppers from one to three weeks ahead of their neighbors, they must plant Neapolitan.

Pkt., 10 cts.; oz., 45 cts.; quarter lb., \$1.25; lb., \$4.50.

Chinese Giant

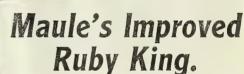

The Finest,
Largest and Handsomest
Pepper of Them All.

Chinese Giant is certainly a wonder. The plants are of strong, stocky growth, of bushy, erect habit, growing 18 inches to 2 feet in height, with abundant foliage. The compact plants are very prolific, setting 3 to 4 extra large fruits at the base quite early in the season, which ripen while a second crop is setting on the branches. The fruit is quite square in appearance, while the flesh is thick and very mild, being entirely free from any fiery flavor.

Without exception every one of my customers who has ever grown the Chinese Giant has pronounced it the finest and largest pepper they have ever seen.

Pkt., 15 cts.; ½ oz., 35 cts.; oz., 65 cts.; ½ lb., \$1.75; lb., \$6.50.

HEBEST OF ALL PEPPERS

This pepper was introduced to the American public more than a decade ago, and it at once took conspicuous place and became the leader of the sweet red sorts. I have every year sought to improve this already good pepper. I can truthfully claim that every year my strain of Ruby King is better than the year before. I have furnished this seed to tens of thousands of gardeners with the most satisfactory results, and my strain of this splendid stock is now noted for perfection of form, large size, brilliance of color, and sweet, mild flavor. So prominent are these desirable features that the words "Maule's Improved" are properly attached to the name. Ruby King pepper attains a larger size than Spanish Monstrous or any other sort excepting Chinese Giant, and is excellent in every way.

Packet, 10 cents; ounce, 45 cents; pound, \$1.25; pound, \$4.50.

Maule's Tomato Pepper.

The illustration herewith, taken from a photograph, is an excellent representation of this new red pepper. As implied by its name, in shape and general appearance it very much resembles a tomato, so much so that nine persons out of ten, seeing it green or ripe, would at first glance say it was a tomato. I secured the seed from a pepper specialist, who has been shipping it for a number of years past with great success to the New York and Boston markets, where he has invariably secured the highest market prices. It is of upright growth and must not be confused with the Red Squash; it is a much better pepper every way, enormously productive, and can be eaten out of the hand like an apple, being of mild and delicate flavor. I have grown it at Panmure for 6 years, where it has excited the admiration of all visitors. As soon as its merits become known, it is sure to prove a profitable market variety. It stays in bearing right through the season from early June until frost; and bulk for bulk will outyield even such a productive variety as Ruby King two to one, taking the entire season through. If you are raising peppers for profit you should certainly include Maule's Tomato Pepper in your order.

Packet, 10 cents; ounce, 45 cents; pound, \$1.25; pound, \$4.50.

GOLDEN DAWN

Maule's New Red Hot Pepper.

Also called Ladyfinger Pepper. Any of my customers who desire a red hot pepper can have it in this variety; it is

who desire a red hot pepper can have it in this variety; it is absolutely the bottest pepper I know of, except the Little Cayenne. Its shape is very attractive, and will command general attention. The handsome long peppers grow about 5 to 7 inches long, hence the name Ladyfinger Pepper. It produces its fruit upright on the plant in wonderful profusion.

This is a strong feature, as none of the peppers are apt to rot at the ends, as is the case with other varieties of similar character. Maule's New Red Hot Peppers are in great demand in all our Eastern cities, and are frequently shipped in car lots by many of my market gardener customers in South Jersey to both the New York and Boston markets. Pkt., 10c; ½ 02., 35c.; 02., 60c.; ½ 1b., \$2.00; lb., \$7.50.

GOLDEN QUEEN.—To say that this pepper is a vellow Ruby King is the highest praise that can be bestowed upon it. Golden Queen is the best of all yellow peppers. It is always large and sometimes remarkably so, specimens reaching 6 to 10 inches in length and 4 to 5 inches in diameter. A single plant sometimes carries 20 large peppers at the same time. The flavor is mild and pleasant, and it may be eaten raw. It is unexcelled for stuffing.

Pkt., 10 cts.; oz., 30 cts.; ½ 1b., \$5 cts.; 1b., \$3.00.

TOBASCO.—Excessively hot in flavor. A small pelong, borne in profusion on the large plant or bush.

Pkt., 10 cts.; oz., 30 cts.; ½ lb., 85 cts.; lb., \$3.00.

TOBASCO.—Excessively hot in flavor. A small pepper about 2 inches long, borne in profusion on the large plant or bush. Tobasco sauce is everywhere known as a flavor for soups, oysters, etc. It is extremely flery and pungent. Packet, 10 cents; ounce, 50 cents.

TOM THUMB.—Plant dwarf and branching. Fruit globular, about the size of a red currant. Adapted to pot oulture.

Packet, 10 cents; 3 packets, 25 cents.

CORAL GEM BOUQUET.—Very prolific. Pods an inch in length, bright red in color and highly ornamental. Hot and suited to seasoning. A fine pot plant. Packet, 10 cents; ounce, 50 cents.

GOLDEN DAWN.—Of a beautiful golden yellow color. Resembles Bull Nose in shape, except that it is a little more pointed on the end. A productive and satisfactory sort Pkt., 10c.; oz., 30c.; ½ lb., 85c.; lb., \$3.00.

RED CHILL—Small, red conical pods about two inches long. Very hot and prolific. Generally used for seasoning and pepper sauce.

Packet, 10 cents; ounce, 30 cents; ½ pound, 85 cents; pound, \$3.00. but somewhat resem— LONG RED CAYENNE. True.—The conical sides.

LONG RED CAVENNE. True.—The conical shaped fruits are 3 to 4 inches long, of b; j, lt red color, and borne in great profusion. The flesh in character is very sharp and pungent. A standard household variety of penper. Pkt., 10 cts.; oz., 30 cts.; ½ lb., 85c.; lb., \$3.00.

ELEPHANT'S TRUNK.—Often grows 10 to 12 inches long. Fruit fleshy, of a bright scarlet color. Pkt., 10 cts.; oz., 30 cts.; 1/4 lb., 85c.

BULL NOSE.

Mrs. H. C. Hill, Webster Crossing, N. Y.—The seeds I got of you were fine. My

Mrs. Mary C. Snow. North Emporia, Va.—I had a splendid garden from the seeds I got from you. They grew fine and were the envy of my neighbors, especially the Tomato peppers, which were a novelty here.

SWEET SPANISH.—Larger than Bull Nose, but somewhat resembling that well-known variety. It is pleasant to the taste. It is red in color at maturity. Pkt., 10 cts.; oz., 30 cts.; ½ lb., 85c.; lb., 83.00.

LARGE BELL OR BULL NOSE.—An old standard and favorite sort. It is early, bright red in color at maturity, entirely mild, of large size, and has thick flesh. It is excellent for stuffing. It is a good bearer, and is much grown for both home and market.

Packet, 10 cts.; ounce, 30 cts.; ½ pound, 85 cents; pound, \$3.00.

SWEET MOUNTAIN.—Somewhat larger and milder in flavor than Bull Nose pepper, but otherwise corresponds closely to that sort. Its color is green, turning to red, and it is productive and desirable. Pkt., 10 cts.; oz., 30 cts.; ½ lb., 85 cts.; lb., \$3.00.

GARDEN PEAS.

Peas belong in three groups: Garden, field and edible podded. Garden peas are smooth or wrinkled. The smooth are earlier and most hardy. The wrinkled are sweetest. Field peas are of high value in stock feeding and green manuring. Edible podded peas are growing in favor.

Culture.—Sow in earliest spring and make successional plantings every ten days until July 1. In the latter part of August sow early peas for an autumn crop. Drill 1 to 2 inches deep in rows 2½ to 4 feet apart. In the field use no sticks. In garden culture sow in double rows 10 inches apart, and use supports for the tall growing varieties. One pint to 75 feet of drill; two to three bushels per acre.

AMERICAN WONDER PEA.

This is a first-rate wrinkled pea of dwarf habit, with vines less than a foot high. It is better suited to the private garden than for market purposes; in fact, it has taken the place in the private garden once occupied by Tom Thumb, and has practically eliminated that once famous sort. American Wonder is one of the earliest of the wrinkled varieties. It is quite distinct from all other peas in habit of growth and appearance, the vines being unusually robust and stocky. In favorable weather and soil it will mature in the remarkably short period of 42 days, but it is less hardy than Maule's Earliest of All, and must not be planted as soon. It makes most rapid growth immediately after the soil has become somewhat warm, and is a perfect second early sort for the family garden. It is a great favorite in many sections. Packet, 10 cents; pint, 30 cents; quart, 55 cents, postpaid. By express or freight, not prepaid, quart, 40 cents.; 4 quarts, \$1.40; peck, \$2.50; bushel, \$9.00.

NEW SURPRISE PEA.

One of the Largest Podded and Earliest of all Wrinkled Extra Earlies.

of all Wrinkled Extra Earlies.

This is one of the best of the new wrinkled peas, and is to-day one of the most famous. It has made an enviable reputation within the brief time that it has been on the market; in fact, it has sprung into universal popularity. It is about as early as the smooth varieties, and far superior to them in both quality and yield. It ranks with the very earliest of the wrinkled sorts, not even excepting Gradus or Prosperity. Pods are smaller than Gradus, but are more numerous. The vine grows 20 to 24 inches high, and requires no sticks. The Surprise pea has attracted universal astention, and has everywhere made a splendid record for both quality and quantity. Its sweetness is noteworthy, and it bears with a profusion that is truly remarkable. Its extreme earliness makes it one of the most profitable market peas ever introduced, and nothing superior to it is available for the family garden. Gradus and American Wonder are as quick to mature, and are larger, but Surprise will equal these famous sorts in quality and will exceed them in yield. Pkt., 10c.; pt., 25c.; qt., 45 cts., postpaid. By express or freight, not prepaid, qt., 30 cts.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.50.

Prosperity or Gradus.

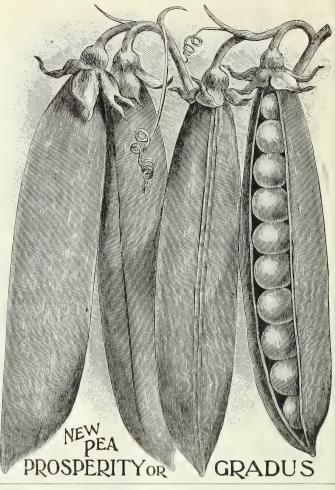

An Extra Early Wrinkled Pea.

This remarkable pea has produced a sensation in the horticultural world, and there is no longer any doubt about its position and standing. It is now recognized as a leader. It is not only large and of best quality, but it is as early as the small, round, extra early sorts. It may be planted as soon as the ground is fit to work in spring, along with the smooth peas. It promises to take the place of the smooth peas in general culture to a great extent. Prosperity or Gradus is a wrinkled pea, with vine growing 18 to 30 inches high. It requires no sticks or brush, though sticks may be used, if preferred. The peas are freely borne, and remain in good order for a number of days. The pods are of a bright green color, and measure 4 inches or more in length, being as large as Telephone, and equally well filled with luscious peas—8 to 10 or more in a pod. The peas themselves are of a first-class table quality, and retain their color and attractive appearance after cooking. The pods are round and plump. On light, sandy soils it attains a growth of only 15 or 18 inches, while on rich, heavy loams it reaches It is entirely adapted to the purposes of the market gardener, requiring only good field treatment.

Pkt., 10 cts.; pt., 35 cts.; qt., 60 cts., postpaid. By ex. or freight, not prepaid, qt., 45 cts.; 4 qts., \$1.60; pk., \$3.00; bus., \$11.00.

FULL CULTURAL DIRECTIONS

will be found printed on each package of Maule's Seeds, both Flower and Vegetable. If they are followed it means that you will have the best garden in your neighborhood.

Perpetual Pea.

A True Pick Forever. Bears from June Until October.

Twenty-four years ago I offered Perpetual as a novelty, and have continued to supply it to a number of my customers regularly every year since. Probably there are no two concerns in the country who know more about peas or who grow more peas for seed purposes than Messrs. Keeney & Son, of Genesee Co., N. Y., or Rogers Bros., of Jefferson Co., N. Y. Messrs. Keeney & Son write:

"It is more accurately named than any other pea in the list, and for the private garden is an excellent variety, as it will continue producing for a long time, if the peas are promptly and completely picked as fast as they become large enough to use on the table."

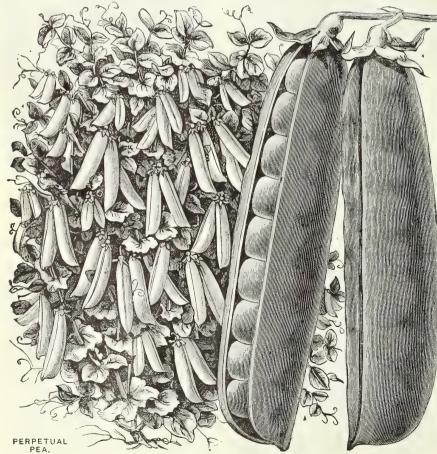

This was supplemented by a letter from Rogers Bros., who made the following statement:

"We consider it the best or nearest to a perpetual pea of anything we have ever seen yet."

Perpetual pea is everything its name implies. It grows about 2½ to 3 feet high, is of strong, robust habit, a good cropper, and, to secure best results, requires sticks or brush. After removing the pods as fast as they are filled it will continue to bear right along throughout the season. This one feature makes it especially desirable for the home or family garden and I know of no large podded pea that will produce so many pods and none that are so well filled as the Perpetual. It is certainly the most remarkable everbearing pea that has ever come to my knowledge.

I am offering this year what I consider an Improved Perpetual, on account of its having larger pods than the old strain I have been offering for so many years.

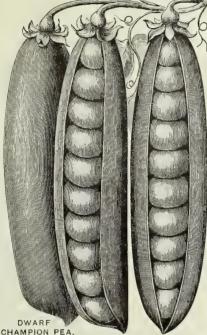

Packet, 15 cents; pint, 40 cents, postpaid. By exp. or freight, not prepaid, pint, 30 cts.

Thomas Laxton Pea A Favorite With Many Commercial Gardeners. This new pea was originated by crossing Gra-

dus with a very early seedling. It is claimed to be earlier, hardler in constitution, of better color, and more prolific than Gradus or Prosperity. It grows like Gradus, about 3 feet high. The wrinkled green peas are very large, and uniformly well filled. The pods are large, long, with square ends fine color and of unsurpassed quality. Many market gardeners have planted the Thomas Laxton in preference to Gradus, to their entire satisfaction. My opinion of Thomas Laxton is that it is not as early as Gradus by three or four days; at the same time it is, if anything more productive, peas are fully as large, of a richer green color. Planted side by side, it is frequently a hard matter to tell which is the better of the two varieties, hence, both are very popular with up-to-date market gardeners. Packet, 10 cts.; pint, 35 cts.; quart, 60 cts., postpaid. By express or freight, not prepaid, quart, 45 cts.; 4 qts., \$1.50; peck, \$2.75; bushel, \$10.00.

DWARF TELEPHONE .- Dwarf Telephone is the famous old Telephone without its long vines. It is of healthy, stocky growth, and very productive. The pods frequently measure 5 inches in length and are broad, straight and remarkably well filled, often containing nine or ten peas. Pod adapted to marketing. Pkt., 10c.; pt., 30c.; qt., 50c.; postpaid. By ex. or freight, not prepaid, qt., 35c.; 4 qts., \$1.25; pk., \$2.25; bu., \$8.00.

THOMAS LAXTON PEA

910

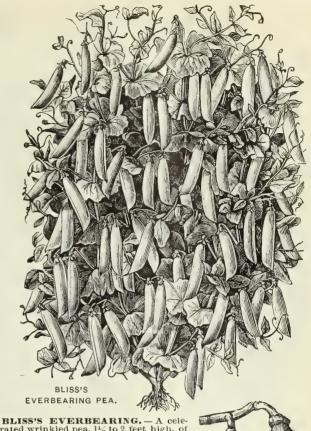

THOMAS LAXTON PEA.

DWARF CHAMPION.

—A hardy, robust, vigorous grower, producing uniform dark green pods of good size, with great abundance and unsurpassed quality. The pods are larger than the old Champion of England and more of them to the vine, although it grows only 2 to 2½ feet tall. A big demand will spring up for it among all friends of the Champion of England Pea. Pkt., 10 cts.; pt., 35 cts.; qt., 60 cts.; pt., 35 cts.; qt., 40 cts.; pt., 40 cts.; pt.

ALASKA.—An extra early sort, with vines 2 feet in height. A prolific bearer. Pkt., 10c.; pt., 25c.; qt., 45c., postpaid. By express or freight, not prepaid, qt., 30c.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.50.

PREMIUM GEM.—A fine early wrinkled pea, with vine about 15 inches high. Pods long, and are produced in abundance. A profitable pea for market. Pkt., 10c.; pt., 30c.; qt., 50c., postpaid. By ex. or freight, not prepaid, qt., 35c.; 4 qts., \$1.25; pk., \$2.25; bu., \$8.00.

BLISS'S EVERBEARING.—A celebrated wrinkled pea, 1½ to 2 feet high, of good quality and flavor. Its season is late to very late, and it is especially adapted to summer and autumn cropping. It has a remarkable and valuable branching habit. It will do well without sticks or brush. Repeated pickings may be made, for the vine continues to produce blossoms and successional crops of pods in its effort to ripen its seeds. It is thus a continuous bearer through a long season. Pkt., 10c., pt., 30c., qt., 50c., postpaid. By ex. or fgt., not prepaid, qt., 35 cts.; 4 qts., \$1.25; pk., \$2.25; bu., \$8.00.

HORSFORD'S MARKET GARDEN.—A first-class wrinkled pea; second early.

—A first-class wrinkled pea; second early. Height, 24 inches; no sticks. It is a profitable sort for market gardeners, as a profitable sort for market gardeners, as a single plant has been known to produce more than 150 pods. It is equally good for the home table. The medium sized pods are borne in pairs, and are easily and quickly picked. This variety is said to have yielded more shelled peas to the acre than any other American sort.

Pkt., 10c.; pt., 25c.; qt., 45c., postpaid. By ex. or fgt., not prepaid, qt., 30c.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.50.

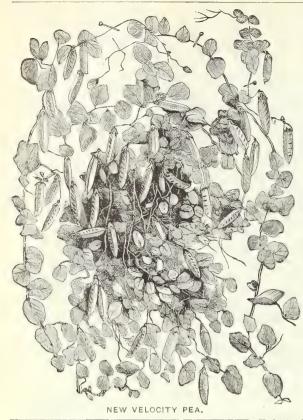

FOR A GOOD SUCCESSION

Plant Maule's Earliest of All, Horsford's Market Garden and Pride of the Market and have peas from April till July. A pkt. of each, 25c. a pt. of each, 75c.; a qt. of each, \$1.30 postpaid.

Early Pea. Maule's Improved Extra

This fine, smooth pea is surpassed in point of earliness only by Maule's | tive. The seed may be sown in earliest spring. The pods large and well Earliest of All and Velocity. The pods come all at once. It requires no | filled. Pkt., 10c.; pt., 30c.; qt., 50c., postpaid. By ex. or freight, sticks. It grows about 2 feet high, is a sure cropper, and is very produc- | not prepaid, qt., 35 cts.; 4 qts., \$1.25; pk., \$2.25; bu., \$8.00.

New Velocity Pea.

Now Offered for the First Time.

Ten Days Earlier Than Any Other Variety of Garden Peas.

When in England last summer I took a special trip down to Witham, in Essex, to look at this pea, believing that the tales I had heard about in London were more fairy tales than anything else, as I did not think it possible to find a pea that was absolutely from 8 to 10 days earlier than any other known variety; but I found that I was mistaken and that there was such a pea. Now I want to be perfectly candid with my customers, and tell them the great point about Velocity is earliness. It resembles very much in size of pod and grain the small peas that are so popular in France, and sold as French peas so generally throughout the world. The pods contain from four to five peas and are only $2\frac{1}{2}$ to 3 inches long; but it is very prolific, and while it takes a great many pods to make a mess for the table, when you consider that by planting Velocity you will have peas 8 to 10 days before Earliest of All, Alaska, or any other extra early variety, I am sure my customers will be glad to try it. If Velocity does well here, as I am very certain it will, it will be a great pea for canners, because it will enable them to put up a class of peas that up to the present time have been very difficult to obtain; in other words, a pea that will compete with the French peas sold all over the country, and for which there is an enormous demand. My stock is limited to 50 bushels, all I could buy, and prices this, its first year, are as follows:

Packet, 15 cents; pint, 35 cents; quart, 60 cents, by mail, postpaid. By express or freight, not prepaid, quart, 45 cents; 5 quarts, \$2.00.

Potlatch or Big Dinner Pea.

The Sensational Pea of 1909.

The Pea That Progressive Market Gardeners are Going Wild Over.

I was most fortunate indeed to be able to offer last year for the first time this great pea called Potlatch or Big Dinner. I had no idea the demand would be so large or that the pea would be so popular, as it was only about three years old; but it seems to me that every gardener who had ever tried Potlatch in small quantities wanted at least a sack or two, so that early in the season the entire crop throughout the whole country was completely exhausted. Potlatch is Chenook Indian for Big Dinner, hence the name Potlatch. The vines are vigorous, growing 15 to 18 inches high, with unusually dark green foliage, which can be distinguished from that of other peas a quarter of a mile away. The long pods are a rich dark green in color, often measuring 6 inches or more, with 9 to 11 enormous peas in a pod. The growth of vine is sturdy and pods are borne in pairs; it is a wonder in productiveness, and the way the peas shell out is astonishing. Potlatch matures as early as Premium Gem; no variety known will produce more pods, shell better, or contain more tender and delicious peas to the pod. The pea crop in 1909 was the shortest in 20 years, yet notwithstanding this fact Potlatch proved to be such a hardy, sturdy grower that I am glad to announce I harvested a better crop of this than any other variety, and have now in store almost 200 bushels of these peas, which, while they may last some time, I expect to be sold out early in the season.

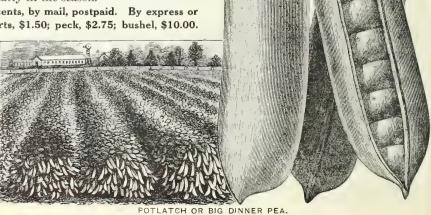

Packet, 10 cents; pint, 35 cents; quart, 60 cents, by mail, postpaid. By express or freight, not prepaid, quart, 45 cents; 4 quarts, \$1.50; peck, \$2.75; bushel, \$10.00.

On this page

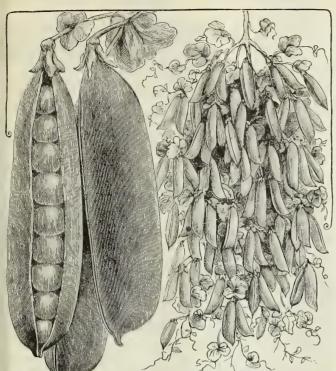

will be found two new peas, one offered for the first time, the other in its second year.

YOUR MONEY BACK IF NOT SATISFIED

means a lot in a case like this, as if Velocity and Potlatch are disappointing and not as good as you expected, the amount you remitted for the seed will be returned if you ask for it. If some other seedsmen did this, there might not be so many novelties introduced each year.

PROLIFIC EARLY MARKET PEA.

PROLIFIC EARLY MARKET PEA

Also Listed as New Prolific Extra Early.

30 to 50 Per Cent. More Prolific Than Alaska.

I offered this grand pea in 1901 for the first time, quoting the introducer to the effect that while it was 3 to 4 days later than the first early sorts, it was 30 to 50 per cent. more prolific. Eight years' experience with it leads me to conclude that it is practically as early as the very first of all, and more prolific.

The introducers, Messrs. N. B. Keeney & Son, prominent New York pea growers, thus speak of it: "About ten years ago the writer selected a very productive plant of an extra early pea, having an exceptionally long pod. From this, during the last ten years, was produced what we call Prolific Early Market. Our tests of this pea during '94, '96 and '97 showed it to blossom two days later than our earliest and best strain of Extra Early, and in the development of pods suitable for picking, 3 or 4 days behind; but the remarkable productiveness and length of pod have followed this strain all through all these years, many of the plants this season, 1900, containing 40 to 50 fully developed pods as the result of one seed sown; and I believe this pea will give a yield of 30 to 50 per cent. more than any other strain of extra earlies I know of."

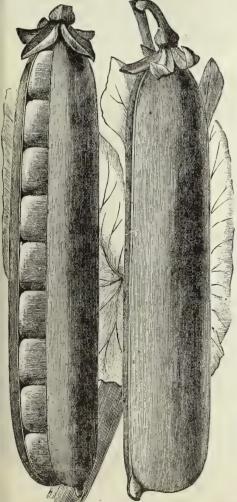

My trials of Prolific Early Market induce me to value it very highly, as above stated. The seed resembles the seed of the hard, round, extra early sorts, but is somewhat wrinkled. But the point or characteristic which I desire most to emphasize is that this variety is very prolific, a thing of extreme importance in a first early pea. Packet, 10 cts.; pint, 25 cts.; quart, 45 cts., postpaid. By express or freight, not prepaid, quart, 30 cents; 4 quarts, \$1.10; peck, \$2.00; bushel, \$7.50.

ALDERMAN PEA.

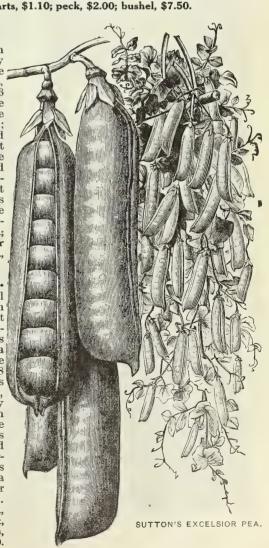

This new main crop pea is in many respects the best early crop variety of the telephone type; producing long, straight, dark green pods from 5 to 6 inches long, well filled with large peas of excellent flavor. The vines grow nearly 5 feet high; are dark green, vigorous and exceedingly productive. Market gardeners are demanding the large podded, dark green colored sorts, which retain their fine appearance even after a distant shipment; the Alderman answers these requirements. One of the best sorts for both home or market gardens. Pkt., 10c.; pt., 35c.; qt., 60c., postpaid. By express or freight, not prepaid, qt., 45c.; 4 qts., \$1.50; peck, \$2.75; bushel, \$10.00.

SUTTON'S EXCELSIOR PEA.

Having had considerable call for this pea, I take pleasure in listing it this year for the first time. Sutton's Excelsior resem-bles Nott's Excelsior, but has longer and broader pods of a light green color; the pods are square at the ends with 6 or 8 large sized peas to a pod. The vines grow 15 in. long and are hardy, permitting early planting. They are very heavy bearers, and on account of its hardiness and large sized pods, many prefer Sutton's Excelsior to the large podded taller varieties. Comes into bearing a few days later than Nott's Excelsior. It is undoubtedly a fine, early wrinkled pea for either home or market gardeners. Pkt., 10 cts.; pt., 30 cts.; qt., 55 cts., postpaid. By express or freight, not prepaid, qt., 40 cts.; 4 quarts, \$1.40; peck, \$2.50; bushel, \$9.00.

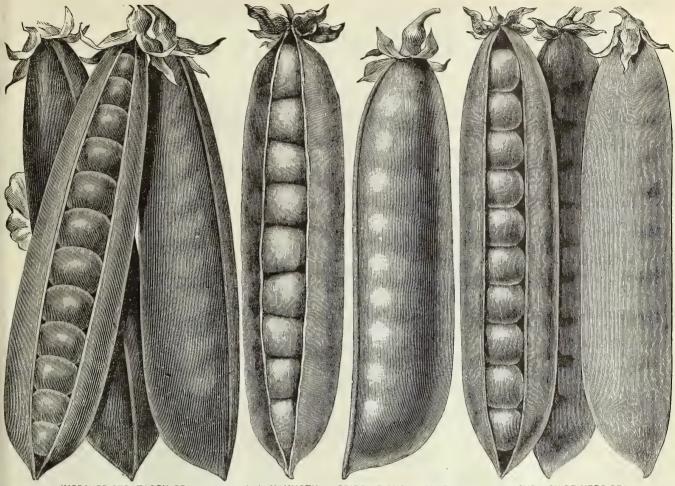

ALDERMAN PEA.

#

Manual A

L. I. MAMMOTH.

IMPROVED STRATAGEM .- An excel-

IMPROVED STRATAGEM.—An excellent wrinkled pea, with sturdy vine, growing 2 feet high; vigorous and productive. The pods are of extra large size, often measuring 5 inches in length, and are always well filled, frequently containing ten peas to the pod. The flavor is first-class, as no pea of recent introduction has gained more rapidly in popularity than this, thus showing its appreciation by both home and market gardeners. Pkt., 10 cents; pt., 30 cents; qt., 55 cents; postpaid. By express or freight, not prepaid, qt., 40 cents; 4 qts., \$1.40; pks., \$2.50; bu., \$9.00.

LONG ISLAND MAMMOTH.—A large fine mid-season pea, of excellent flavor, for market purposes on account of the size, number and good appearance of its well filled pods. Picking is easy and a handsome basket is presented to the eye of the buyer. This variety is highly esteemed by truckers for its selling qualities. In vine it is a strong grower, hardier and larger than Telephone and with darker foliage. The peas are almost smooth when dry, It reaches market after all the early sorts have gone. Pkt., 10 cts.; pt., 30 cts.; qt., 50 cts., postpaid. By express or freight, not prepaid, qt., 35c.; 4 qts., \$1.10; pk., \$2.00; bu., \$7.50.

TELEPHONE.—This is a fine wrinkled pea, growing about four feet high. The peas

35c.; 4 qts., \$1.10; pk., \$2.00; bu., \$4.00.

TELEPHONE.—This is a fine wrinkled pea, growing about four feet high. The peas are large and of a pale green color, and possess a superior sugary flavor. It is a second early or medium variety, robust in habit of growth, and a great bearer. The pods are of largest size, containing 8 or 10 peas each. Of especial value in the choice family garden. Pkt., 10c.; pt., 30c.; qt., 55c., postpaid. By ex. or freight, not prepaid, qt., 40c.; 4 qts., \$1.40; pk., \$2.50; bu., \$9.00.

WHITE MARROWFAT. - An old and WHITE MARROWFAT.—An old and well-known standard smooth pea, growing from 3 to 5 feet high, depending on weather and soil. It has long been used by market gardeners for a midsummer or late crop, and is very productive. Grown upon brush in gardens. Pkt., 10c.; pt., 25c.; qt., 45c., postpaid. By ex. or fgt., not prepaid, qt., 30c.; 4 qts., 75c.; pk., \$1.25; bu., \$2.50.

BLACK-EYED MARROWFAT.—An old, widely popular, smooth variety. Grown extensively as a market variety for a main crop. Height, 3 to 5 feet. Very hardy and productive. packet, 10 cts.; pint, 25 cts.; quart, 45 cts., postpaid. By express or freight, not prepaid, quart, 30 cts.; 4 quarts, 75 cts.; peck, \$1.25; bushel, \$4.50.

PRIDE OF THE MARKET.

SHROPSHIRE HERO PEA.

the best of the so-called marrow peas. It is a smooth pea of English origin, growing 18 inches to 2 feet high. It has a robust, branching habit, and requires no sticks. Wonderfully productive. The pods are large in size and extremely handsome in appearance, and the variety is a popular one for market and equally good for home use. The table quality is excellent. The size, shape and beauty of the pod are shown in the illustration, and I commend it strongly to the attention of truckers and market gardeners who wish to offer attractive looking produce to their customers. Packet, 10c.; pint, 30c.; quart, 50c., postpaid. By express or freight, not prepaid, quart, 35 cents, 4 quarts, \$1.25; peck, \$2.25; bushel, \$8.00.

SHROPSHIRE HERO.—This superb wrinkled PRIDE OF THE MARKET .- This is one of

\$1.25; peck, \$2.25; bushel, \$8.00.

SHROPSHIRE HERO.—This superb wrinkled pea is one of my greatest leaders, and I do not think there is a better late variety now under general cultivation. It attains a height of about 2½ feet, and is esteemed for good quality and productiveness. The pods are long, handsome and wonderfully well filled, and are produced in great abundance. The peas are of unusually large size and delicious flavor; eight to ten to the pod. I am greatly pleased with the behavior of Shropshire Hero in my trial grounds, in comparison with all other varieties, and feel that it cannot be overpraised as a standard medium or late sort. Packet, 10 cents; pint, 30 cents; quart, 55 cents, postpaid. By express or freight, not prepaid, quart, 40 cents; 4 quarts, \$1.40; peck, \$2.50; bushel, \$9.00.

CHAMPHON OF ENGLAND.—An old standard

CHAMPION OF ENGLAND.—An old standard wrinkled variety, growing 4 to 5 feet high. It is late, but very productive, the pods being large and the peas tender and sweet. The bearing period is prolonged, it being a hardy and rampant grower. Packet, 10 cents; plnt, 30 cts.; quart, 50 cents; postpaid. By ex. or freight, not prepaid, quart, 35 cts., 4 qts., \$1.25; peck, \$2.25; bushel, \$8.00.

SUGAR PEAS.

DWARF SUGAR.—Pods edible. Grows about 2 feet high. Packet, 10c.; pt., 30c.; qt., 55c., postpaid. By express or freight, not prepaid, quart, 40 cents; 4 quarts, \$1.40; peck, \$2.50.

MELTING SUGAR.—A standard edible podded of England. Sort. Height, 5 feet. Pods cooked and used the same as wax beans. Packet, 10 cents; pint, 30 cents; quart, 55 cents, postpaid. By express or freight, not prepaid, quart, 40 cents; 4 quarts, \$1.40; peck, \$2.50.

fue

POTATOES.

Culture.—Use 8 to 12 bushels of seed potatoes per acre. Cut to two or three eyes. Plant in rows 3 feet apart, and drop 15 to 18 inches apart in row. Cultivate constantly and thoroughly. Ridging with loose soil is often practiced but it is not always necessary. Store in frost-proof cellar in winter. Potatoes are planted both early and late.

Eureka Extra Early Potato.

The Favorite Extra Early.

None More Quick to Mature, More Proof Against Drought and Blight, So Free From Second Growth.

As to its origin and history, the originator says of it: "Eureka Extra Early was a chance hill found growing in a field of Early Morn potatoes, season of 1895. In looking over the field a single plant was noticed distinct from the rest, which died while the others were still green.

"It has never failed to produce a large crop of extra early potatoes. The plant is dwarf and compact, maturing in advance of the Early Rose and Bovee. It never has had the blight. The tubers are round, slightly flattened. White skin, free from disease. Flesh, white and mealy; no cores or black specks. Quality unsurpassed.

"One point alone which makes it valuable is that it has never taken second growth, and resists drought better than any other potato I have ever grown. Grown side by side with the Bovee it produced a third more large tubers, and matured ten days in advance of Bovee. The potatoes were perfect, while the Bovee took second growth."

North, South, East and West, Eureka the past summer came off with flying colors. I again advise early orders, for while my stock is large, the demand for Eureka is simply astonishing.

Pound, 40 cts.; 3 pounds, \$1.00, by mail, postpaid. By express or freight, not prepaid, peck, \$1.00; bushel, \$2.75; barrel, \$5.50.

Look up the Maule advertising in the newspapers; you will find no seeds offered at a reduction from catalogue prices to influence new trade. I do not believe in discriminating against old friends in order to secure new ones. Old customers and new customers must pay the same price for Maule's Seeds and Plants at all times

jackets on, and appear snow white and

"They grow very thickly, and ripen here several weeks in advance of Early Rose. My first general planting this year was ready to be put in the cellar August 1st, being then thoroughly ripe and vines dead. I have frequently dug six to nine pounds from a single hill, and in rich ground there are few small ones."

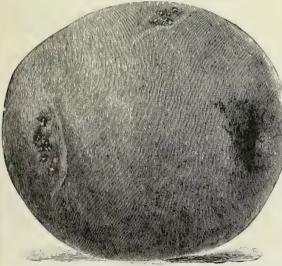

Pound, 40 cents; 3 pounds, \$1.00, postpaid. By express or freight, not prepaid, peck, \$1.00; bushel, \$2.75; barrel, \$5.50.

Irish Cobbler.

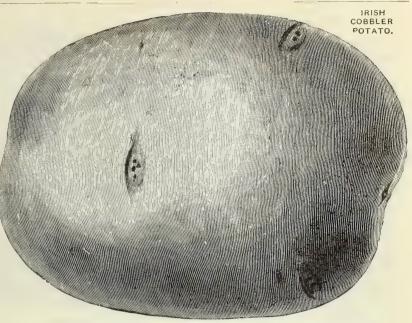

NOW A WORLD WIDE FAVORITE.

It is a most excellent extra early variety, maturing good size tubers seven weeks from time of planting. It has also the remarkable characteristic of producing very few, if any small potatoes, all the tubers being of marketable size. The vines make short, upright growth, so that the hills may be only a short distance apart. The flesh is pure white, with a clean, smooth skin; and in quality they are excellent, always cooking dry and mealy. They are splendid keepers, and taking it all in all, it is a first-class sort and worth the attention of all potato growers.

Pound, 30 cents; 3 pounds, 75 cents, by mail, postpaid, By express or freight, not prepaid, peck, 75 cents; bushel, \$2.50; barrel, \$5.00.

BLISS' RED TRIUMPH POTATO

Bliss' Red Triumph. A Week Earlier Than Rose. A Great Leader in the South.

Extremely prolific and a full week in advance of Early Rose. Color, a beautiful light red. Size, medium. Growth, very uniform. Shape, nearly round. The flesh is white; very mealy when cooked. This potato is in exceedingly high favor with Southern market gardeners and truckers, and is shipped to the Northern markets in enormous quantities in the early spring. It grows well at the North. The eyes are slightly depressed and the skin is smooth. Its beauty, good quality, extreme earliness and great productiveness make it very profitable.

Pound, 30 cents; 3 pounds, 75 cents, by mail, postpaid. By express or freight, not prepaid, peck, 75 cents; bushel, \$2.50; barrel, \$5.00.

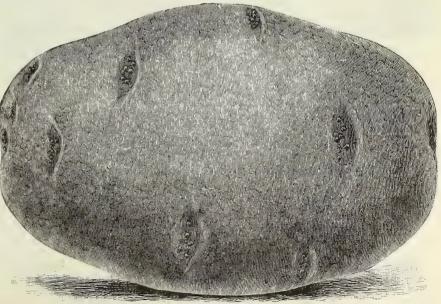

AROOSTOOK CO., MAINE, for years has had the well earned reputation of being the best potato growing district in the world. Years ago I recognized this fact, and my entire crop of seed potatoes is annually grown for me under contract by the very best farmers in Aroostook Co., who well know what a particular and high class of trade I have had for many years in the seed potato line. In consequence of this fact I probably sell more seed potatoes direct to the planter than any other seed house in the United States, and it is a great satisfaction for me to have so many of my customers come back to me year after year for their annual supply. This season my crops are particularly clean and fine, and are sure to please the most exacting buyer.

THE NEW SNOW POTATO.

The Newest Money Maker Main Crop Potato.

I take pleasure in offering my customers this new main crop potato. It originated in Maine, and after repeated trials in various sections of the country has proved itself to be of great value on account of its immense yield together with the fact that it invariably produces very few small potatoes and is now attracting wide spread attention. In shape the Snow potato is roundish, slightly flattened eyes on the surface; the skin is well netted, which is nature's mark of good eating quality. It is very fine grained and flaky. Grows a large, heavy top, dark green leaves, blossoms white. This wonderful potato ought to have been named the poor man's friend, for it will do the best of any potato grown on poor soil, wherever little care is taken of it, and when given the best of care and fertilization, it will repay the planter most bountifully. The Snow Potato is just what the markets desire and will bring fancy prices.

Pound, 40 cents; 3 pounds, \$1.00, by mail, pospaid. By express or freight, not prepaid peck, \$1.00; bushel, \$2.50; barrel, \$5.50.

THE NEW SNOW POTATO.

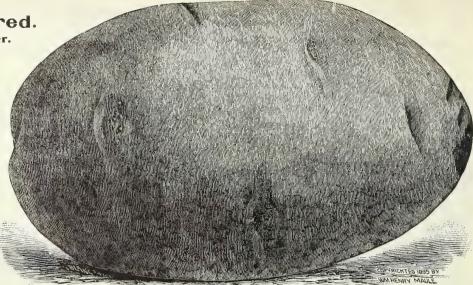

Maule's Early Thoroughbred.

The Quickest Basket Filler.

Maule's Early Thoroughbred was first offered to the public in 1896, at \$25.00 a barrel, since which time I have received hundreds of reports of field erops running up to 300 bushels per acre. On account of its earliness it is not much affected by the usual midsummer and autumn droughts, while in keeping qualities it is unsurpassed by any late variety under cultivation. The illustration does not in any way exaggerate its smooth and handsome appearance. It produces an unusally large proportion of merchant-able tubers. The potatoes grow closely in the hill, and are of large and nearly uniform size. Mr. T. B. Terry, the wellknown Ohio potato grower, made a comparative test of Maule's Early Thoroughbred with a potato in favor in his neighborhood, the result being as 45 to 15 in favor of the former, or at the rate of 240 bushels an acre for Early Thoroughbred Potato. "In every hill," says Mr. Terry, "there were great large, beautiful potatoes, such as I have never seen since the first year the old Early Rose came around. There were partic-

Rose there were a good many tubers as fine and large as these. I have never seen any early potatoes on my farm since as fine until I dug these.

* * * They resemble the Rose in shape, color and quality very much.

MAULE'S EARLY THOROUGHBRED POTATO.

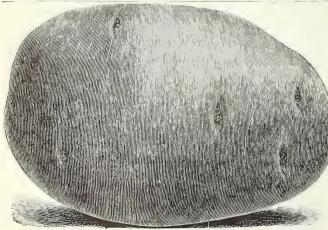

cally no small or medium sized ones. * * * The first year I grew Early | They are quite as early. I was never so surprised in all my life at any results obtained in potato culture." The Early Thoroughbred is capable of infusing new life and profit into the potato business, and is to-day as

Pound, 30 cents; 3 pounds, 75 cents, postpaid. By express or freight, not prepaid, peck, 75 cents; bushel, \$2.50; bbl., \$5.00.

THE BARNS AT PANMURE

PURE EARLY ROSE POTATO

Pure Early Rose.

An Old Standard Favorite Sort.

Every farmer and gardener knows the old Early Rose potato, and nothing need be said in its favor. It has no faults, except that ill treatment and neglect sometimes cause a poor or weak strain to be put on the market under the name of Early Rose seed potatoes. I have been at great pains, therefore, to get a true, strong strain of Early Rose grown in the far North, for my stock, and I can offer it as the purest and best that can be had. Indeed it is the old Early Rose itself, as vigorous and productive as ever. Early Rose will never go out of fashion as long as the original stock can be obtained.

Pound, 30 cents; 3 pounds, 75 cents, postpaid; By express or freight, not prepaid, peck, 75 cents; bushel, \$2.25; barrel, \$4.50.

Date of Shipment. Potatoes will be shipped at any date ordered during the winter, but at your own risk. Where no special instructions are given to the contrary, I will hold same until in my judgment there will be no danger from freezing and then ship promptly.

Main Crop or Late Potatoes.

Green Mountain Potato.

An Improved State of Maine Potato.

This is a most excellent late potato; it does remarkably well on poor soils, and is very free from disease; it resists drought wonderfully well, and produces tubers of large size and attractive appearance; flesh white. It is a good keeper, and when put away in the fall will keep in good condition until time for the new crop.

new crop.

Lb., 30 cts.; 3 lbs., 75 cts., by mail, postpaid. By express or fgt., not prepaid, pk., 75 cts.; bu., \$2.25; bbl., \$4.50.

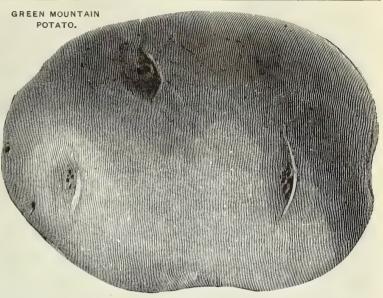

POTATO SEED.

Seed from the Flower Ball.

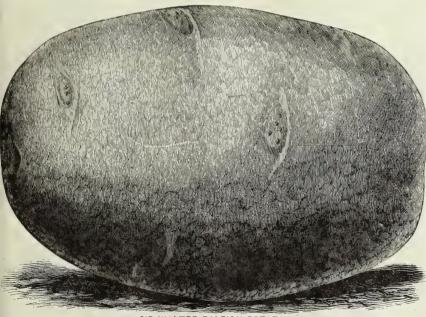

I have choice potato seed from the flower ball, for those who wish to experiment in the production of new sorts. It requires three years to bring seedlings up to a marketable size. Packet, 15 cents.

Note.

Bear in mind that customers can order half pecks of potatoes at peck rates; half bushels at bushel rates.

Sir Walter Raleigh Potato.

SIR WALTER RALEIGH POTATO.

THE CHAMPION LATE SORT.

A white-skin, main crop or late potato; the best of Mr. Carman's introductions. It is a magnificent new potato, much resembling Rural New Yorker No. 2, of which it is a seedling. It is decid-It is decidedly better than its parent, the tubers being quite uniform in size, with but few small ones among them. It is from four to six days later than the parent stock. The color is the same, the skin and flesh being white. In fact, it can be justly claimed for Sir Walter Raleigh that it is the whitest fleshed and finest grained potato on the whole list of main-crop varieties, not even excepting the Snowflake; and it promises to supersede all other sorts of its class on account of its sterling excellence. On the trial grounds of the Rural New Yorker it proved the best and heaviest cropper of 49 varieties. It does wonderfully well on my trial grounds at Briar Crest and Panmure. It will take the place of Carman No. 3, which it equals in all respects, and which it excels in table qualities. It was given to the world as late as 1897, under the claim of being Mr. Carman's best. That claim has been sustained. In field culture it has gone above 450 bushels to the acre. Its record in all respects entitles it to rank with the very best late potatoes now grown upon American soil, and no progressive cultivator should fail to give it a trial.

Lb., 30 cts.; 3 lbs., 75 cts., by mail, postpaid. By express or freight, not prepaid, peck, 75 cts.; bushel, \$2.25; barrel, \$4.75.

There are some small people in the seed business,

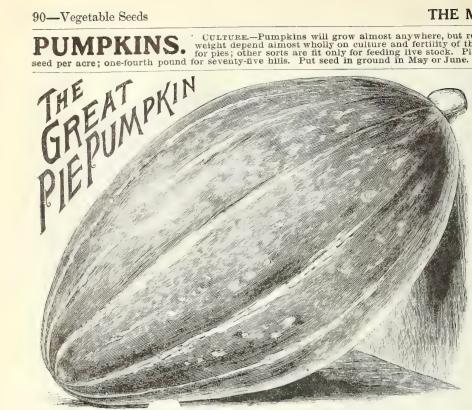

as well as in other lines of life. There are some business houses that if any of their competitors introduced the best thing on earth, and they knew it was the best variety, they would not list it under any circumstances. I have known certain houses to wait ten years before listing varieties of seeds of particular merit, and then they only did it because their trade absolutely demanded it. Henderson's Bush Lima Bean was first offered to the public in 1888; in the fall of 1887, being in New York, I called on my old friend, the late Peter Henderson, and then for the first time learned of their bush lima, the first one of its class. When I went out of the office I had given them an order for 20,000 packets of this bean at their regular price, and in 1888, the same year as they first offered it to the public, I was glad to be able to offer Henderson's Bush Lima Beans in my seed book to my customers. This is what I consider good fellowship; it did not hurt me at all, and it is unnecessary to say P. H. & Co. were pleased to book among their first orders, 20,000 packets of this bean for Wm. Henry Maule, of Philadelphia. This is one of many similar instances, and whenever a good thing comes along, which Henderson's Bush Lima certainly is, I am glad when I can offer it to my customers the same year as the introducer, or at least the year following.

PUMPKINS. Culture.—Pumpkins will grow almost anywhere, but rejoice in rich soil. In many varieties the size and weight depend almost wholly on culture and fertility of the land. Many pumpkins are exceptionally good for pies; other sorts are fit only for feeding live stock. Plant in hills 8x8 feet. Use three to four pounds of seed per acre; one-fourth pound for seventy-five hills. Put seed in ground in May or June.

SUGAR PUMPKIN. called Sweet Pumpkin.

the pumpkin from which the celebrated Yankee pumpkin pie is made. It is small, being about 10 inches in diameter, but of best character. It has a deep orange yellow skin and fine grained flesh; handsome and an excellent keeper. It is prolific and in every way desirable. It cannot be excelled as a table pumpkin. The aver-age weight is about 5 pounds. A sure cropper and excellent for marketing, as it is of convenient Pkt., 5 cts.; oz., 10 cts.;

This is

MAULE'S PRIZE POTIRON. (The 2481/4-pound pumpkin.)

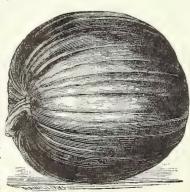

MAULE'S PRIZE POTIRON .-- A prize winner. Grows to immense proportions. Flesh bright yellow, fine grained and of good quality. The outer skin is salmon colored. Notwithstanding the great size of this variety it is excellent for making into pies and a good winter keeper. One of my customers secured a premium on a specimen weighing 248% lbs. Another customer grew a Potiron pumpkin weighing 230 lbs.

Packet, 10 cents; ounce, 25 cents.

CONNECTICUT FIELD OR COMMON YELLOW.—Extensively grown for stock feeding, and is generally planted in with corn, producing enormous crops. Hardiest of all and good for ples. Packet, 5 cents; ounce, 10 cents; 1/4 pound,

20 cents; pound, 50 cents, postpaid. By ex. or freight, not prepaid, 40 cts.; peck, \$1.50; bushel, \$5.50.

LARGE CHEESE. The same as Kentucky Field. A large, round, flattened pumpkin, with broad Often attains a diameter of two feet. Color, creamy buff. The flesh is yellow. Superior to ordinary field pumpkin; fit for table as well as stock. Packet, 5 cts.; oz., 10 cts.; 1/4 lb., 25 cts.; 1b., 75 cts.

CONNECTICUT FIELD PUMPKIN

Maule's Yellow Sweet Potato Pie Pumpkin.

Famous Household Favorite.

This handsome and high-merit pumpkin, famed as a pie-maker, is one of the most satisfactory that I ever introduced. It has given satisfaction to many thousands of my customers. It is not only a good thing for the kitchen, but on account of its quality is an unsurpassed food for dairy cows.

The flesh is very thick and fine grained, of a beautiful golden yellow color, and in texture and flavor peculiarly adapted for pie-making purposes.

It is very prolific, a single vine often producing six or eight large pumpkins. As a winter keeper it is unexcelled, as the pumpkins will remain in perfect condition until late in the spring.

I do not know of anything in the shape of a pumpkin that will be found more satisfactory for the family garden or farm use than Maule's Yellow Sweet Potato Pie Pumpkin; but, as its name indicates, it is especially adapted for house. hold purposes. It is sweet and delicate in flavor.

Weighs ten or twelve pounds on the average, but easily running up to greater weight under good culture. Indeed, it can be made to assume mammoth proportions, if desired; and its fine grain and delicate flavor will remain unimpaired.

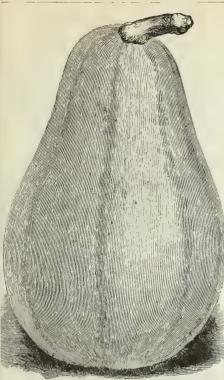

Pkt., 10c.; oz., 20c.; 1/4 lb., 50c.; lb., \$1.75.

SUGAR PUMPKIN.

HUNDRED-WEIGHT.—The Great Premium Taker. A selected strain of my Prize Potiron. Seed saved only from specimens weighing over 100 pounds. This is the pumpkin to plant for show purposes, as it not infrequently attains a record of 200 to 250 pounds. The flesh is fine-grained and sweet, and of a bright yellow color, making it a high-quality table or pie pumpkin. The outside is a dark salmon, decidedly bandsome. Hundred-Weight invariably wins favorable comment at fairs. It contains comparatively few seeds, and as I save only large specimens the price is necessarily high. Packet, 15 cents; ounce, 50 cents.

TENNESSEE SWEET POTATO PUMPKIN.

TENNESSEE SWEET POTATO.—Medium sized, pear shaped, slightly ribbed. Color, creamy white, sometimes lightly striped with green. Fiesh light colored, fine grained, dry and of a superior flavor, and when cooked resembling a sweet potato in taste. A good keeper. Pkt., 10 cts.; oz., 15 cts.; ½ lb., 40 cts.; lb., \$1.25.

CASHAW OR CROOKNECK PUMPKIN.

CASHAW.—Also known as Crookneck. One of the widely popular varieties. Two feet long, light colored. Flesh yellow, solid, sweet; excelent for pies. Has little interior cavity, being almost solid flesh. Pkt., 5 cts.; oz., 10 cts.; ¼ 1b., 30 cts.; lb., \$1.00.

JAPANESE PIE.—A high quality pumpkin of Japanese origin. The flesh is very thick, of a rich salmon color, fine grained, dry and sweet. Seed cavity small. Of medium size, early, very productive and a good keeper. Highly desirable as a pie or cooking pumpkin.

Pkt., 5c., oz., 10c., ½ 1b., 30c., lb., \$1.00.

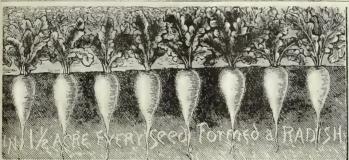

WINTER LUXURY.—A superior pie pumpkin, enormously productive and of medium size. Shape slightly oval about ten inches in diameter. Color, golden russet, finely netted. Flesh, deep golden, sweet and tender. An excellent winter keeper. Packet, 10 cents; ounce, 15 cents; 4 pound, 40 cts.; pound, \$1.25.

GOLDEN OBLONG.—The outer color is golden orange. The flesh is yellow, dry, sweet and excellent for pies. Skin is thin but tough. A good winter keeper. Packet, 5c.; ounce, 10c.; ¼ pound, 25c.; pound, 75c.

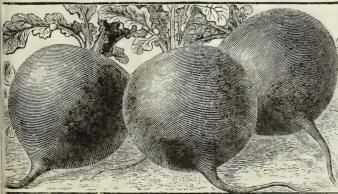

RADISH. In brisk demand in the markets at all seasons of the year, especially in winter and spring. Seed pods sometimes pickled.

Culture.—Sow in ground well enriched with rotted manure. Quality depends on quickness of growth. The proper temperature is 40° to 65°. Good ventilation is necessary if grown under glass. The seed should be sown shallow; I ounce to 100 feet of drill, or 8 to 10 pounds per acre. Thin to 1 inch apart for small varieties and 3 or 4 inches for the large varieties. Radishes will mature in from 3 to 5 weeks. They mature most rapidly when standing well apart.

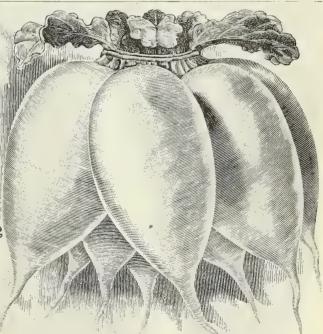

MAULE'S 1834 or ALL YEAR ROUND RADISH.

This high-bred white radish, which I introduced to the public a number of years ago, was brought to America in 1834 by a German gardener. It is now most widely known under the name of 1834. It is of a beautiful ivory color, and of crisp, brittle texture. That it has been in favor for two-thirds of a century is proof of its extra good quality, and I wish to say that my seed has always been from one and the same grower, and still maintains its original excellence. The shape is shown in the illustration. It is truly a radish of fixed habit, with an unusually long and well-known its original excellence. pedigree. It is solid in character, and conspicuously uniform in growth Adapted to every season; to forcing as well as to open air culture. Pkt., 10 cts.; 20 cts.; 1/4 lb., 50 cts.; lb., \$1.50.

CRIMSON GIANT RADISH.

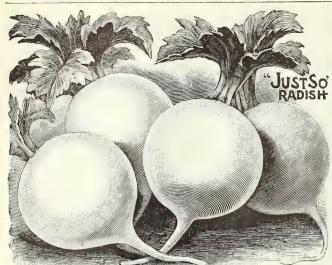

MAULE'S 1834 OR ALL YEAR ROUND RADISH.

Crimson Giant Radish.

This is a new early turnip-shaped radish, double the size of any of the early turnip-shaped type, and equally suitable for forcing or early planting out of doors. It is a rapid growing sort, developing roots of a beautiful deep crimson color, which vary in shape from round to almost oval, and often measure from 6 to 7 inches in circumference. The flesh is the purest white, mild in flavor, firm and crisp, and entirely free from the hollow or pithy centre. Good for market gardeners, for forcing or open ground culture.

Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00.

Maule's Just So Radish.

is the best all around radish ever offered the American public. I have is the best all around radish ever offered the American public. I have tested nearly every variety sent out, and have originated many varieties myself, but nothing has ever come to my notice that will equal Just So. They mature very early. I was able to pull fine radishes in 20 days from sowing the seed; radishes that would measure over one inch in diameter, fine, crisp, white and smooth. I never saw such a sight; they were like peas in a pod, all alike; one crowding the other out of the ground. Every seed produced a fine radish, and this on poor, gravelly soil which has had no manure applied in years. For iorcing in hot or cold beds they have no equal. I have tested them in every way, and am satisfied." Pkt., 10c.; 0z., 15c.; 1/4 lb., 40c.; lb., \$1.25.

Lightning Scarlet Turnip Radish.

Truly a little gem for bunching, and one of the most profitable for forcing. A good companion to Scarlet Turnip White Tipped. Nothing can surpass its crisp and nutty flavor. Fit to pull in from 16 to 21 days from sowing, and absolutely one of the best of all turnip-shaped radishes, sure to take a leading place in all under glass operations, as well as open air culture. Pkt., 10 cts.; oz., 15 cts.; 1/4 lb., 30 cts.; lb., \$1.00.

Prussian Globe Radish.

This new rapid growing red radish is very handsome and attractive in appearance and of the best quality. It is one of the smallest forcing radishes grown. Round or slightly flattened in shape. Very deep red in color, with small tops; flesh white, crisp and solid and of the finest quality. They grow so rapidly that under favorable conditions they may be pulled 20 days from sowing the seed. Remains in condition for use the longest of any of the early forcing sorts and is a favorite where a small, deep red, round radish is desired for early outdoor planting as well as forcing. Grown extensively by leading market gardeners of Long Island, and its great beauty makes it a quick seller. Packet, 10 cts.; ounce, 15 cts.; 4 pound, 30 cts.; pound, \$1.00.

DELICIOUS RADISH.

PRUSSIAN GLOBE RADISH.

RED DELICIOUS .- This

RED DELICIOUS.—This new radish is of a bright carmine red color, inclining toward a purple tint. It is superlatively good. Its size and form are correctly shown in the illustration. The leaves are small. The flesh is white, crisp, julcy and sweet. It is a quick grower, and bunches up handsomely. The name of this radish is part of the story; it is truly "delicious."

Pkt., 10 cts.; oz., 15 cts.; ½ 1b., 40 cts.; 1b., \$1.25.

WHITE DELICIOUS.—In describing this new half long radish I cannot do better than say that it is as good as Red Delicious described above, but is white instead of red in color. The only thing I have to add is that in crisp, sharp, brittle quality it has no superior; while the roots are always smooth and regular in shape and solid all the way through; never hollow until they are absolutely unfit for use. Skin is a pure white. A rapid grower, and one of the very best half long varieties. Pkt., 10c.; oz., 15c.; ½ 1b., 40c.; ib., \$1.25.

This new medium size, turnip-shaped radish, has a small oak leaved top, is of quick growth, maturing very early, and is deserving of general cultivation. It is of rich color; dech white, crisp and tender, and of mild flavor. A very attractive and distinct variety for forcing or outdoor planting.

Pkt., 5 cts.; oz., 10 cts.; ¼ 1b., 30 cts.; 1b., \$1.00.

NEW OAK LEAVED ROSE SALMON RADISH

Mrs. A. B. Mitchell, Tumwater, Wash.—Your New Ideal Early Corn is the best I have ever had on my ble. Also Lightning Scarlet Turnip Radish.

John R. Hamilton, Terrell, Pexas.—I ordered my seeds from you this year, and am more than pleased with them. Secured good stand, although the weather has been anything but favorable, and now my garden looks well after a long drought. I am especially pleased with your Earliest White Radish and Earliest of All Tomato. The following have asked me to send their names to you for your new catalogue, This request came after they had seen the superiority of plants from your seeds.

MAULE

MAULE'S EARLIEST WHITE.—A splendid olive shaped radish, pure white in color, which I secured in France from a prominent grower. It has proved to be as well suited to America as to Europe, and is now widely popular here. It is distinctly earlier than any other radish grown, of any color, as will be understood when I say that good sized radishes may be pulled in 12 to 15 days from the sowing of the seed. It has a small top, is solid and crisp, of good flavor, and first-class in every respect. Its size and shape are accurately shown in the illustration. Pkt., 10 cts.; oz., 15 cts.; 1/4 lb., 40 cts.; lb., \$1.25.

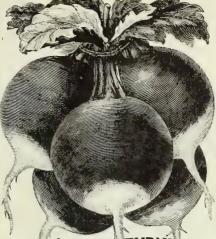

Maule's IMPROVED LONG SCARLET SHORT TOP RADISH.

Maule's Improved Long Scarlet Short Top.

The only objection to this radish is its name, which is too long, but is very descriptive. In it we have, without exception, the very finest long brittle, brightest scarlet radish I am acquainted with. My seed has for years been grown for me by the same French grower, who has bred it up until now it is simply the perfection of a long red radish, and much better than the ordinary strain offered. It matures beautiful radishes, which are always brittle and sweet, 25 to 30 days from the sowing of the seed. Size and shape well shown in illustration herewith. It is undoubtedly the standard long red variety for either the market or home gardener. Pkt., 5 cts.; oz., 10 cts.; ½ 1b., 30 cts.; lb. 80 cts.

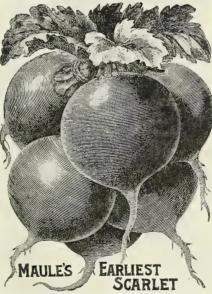

Marietta Tompkins, E^i vood, Ind.—Your seeds are fine, the best on the me ket. We have the praise of having the best vegetabl s on the market, and I think that is a good name.

MAULE'S SCARLET TURNIP SCARLE WHITE TIPPED

SCARLET TURNIP WHITE TIPPED.

The cut gives an idea of the shape of this attractive radish. The color is scarlet and white. It is extremely quick to mature, being ready for the table in 17 to 20 days from the time of sowing the seed. It is invaluable for forcing under glass, as well as for growth in the open air. The skin is very smooth, and its clear color gives it an appetizing appearance on the table. Its flavor is excellent, and its qualities high in all respects. Market gardeners find it a quick selling sort at good prices, always above ordinary sorts, and it is no less satisfactory in the private or home garden. Packet, 5 cents; ounce, 10 cents; 4 pound, 30 cents; pound, 1.00. SCARLET TURNIP WHITE TIPPED.

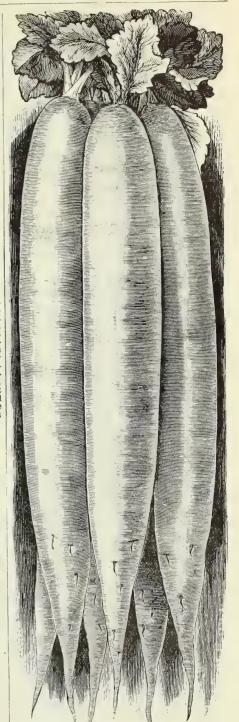

MAULE'S EARLIEST SCARLET.—If you wish to have the finest and first red radishes sow Maule's Earliest Scarlet. It is crisp and brittle. The skin is of a rich, scarlet color, while the flesh is pure white, and always tender, mild and sweet. It has a small, short top, and is well adapted to open air culture or to forcing under glass. In favorable weather and in good soil it will mature in 18 to 20 days from the sowing of the seed. It is extensively used by market gardeners and truckers, who hold it in high esteem. It is good, quick and profitable. Its globular shape and attractive proportions are well shown in the engraving above and I do not think it can be surpassed. Pkt., 10c., oz., 15c., ½ lb., 30c.; lb., \$1.00. MAULE'S EARLIEST SCARLET. -Pkt., 10c.; oz., 15c.; 1/4 lb., 30c.; lb., \$1.00.

J. A. Masing, Salina, Kan.—I bought 1 pound of your Scarlet Turnip White Tipped Radish seed last year, and it proved the best I have ever sown. Every seed a radish of perfect form and color.

Geo. F. Shaver, Richmond, Va.—I will state that your Maule's Improved Long Scarlet Short Top Radish is the finest vegetable in this line I have ever seen. I have had it on my table for the last three weeks, and it is the best radish I have ever seen.

John Schaefer, Evansville, Ind.—I am well pleased with the seeds received from you. I had the earliest and finest radishes on the market.

NEW ICICLE RADISH.

NEW RADISH. ICICLE.

Long, White, Extremely Early.

Excellent and profitable; a new and distinct sort. Ready for use as soon as Maule's Long Scarlet Short Top, but has fewer leaves and is even better for forcing. Admirable alike for open air and under glass.

The Icicle radish is perfectly white in color, and long, slender and tapering in shape. It quickly grows to market size, is crisp and brittle, and of mild, sweet flavor. It remains tender during the entire growing period, and is quite as good when an inch in diameter as when only half an inch.

A fine variety for market and private gardeners, who have a demand for an early, long, white radish. It was a marvel of excellence at Briar Crest and Panmure, and will certainly become popular. Pkt., 10 cts.; oz., 15 cts.; 14, 10, 51.00.

WHITE BOX.

A most excellent radish for forcing under glass or for growing in the open ground. Its short top and rapid growth make it a great favorite with market men, and its mild, sweet quality wins the favor of the consumer. At Philadelphia and elsewhere the market men grow it extensively in glass covered frames without heat. The frames are sometimes called "boxes," and hence the name of the radish Packet, 5 ets.; ounce, 10 cts.; ¼ pound, 30 cts.; pound, 80 cts.

WHITE LADY FINGER.—Sometimes called Long White Vienna. A fit companion for Maule's Long Scarlet Short Top, being very much of the same character, but white instead of red. It has been an extremely popular sort for years, and is one of the very best and finest of the long white radishes. It is graceful in form, and in flavor is sweet and mild, with brittle flesh. It is an especial favorite with many market gardeners, and has recently undoubtedly taken a fresh hold upon the popular taste, as the demand has largely increased for my selected strain of White Lady Finger during the last five years. You cannot make a mistake by including this variety in your order, as it is sure to please all lovers of long white radishes. Pkt., 5c.; oz., 10c.; ¼ 1b., 30c.; 1b., \$1.

CINCINNATI MARKET.—Sometimes called Glass Radish, in allusion to its brittleness. This radish is widely sown in the West, and is certainly of high quality, but I find that it is almost identical with my Long Scarlet. In my trial grounds I can see but little difference between the two sorts, except that Cincinnati Market may be somewhat larger in size and a little darker in coloring than Maule's Long Scarlet. No one will make much of a mistake in sowing one kind for the other, but for the sake of those who prefer the Cincinnati Market I list a genuine strain of that seed. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 30 cts.; lb., \$1.00.

Deduct 10 cents per pound when ordering seeds by express or freight, customer to pay transportation charges.

CHARTIES shading to cleation. Large, to This radish m Pkt., 5 cts.; o

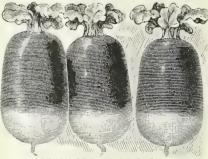

LONG CARDINAL.—Fit for use in 25 days from sowing. It is of a bright red color, with white tip. Shape shown in the illustration. Noted for its crisp, tender flesh and good appearance. It is smooth and uniform and highly colored; the contrast of brightest cardinal with the white tips is both effective and fetching. Being early it is very profitable for marketing. Pkt., 5c.; oz., 10c.; ½ lb., 30c.; lb., \$1.00.

mes called for Maule's uch of the bd. It has ars, and is long white in flavor It is an gardeners, fresh hold has largely out cannot tay in your long white ca; lb., \$1. mes called less. This is certainly st identical grounds I two sorts, somewhat oring than he much of ler, but for ati Market kt., 5 cts.;

buct 10 cents pound when ling seeds by so or freight, mer to pay is portation less.

CHARTIERS,—A long, shown, in the illustration as shown, in the illustration and ingreated the second radials, red above and anding to clear white at the tipn as shown, in the illustration.

CHARTIERS.—A long, smooth radish, red above and shading to clear: white at the tip, as shown in the illustration. Large, but both brittle and tender. Widely popular. This radish makes a fine appearance on the market stall, **Pkt.**, 5 cts.; oz., 10 cts.; ½ lb., 30 cts.; lb., \$1.00.

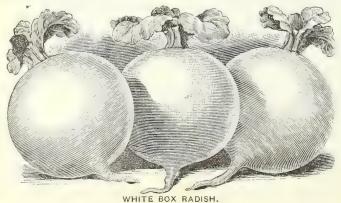

FRENCH BREAKFAST RADISH.

FRENCH BREAKFAST.— This pretty radish in color is bright red, tipped with white. It is oblong in shape, and in quality is crisp and tender. It is a quick grower, and is an exceedingly popular variety. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 30 cts.; lb., 80 cts.

WHITE STRASBURG.—A white radish, of large size, good quality, and ability to resist severe heat. I have always recommended White Strasburg for summer planting. It will grow solid, with good flavor, when other kinds fail. Pkt., 5c.; oz., 10c.; ½ lb., 30c.; lb., \$1.00.

Mrs. A. H. Freer, Margaretville, N. Y.—Your seeds have all done better, notwithstanding the dry season, than any I have ever tried. I had lots of ripe tomatoes from your Earliest of All before my neighbors had any; the plants bore from early in August until frost. Harris' Earliest Watermelon is very early, sweet and tender.

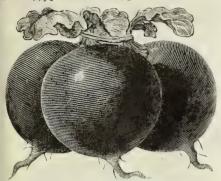

EARLY SCARLET ERFURT RADISH.

EARLY SCARLET ERFURT. — This radish is quite desirable as an early sort, and is particularly adapted to forcing. The shape is well shown in the illustration. The color is a vivid scarlet. The flesh is white, crisp, solid and mild. It has a very small top, and will bear close planting. An excellent radish for the market gardener. Packet, 5 cts.; ounce, 10 cts.; 4 pound, 30 cts.; pound, \$1.00.

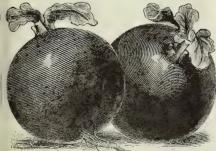

EARLY ROUND DARK RED RADISH.

EARLY ROUND DARK RED .- This rad-EARLY ROUND DARK RED.—This radialsh is a great favorite with market gardeners, on account of its size and attractive appearance. Its beautiful color is implied in its name. It makes very rapid growth, and is one of the sweetest and tenderest radishes on my whole list. Market gardeners and private growers as well find this variety to give entire satisfaction in point of profit and general good qualities. Pkt., 5c.; oz., 15c.; ¼ 1b., 30c.; lb., \$1.00.

EARLY SCARLET TURNIP RADISH.

EARLY SCARLET TURNIP.—A good, standard scarlet radish for general purposes. It is of very quick growth, and of a very desirable size. Packet, 5 ets.; ounce, 10 ets.; 1/4 pound, 30 cts.; pound, 80 cts.

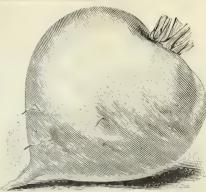

VICK'S SCARLET GLOBE RADISH.

VICK'S SCARLET GLOBE.—This grand radish has established a good reputation as a forcing sort. Its peculiarity is that it will bear the heat requisite for forcing without becoming pithy in character or suffering injury to its flavor. Its attractive shape is shown in the flustration. Its color is a rich seartet. It has a small top and is a high bred radish. Pkt., 5 cts.; oz., 10 cts.; ½ ib., 30 cts.; lb., \$1.00.

EARLY SCARLET OLIVE SHAPED .- This highly desirable early radish is of quick growth and attractive rich carmine color. It is of good appearance upon a plate or when bunched for sale, and is of mild flavor, with crisp flesh. The illustration shows both its shape and its size. Pkt., 5c.; oz., 10c.; 1/4 lb., 30c.; lb., 80c.

GIANT STUTTGART RADISH.

GIANT STUTTGART. — This mammoth white radish is the largest of the turnip shaped sorts. It has solid, crisp, pungent flesh, and is highly prized by people demanding a radish of high or lively flavor. Both skin and flesh are pure white. It should be given plenty of space in the row. The shape is shown in the illustration. It is well known and popular. Pkt., 5c.; oz., 10c.; // lb., 30c.; lb., 80c.

Winter Radishes.

CHINA ROSE WINTER RADISH.

gent. A splendid keeper for use in winter. A very showy radish. Packet, 5 cents; ounce, 10 cents; ½ pound, 30 cents; pound, \$1.00.

HORSE-RADISH SETS.

Horse-radish is always in demand in winter and spring. The culture is by sets or root cuttings, as it seldom seeds. These sets are planted in rows or furrows 2 to 3 feet apart and 15 to 18 inches apart in the rows. The sets should be placed in a perpendicular position, with erown 3 to 6 inches below surface. Horse-radish delights in a deep, rich soil and requires but little cultural attention. It makes large top growth, giving weeds small chance. Near to markets the horse-radish is a most important crop. The common variety 1 offer at 25c. per dozen; 90c. per 100, by mail, postpaid. By ex. or fgt., not prepaid, 60c. per 100; \$4.00 per 1,000.

MALINER KREN.—(New Horse Radish from Bohemia.) Even ordinary kitads, but the roots are so much larger and heavier that the yield is about doubled. Then, too, it matures so much quicker that the crop can be sold in October. The flesh is pure white. Three and four tons per acre can be grown easily. This grand variety was found in Bohemia by Mr. David Fairchild, Agricultural Explorer for the U. S. Department of Agriculture, and my roots are from the original lot. Price, 6 for 25 cts.; 40 ets. per doz.; \$1.75 per 100, by mail, postpaid. By express or freight, not prepaid, 50 for 65c.; \$1 25 per 100; \$8.00 per 1000.

RHUBARB.

CULTURE.—Usually multiplied by division of roots. Plant 4 feet apart each way, in very rich soil. Rhubarb is a gross feeder, and will make good use of the strongest manure, either fresh or rotted. Pull as long as demand continues, which is usually 1 to 2 months. Cultivate well and top dress liberally twice a year—in early spring and at the end of pulling

season. Plants easily grown from seed; used for forcing during winter.

VICTORIA.—A good market sort. Stalks red. Pht., 5 cts.; cts.; '4 lb., 40 cts.; lb., \$1.50. Roots, 15 cts. each; 4 for 50 cts..

VICTORIA RHUBARB. postpaid. By express or freight, not prepaid, \$5.00 per 100.

EVERLASTING.

rrue spinach, but an admirable substitute. Cooks like others. Pkt., 5c.; oz., 10c.; ¼ 1b., 30c.; lb. \$1.

LONG STAND-ING.—Also called Improved Thick-leaved. Leaves large,

Spinach.

CULTURE.—Sow in drills or broadcast, in spring or autumn. Springsown spinach should be cut as soon as large enough. Autumn-grown spinach may be cut all winter, when not covered with snow. Use 1 oz. to 130 feet of row; 12 pounds per acre broadcast, or 8 pounds in drills.

VICTORIA.—This is a handsome variety with exceedingly dark green color, and has very long standing qualities. Market gardeners around Philadelphia praise this sort highly. Unexcelled for spring or fall sowing. Pkt., 5 cts.; 02., 10 cts.; ½ lb., 15 cts.; 1b., 35 cts.; 5 lbs., \$1.50.

EVERLASTING SPINACH

Also called Norfolk Savoy Leaved. A great favorite with market gardeners along the Atlantic slope, from Pennsylvania and New Jersey southward. It has thick, dark green wrinkled leaves, and is perfectly hardy. Fine substance and flavor. One of the best for fall sowing. Pkt., 5c., oz., 10c.; ½ lb., 15c.; lb., 35c.; 5 lbs., \$1.50. BLOOMSDALE.

thick and crimped, with a fleshy appear-ance. Hardy, and one of the best varieties for either autumn or spring Sowing. Packet, 5 cents; ounce, 10 cents; pound, 35 cents; 5 pounds, \$1.50, postpaid.

ROUND LEAVED.—A hardy and favorite sort, desirable for early spring sowing. Packet, 5 cts.; ounce, 10 cts.; ¼ pound, 15 cts.; pound, 35 cts.; 5 pounds, \$1.50, postpaid.

LONG SEASON.—Forms a dense rosette of thick, tender and succulent crumpled or blistered leaves of dark green color. Their great substance and short leaf stalks enable them to stand up in hot weather, retaining their freshness for a long period after cutting. With this variety spinach may be continuously grown in any home garden. The best variety to be sown in the spring and at intervals for a successional summer supply. It is invaluable to both home and market gardeners.

Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 20 cts.; 1b., 50 cts.; 5 lbs.. \$2.25.

Salsify.
CULTURE.—Also known as Oyster
Plant or Vegetable Oyster. Treat
about the same as carrot, except about the same as carrot, except that saisify is hardier, and may be left in the ground all winter. Sow in drills a convenient distance 1 to 2 feet apart, and thin to 4 inches in the row. Cover seed about 1 inch. Use I ounce to 75 feet of row; 8 to 10 pounds per acre. Sow in April or May.

MAMMOTH SANDWICH ISLAND.—This is an improved type and the largest and most profitable salsify now in cultivation.

itable salsify now in cultivation. Roots much heavier than the old Long White, which I have discardand of more agreeable flavor. It is white in color, and a satisfactory sort in every way. It is invaluable to market gardeners. Packet, 10 cents; ounce, 20 cents; pound, 40 cents; pound, \$1.50.

P. C. Gaines, Long Beach, Miss.—I got my first catalogue from you in 1888, and have been buying your seeds ever since. I have bought seeds from a great many seedsmen, you beat them all; not in prices, but in quality — The best seeds are the cheapest.

Matthew Bosch, Salisbury, N. C.-I had the finest garden in this neighborhood. Took first prize on Chinese Giant red pepper and on pumpkins at our county fair. My radishes, turnips, etc., cannot be beat.

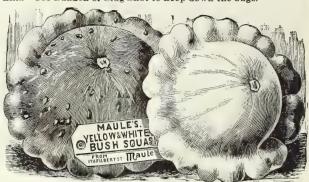

P. W. Stockslager, Riverside, Cal.-P. W. Stockslager, Riverside, Cal.—My small garden did excellent, especially the egg plants (seed I got from you), From 20 plants, after using all needed for family use and giving some to my nelgbbors, I have sold \$11 worth to date and plants yet full of fruit.

MAM SANDWICH ISLAND SALSIFY.

Summer Squashes.

CULTURE.—About the same as melons. Make the ground very rich A good sandy loam is best. The squashes are all tender, and the seed should not be planted until warm weather. Allow 4x4 feet for the hills of the bush squashes and 8x8 feet or more for the running varieties. Three plants to the hill; 2 to 3 pounds of seed to the acre. For summer squashes estimate 4 ounces to 100 hills; for winter squashes 8 ounces to 100 hills. Use Buhach or Siug Shot to keep down the bugs.

EARLIEST WHITE BUSH.—The bush or patty pan squashes are earlier than any other summer variety. The illustration shows the characteristic shape. The skin of this one is white, and it is tender when ready for use. It is of dwarf habit, quite hardy and very productive. Pkt., 5 cts.; oz., 10 cts.; ½ 1b., 30 cts.; 1b., \$1.00.

EARLY YELLOW BUSH.—Similar to the white bush in every way, except color and markings. The skin is of a clear yellow.

Packet, 5 cts.; ounce, 10 cts.; ½ pound, 30 cts.; pound, 85 cts.

GOLDEN SUMMER CROOKNECK.—One of the best of the summer squashes. It is of dwarf, bushy habit and very productive. The skin is yellow. The shape is shown in the illustration. The flesh has a greenish yellow color, and is dry and of most agreeable flavor. This is, in fact, most highly esteemed of all the summer varieties. I particularly recommend my selected strain to the attention of market gardeners. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 30 cts.; lb., 85 cts.

'41b., 30c.; 1b., 85c.
GOLDEN CUSTARD.—This excellent variety is sometimes called Mammoth Yellow Bush
on account of its
great size. It is the
largest of the scalloped sorts, sometimes attaining a diameter of 2 feet. The
color is a rich, golden
vellow, as indicated
by the name. In table
quality it is excellent.
Packet. 5 cents;
unnce. 10 cents;
y pound, 30 cents;
pound, 85 cents.

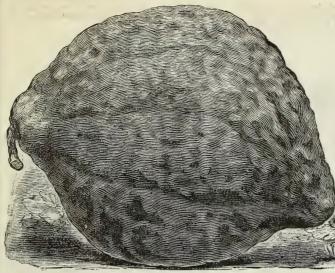

GOLDEN CUSTARD SQUASH.

W. B. Wait, New Castle, Pa.—I purchased my seeds from you last year and am more than pleased with the result; everything I got from you grew satisfactorily; and I want to mention particularly about those Habbard Squashes; I had just two vines and raised 22 fine squashes.

Mrs. E. P. Kipp, Ellendale, Del.—This is 21 years that I have grown your seeds. Your Earliest of All Tomato is fine and rightly named, and your Delicious Squash is also true to name.

John N. Jaeger, Washington, Mo.—Taken all round I must say that Maule's Plants and Seeds are the very best that money can buy. To order from Maule means a safe investment. Good as gold.

I saac Lile, Alpowa, Wash.—Yes, I had the best garden in this country. People asked why it was. I told them "I planted Maule's Seeds from Philadelphia."

MAULE'S IMPROVED HUBBARD SQUASH.

WINTER SQUASHES.

Maule's Improved Hubbard.

THE ACKNOWLEDGED STANDARD FOR QUALITY.

More people in more places plant the Hubbard Squash than any other sort; that is, it is the American favorite. It out-sells all other varieties in winter in the great Eastern markets. It is an especial favorite in New York and New England, but reaches perfection almost everywhere at the North from ocean to ocean. Thousands and tens of thousands of barrels of Hubbards are annually disposed of in Philadelphia, New York and Boston. While the average strain is good there are differences in the Hubbard type which should be recognized by progressive gardeners. Maule's Improved Hubbard represents the perfection of the type.

is the choicest type of Hubbard grown.

The flesh is of a rich yellow or orange color, and is very fine grained, solid, dry and sweet. The toughness of the rind or shell makes it a good keeper. The color varies somewhat, being sometimes green and sometimes reddish when mature; but the color and quality of the flesh are fixed and unchangeable—always a deep golden yellow or orange.

Packet, 10 cts.; ounce, 15 cts.; ½ pound, 40 cts.; pound, \$1.25.

MAMMOTH WHALE.—An extra large fruited sort, quite distinct in form and appearance. Often grows 3 feet long and sometimes weighs 100 pounds or over. The skin is of a dark olive green or slate color. Prolific, flesh firm and solid; of a beautiful orange color, quality good and keeps well, an extra good exhibition sort.

Packet, 10 cts.; ounce, 15 cts.; ¼ pound, 40 cts.; pound, \$1.50.

ESSEX HYBRID.—For shape see illustration. Skin and flesh a rich orange red. Flesh thick and solid. The flavor is excellent. One of the most productive squashes ever introduced. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 30 cts.; pound, \$1.00.

DELICIOUS.—One of the thickest meated and very best in quality, not exceptin Hubbard. Although at any time excellent, does not acquire its best quality unt winter. Packet, 5 cents; ounce, 10 cents; ¼ pound, 30 cents; pound, \$1.00.

PROLIFIC MARROW.—Maturing ten days sooner than the Boston Marrow. Sorange colored. Flesh yellow, fine grained, thick, dry and sweet and keeps well.

Packet, 5 cents; ounce, 10 cents; ¼ pound, 30 cents; pound, \$1.00.

BOSTON MARROW.—This is a widely popular squash for autumn and winter use. Its color is a bright orange. Flesh yellow, rich and sweet, a most popular variety.

Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00.

ESSEX HYBRID SQUASH.

THE FAXON.—One of the most reliable. Not excelled for table use or as a keeper. Outside color varies from green to orange. The flesh is rich, dry and sweet. Pkt., 5c.; 0z., 10c.; ½ 1b., 30c.; 1b., \$1.00.

THE FAXON SQUASH.

MAMMOTH CHILL.—The outer skin of this great squash is a rich orange yellow. The flesh is yellow and very thick, and the quality is good and nutritious. It is of the highest value as a stock food, far exceeding ordinary pumpkins in this respect, and answering as well as root crops. It is a prolific variety, and a good winter keeper. Has reached the great weight of 292 pounds. It is a typical sort to grow for exhibition at the fairs. Pkt., 10c.; oz., 15c.; ¼ lb., 40c.; lb., \$1.50.

BOSTON MARROW SQUASH.

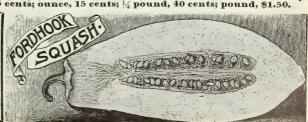

RED OR GOLDEN HUBBARD SQUASH.

RED OR GOLDEN HUBBARD.—A valuable squash, a sport of the old Hubbard. It has the shape and virtues of its parent, but is earlier and more productive. The color of the skin is very pleasing, being Geep yellow or orange red. Flesh richer in color than Hubbard, and of equal quality. Fine grained and sweet. It cooks dry, and is a splendid keeper.

Packet, 10 cents; ounce, 15 cents; 1/4 pound, 40 cents; pound, \$1.25.

FORDHOOK BUSH.—A true bush type of the above, that can be grown much more closely. The fruits are rather shorter and thicker than those of the running type, also thicker fleshed, and have a smaller seed cavity. Packet, 5 cents; ounce, 15 cents; ½ pound, 40 cents; pound, \$1.50.

Maule's Seeds Once Grown Always Grown.

MAMMOTH CHILI.-THE 292-POUND SQUASH.

TOMATOES. CULTURE.—Sow seed in a box or hot-bed and transplant at least once to get strong well rooted plants. When danger of frost is over set in open ground, three to five feet apart each way, and cultivate thoroughly. An ounce of seed will produce about 3,500 plants; enough for an acre.

The Greatest of all Early Tomatoes.

Today, 18 years after its first introduction to the American public, it is still the leading extra early tomato, and all its name implies:

Four Days to a Week Earlier Than Earliana or Any Other Extra Early Tomato.

NOTE.—In Monmouth County, N. J., where Earliana has been planted almost ex-clusively for years, Maule's Earliest of All was planted more largely than ever in 1909, taking the place of Earliana because the market growers there think it is so much better and larger, is earlier and brings better prices. This for the East. For the West would say: I shipped to Sunnyside Washington, alone last spring over 100 lbs. of seed

Since 1892 my friends have made tens of thousands of dollars by planting Maule's Earliest

of All, and if you have not given this wonderful variety a trial you will neglect your own interests if you do not include it in your order for 1910. Maule's Earliest of All is the best tomato in America for truckers, market gardeners and money makers.

Nor is its extreme earliness its only virtue, for it is of large size, good color and delicious flavor. It does not crack and has no hard core. Color is a bright red, and though a little irregular in shape, the fruit is not rough.

Pages of this catalogue could be filled with statements and comments about the money value of this fine, early tomato; but the best testimonial that I can present in regard to its worth is the fact that my customers, especially the New Jersey truckers, have again and again exhausted my supply of seed, even when I had imagined it to be sufficient for all demands.

Earliest of All is all its name implies, namely: the earliest tomato in existence, notwithstanding the claims made for June Pink, Earliana, Early Jewel, Early Richmond, etc., etc.

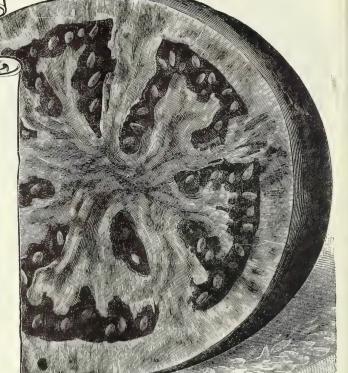

Packet, 15 cents; half ounce, 30 cents; ounce, 50 cents; quarter pound, \$1.50; pound, \$5.00.

In the New England States Maule's Earliest of All Tomato is a Wonder.

Mrs. Jas. M. Dow, Hartford. Conn.—I want to tell you how pleased 1 am with you. Earliest of All Tomato and what success I had last season. I raised about 18 plants of this variety, picking my first ripe tomato July 10th and the last one I had Thanksgiving. The 18 plants yielded me over 1,500 tomatoes—all nice and of good

J. A. Moloney, Orono, Me.—At the time I sent for tomato seed from you I also put it up to another house of standing, asking for a tomato that would beat Maule's Earliest of All. I got them and planted them in a flat, same size, same earth, etc., side, on the bench with yours. The result was I notified that house today that Maule's Earliest of All was to all appearances one week ahead in appearance of this test. Really your Earliest of All is grand, and the hundreds of customers I had for plants last summer were well satisfied.

Mrs. Jas. M. Dow, Hartford, Conn.—I want to tell you how pleased I am with your. Earliest of All Tomato and what success I had last season. I raised about 18 plants of this variety, picking my first ripe tomato July 10th and the last one i had roughly like the strip of the serving of the serving rest in the Berkshire Hills, 1,100 feet above the level and 200 miles north of Philadelpha, with killing frests until about June 1st. Last year was an exception and everything made good progress until the very dry weather set in phia, with killing frosts until about June 1st. Last year was everything made good progress until the very dry weather set in

Maule's Success Tomato.

itself at once in the high esteem of every tomato grower who planted it. That it well deserves the name "Success" is borne out in the fact that when I offered \$100 for a name for this variety 37 of my customers suggested the name Success. No other name would have been as appropriate, and no better title has been found for a new vegetable, fruit or flower for many a day. In shape Success is smooth, well formed and extremely deep from stem to blossom, making it unusually heavy. It ripens evenly to the stem, and is without ridges or cracks; has great meatiness and few seeds. It is firm without shipper. The vines are vigorous but compact. The joints that has sprung so quickly into popular favor.

(Bright red.) Maule's Success Tomato found a place for are short and it always fruits in large clusters at every second joint, which accounts for its wonderful productiveness. Maule's Success is the heaviest for its size of any variety, and on account of its brilliant red color, depth and solidity, is the handsomest tomato I have ever seen. Almost 10,000 letters have come to hand from my customers, praising Success in the highest terms. On the market stall its beautiful appearance and color make it sell ahead of all sorts, and its unusual solidity, few seeds and desirable form make it the most desirable canning variety known. The largest growers of tomatoes for canning and market purposes are all enthusiastic about being hard, an unrivaled home tomato and an unequaled Success. I have never introduced a variety of any vegetable

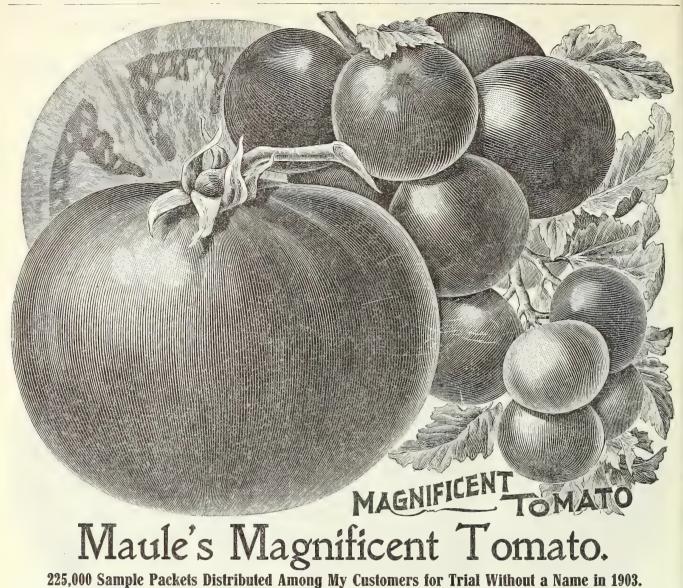

Packet, 10 cents; ounce, 45 cents; quarter pound, \$1.25; pound, \$4.50.

Mrs, L. M. Ross, Linden Hall, Pa.—The Success Tomato seed I bought of you last year produced the most beautiful perfect tomatoes I ever picked.

J. T. McGee, Burkesville, Ky.—I have been raising your Success Tomatoes for years and they cannot be excelled.

W. L. Danner, Fayetteville, Ark.—We have had plenty of vegetables all summer and fall. Your Tomato "Success" is indeed a success here, matchless and O. K. Henry Brugh, Lithia, Va.-I gathered, last year from 1½ acres, 610 bushels Success Tomatoes.

are t

225,000 Sample Packets Distributed Among My Customers for Trial Without a Name in 1903.

thoroughly in all sections of the country as Maule's Magnificent. In different soils and various climatic conditions it came out with flying colors. The name itself suggested by came out with flying colors. The name itself suggested by eleven customers, expresses in one word how really good it is, and it certainly well deserves the name Magnificent. In describing it I cannot do better than quote from a report sent me by Mr. A. F. Boyd, Limestone, Pa. Mr. Boyd writes as follows: "It is different from all other tomatoes in almost every particular. First—the plants root well from the very beginning of their growth. Second—As the result of this strong growth of root there is a large and vigorous growth of stock to support the weight of the fruit. Third—As a result of this strong and vigorous growth of stock the spreading branches produce a great abundance of fruit from each plant, giving larger crops than other tomatoes of equal acreage. Fourth—the fruit is large, solid and smooth, easily prepared Fourth—the fruit is large, solid and smooth, easily prepared for market on account of its perfection. Rub each tomato with a dry cloth, and your basket will challenge any gardener for size, smoothness, richness of color and general perfection. A good shipper, does not crack or rot; unsurpassed for canning.

(Bright red.) Never before has any vegetable been tried so | Fifth—The plant is hardy, can be set out early and not be oroughly in all sections of the country as Maule's Magnificiant by the cold if protected from frost. Sixth—The fruit ripens early, and the later fruit on the vines is just as large and perfect as the early. After two heavy frosts (the vines lightly covered with straw) we are selling as fine tomatoes as I have ever seen, the people glad to get them at one dollar per bushel. If you want an abundant crop of solid, smooth, bright red, meaty tomatoes that will be large and good as long as vines can be protected from frosts, send for Maule's Magnificent.'

Thousands upon thousands of people seeing this tomato growing in the gardens of their neighbors were struck by its remarkable beauty, making the remark they must surely have some of this seed next year, so that Maule's Magnificent

has at once sprung into popular favor.

Maule's Magnificent will be particularly in demand this year on account of the failure of my crop of Enormous. While it does not grow as large as the Enormous, Magnificent really produces double the quantity of tomatoes to the acre, so I can say to all my friends who are not able to plant Enormous, they could not find a better substitute than Magnificent.

Packet, 10 cents; ounce, 40 cents; quarter pound, \$1.25; pound, \$4.00.

Frank Haak, Ottawa, Ill.—Sold \$100 worth of vegetables raised from your seeds on one-balf acre of ground. Your early sweet corn and Maule's Earliest of All Tomatoes did exceptionally well. Sold \$35 worth of tomatoes from about 50 vines. Had best vegetables for miles around here.

Sherman J. Pool, Waverly, Iowa.—I am well satisfied with your seeds. Maule's Earliest of All Tomato is the best we ever had; earlier than all others, color good, size large; beats any we ever had.

E. T. McDonald. Tulia, Tex.—Your Tomato, Maule's Earliest of All, was about the only tomato that bore any fruit here last year, and I feel sure you will receive some good orders this winter. I sold over \$20.00 worth from 4 rows 20 yards long.

Mrs. R. Clark, Bridgeport, Wash.—Enclosed find my order for seeds. Three years ago I lived at Tekoa, Wash., and was told it was too cold there to raise tomatoes and melons. But I ordered some of your Earliest of All Tomato seed,

Phinney's Early Watermelon and Rocky Ford Muskmelon from you; also got my other vegetable seeds of you, and I wish you could have seen my garden; it was simply perfect. I raised and ripened lovely melons and tomatoes, and all my other vegetables were fine, too.

M. H. Myers, Villa Nova, Pa.—I have planted your seeds every year for more than 30 years and hope to be able, if I have my health, to plant them for 30 years more. They have always given excellent satisfaction.

W. R. Crump, Howell, Tenn.—I have Induced Mr. A. P. Taylor to become one of your customers. He is a merchant, and a very fine gardener, and sells —— seeds, and until this year used them exclusively. But I beat him so badly raising early tomatoes he was forced to acknowledge that Maule's Earliest of All was way ahead of —— Earliest of All: so he and I sent together. I shall order Maule's Earliest of All again this year, as well as the Maule's Imperial; the latter is my favorite both in quality and continued bearing.

Burpee's New Dwarf Giant.

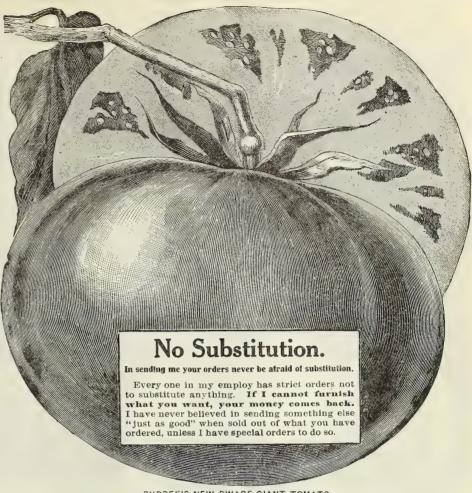

(Purple crimson.) This tomato was first offered last year, and I raised a small crop of it from seed obtained direct from the introducer, who has this to say regarding this variety: "Dwarf Giant is the largest fruited of all dwarf tomatoes; the fruits are truly gigantic in size, and are uniformly large throughout the season. In fact, no other tomato, excepting only the Ponderosa, is so large and heavy. The color is a rich purple crimson, and the depth of color is maintained throughout the entire fruit. The skin, while thin and easily removed in peeling, is sufficiently strong to protect the fruit when shipped to distant markets. Dwarf Giant is of uniformly compact and bush-like growth. While of the true dwarf type, the plants growing 2 feet high and well branched, are very strong and vigorous. The cut-leaf foliage is dark green and heavy, almost like leather in texture. The thick stalks carry well the tremendous weight of fruits, which are produced in clusters of 4 to 6, and weigh 12 to 18 ounces each."

Packet, 10 cents; 3 packets, 25 cents.

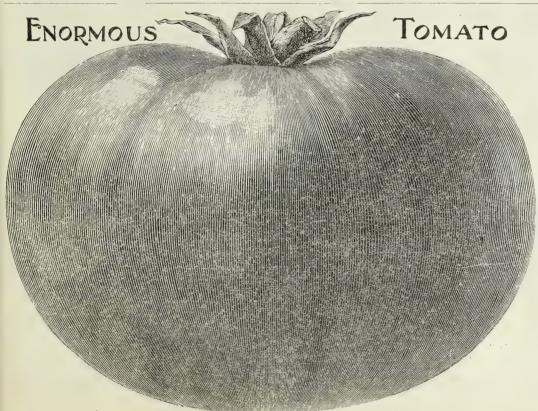

The McGee Tomato.

(Scarlet red.) My attention was called last spring to this tomato, which seemed to be creating quite a lot of comment in Texas, so I had my manager at Panmure send to Prof. McGee, San Marcos, Texas, the originator, for a few packets of the seed, and must say it has done fairly well

time. It impressed me so favorably that I saved the seed, and now offer another crop in the fall. Packet, 15 cents, 2 packets, 25 cents.

BURPEE'S NEW DWARF GIANT TOMATO. on my trial grounds; proving to be a short vined variety similar to | headquarters stock. Prof. McGee has been able to raise two crops in Earliana and maturing very nice smooth scarlet fruit about the same one year. In other words, from seed harvested in June he has raised

(Deep red.) Enormous Tomato, bred by Mr. Miesse, was first introduced to the public in my catalogue for 1899, having been sent out the previous year in packets for trial under the name "Eight to the Yard." Maule's Enormous, however, was not bred merely for large size. The name was selected from the fact that it seemed to apply better to this wonderful tomato than any other. In comparative trials with other sorts, under ordinary conditions, Maule's Enormous has made a record for both quality and quantity, while the beauty of the fruit makes it an easy and quick seller in all mar-kets. The fruit is remarkably solid and firm; Enormous is now universally recognized as a standard main crop red tomato, of great size and productive ability, and of the highest amateur and commercial quality. Everybody is pleased with it but I regret the crop is almost a failure this year.

Pkt., 10e.; 3 pkts., 25c.

Maule's Imperial Tomato.

(Purplish pink.) Maule's Imperial is unquestionably the best purple fruited tomato in the market to-day. Not quite as early as Maule's Earliest of All, but only a few days later. The fruits are beautifully smooth, and in market this variety invariably commands the highest prices at all times and in all seasons. I first named and offered Imperial in 1895, and in my catalogue that year published the following letter, which may still prove interesting, and which I received from Mr. James J. H. Gregory, of Marblehead, Mass., who had visited Mr. A. H. Halladay, Bellows Falls, Vt., the originator of Imperial, in 1884:

"I was at Mr. Halladay's, Bellows Falls, Vt., and examined his crop of tomatoes, and can say that I never saw a handsomer crop. They were uniform in size, ripened well around the stem, thick meated and resembled the Dwarf Champion in color. As for earliness, I can tell only what Mr. Halladay claims for them. At the time he said they were fourteen days earlier than any other, he having tried them for five years with all the earliest varities known. I measured several of the tomatoes, the result was 34 inches by 24 inches. From what I saw of it I think it would make an excellent shipping tomato, it being very firm and solid."

Maule's Imperial has proven so good that it is today planted more largely than ever by market gardeners in all sections of the country, although I am afraid that some of them do not know it under the name of Imperial, as thousands of pounds of this tomato have undoubtedly been sold under different names since it was originated by Mr. Halladay, of Vermont, 20 years ago, and first named and introduced by me in 1895.

Maule's Imperial is a sport or hybrid from the Dwarf Champion, but matures sooner. It is later than Maule's Earliest of All, but of superior appearance. It is as large and smooth as Matchless, and as solid as Turner Hybrid.

Maule's Imperial in color is between pink-purple and glossy crimson. The flavor is of the best. It ripens evenly to the stem, and is highly productive, the yield under field culture having reached 1½ bushels of ripe fruit per plant. It not only bears early but produces fruit until frost.

Maule's Imperial is no longer an experiment, but a recognized sort of established merit. It has proved its adaptability to all sections of the country, and is now a standard and satisfactory tomato in all respects.

Earliana.

(Scarlet red.) Very popular with many growers of tomatoes for early market. There is no question but that it is a very early variety, and one fully deserving the remarkable newspaper notoriety it has had for the last three or four years. As far as I am personally concerned I am satisfied Maule's Earliest of All is still the earliest of all tomatoes. But at the same time I am willing to admit that Spark's Earliana is also an excellent variety, and that it has given Maule's Earliest of All a harder tussle for supremacy than any early variety. Of large size, scarlet red color and great productiveness. I have secured a supply of seed direct from headquarters.

Pkt., 10 cts.; oz., 35 cts.; \(\frac{1}{4}\) 1b., \$1.00; 1b., \$3.50.

S. M. Viser, Pembroke, Ky.—Your Earliest of All Tomato takes the premium; I had 50 vines, the first one ripened June 28th, sold the first July 3rd and the last Nov. 10th; have sold 7 bushels off the vines and have enough to last until Christmas.

to last until Christmas.

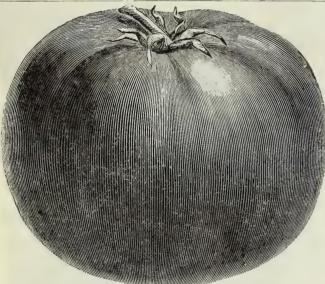

Jio R. Warren, Salem, Utah.—Be sure to send me the genuine Maule's Imperial Tomato, as I have grown this tomato since 1901 from seed obtained from you, and would not know how to get along without it. I planted tomato seed last year that I got from you in 1901, and I believe every seed grew that I put in the hotbed.

Sue Butner, Mt Vernon, Ky.—Last summer I had several trial packages of tomatoes sent me that were said by the parties who sent them to be the earliest in the world. I planted and cultivated Maule's Earliest of All Tomatoes by the side of them and Maule's ripened a week before the others. I will always recommend Maule's Seeds.

Emory L. Ayers, Rehoboth, Del.—Your Stone Tomato

Emory L. Ayers, Rehoboth, Del.—Your Stone Tomato seed was fine last year, as always. We picked 645 baskets of tomatoes from one acre, and they were nice, large ones —no small among them. Mine was the prize among all for one acre.

NEW CORELESS TOMATO.

New Goreless.

A perfect globe shaped medium to large size tomato of (Searlet red.) recent introduction. This new shape is preferred by many growers; it is almost round, being about the same diameter each way. There is little or no depression at the stem end; making it very economical for all uses. It is most productive, cluster of six or more fruits being produced at close intervals all along the vines. Fine for slicing, the seed cells being surrounded by bright red, heavy, meaty and delicious fiesh, which is slightly more acid than in some other varieties. In color it is a rich bright red. On account of its superior solidity it is a good long distance shipper. The vine is a strong and most luxuriant grower. A main crop tomato for canners, home or market gardeners,

Packet, 10 cts.; ounce, 40 cts.; 1/4 pound, \$1.25; pound, \$4.00.

Packet, 10 cts.; ounce, 35 cts.; 1/4 pound, \$1.00; pound, \$3.50.

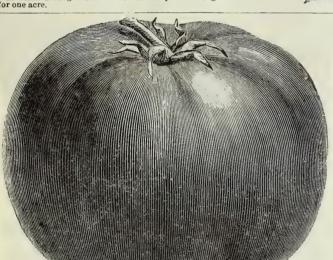

Warren W. Pay, Humansville, Mo.—We planted your Earliest of All Tomato at the same time with several others, and yours proved to be at least ten days ahead of them all. I put the first ripe tomatoes on the market July 10th, and they were fine ones; they are fine bearers and bring the highest price in the market. Our onlons are also beauties: Maule's Noxall and Lazy Wives Pole Beans are the best.

W. L. Jenkins, Ogden, Utah.—Please send me ½ lb. Dry Weather Cauliflower seed. You will receive the balance of my order a little later on, I thought I would place my order for cauliflower seed now, and make sure I get the kind I want while you have it in stock, as I cannot possibly plant any other strain. I am growing cauliflower for pickling purposes, and I have never been able to grow such cauliflower from any other strain of seed as I have from the Dry Weather; it stands our dry weather and hot summer months to perfection.

Philip Peterson, Clarinda, Iowa,—Your tomato Maule's Success was a sure success with us this year. The finest tomatoes I have ever seen and they made the grocery man smile every time I brought in a basket.

Maggie Chambers, Monogah, W. Va,—I have purchased seeds from a good many different seedsmen and I find yours the best. Have purchased my seeds from you for the last few years and have had the best stand of everything. Your Earliest of All Tomato is the earliest of them all. Maule's Success is the nicest tomato I have ever raised; it is so smooth and a nice size. I have no fault to find with any of your seeds, as all have proven first-class in every way.

Alec. Keegan, East Spokane, Wash.—I took first prize at the State Fair in Spokane last fall for best display of garden truck, out of your seeds; I also took first prize on peppers, muskmelons, cucumbers and squashes.

JUNE PINK TCMATO.

PARAGON. (Extra Select.)—(Deep Red) Fruit large, dark red in color, and perfectly smooth. The flesh is solid and of excellent flavor. It ripens evenly and quickly. Much used for canning purposes. The foliage is heavy and an immense cropper. Pkt., 5 cts.; oz., 30 cts.; ½ lb., \$5 cts.; lb., \$3.00.

DWARF STONE.—(Bright Red.) This excellent strain of

PARAGON TOMATO.

the Stone Tomato is claimed to be more productive and larger

the Stone Tomato is claimed to be more productive and larger fruited than the old Stone. In fact, it is about the largest of all the dwarf or bush tomatoes, averaging, at times, 4 inches in diameter and 2½ inches in depth, stem to blossom end.

Pkt., 10 cts.; oz., 30 cts.; ½ lb., 85 cts.; lb., \$3.00.

SELECTED ACME.—(Pink purple). A celebrated pink purple tomato; round, smooth and productive. Of delicious flavor and with firm, solid flesh. Size medium to large. It comes into bearing early. Pkt., 5 cts.; oz., 30 cts.; ½ lb., \$5c.; lb., \$3.00.

BEAUTY.—(Purplish Pink.) Fruit large, in clusters of four or five. Color a rich, purplish pink. Excellent for early market. It can be picked when green, and will ripen up afterward.

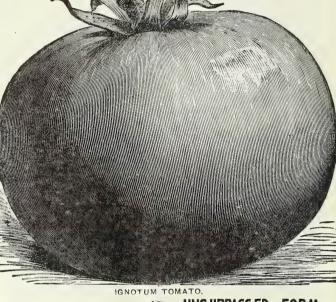

Pkt., 5 cts.; oz., 30 cts.; ½ lb., \$5 cts.; lb., \$3.00.

Pkt., 5 cts.; oz., 30 cts.; ¼ lb., 85 cts.; lb., \$3.00.

IGNOTUM.—(Deep Red.) A large main crop tomato, of deep red color. It is round and regular in shape, and always smooth and solid. A productive and profitable variety, the last pickings being equal in both quantity and quality to the first. It does not crack and resists drought well. It is among the earliest of the large, deep red, smooth varieties. In New Jersey it is grown quite largely as a second early market sort.

Pkt., 5 cts.; oz., 30 cts.; 1/4 lb., 85 cts.; lb., \$3.00.

Chalk's Early Jewel Tomato.

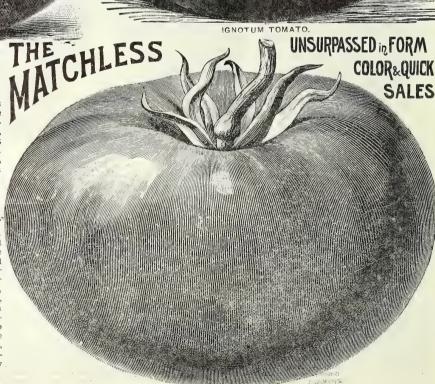

(Bright Red.) At Panmure I have given this variety a thorough test. I find it is not to be classed with Earliest of All or Earliana. It matured with us about the same time as Success, and while it is a smooth and productive sort should be classed with the second early varieties. The seed I offer was carefully grown at Panmure, from stock obtained at a high price direct from the introducer. A home or early market sort.

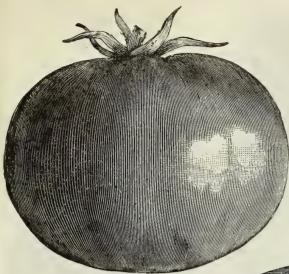

Pkt., 10c.; oz., 40c.; ¼ lb., \$1.10; lb., \$4.00.

The Matchless Tomato.

(Cardinal Red.) This great tomato is well named. The illustration gives a fair idea of its size and smoothness. The color is a rich, cardinal red. The skin is so tough that it is a splendid keeper and shipper, and is less liable to crack in wet weather than any other large tomato. Unsurpassed for market or for table. The plant is a strong grower, and is very productive. The fruit is free from core, and the seed spaces are small. The leaves are of a rich, dark green color, and very luxuriant, indicating great vigor, and giving the plant ability to produce fruit of the largest size throughout the entire season. It stands at the front as a large, bright red, main crop sort, and I can safely highly recommend it to all my friends, and especially to those who are running market gardens.

Pkt., 10c.; oz., 40c.; 1/4 lb., \$1.10: lb., \$4.00.

Livingston's Hummer Tomato.

(Scarlet red.) A new tomato of bright scarlet red color, medium size. Not as large as Stone, round as a ball. Very attractive, firm and solid, and of fine quality. A healthy, vigorous grower of medium size vines, very prolific, producing clusters of medium size, bright scarlet fruit. Quite early to ripen. Is especially desirable for home gardens or canning the whole fruit.

Packet, 10 cents; ounce, 35 cents; 1/4 pound, \$1.00; pound, \$3.50.

Golden Queen.

(Bright yellow.) Best large yellow tomato. Much like Paragon, except in color. Always smooth and ripens early. Quality excellent in all respects either for slicing or preserving.

Packet, 10 cents; ounce, 30 cents; 1/4 pound, 85 cents; pound, \$3.00.

LIVINGSTON'S HUMMER TOMATO

LIVINGSTON'S HUMMER TOMATO

MAULE'S TROPHY.— (Deep red.) I have pure seed of this grand old favorite. Its color is a rich deep red. The fruit is large, solid and generally smooth, and it still ranks as one of the best tomatoes in cultivation. The flavor is unsurpassed by any of the newer sorts. Maule's Trophy is yearly improving in quality. Pkt., 5 cts.; oz., 30 cts., 4 lb., 85 cents; lb., \$3.00.

PEAR-SHAPED RED.—
(Bright red.) Fruit small and pearshaped, about the size of a plum. Color, bright red.) Evidence of a plum. Packet, 5 cts.; ounce, 30 cts., 4 pound, 85 cts.; pound, \$3.00.

PEAR-SHAPED YELLOW.—

PEAR-SHAPED YELLOW. (Bright yellow.) A pretty tomato, similar to Pear-Shaped Red, except in color. Pkt., 5 cts.; oz., 30 cts.; ¼ lb., 85cts.; lb., \$3.00.

(Purplish pink.) The famous Dwarf Cham-pion tomato owes its wide popularity to its stiff, vigorous, upright growth, with fruit well above the soil, and to the earliness with which it reaches maturity. In color the fruit is a purplish pink, and it is always round, smooth and symmetrical. Size medium. Table quality superior. A good shipper. Plants may be set 3 feet apart in rows 4 feet apart. One of the earliest and most profitable tomatoes grown. The dark green wrinkled leaves bespeak a strong type. It is one of the best of the so-called tree tomatoes, and everywhere recognized as a money maker, a valuable home or market sort.

Packet, 10 cts.; ounce, 30 cts.; 1/4 pound, 85 cts.; pound, \$3.00.

DWARF CHAMPION TOMATO.

STONE TOMATO. STONE.

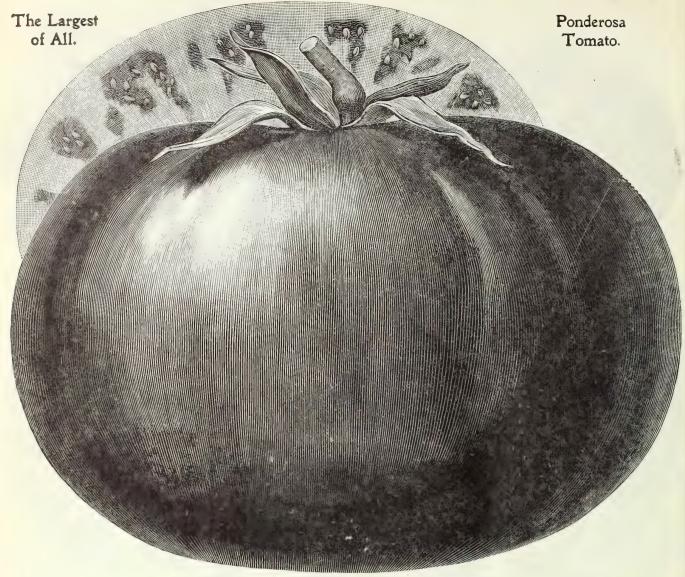

The Great Canning Tomato.

0 0

(Bright red.) This has come to be recognized as one of the best of all the standard sorts, though still comparatively new. The color is a desirable bright red. The fruit is of good size, perfectly smooth and of best table quality. It is a famous main crop tomato in many sections, both North and South, and is much used for can-The plants are productive and the fruit bears shipment well. Stone is used for forcing purposes under glass, with very satisfactory results. Its shape, color and quality adapts it to the fancy market trade, also to the home garden. Packet, 10 cents; ounce, 30 cents;

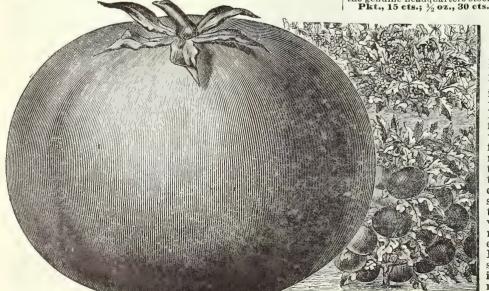

THE TURNER HYBRID. - (Purplish pink.) This is one of the largest, and most productive THE TURNER HYBRID.—(Purplish pink.) This is one of the largest, and most productive tomatoes grown. The color is a rich, pink ish red, with a suggestion of purple. The skin is thin, but so tough as to preserve the fruit a long time in good condition. The tomato in the basket is especially handsome. It ships well and sells quickly. The fruit ripens evenly to the stem, and is very smooth, with no hard core and in flavor is unsurpassed. It is a strong, vigorous grower, the vines demanding plenty of room. The foliage differs from all others, the leaves being entire and not cut or deeply lobed, resembling potato foliage. In fruiting capacity it is enormous. Packet, 10 cents; ounce, 30 cents; ¼ pound, 85 cents; pound, \$3.00.

PONDEROSA TOMATO.

(Purple crimson.) Although introduced many years ago, in all that time no tomato has ever surpassed the genuine Ponderosa in size or delicious, meaty flavor. It is not only the largest, but also the heaviest the genuine respectively. It is not only the largest, but also the heaviest the genuine headquarters stock.

Pkt., 15 cts.; ½ oz., 30 cts.; oz., 50 cts.; ¼ lb., \$1.50; lb., \$5.00.

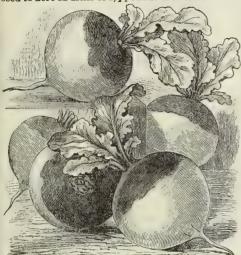

BONNY BEST EARLY TOMATO.

Bonny Best Early.

(Scarlet red.) This new variety is fully ten days earlier than Chalk's Early Jewel, and within two or three days as early as Earliana. It is a vigorous grower, enormously prolific, with larger foliage than the Earliana, which will protect the fruit from the hot sun, on days when other early varieties with less foliage would scald. In shape it is roundish and slightly flattened at the stem end but thicker through than most other tomatoes in its class. In color it is a beautiful state of the stem of the ste scarlet red; setting its fruit in clusters of five or more at close intervals. When ripening each set ripens nearly all at once, and ripens evenly all over up to the stem. Makes a magnificent variety for slicing; its greatest characteristic is its uniformity of size and smoothness in shape. A good early red skin variety for all purposes.

Packet, 10 cents; ounce, 40 cents; 1/4 pound, \$1.25; pound, \$4.00.

TURNIPS. CULTURE.—Sow in drills or broadcast. The main sowing is usually in July or August, as a second crop. The seeds should be about half an inch under the surface of the soil. Thin to 4 or 5 inches in the row. Well cultivated crops in drills will be far larger than broadcasted crops. Ruta Bagas or Swedish turnips or Swedes should be planted a month earlier than common turnips, and thinned to 6 or 8 inches in the row. Store in heaps covered first with straw and then with earth in the open field during winter. Use 2 pounds of seed to acre in drills or 2½ pounds broadcast.

RED OR PURPLE TOP WHITE GLOBE TURNIP.

RED OR PURPLE TOP WHITE GLOBE TURNIP RED OR PURPLE TOP WHITE GLOBE.—One of the handsomest and most salable turnips. I sell annually more seed of this variety than any other sort. As a turnip for home or market it is unsurpassed. It is a large, rapid growing sort, with globular shaped roots. Flesh pure white, and the best flavored, raw or cooked, of all turnips. The skin is white with a purple top. On account of its shape it will outyield any other sort. Like Red or Purple Top Strap Leaf it is one of my specialties, and the precautions I take in having only a strictly first-class strain has made many friends for this variety. Packet, 10 cts.; ounce, 15 cts.; ½ pound, 25 cts.; pound, 75 cts.

RED OR PURPLE TOP STRAP LEAF.—I sell enormous amounts of seed of this celebrated turnip every year. Philadelphia seedsmen for years past have been accustomed to handle it by the ton; consequently, it is not to be wondered at that I take care to send out only extra selected, carefully grown stock. It is one of the best table and stock turnips on the market, being fine grained and of mild flavor. (See illustration.) It is white below, with a bright purple top; flesh white, leaves short, narrow and erect. Will mature in 8 or 9 weeks. Good cropper and an excellent keeper.

Pkt., 5c.; oz., 10c.; ½ lb., 20c.; lb., 60c.

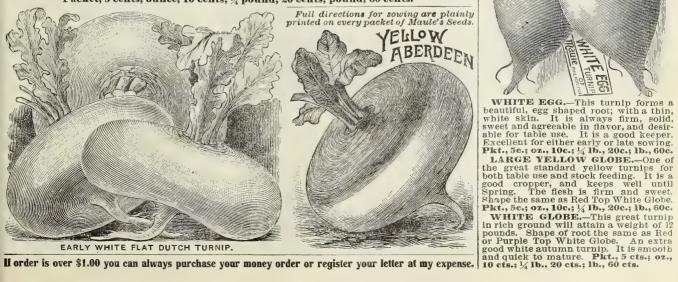

LARGE WHITE NORFOLK.—One of the standard turnips for field culture for stock

LARGE WHITE NORFOLK.—One of the standard turnips for field culture for stock feeding; grows to a large size. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 20 cts.; lb., 60 cts.

SOUTHERN SEVEN TOP.—A variety of turning grown entirely for its tops, which are used as a salad. It produces no edible root. This is a very hardy sort, standing through the winter south of Philadelphia, without any protection. Largely grown as greens in the South, where it is handled and cooked in a way similar to spinach. Pkt., 5 ets.; oz., 10 ets.; ½ lb., 20 ets.; lb., 60 ets.

YELLOW ABERDEEN.—A turnip of high merit. The flesh is yellow, tender, sugary and very olid. In color the turnip is purple above and deep yellow below, as indicated in the illustration. Is productive, hardy and a good keeper. Used on the table as well as for stock feeding.

Packet, 5 cents; ounce, 10 cents; 1/4 pound, 20 cents; pound, 60 cents. It is producti

EXTRA EARLY PURPLE TOP MILAN TURNIP.
EXTRA EARLY PURPLE TOP MILAN.—
Earliest turnip in cultivation; a week sooner than any other. Flat, smooth, of medium size, with bright purple top and few leaves. Flesh white and choice. Adapted to spring or fall. A good keeper. Packet, 5 cts.; ounce, 10 cts.; 4 pound, 25 cts.; pound, 75 cts.

EXTRA EARLY WHITE MILAN.—Similar to the above, but pure white. A very good growth. Fine grained and tender. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; lb., 75 cts.

EARLY WHITE FLAT DUTCH.—A flat, smooth, white turnip, held in high esteem by all growers; one of the best for the family garden in the spring. Of medium size and matures quickly. Skin is clear white; flesh excellent, mild and juicy. Pkt., 5c; oz., 10c.; ¼ lb., 20c.; lb., 60c.

RED OR PURPLE TOP STRAP LEAF TURNIP.

Full directions for sowing are plainly printed on every packet of Maule's Seeds. YELLOW ABERDEEN

WHITE SIX WEEKS TURNIP.

WHITE SIX WEEKS. - This is a

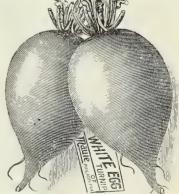

WHITE SIX WEEKS.—This is a comparatively new and very early turnip. The roots are fine, large, smooth and handsome. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 20 cts.; lb., 60 cts.

COW HORN.—A white turnip of peculiar long shape and quick maturity. It grows to a large size, standing half out of the ground. It is fine flavored and desirable. Cow Horn turnip sown in connection with Rape is one of the newly recommended things for green manuring purposes. Pkt., 5 cts.; oz., 10 cts.; ½ lb., 20 cts.; lb., 60 cts.

GOLDEN BALL TURNIP.

GOLDEN BALL. — A superior table turnip, of bright yellow color. In flavor it is rich and sweet. A rapid grower and excellent keeper. Its shape and appearance are indicated by the illustration. Pkt., 5c.; oz., 10c.; ½ lb., 20c.; lb., 60c.

Japanese Turnip.

A NEW VARIETY FROM THE LAND OF THE MIKADO.

A Large, Tender and Sweet Turnip, Deserving Universal Trial.

This new turnip is a large white variety, of great merit, and comes directly from Japan; in fact, the seed which I offer was actually grown in Japan, and was imported expressly for this season's sales. The shape of the turnip, as shown in the illustration, is between flat and globe. The color is a pure white, both outside and inside, except that there is a pale tinting of green on top, near the leaves. As it is a large turnip it has correspondingly large and vigorous leaves. It is solid and meaty in desh. As a heavy cropper and reliable winter keeper it cannot be excelled, and I am able to recommend it highly to farmers and gardeners. It will be found adapted to table use as well as to stock. This variety is new, and the seed stock is limited.

Packet, 10 ets.; ounce, 15 ets.; 1/4 pound, 40 ets.; pound, \$1.25.

RUTA BAGAS OR SWEDE

MAULE'S HEAVY CROPPING SWEDE.—I have been selling this magnificent ruta baga for 21 years, having first offered it in 1888, and it has given perfect satisfaction everywhere. It is, I think, the finest and most profitable of all the Swede turnips, being the hardiest, heaviest, best shaped and most productive. The roots are better keepers than other sorts. The flesh is of a beautiful yellow color, of the choicest quality, and full of nourishment. The external markings, the shape, etc., may be learned by referring to the illustration. It is the king of the ruta bagas. Pkt., 5c., oz., 10c.; ½ 1b., 25c.; 1b., 75c.

IMPROVED PURPLE TOP SWEDE.—Next in yield and value after my Heavy Cropping Swede, I place this old standard variety. It is of fine quality and is widely grown. It keeps perfectly all winter, and even into the following summer. It is hardy, productive, sweet, solid and satisfactory. Its shape is shown in the illustration, which also gives a hint of its yield. It is justly held in high esteem for both table and stock feeding purposes. My strain of this seed is of the best, as I long since succeeded, by careful selection, in attaining a stock of the highest purity and excellence. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents; pound, 60 cents.

LARGE WHITE FRENCH SWEDE.—Grows to a large size, and is most excellent for table use or for live stock. The white flesh is firm, rich and of sweet, nutritious quality. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents; pound, 60 cents.

SUTTON'S CHAMPION SWEDE.—Is a great cropper, sometimes producing over 40 tons to the acre. It is considered by many people to be one of the best ruta bagas grown, equally remarkable for quality, hardiness, keeping ability, size and flavor. Flesh yellow, solid, firm, sweet and rich. A most excellent sort either for table or for feeding stock. Packet, 5 cents; pound, 60 cents.

Libbie Leany, Leeds, Utah.— Maule's seeds, both vegetable and flower, have been used in the family for years and have never proven unsatisfactory. For a table turnip your Red Top Strap Leaf cannot be beaten.

WHITE ROCK RUTA BAGA.

wHITE ROCK SWEDE.—This variety was until lately but little known outside of the New England States, but in that section it has long had an enviable reputation as an extra good cropper and reliable keeper. It is equally desirable for table purposes or for stock feeding. The illustration shows its excellent form. Packet, 5 cts., ounce, 10 cts., 14 pound, 20 cts.; pound, 60 cts.

CULTURE.—Sow seed as soon as danger of frost is over; use wood ashes on seed bed. Pulverize soil of seed bed thoroughly. When plants are 6 inches high transplant into hills 4 or 5 feet apart each way, and cultivate frequently. An ounce of seed produces sufficient plants for an acre. BIG HAVANA.—An improved Havana tobacco, larger than the old sort. It is one of the earliest. Fine texture and superior flavor. Packet, 10 cets; ounce, 30 cts.

IMPROVED YELLOW ORONOKO. — Produces the best yellow type. Long broad leaf. For wrappers and cutters, also cigarettes. Packet, 10 cents; ounce, 25 cents.

IMPROVED WHITE STEM ORONOKO.—It has a large leaf and is of the finest texture. It cures the finest yellow.

Packet, 10 cents; ounce, 50 cents.

IMPROVED LONG LEAF GOOCH.—One of the best for growing on light or sandy soils. Has a long tapering leaf of fine texture. Packet, 10 cents; ounce, 25 cents.

SUMATRA.—Of fine texture and small fibre. Grown for its superior quality for cigar wrappers. Best stock. Pkt., 15 cts.; oz., 75 cts.

VUELTA DE ABAJO.—The finest, silklest and highest flavored Havana tobacco grown. A fine cigar variety. Pkt., 15c.; oz., 75c. CONNECTICUT SEED LEAF.—Grown in all sections of the U. S. and extensively in Connecticut. Broad leaf of medium length. Suitable for cigar fillers. Packet, 5 cents; ounce, 20 cents.

SWEET ORONOKO.—A favorite sort producing the finest plug llers. When sun cured it makes the best natural chewing leaf. Packet, 5 cents; ounce, 25 cents.

NEW PRIMUS.—This is the earliest tobacco grown. It will ripen even in Canada. Leaves large, fibre fine, texture silky, flavor superior. It makes an elegant smoking tobacco, either for cigars or pipe. Packet, 10 cents; ounce, 30 cents.

IMPROVED WHITE BURLEY.—The Western favorite, superior to the old variety of Burley. Makes better color; commands higher prices. Packet, 10 cents; ounce, 40 cents; ¼1b., \$1.10; lb., \$4.00.

ZIMMERS SPANISH.—An original pure Havana seed leaf. It is held to be one of the very best varieties of cigar tobacco in this country. Packet, 10 cents; ounce, 40 cents.

HERBS AND ODDS AND ENDS.

HERBS. Every kitchen garden should have a few herbs. They are easily grown and are always pleasant and desirable for flavoring, perfuming and medicinal purposes.

*Anise.—Packet, 5 cents; ounce, 10 cents.
*Baim.—Packet, 5 cents; ounce, 20 cents.
*Basil, Sweet.—Packet, 5 cents; ounce, 20 cents.
*Bene.—Packet, 5 cents; ounce, 15 cents.

Borage.-Packet, 5 cents; ounce, 15 cents.

†Caraway.—Packet, 5 cents; ounce, 10 cents. †Catnip.—Packet, 10 cents; ounce, 30 cents.

Coriander.-Packet, 5 cents; ounce, 10 cents. Cumin.-Packet, 5 cents; ounce, 20 cents.

†Dill.—Packet, 5 cents; ounce, 10 cents. †Fennel, Sweet.—Packet, 5 cts.; ounce, 10 cts. †Horehound.—Packet, 5 cents; ounce, 20 cents. Lavender.-Packet, 5 cents; ounce, 15 cents.

joram, Sweet.-Packet, 5 cts.; ounce, 15 cts.

†Mint.—Packet, 25 cents. *Pennyroyal.— Packet, 10 cts.; 3 packets, 25 cts.

†Rosemary.-Packet, 5 cents; ounce, 40 cents. +Rue.-Packet, 5 cents; ounce, 20 cents.

*Saffron.-Packet, 5 cents; ounce, 10 cents;

†Sage.—Pkt., 5 cts.; 02., 15 cts.; ¼ lb., 40c.; lb., \$1.50.
*Summer Savory.—Packet, 5 cts.; ounce, 15 cts. †Tansy.-Packet, 5 cents; ounce, 25 cents.

†Tarragon.-Packet, 10 cents; 3 packets, 25 cents Thyme.—Packet, 10 cents; ounce, 30 cents.

Winter Savory .- Packet, 5 cts.; ounce, 20 cts. Wormwood.-Packet, 5 cents; ounce, 15 cents.

(Herbs marked * are annual; marked † are perennial; marked | are biennial.

PER GRASS.—An an-nual, making a good salad. Sow thickly in shallow drills in spring, and make repeated plantings. It does well in dry soils. Pkt., 5c; oz., 10c.; ½1b., 20c.; 1b., 50c.

WATER CRESS. UPLAND CRESS.
Propagated by roots or seeds. It will grow in shallow water on the edge of streams, or upon a greenhouse bench in moist soil. Packet, 10 cents; ounce, 30 cents; ¼ pound, \$1.00.

Root used when dried as a substitute for coffee; the tendersprouts when forced in the dark are used for salads. acket, 5 cts.; ounce, 10 cts.; 1/4 pound, 20 cts.; pound, 60 cts.

GORN SALAD. Sometimes called Fetticus. Used as a salad like lettuce or cooked like spinach. CULTURE.—Treat like lettuce, except that it may be planted closer, as it is smaller. It is hardy, and may be carried through the winter in cold frame or under litter.

NEW LARGE ROUND-LEAVED. — Matures in 4 or 5 weeks. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 20 cts.; pound, 60 cts.

dive is blanched by tying the leaves together, or laying a board upon the plant, or covering with a box for a week. Use 4 to 5 lbs. of seed per acre; 1 oz. to 300 feet of row.

GREEN CURLED.
-Extra Curled. Pkt., 5c.; oz., 15c.; 1/4lb., 40c.; lb., \$1.25.

ENDIVE. Endive is used as a salad, and for window decoration in eating houses and restaurants.

CULTURE.—The seed is planted in the open ground, in June or July, as a second crop. Seed should be drilled in an inch below the surface, and the soil pressed firmly about it. In autumn the endive is blanched by ty-

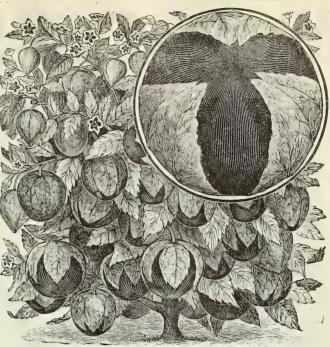

EVER WHITE CURLED ENDIVE.

EVER WHITE CURLED.—Self-blanching. Fine moss-like leaves. A favorite sort. Pkt., 5 cts.; oz., 15 cts.; ½ lb., 40 cts.; lb., \$1.25.

OYSTER OR FRINGED.—Largely grown for the markets of big cities in the East. Pkt., 5 cts.; oz., 15 cts.; ¼ lb., 40 cts.; lb., \$2.50.

BROAD LEAVED BATAVIAN.—Cooked like spingen or used for flavoring soups, stews, etc. Pkt., 5c.; oz., 15c.; ¼ lb., 40c.; lb., \$1.25.

CHIVES. Also called Schnittlauch. Chives resemble small onions. Easily raised from seeds. Perfectly hardy. Pkt., 10 cts.; oz., 50 cts. CHERVIL. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 25 cts. DANDELION. A hardy perennial. Sow in early spring, in drills half an inch deep, and thin to 10 or 12 inches in the row. Give good summer culture, and the Dandelion will be ready to cut the following spring. One ounce of seed to 300 feet of drill. Pkt, 10c.; oz., 50c.

MAMMOTH PURPLE FRUITED GROUND CHERRY.

Mammoth Purple Fruited Ground Cherry.

Superior to all other husk tomatoes for preserving purposes. Fully double the size of any other variety. The most prol fic of all; almost as many Ground Cherries as leaves. Originally received from Mexico and improved at Panmure. Is a wonderful prolific bearer of enormous size fruit, which measures 1½ to 2½ inches in diameter. The flesh is green while the color of the skin is green changing to a purple. This fruit when made into preserves, has the appearance of green gages. The flavor is simply delicious. The fruit is four times as large as other varieties; bush form plant 2½ feet high and the same in width; producing an abundance of fruit, which if kept in their shuck in a cool place will remain in perfect condition nearly all winter. Pkt., 15c.; 2 pkts., 25c.

IMPROVED GROUND GHERRY. A low growing plant producing fruit good for canning, preserving, pies, etc. Unexcelled when dried in sugar, like raisins or figs. The fruit is of a handsome yellow color, and will keep until midwinter. The diameter of the fruit is about ½ inch and the flavor suggests the strawberry. Packet, 10 cts.; 3 packets, 25 cts.

GARDEN LEMON.

Fruit striped dark green, somewhat smaller than the melon peach, with thinner flesh and decidedly more acid, thus dispensing with acid, thus dispensing with the sliced lemon so important in putting up the melon peach. The cultivation is the same as for muskmelon Pkt., 10c.; 3 pkts.; 25c.

MELON PEACH.

Grows on a vine, the same as a melon. The fruit has the size, shape and golden yellow color of an orange. The firsh is snow white, and makes excellent preserves. The fruit may be sliced and fried, like egg plant. Superior to peppers for use as mangoes. The vine is productive and quite hardy. Pkt., 10c.; 3 pkts., 25c.

CHINESE LANTERN PLANT. (Physalis Francheti.) Perfectly hardy. A beautiful window plant. Pods at first light green, then bright yellow, then intense orange scarlet. Resembles the winter cherry or husk tomato, except that the color is a deep ruby red and the food quality far superior. Packet, 10 cents; 3 packets, 25 cents.

Recipes for preserving sent with each of the above packets of seeds. One brick of spawn is sufficient for 8 square feet of prepared bed. Special cultural hints sent with every order. Purc Culture Brand. Brick, 40c.; 5 bricks, \$1.75, postpaid. By ex. or fgt., not prepaid, 10 bricks, \$2.00; 25 bricks, \$4.25.

maid. By ex. or fgt., not prepaid, 10 bricks, \$2.00; 25 bricks, \$4.25.

MISTARD

Make repeated sowings in shallow drills a foot apart.

Of easy cultivation.

SOUTHERN GIANT CURLED.—Produces large, dark green leaves with extra curled edges. Makes a fine salad and very effective in garnishing. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; lb., 75 cts.

NEW CHINESE.—Large crimped leaves. Tender and delicious when cooked like spinach. Pkt., 5c.; oz., 10c.; ½ lb., 25c.; lb., 75c.

FORDHOOK FANCY.—Beautiful dark green leaves, curved outward like an ostrich plume. Pkt., 5c.; oz., 10c.; ½ lb., 25c.; lb., 75c.

WHITE.—Mostly grown for its large, round yellow seeds, which are used as a condiment. Pkt., 5c.; oz., 10c.; ½ lb., 15c.; lb., 40c.

NASTURTIUM. Used for pickles. Also prized as a flower. CULTURE.—Sow in drills, 1 inch deep, in early spring The tall kinds need sticks. An ounce will sow 25 feet of row.

TALL.—Pkt., 5 cts.; oz., 10 cts.; ½ lb., 20 cts.; lb., 70 cts.

DWARF.—Pkt., 5 cts.; oz., 10 cts.; ½ lb., 25 cts.; lb., 90 cts.

SORREL. Used as a salad. It has a sprightly flavor. Cook like spinach. Pkt., 5c.; oz., 15c.; 1/2 lb., 40c.; lb., \$1.25.

Maule's Field Seeds

Nothing better illustrates my policy of business than the fact that one of my leading Yellow Dent corns today was also one of my leading specialties 25 years ago, so much so that away back in 1889, when the American Agriculturist offered large cash prizes to those of their subscribers raising the largest yield on a single acre of corn, the first prize in this contest was secured by the late Alfred Rose, of Penn Yan, Yates Co., N. Y., who purchased his seed from me; and the second prize was secured by another one of my customers, in Nebraska, who also purchased his corn from me; one raising 213 bushels, the other 171 bushels on a single acre of ground. The reports of both these gentlemen were thoroughly investigated and found correct by a jury composed entirely of disinterested parties. The variety was my Mastodon Corn, which my friends will find prominently listed on page 113 of this catalogue. Although it has been more than 25 years since I originally named and introduced the Mastodon variety, it is as good today as it was then. I simply reiterate this incident to emphasize the fact that in field seeds, as well as in vegetables, I believe that the old standbys, if properly taken care of and improved year by year, are in many cases equal, if indeed they do not surpass the new things it is customary for so many seedsmen to offer each year, and which frequently die a natural death before they are out of their swaddling clothes. Owing to the large size of this book, in connection with other departments, my friends will notice I give more prominence to Field, Grass and Clover Seed, etc., this year than usual, and am surely looking for an increased trade. It is hardly necessary to say my samples must be good,

If Not Satisfied Your Money Back.

as you can always have

Packet, 10 cents; $\frac{1}{2}$ pound, 30 cents; pound, 50 cents; 3 pounds, \$1.25, by mail, postpaid. By express or freight, not prepaid, $\frac{1}{2}$ peck, 85 cents; peck, \$1.50; bushel, \$5.00; 10 bushels, \$40.00.

Johnson County White Dent Corn.

A Single Ear Has Won \$1,000 in Prizes.

This wonderful corn is one of the sensations among progressive farmers. During the past 2 years at the Chicago and Omaha National Corn Expositions, this variety has captured prizes amounting to \$10,183.50 It also won the Grand Prize at the St. Louis Exposition and the Silver Medal at the Paris Exposition. The reason for this is because it complies with the score card more than any other corn grown. The high breeding of this variety makes it uniform in exhibit. The ears are cylindrical in shape up to within about 2 inches of the tip, where there is a slight tapering. Both kernel and cob are white. The tips of the ears are well filled, a large percentage of them being completely covered with grain. The butts are deeply rounded with medium shanks. The kernels are uniform in size and very long and wedge-shaped. The ears will average about 10 inches in length and from 7½ to 8 inches in circumference. There is very little space between the rows and this variety yields a very high percentage of shelled corn. The stalk is good and thrifty, ranging in height from 10 to 12 feet. An excellent root system enables the stalk to stand up under a heavy load of corn even during severe rain and wind storms. This variety has no barren stalks and is practically free from smut and other corn diseases. It is strong in pollen and stands a great deal of scorching wind and sun. Matures in about 110 days. According to analysis Johnson County White Dent is very rich in protein, which every stock raiser will appreciate. This corn has been known to yield from 100 to 125 bushels per acre and gives excellent satisfaction to all who have grown it as far north as 80 miles above Philadelphia. Mr. L. H. Cooch, Editor of The Practical Farmer, grew some Johnson County White Dent on his farm last year and speaks of it in most glowing terms, his stock seed cost \$10.00 per bushel, and Mr. Cooch considers it the best investment in seed corn he ever made. I have purchased his crop, and this is the seed I am offering my customers. I must say I have neve

AN IMPROVED MASTODON CORN FROM INDIA

I think the above heading will arrest the attention of a great many of my seed corn-customers, and in explanation I publish the following letter from one of my customers in India, Mr. John Jauncey, Bega, Angledale, India:

"I received by last American mall three packages of seed potatoes and one of garden seeds which arrived in good condition. I send you by this mail a package of seed corn. It is from the Early Mastodon Corn I received from you 10 years ago, which I allowed to become inoculated with a Yellow Dent Corn that I had growing at the time, and a very good kind. I did so intentionally, considering a cross would be better than either kind alone. The result has been very satisfactory, but my corn is now three weeks later than the old Mastodon was. I may remark the rows on the old Mastodon were irregular, scarcely a straight row in a sackful; now the rows are as straight as any.

"Trusting the seed will reach you safely and that you may be able to make some use of it, I remain,

"JOHN JAUNCEY."

The corn duly reached me the latter part of March, and was such an excellent sample I determined to raise a crop of it. It proved very distinct from Mastodon in many ways. In the first place it is the tallest growing corn I know of; many of the stalks are 12 to 15 feet high; these stalks being very close jointed, make most excellent ensilage; in fact, I think it is going to prove the best ensilage corn on the market. Two large ears were to be found on every stalk, averaging in length from 10 to 13 inches. It sets its ears from 4½ to 5 feet from the ground. I believe this corn can be made to yield with good cultivation, and without much trouble, 125 to 150 bushels per acre, besides making tons of the most desirable ensilage. The one great trouble is it takes 115 to 120 days to mature. I consider this the greatest novelty in corn offered in many years. I have only a small quantity of seed to offer this year, as I am going to plant a large acreage the coming season, and as long as my supply holds out I offer India Improved Mastodon at the following prices:

Packet, 15 cents; ½ pound, 60 cents; pound, \$1.00; 3 pounds, \$2.50, by mail,

Packet, 15 cents; ½ pound, 60 cents; pound, \$1.00; 3 pounds, \$2.50, by mall, postpaid. By express or freight, not prepaid, pound, 90 cents; 3 pounds, \$2.10.

REID'S YELLOW DENT.

The Most popular Yellow Dent Corn in the Great Central Corn Belt. Does Equally as well in Pennsylvania as it does in Illinois.

For a number of years past Reid's Yellow Dent has been one of the most popular varieties of the Middle West, some people going so far as to say there is more of this corn planted than of all other sorts combined. It is a true dent corn, color a beautful golden yellow, with one of the smallest cobs for size of ear of any yellow corn. Ears are frequently 10 to 11 inches long, and from 7 to 8 inches in diameter. It is easily shelled and matures its crop very early, frequently in 100 days or less. Itundoubtedly has taken more prizes at the Illinois State Fairs and other great corn shows than any other variety. The 10 ears that won the sweepstakes at the Great National Corn Exposition three years ago sold at auction for \$200, or \$20.00 a piece. I have an unusual crop of seed this season, grown in the Middle West, and will furnish it as long as the supply holds out, at the following prices:

Packet, 10 cents; pound, 40 cents; 3 pounds, \$1.00; by mail, postpaid.

By express or freight, not prepaid, peck, 75 cents;

bushel, \$2.50; 10 bushels, \$22.50.

A FINE YELLOW DENT CORN.

DROUGHTPROOF.

Resists Drought and Scorching Heat Better Than any Other Variety.

Droughtproof originated in Erie County, Ohio, and came to me through Mr. C. S. Clark, from whom I originally obtained the celebrated Early Mastodon that to-day is well and favorably known in all sections of the country. Mr. Clark wrote me in 1901 that if I wanted something distinctly better than anything on the market in the way of a bright yellow dent corn, he had it, and would give me the first chance at it. It took me but a short time to place with Mr. Clark probably the largest order ever given for any variety of corn the first year; in fact, I took Mr. Clark's entire crop.

My own field notes in regard to Droughtproof were in substance as follows:

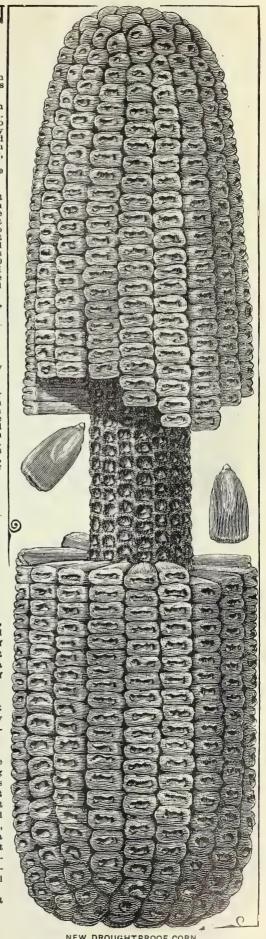

The largest grain of any Yellow Dent Corn. The smallest cob of any Yellow Dent Corn. Brightest color of grain. Fully as early as Leaming. Yield not excelled by any other sort. Strong growth of stalk and handsome ear. Unusual yield of shelled corn insured by great depth of grain.

Under date of November 6th, 1901, Mr. Clark wrote me as follows:

"You are fortunate to have the new Droughtproof yellow dent corn to place before your customers. More corn fields have been ruined by the drought and hot sun killing the tassel and pollen this past season than the writer has ever known, and especially is this fact true in the great corn belt. This new corn (now named Droughtproof) went on through six weeks of growing weather without a drop of rain, and the heat the most severe ever known in this section, and it has made a crop where other sorts failed. All fields that leaned towards the hot sun burned up. The pollen on these fields was killed, therefore the silk was not fertilized; result, no grains on the cob. On the other hand, a large field of this wonderful strong-growing variety, which leaned toward the sun, kept green and yielded over 100 bushels per acre. I do not hesitate to say that, all points considered-its beautiful color, small cob, long yellow grains, large ears-taking all points combined, it is the finest yellow corn ever introduced, and each customer who gives it a trial will be fully convinced that it is the best 90 to 100 day corn he ever planted."

Droughtproof Corn is phenomenally excellent, and must be tried by all farmers. It will yield big crops wherever corn can be grown. I advise all my friends to try it.

Packet, 10 cents; pound, 40 cents; 3 pounds, \$1.00, by mail, postpaid. By express or freight, not prepaid, peck, 85 cents: bushel. \$3.00; 2 bushels, \$5.50; 10 bushels. \$25.00.

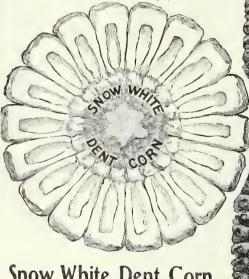

NEW DROUGHTPROOF CORN. DRAWN FROM NATURE.

Improved Klondike Field Corn.

This year I offer an Improved Klondike Corn that will fully equal in yield and every other quality, the Klondike that I have been furnishing my customers for the last eight years. A thoroughbred that has fulfilled its promise. Improved Klondike Corn combines more solid merits than any other corn I know of. Its great merit lies in the fact that it is a natural yielder. The illustration on this page is an exact reproduction of an average ear. The color is a

rich golden yellow, the ears are large, cobs medium size, butts and tips well covered, grains close together; the fodder grows strong and abundant, but not coarse; ears set in fine form about 4 feet from the ground, often setting two good sized ears to a stalk, The Improved Klondike was brought to my attention a few years ago, and after a thorough trial I became convinced that I had a corn that could be honestly recommended as a rival of the famous Mastodon. Matures in 100 to 110 days, according to the season.

Packet, 10 cents; pound, 30 cents; 3 pounds, 75 cents, by mail, postpaid. By express or freight, not prepaid, peck, 75 cents; bushel, \$2.50; 2 bushels, \$4.75; 10 bushels, \$22.50.

Snow White Dent Corn.

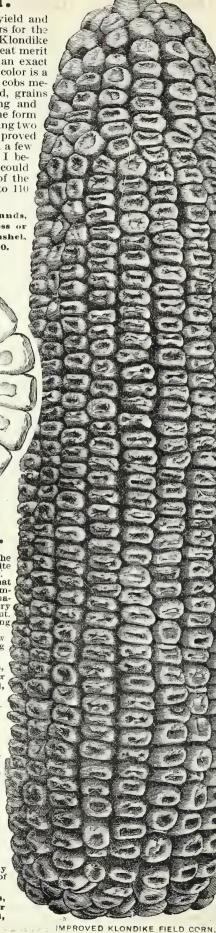

Has proven the grandest milling corn in the world, and is considered one of the best white corn for average yield and germinating power. In Snow White Dent we have a corn that combines very white color with large size, compactness and smoothness of grain and sure maturity. It has a large size ear and grows very large, compact, close set grains well filled out. Cob medium size, very white, and weighing about 7½ pounds per 70 pounds of ears. Taking all points into consideration, Snow White Dent is the white variety for milling and all other purposes.

Packet, 10 cts.; pound, 30 cts.; 3 pounds, 75 cts., by mail, postpaid. By express or freight, not prepaid, peck, 75 cts.; bushel, \$2.50; 2 bushels, \$4.75.

Minnesota King Corn.

This famous eight-rowed field corn is neither a dent nor a flint variety, but may be described as a half dent. It is widely advertised as the most valuable early field corn ever sent out. The introducers claim that no other sort will produce so largely and do so well, taking poor years with good ones, as Minnesota King. It is able to endure conditions of both flood and drought with remarkable success, but what is even more significant it can withstand changes of temperature, and is but little injured by heat or cold. It seems peculiarly adapted to those locations where short seasons and early autumn frosts make corn an uncertain crop. The grain is very broad and of an extremely clear, golden color. The eight-rowed ear is of good size and shape, with a small cob. This famous eight-rowed field corn is neither

Packet, 10 cts.; pound, 30 cts.; 3 pounds, 75 cts., by mail, postpaid. By express or freight, not prepaid, peck, 75 cts.; bushel, \$2.50; 2 bushels, \$4.75.

MINNESOTA KING FIELD CORN.

Maule's Improved Mastodon Corn.

The Earliest of all the Large Eared Varieties. Has a Record of 213 Bushels of Shelled Corn to the Acre.

In the celebrated American Agriculturist corn contest, Imp. Mastodon outyielded every other yellow corn. On the farm of Alfred Rose, Yates county, New York, tripoduced 213 bushels of shelled corn to the acre, and on the farm of George Cartner, Pawnee county, Nebraska, it produced 171 bushels of shelled corn to the acre. In both cases I furnished the seed.

There has been a brisk demand for this corn for years past, and my supply has not infrequently been completely exhausted early in the season. I regret to believe that unscrupulous dealers have sold a great deal of inferior or impure

seed under the name of Mastodon, thus deceiving their customers and injuring the reputation of a noble variety of corn. My suggestion is, therefore, that purchases be made only from reliable neighbors who have raised the stock or that orders be sent direct to me at 1711 Filbert street, Philadelphia, for the

true headquarters seed, and run no risk.

Maule's Improved Early Mastodon combines large yield, large grains and extra early quality to a remarkable degree. It originated with Mr. C. S. Clark, of Ohio, probably the largest grower of seed corn in America. Mr. Clark grows every variety of corn known to the American public, and claims Mastodon to be the best of all. He truly says that it is a high bred corn of beautiful color. Nothing surpasses it in number of rows on cob, and in depth of grains. It makes fine looking shelled corn, showing two shades of color, and commanding the highest price in market.

Mr. Clark further states that it fully withstands the rigor of this Northern climate, makes a rapid, strong and rank growth, attains a good height, "and will outyield any corn ever grown in this section. * * * It was grown and ripened in from 96 to 110 days within eight miles of Lake Erie." Fields

planted June 1 were cut September 15.

"The Mastodon is three weeks to one month earlier than Golden Beauty, growing side by side, and planted the same week. How can it be otherwise? It is crossed with the two earliest corns ever grown in the North-the White Cap and Early Yellow Dent."

Packet, 10 cents; pound, 40 cents; 3 pounds, \$1.00, postpaid. By express or freight, not prepaid, peck, 85 cents; bushel, \$3.00; 10 bushels, \$25.00.

CANADA EARLY YELLOW FLINT. — The most popular of all flint varieties; bears close planting. Matures in about 90 days. Ears are of medium length and have 8 rows of large deep yellow grains, which fill out to the extreme tip, cob small. The stalk grows about 6 feet high and make excellent fodder. Pkt., 10 cts.; lb., 30 cts.; 3 lbs., 75 cts., postpaid. By ex. or freight, not prepaid, pk., 75 cts.; bu., \$2.50.
PRIDE OF THE NORTH. A very early maturing yellow dent corn; it will ripen in Northern localities hitherto able to grow only the flint, and hence is of great value. The ears are of medium size, 8 to 10 inches long, and have from 14 to 16 rows of bright orange color grains; the stalk grows 6 to 8 feet high and makes good fod-

6 to 8 feet high and makes good fodder. Matures in about 90 days. Pkt., 10c.; lb., 30c.; 3 lbs., 75c., postpaid. Pk., 75c.; bu., \$2.50.

IMPROVED LEAMING. — A
popular early yellow dent variety.
Nearly always two good ears to the
stalk. Has yielded 134 bushels of
shelled corn to acre. Grain a deep
yellow color. Pkt., 10 cts.; 1b.,
30 cts.; 3 lbs., 75 cts., postpaid.
Peck, 75 cts.; bu., \$2.50.

Peck, 75 ets.; bu., \$2.50.

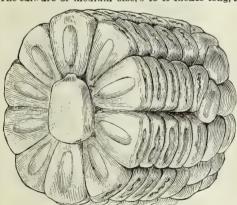

HICKORY KING. — Smallest cob and the largest grained white corn in cultivation. Will outyield many other white sorts, and will bear closer planting. Ripens in 100 to 120 days. It husks and shells easily and produces much fodder. Pkt., 10c.; lb., 30c.; 3 lbs., 75c., postpaid. Pk., 75c.; bu., \$2.50.

IOWA SILVER MINE. — A pure white corn with deep grain. The ear averages 10 to 12 inches in length, 16 to 20 rows, with small cob length, 16 to 20 rows, with small cob and filled out ciear over the tip. It is early, maturing in 95 to 100 days. The stalk grows to a height of about 7 to 8 feet; a good yielder. It is well worthy of extensive trial. Pkt., 10c.; 1b., 30c.; 3 1bs., 75c., post-paid. Pk., 75c.; bu., \$2.50.

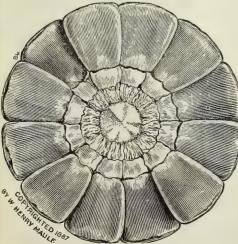

IMP. GOLDEN BEAUTY. fect ears, with 10 to 14 straight row fect ears, with 10 to 14 straight rows of large golden yellow grains. Cob small. When broken in half the grains will almost reach across. Easily shelled. My stock is worthy of the name improved. Pkt., 10c.; 1bt., 30c.; 3 lbs., 75c., postpaid. Peck, 75 cts.; bushel, \$2.50.

RED COB ENSILAGE. RED COB ENSILAGE.—A pure white corn cropping as high as 45 tons of fodder per acre. Sweet, tender and jutey. More nourishment than any other variety. Short joints, abundance of leaves and of tall growth. Pkt., 10 cts.; 1b., 30 cts.; 3 lbs., 75 cts., postpaid. Peck, 75 cts.; bushel, \$2.50.

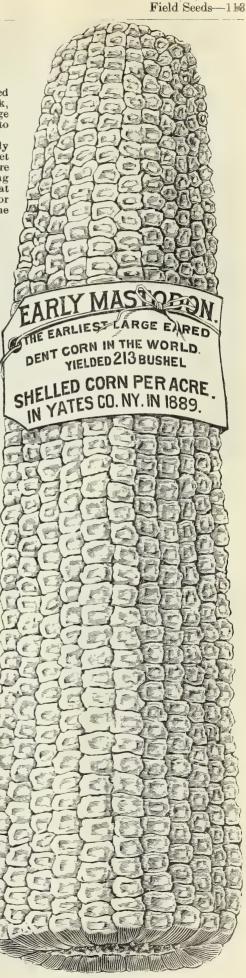

At prices quoted by the peck or bushel the purchaser must, in all cases, pay the transpor-tation charges.

HICKORY KING CORN.

IMPROVED GOLDEN BEAUTY CORN.

A FIELD OF NEW WHITE CLUSTER OATS.

New White Cluster Oats. A Heavy Yielder.

This new oats, grown extensively in the State of Ohio, is claimed to be the best large, white grained, stiff straw, side oats grown to date. The straw is exceedingly tall, stiff and heavy, and produces enormous yields of pure white grains. Its great stooling habit makes it one of the best varieties for hay. The heads are long and of branching habit. Well filled with plump, white kernels, which, when threshed, are very heavy. White Cluster does not lodge, on account of its strong, stiff straw, and large deep root growth, and has given very general satisfaction. Often yields 100 to 120 bushels or over per acre.

Packet, 10 cents; pound, 25 cents; 3 pounds, 65 cents, by mail, postpaid. By express or freight, not prepaid, peck, 50 cents; bushel of 32 pounds, \$1.65; 10 bushels, \$15.00.

Long's White Tartar Oats.

In the great oat section of Western New York, these oats have created considerable excitement for the last few years, and last season where they could get the seed, it was purchased by farmers to the exclusion of all other varieties. This improved strain of oats was originally obtained by selecting the largest and most vigorous plants from an extra good stock of Improved White Tartar; by continuing this selection for a number of years, Mr. Long so improved the variety in vigor and productiveness, that it earned the right to be properly called Long's White Tartar Oats. These oats have immense heads of grain, often measuring a foot long, and always well filled; the straw is very large, strong and stiff, and less liable to lodge than any other variety. The seed is large,

plump and heavy, pure white and with thin hulls. Furthermore, they are earlier by several days than any other variety. From my experiments with it for four seasons I am convinced that White Tartar will yield at least 15 bushels per acre more than any other improved variety, and from 20 to 30 bushels more than common oats. Last year we got a yield of 91 bushels per acre on a 7-acre field, and 74 bushels per acre on a 26-acre field, the latter not yielding as well as the first on account of late sowing. There is bound to be an enormous demand for this variety this season, and while I have quite a large quantity in store, I have no doubt I will be sold out before the season is over, hence, would advise early orders from all my customers desiring these oats in quantity.

ing a foot long, and always well filled; the straw have no doubt I will be sold out before the season is very large, strong and stiff, and less liable to lodge than any other variety. The seed is large, my customers desiring these oats in quantity.

Packet, 10 cents; pound, 25 cents; 3 pounds, 65 cents, by mail, postpaid. By express or freight, not prepaid, peck, 50 cents; bushel of 32 pounds, \$1.65; 10 bushels, \$15.00.

I have often thought it a very important matter to be most particular in filling, packing and shipping all orders, large or small, whether they go by mail, express or freight. Every package of Maule's Seeds that is sent through the mail should look as good and be as carefully packed as a package of candy costing \$1.00 a pound. Such are my instructions, and if any customer orders goods by mail from any other seedsman that are put up better than Maule's Seeds, I would like to know it. I have a reputation to maintain in this particular, and do not propose to be beaten by any one. Then again, I am just as particular with my express and freight shipments; all my boxes, I am told, are marked better, shipped better and routed better than those of any other house in Philadelphia. Every box of any size is always wire hooped, while if an express or freight shipment is made in seamless bags, nothing but good sound bags is ever used, double tied with the strongest twine. Furthermore, at prices quoted in this catalogue no charge is made for packing, for brand new boxes or strong seamless bags, and everything is delivered without extra charge on board cars or boat in this city. Duplicate Bilis of Lading are always issued on every freight shipment and mailed the customer the day goods are shipped. In conclusion, I would say that if on receipt of your goods you do not think your package is equal to any you have ever received from any one else, no matter what the line of business, Iwant to know it. Personally, I consider I am miles ahead of every one of my would-be competitors in this most important matter; if you think I am mistaken let me know.

LONG'S WHITE TARTAR OATS.

If you think of ordering, read this.

Two Profitable Oats.

GOLDEN FLEEGE OATS. Handsome and Prolific.
Over 100 Bushels Per Acre.

It originated in central New York, and has already been widely tested and approved. First offered in 1902, and it met everybody's expectations fully. The yield of Golden Fieece oats has reached as much as 4,752 pounds of cleaned seed per acre. This is 108 bushels of 44 pounds each, or nearly 1.0 bushe s of 32 pounds each. The large white grains are plump and handsome. The straw is very strong, and stands up well. The blade is double the size of ordinary oats, which attests the vigor and productive capacity of the strain. Golden Fleece is remarkable for its great stooling capacity, and for this reason the seeding requirements are lighter than with most other sorts. I believe that this grand oats, by reason of its unusual vigor, will prove distinctly profitable in many places where the oats crop has heretofore been a failure, or only a partial success. In all oats growing sections the Golden Fleece will prove to be a perfect treasure, not only in the way of heavy production but in point of quality. Packet, 10 cts.; pound, 25 cts.; 3 pounds, 65 cts., postpaid. By express or freight, not prepaid, peck, 50 cts.; bushel of 32 pounds, \$1.65; 10 bushels, \$15.00.

MORTGAGE LIFTER OATS. Just What Its Name Implies.

I take satisfaction in the conspicuous and universal success of this highly profitzble oats. No better name than Mortgage Lifter could have been selected for it, as it is a first-class cropper, early to mature, and of unusually heavy weight. The straw is strong and stiff, and is thus far free from rust. It is so strong and thrifty that neither freezing weather, protracted drought, heavy rain nor hot wind seems to have much effect upon its growth. It appears able to go right along from start to finish almost without regard to weather or conditions. Mortgage Lifter is as bright and white as a new silver dollar, with a hull as thin as a sheet of paper. "We have raised," says the originator, "a hundred bushels to the acre." A yield like this is uncommon, but yields of 60, 70 or 80 bushels can be obtained by any good farmer with careful culture. My opinion of Mortgage Lifter oats is very high. Pkt., 10c.; 1b., 25c.; 3 lbs.; 65c., postpaid. By ex. or freight. not prepaid, pk., 50c.; bu. of 32 lbs., \$1.65; 10 bus. \$15.00.

JAPANESE BUCKWHEAT.

The best, most productive and most profitable variety in cultivation. From ½ bushel of seed sown a crop of 4) bushels has been harvested. Flour from Japanese buckwheat is superior to that from any other variety. It ripens early. A heavy cropper. Excellent for bees. Pkt., 10 cts.; lb., 25 cts.; 3 lbs., 65 cts., postpaid. By ex. or freight, not prepaid, pk., 50 cts.; bu., \$1.75; 10 bus., \$15.00.

WHITE HULLESS BARLEY.

Grows 2½ feet high. Heads well filled. Plump, heavy kernels, which are hulless like wheat when threshed. Ripens early and yields well. Pkt., 10 cts.; 1b., 25 cts.; 3 lbs., 65 cts., postpaid. By express or freight, not prepaid, peck, 60 cts.; bushel, \$2.25.

NOTE. Bear in mind customers can order ½ pecks of Field Seeds at peck rates; ½ bushels at bushel rates.

TREE SEEDS.

Apple, ounce, 10 cents; pound, 50 cents. Arbor Vitæ, American, oz., 20 cts.; 1b., \$2.00. Box Elder, ounce, 10 cents; pound, 75 cents. Catalpa Speciosa. (True.) Oz., 25c.; 1b., \$2.50. Cherry Mazard, ounce, 10 cts.; pound, 40 cts. Hemlock, ounce, 50 cents; pound, \$5.00. Honey Locust, ounce, 10 cts.; pound, 50 cts. Norway Spruce, ounce, 15 cts.; pound, \$1.25.

Peach, ounce, 10 cents; pound, 25 cents.

Pear, ounce, 20 cents; pound, \$1.75.

Quince, ounce, 20 cents; pound, \$2.00. Russian Mulberry, oz., 50 cents; 1b., \$5.00. Scotch Pine, ounce, 15 cents; pound, \$1.50. Silver Fir, European, oz., 10 cts.; lb., \$1.00. White Ash, ounce, 10 cents; pound, 75 cents. White Birch, American, oz., 20c.; lb., \$2.00. White Mulberry, ounce, 20 cts.; pound, \$2.00. White Pine, ounce, 30 cents; pound, \$3.00. Yellow Locust, ounce, 10 cts.; pound, 50 cts.

OSAGE ORANGE.—Produces a good hedge in from 3 to 4 years. Oz., 10 cts.; 1b., 50 cts., postpaid. By ex. or fgt., not prepaid, lb., 40 cts.; peck, \$3.00; bushel, \$10.00.

IMPROVED EVERGREEN BROOM CORN.

The best. Brush firm, of good length and bright green color. Pkt., 10 cts.; lb., 25 cts.; 3 lbs., 65 cts., postpaid. By ex. or freight, not prepaid, pk., 75 cts.; bu., \$2.50.

SPRING RYE.

Used with profit as a catch crop where grain has winter killed. Quite commonly employed within recent years. Sow about 1½ bushels to the acre. Pkt., 10c.; 1b., 25c.; 3 lbs., 65c., postpaid. By express or freight, not prepaid, peck, 50 cts.; bushel, \$1.75.

Saskatchewan Fife Spring Wheat.

Widely recognized as the most desirable spring wheat in cultivation. It is not excelled for earliness, vigor and yield. I find a rapidly increasing call for spring wheat, as well as for spring rye. The Saskatchewan Fife is more demanded than any other sort. Sow 1½ bushels per acre. Pkt., 10 cts.; lb., 25 cts.; 3 lbs., 65 cts., postpaid. By express or freight, not prepaid, pk., 75 cts.; bu., \$2.50.

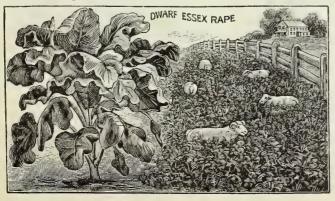

This is the best autumn sheep forage known, and is also used for pigs and dairy cows with success and profit. Under favorable circumstances it is ready for pasturage in six weeks from the time of sowing. One acre of good rape will carry a flock of a dozen sheep for two months. Rape is a plant of the cabbage family, requiring the same cultural treatment as the turnip. It is grown exclusively for its leaves. Stock should be fed alternately on grass and rape; not on rape exclusively. Rape-fed animals should have free access to sait. The seed should be sown in May, for midsummer pasturage; or any time before the end of August (at the North) for autumn pasturage. In the Southern States the best sowing time is September or October. Rape is a plant which loves cool weather, and thrives better in autumn than in midsummer. The seed should be used at the rate of 3 pounds per acre in drills, or 5 to 10 pounds per acre broadcast. Rape is one of the best and most fattening of forage plants, especially for sheep. The leaves are so succulent and juicy that the animals will require little or no water, but salt is quite necessary, as above stated. Rape is an excellent green manure for plowing down.

Packet, 10 cts.; pound, 25 cts.; 5 pounds, \$1.00, postpaid.

Packet, 10 cts.; pound, 25 cts.; 5 pounds, \$1.00, postpaid. By express or freight, not prepaid, 25 lbs., \$2.25; 100 lbs., \$8.00.

NEW REVENUE COW PEA.

Cow peas have long been grown in the South as forage crops and soil improvers. The Practical Farmer, of Philadelphia, has constantly urged their importance, the result has been that the attention of the Northern farmers has been attracted to the crop, and the culture has been greatly extended as varieties have been introduced that ripen anywhere in the North. They will thrive where clover will not grow. They must not be sown till the soil is warm. Where wheat follows the oat crop, the peas can be sown after oats are harvested and will make a growth to turn under for wheat that will improve the crop. The early 70-day sorts are best for this purpose; the running varieties for earlier sowing for hay. The crop of hay even on land of only moderate fertility will be more than 2 tons per acre.

New Revenue.

The originator says: "New Revenue is all I claim it to be. I do not offer it as a field pea but as a garden pea. The table varieties of the cow pea are almost unknown out of the South, but are a staple article of food there. Such sorts as Black Eye, Lady and Rice are extensively grown for table use. Revenue lays all these sorts in the shade. I have had ten years' experience in testing and crossing the different types of cow peas, and I know this to be the most valuable all-around pea ever offered. It is early, productive and an extremely rank grower. The green pods are splendid as snap beans, delicious hulled and used while green as lima beans, and excellent in the dried state, boiled or baked as navy beans, or used in soups. Makes as large a growth of vines as the Wonderful, 8 to 15 feet long, and covered the entire ground to a depth of 2 or 3 feet with a dense growth of vines. It outyields any other pea I am acquainted with. In average seasons Revenue matures in 90 days. The pods are fit for use in 70 to 75 days. It is not quite so early as Black Eye, but is by far the earliest of all the heavy growing sorts. It will yield more peas than any sort I have tested. The peas are large and well crowded in the pods. "So productive is this pea that a small packet, planted two peas in a hill, 3 or 4 feet apart each way, will produce enough edible peas or pods for an average family.' Packet, 10 cts.; pint, 25 cts.; quart, 40 cts., postpaid. By express or freight, not prepaid, quart, 25 cents; peck, \$1.50; bushel, \$5.00.

Panmure Early Wonder.

This is a valuable early and productive variety, yields enormously of shelled peas, which are excellent for table use during the winter. It makes an ordinary vine not so rank as some other varieties; the stems that support the pods stand erect 6 to 10 inches above all the vines, having 3 to 6 pods to each stem, and some pods contain as many as 20 peas, making them very easy to gather by handpicking, producing an average yield of 40 bushels shelled peas per acre. A good soil improver and relished by all farm stock. Packet, 10 cents; pint, 30 cents; quart, 50 cents, postpaid. By express or freight, not prepaid, quart, 35 cts.; peck, \$1.50; bushel, \$5.00.

The Clay.

This is so-called from the color of the seed, which is the color of reddish yellow clay. The plant is of the same season and habit of growth as the Black, and like the Black has ripened at Ithaca, New York. Many growers in the South prefer it to the large Black because of the fineness of the growth, which makes it easier to cure. Packet, 10 cts.; pint, 20 cts.; quart, 35 cts., postpaid. By express or freight, not prepaid, quart, 20 cts.; peck, 85 cts.; bushel, \$3.00.

Extra Early Black Eye.

This pea is one of the earliest. It is a strong grower and moderate trailer. It will mature seed in about 60 days. A very valuable hay crop can be made from it in the North, especially on sandy soils. In the South it is grown mainly for table use, and takes the place of the white beans in the North. The peas bring a higher price on the general market in the South than any other variety. As a soup pea it soon becomes popular when tried. Packet, 10 cts.; pint., 20 cts.; quart, 35 cts., postpaid. By express or freight, not prepaid, qt., 20 cents; pk., \$1.00; bu., \$3.50.

Whip-poor-will.

A small seeded pea of a dark reddish color dotted over with dark specks. It is a second early variety, and matures in about 70 days. It is not a heavy forage maker, but a very productive variety and largely grown as a soil improver and for pasturage. Trails very little and usually in bush form only. Probably more largely grown in the upper South and Middle States than any other variety. A favorite standard sort. Packet, 10 cts.; pint, 20 cts.; quart, 35 cts., postpaid. By express or freight, not prepaid, quart, 20 cents; peck, 85 cents; bushel, \$3.00.

Black.

This variety offered is the Black that is universally grown in Virginia and North Carolina, and called the Large Seeded Black. It is about a 100-day pea from planting to ripening seed. Trails freely and makes a heavy crop of hay. In fact, one of the best for hay, as it will get into condition for curing early enough for any locality in the Middle States. Has matured to perfect ripeness as far north as Ithaca, New York. Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts., postpaid. By express or freight, not prepaid, quart, 20 cts.; peck, 85 cts.; bushel, \$3.00.

The Wonderful.

This is a pea of a light vellowish dun color. It was formerly known in the South by the names Quadroon and the Unknown, but the wonderful growth and profusion of fruiting has gotten it the present name. Its first growth is very erect, but later in the season it runs rampantly, making vines fully 15 feet long over the top of the erect growth; and though making so tangled a growth is rather easy to save because of the erect lower growth. It is the latest of all the cow peas and seldom matures seed north of Central Virginia or Delaware. But as a soil improver, to be plowed under in the late fall, there is no plant that will equal it. For silage making it will be found very good. Packet, 10 cents; pint, 20 cents; quart, 35 cents, postpaid. By express or freight, not prepaid, quart, 20 cts.; peck, 85 cts.; bushel, \$3.00.

The usual quantity of any of the above cow peas sown per acre, is one bushel, but on strong soil will result in a stout growth of stem; to produce a finer growth for hay, $1\frac{1}{2}$ bushels should be sown.

Canada Field Pea.

The foliage and habit of growth quite similar to garden peas. The | and rich in milk-producing elements. It is quite hardy and may be and is largely used for that purpose and for green manuring. It is seed should be sown at the rate of 1 to 1½ bushels per acre. sometimes grown alone, but the most satisfactory dairy results come from sowing it with oats, rye or barley. It makes good ensilage, and is an admirable food either green or dry for cattle, being highly nutritious | bushel, \$3.00.

Canada Field Pea is one of the very best soiling crops at the North, sown early in the spring, and will be ready to cut in May or June. The

Packet, 10 cents; pint, 20 cents; quart, 35 cents, postpaid. By express or freight, not prepaid, quart, 20 cts.; peck, 85 cts.;

A Page of Soil Improver and Forage Crops.

HOLLYBROOK EARLY SOJA BEAN.

Hollybrook Early Soja Bean.

The most promising legume plant for Northern planters.

Makes a quicker growth and matures its crop two to three weeks earlier than Mammoth Makes a quicker growth and matures its crop two to three weeks earlier than Mammoth Yellow Soja. An erect growing plant and is far more easy to harvest and cure than Cow Peas. Hollybrook Early Soja is the earliest variety and succeeds in all sections of the North, while the Mammoth Yellow is of great value in the South. It is admirably adapted for growing in mountainous places, and throughout the North and West where the seasons are shorter. It is a sure cropper, vigorous and quick growing. A larger crop can be had by planting something like corn and cultivating. The crop can be harvested with the corn binder, and set in shocks for curing; but to make a finer hay sow broadcast, mow with hay mower, and cure in cocks. For this purpose sow 1½ bushels per acre. They may also be sowed with cow peas, with great success, using a half bushel of each per acre, well mixed. The erect habit of the Soy beans will sustain the running cow peas, and make a more nutritious crop even than cow peas.

Packet, 10 cents; pint, 20 cents; quart, 35 cents, by mail, postpaid. By express or freight, not prepaid, quart, 20 cents; peck, 75 cents; bushel, \$2.50.

Mammoth Yellow Soja Bean.

Soja Beans do equally well on both light and heavy soils, and make a most desirable land improver. The use of this crop is increasing very rapidly in all sections, and is proving to be one of the most valuable and important forage and feed crops for the farmer. It is almost impossible for weeds to grow or thrive where a crop of Soja Beans is grown. Another valuable point is they resist drought and hot weather to a remarkable extent. Mammoth Yellow Soja is the best known and most widely cultivated variety in the Southern States. It has also been grown to a considerable extent in the North, mostly because of the splendid growth it makes, although owing to its lateness it has never given entire satisfaction there.

Packet, 10 cents; pint, 20 cents; quart, 35 cents, by mail, postpaid. By express or freight, not prepaid, quart, 20 cents; peck, 60 cents; bushel, \$2.25.

Speltz.

A Wonderful New Grain.

where it is extensively cultivated under the name of "Shallu." It is also known under the name of California rice corn, California wheat, Egyptian wheat. A Kansas grower received from the California Experimental Station four years ago a small sample of Shallu, and after continuing planting has now raised a large crop for this season. He thinks it is more valuable than Kaffir Corn for the grain as it yields considerably more seed, and on account of its stooling habit, 3 to 6 stalks are produced from a single grain. In addition, he considers it a drought resister; it forms a large head, with round, plump white seeds similar to broom corn, and has proven an excellent feed for horses, cattle and chickens. It can be popped the same as pop corn, and is even more crisp then pop corn; makes an excellent flour for pan-cakes, in fact it is really more of a grain crop than a forage crop, as it will produce more seed than any of the cane or sorghum family, and will yield double the amount of Kaffir Corn. Should be sown in rows 3 feet apart, 3 to 5 pounds to the acre; for fodder sow 25 to 50 pounds, either broadcast or in drills. I certainly consider it worth a trial.

Packet, 10 cts.; pound, 40 cts.; 3 pounds, \$1.00, postpaid. By express or freight, not prepaid, pound, 30 cents; 5 pounds, \$1.25; 10 pounds, \$2.25.

Mrs. W. F. Tray, Auburn, Wash.—I like Maule's Seeds the best of any I ever used. I used them when living in New York State and when we came to Washington, I sent for them. They are sure to come up and do well.

 ${\bf L}.~{\bf D}.~{\bf Hodge},$ Sterling, Kan.—I have used your seeds over 30 years and can truly recommend them above any others I have ever planted.

J. D. West, North Emporia, Va.—Your seeds did fine for me in 1908 as they have for 30 years past. Maule means a square deal.

Hairy or Sand Vetch. This useful plant (vicia villosa) is noted for

This useful plant (vicia villosa) is noted for its extreme hardiness, and promises to be highly valuable at the North as a winter cover crop to prevent leaching, as well as for forage and fertilizing purposes. It will live over winter in well drained soils. It is a perennial, but drops its seeds freely, and will come unversely. come up year after year on the same ground. If sown in September it will make excellent forage the follow-ing spring. The top is small and inconspicu-ous at the start, but the root system is exsystem is ex-tensive from the beginning. The plant is a valuable nitrogen gatherer. At Philadel-At Philadel-phia, it blos-soms in May, from au-tumn sown seed. The beautiful purple blossoms and graceful foliage make the Hairy V e t c h worthy of a place in the flower gar-

place in the flower garden. Forage yield, 1½ to 4 tons per acre. Excellent for dairy stock and for poultry pasturage. Use 1½ bushels of seed per acre, or bushel of vetch and ½ bushel of rye. Packet, 10 cts.; pound, 40 cts.; 3 pounds, \$1.00, postpaid. By express or freight, not prepaid, peck, \$1.50; bushel (60 lbs.), \$5.75.

SHALLU.

MEADOW FESCUE

CLOVERS AND GRASSES. NOTE.—Peck, bushel and 100-pound prices on clovers and grasses are net figures Jan. 1, 1910, and subject to market changes.

TIMOTHY

CLOVERS. THE

THE CLOVERS.

ALFALFA OR LUCERNE. The great agricultural clover of the West. Well adapted to dry sections, but thriving anywhere on well-drained soil. It is a perennial plant, lasting many years under good treatment, and may be cut several times each season when well established. Alfalfa roots not infrequently descend 10 or more feet into the soil, indicating ability to resist drought. Recent experiments at the New Jersey station show that Alfalfa has an extremely high value as a forage crop in the East. It should be tried by all dairymen. Use 15 to 25 lbs. of seed per acre. Sow in April and May, or July and August on well timed land. An Alfalfa field is worthy of all care and expense required to produce it. Bulletin No. 148 of N. J. Station, issued in February, 1901, says: "The average yield of green forage per acre for three years (including the first year) was 18.27 tons, equivalent to 4.57 tons of hay. The yield third year from five cuttings was 26.6 tons of green forage, equivalent to 6.65 tons of hay." Pkt., 10c.; 1b., 35c.; 3 lbs., \$1.00, postpaid. By ex. or fgt., 25 lbs., \$6.50; 100 lbs., \$23.00.

TURKESTAN ALFALFA. Pkt., 10c.; lb., 45c.; 3 lbs., \$1.25, postpaid. By ex. or fgt., 25 lbs., \$6.50; 100 lbs., \$23.00.

RED CLOVER.—Well and favorably known everywhere. Specially valuable for dairy cows on account of high percentage of nitrogenous elements. Sow 8 to 12 pounds per acre. Lb., 35c.; 3 lbs., \$1.00, postpaid. By ex. or fgt., pk., \$2.75; bu., of 60 lbs., \$10.50.

MAMMOTH OR PEA VINE CLOVER.—This is a variety of Red Clover, of greater size and strength than the original type. It has a longer life than ordinary Red Clover. Attains a height of 5 or 6 feet. Weight of seed the same. Pound, 35 cents; 3 pounds, \$1.100, postpaid. By express or freight, peck, \$3.00; bushel, \$11.00.

weight of seed the same. Found, 35 cents; 3 pounds, \$1.00, postpaid. By express or freight, peck, \$3.00; bushel, \$11.00.

ALSIKE CLOVER.—The same as Swedish or Hybrid Clover. Perfectly hardy, and one of the very best of all the clovers, for cow pasturage, bee pasturage or for making hay. Deliciously fragrant and highly nutritious. Lasts for many years, on both wet and dry soils. Sow to 10 pounds per acre. Packet, 10 cts.; lb., 35 cts.; 3 lbs., \$1.00, postpaid. By express or freight, pound, 20 cents; 100 pounds, \$18.00. CRIMSON OR SCARLET CLOVER.—A. well-known and favorite winter cover crop and soil enricher, affording excellent early forage. Seed should be sown in August or September. Use seed at the rate of 15 pounds per acre. It grows all winter, when ground is not frozen. It is very beautiful when in bloom, and valuable for soiling purposes, for pasture or hay, and the roots add materially to the fertility of the soil. My seed is American grown. Pkt., 10 cts.; lb., 30 cts.; 3 lbs., 75 cts., postpaid. By express or freight, peck, \$2.25; bushel, \$8.50.

WHITE CLOVER.—It should find a place in all grass mixtures, whether for lawn, meadow or permanent pasture. It is extremely useful to be keepers, affording honey of the best sort. It is perfectly hardy. Sow 3 lbs. per acre with other grasses; 6 lbs. alone. Pkt., 10c.; lb., 45c.; 3 lbs., \$1.25, postpaid. By express or freight, lb., 30c.

BROMUS INERMIS.—This useful grass, also called Hungarian or Awnless Brome Grass, grows sometimes to a height of three or even the feet. It is a native of Hungary. Awiless Brome Grass, grows sometimes to a height of three or even five feet. It is a native of Hungary. It has done well in America, especially on dry, arid solls, in which situations its drought-resisting qualities are seen to advantage. It is a hardy perennial, well adapted to cold climates and exposed situations. It is claimed for it that it will succeed in a wider range of temperature than any other grass, and that it will produce satisfactory crops on land too poor to support timothy and the other agricultural grasses. It has had wide trial and unquestionable endorsement, both by the experiment stations and by individual farmers, and as already said will prove to be a boon to many farmers. Weight of seed, 14 pounds to the bushel. Sow 28 to 55 pounds per acre. Lb., 30c.; 3 lbs., 75c., postpaid. By ex. or fgt., lb., 15c., 25 lbs or more, 13 cts., per lb.

BROMUS INERMIS GRASS

RED CLOVER.

THE GRASES.

Success in grass culture demands nice and exact methods. The soil should be worked to a depth of at least 8 or 9 inches. Heavy applications of both natural and artificial fertilizers should be made. The mixture of fertilizers with the soil and the pulverization of the soil should be perfect. Seeding should be extremely shallow. Sowing may occur in spring or fall, preferably in April or September. The seed may be sown alone or with a nurse crop like oats or wheat. Please see my special mixtures for lawns and permanent pastures on pages 100 and 101.

be sown alone or with a nurse crop like oats or wheat. Please see my special mixtures for lawns and permanent pastures on pages 100 and 101. TIMOTHY. (Phleum pratense.)—By far the most popular and valuable hay grass of America. It prefers moist, loamy or clayey soils, and is not so well adapted to sandy situations. Height, 2 to 3 feet. If used alone, sow 15 to 20 ibs. of seed per acre. Pound, 30 cts.; 3 pounds, 75 cts., postpaid. Peck, 85 cents; bushel of 45 pounds, \$3.00. RED TOP OR HERD GRASS. (Agrostis vulgaris.) Free from chaff. One of our best native pasture grasses. Blooms in July. Useful for lawn or field. Grows well everywhere. Height 1 to 2 feet. Sow 20 lbs. per acre. Pound, 30 cents, postpaid. Bushel (32 lbs.), \$5.00. RED TOP OR HERD GRASS.—In chaff. Sow 2 bushels per acre. Qt., 20 cts., postpaid. Bu. (14 lbs.), \$1.50; sack of 50 lbs., \$5.00. KENTUCKY BLUE GRASS. (Poa pratensis.)—Also called June Grass. Best of all the native grasses for pasture. Blooms in June. A true perennial, and when it becomes fully established will last for years. Succeeds everywhere, but prefers a rich soil and a rather dryer situation than Red Top. One of the most desirable lawn grasses, especially in mixture. Height, 9 to 18 inches. Sow 2 bushels to the acre. Quart, 25 cents, postpaid. Bushel of 14 pounds, \$2.50.

CANADIAN BLUE GRASS. (Poa compressa.)—A hardy perennial growing on poorest and dryest soils. Short (6 to 18 inches). Hard and wiry, but high in nutritive value. Decidedly blue in color. Stems flattened. Invaluable for use on steep places or exposed situations. Sow 2 bushels to acre. Quart, 25 cents, postpaid. Bushel of 14 pounds, \$2.50.

WOOD MEADOW GRASS. (Poa nemoralis.)—For shady places, under trees, etc. Makes a compact green sod. Use 28 lbs. to the acre. Pound, 75 cents, postpaid. Bushel of 14 pounds, \$8.75.

ORCHARD GRASS. (Dactylis glomerata.)—Sometimes called Cocksfoot. Height, 3 feet. Admirable for pasturage or for mowing. Will grow in sun or shade. Use 2 bushels to the acre. Quart, 20 ots., postpaid. Bush

Cocksfoot. Height, 3 feet. Admirable for pasturage or for moving, Will grow in sun or shade. Use 2 bushels to the acre. Quart, 20 ots., postpaid. Bushel of 14 pounds, \$2.75.

ENGLISH OR PERENNIAL RYE GRASS. (Lolium perenne.)—Largely used in lawn and pasture mixtures. It makes a rich, green sod and a nutritious hay, and lasts for several years. Use at rate of 36 to 48 lbs. per acre. Lib., 30 cts., postpaid. Bu. of 24 lbs., \$2.75.

ITALIAN RYE GRASS. (Lolium italicum.)—An annual or blennial grass of very high value for solling purposes. It is a remarkably rapid grower on good soil, being ready to cut in four or five weeks from seeding. Sow 36 lbs. per acre. Lib., 30c., postpaid. Bu. of 18 lbs., \$2.50.

TALL MEADOW OAT GRASS. (Avena elatior.)—This grass attains a height of two to four feet, and is held in high esteem for both hay and pasture. It is hardy and drought resisting. Sow 26 to 39 lbs. to the acre. Pound, 40 cts., postpaid. Bushel of 10 pounds, \$2.75.

MEADOW FESCUE. (Festuca pratensis.)—The celebrated English blue grass. Used in most American pasture mixtures. An excellent variety. Pound, 40 cents, postpaid. Bushel of 22 pounds, \$5.50.

CRESTED DOGSTAIL. (Cynosurus Cristatus.)—Suitable for hard soils that are liable to bake; excellent also as a nasture and lawn grass, roots penetrate deeply, stands severe droughts. Sow 3½ to 4 bushels per acre. Pound, 60 cents, postpaid. Bushel of 21 pounds, \$10.00.

SHEEP'S FESCUE. (Festuca ovina.)—Should be in all sheep pastures. Will thrive in dry soils. Height, 1 to 2 feet. Use 80 lbs. to acre. Pound, 40 cents, postpaid. Bushel of 12 pounds, \$2.75.

HARD FESCUE. (Festuca duriuscula.)—Like Sheep's Fescue, but smaller. Emphatically a grass for dry pasture lands; very nutritious and perfectly hardy. Not recommended for lawns. Use 80 lbs. to acre. Pound, 40 cents, postpaid. Bushel of 12 pounds, \$2.50.

SWEET VERNAL GRASS. (Anthoxanthum odoratum.)—The true perennial sort, for meadows and pastures. Valued on account of its delightful fragrance. Generally used in connection

RHODE ISLAND BENT. (Agrostis canina.)—For sowing at seashore resorts, on putting greens, tennis courts, or lawns; use 40 lbs. per acre. Pound, 50 cents, postpaid. Bushel of 14 pounds, \$4.50.

At prices quoted by express or freight and at all peck and bushel figures, purchaser must pay the transportation charges.

Note.—The following mixtures, based upon experience, will be found highly satisfactory. The purpose of each is suggested by its name. They are made of the best components to be had on the market. None but the finer grasses are employed, and only seeds that have been thoroughly cleaned. I will cheerfully compound grass mixtures to order.

Maule's Extra Lawn Grass Mixture.

This mixture will insure a beautiful, compact, evergreen sod on any lawn where the essential requirements of grass culture have been complied with. Its component parts are the grasses peculiarly adapted to lawns and door yards, including choice selected strains of Kentucky Blue, etc., along with the best known creeping or sod forming sorts. I have included a little white clover in the mixture, regarding it as essential, but will omit it on special request. Timothy and orchard grass are wholly excluded, on account of their coarse leaves, and only fine sorts are employed. Full provision is made for a succession of growth, so that there shall be no break in the richness of the verdure from spring until autumn, and experience proves that Maule's Extra Lawn Grass Mixture is now perfect. Nothing better can be purchased on the American market, no matter what claims may be advanced by other seedsmen. My friends will please note that this seed is sold by the bushel of 20 pounds, while some seedsmen sell a bushel weighing

only 14 pounds. This is because 1 employ the choicest and heaviest strains of grass seed in making the mixture. As to preparation of the soil, I recommend a thorough working and manuring to a depth of 8 or 9 inches, and a regular semi-annual application of top dressing afterward. It is a good practice to use well-rotted stable manure in the autumn and a complete fertilizer carrying potash, like Maule's Panmure Plant Food, in the spring; also, to renovate the lawn every spring with a little fresh seed, using a quarter or a third the quantity employed in the original seeding. Grass seed should be sown in April or September. Use 1 quart to 300 square feet of ground, or 1 bushel will sow a plot 100 feet wide and 108 feet long or 4 bushels per acre. Maule's Extra Lawn Grass Mixture cannot be excelled for quality and vitality. Quart, 25 cents; 2 quarts, 45 cents; 5 quarts, \$1.00, postpaid. By express or freight, not prepaid, peck, \$1.50; bushel (20 lbs.), \$5.00; 4 bushels, \$17.50.

Maule's Quick Results Lawn Mixture.

This mixture is for producing an immediate greensward that will be followed by a good, permanent sod. It is especially to be recommended for late spring seeding, without a nurse crop. For early seeding I would rather use Maule's Extra Lawn Grass Mixture, but after May 1st (in the latitude of Philadelphia) I would much prefer this one. It will make rapid growth, and will be ready to cut two weeks or more in advance of any other mixture which I offer; nor is it lacking in permanence. Qt., 25 cts.; 2 qts., 45 cts.; 5 qts., \$1.00, postpaid. By express or freight, not prepaid, pk., \$1.25; bu. (20 lbs.), \$4.00.

Maule's Shady Lawn Mixture.

This mixture is intended for all situations that are in partial or complete shade, and will be found invaluable on grounds lying under the shadows of trees or buildings. In preparing such places for the reception of grass seeds it is well to use air slaked lime quite liberally (50 bushels to the acre). The lime sweetens the land and wonderfully aids the growth of the grass. Lime will be found particularly effective in open woodlands where grass is desired. This mixture is adapted to its purpose. Qt., 30 cts.; 2 qts., 50 cts.; 5 qts., \$1.10, postpaid. By express or freight, not prepaid, peck, \$1.50; bushel (15 lbs.), \$5.00.

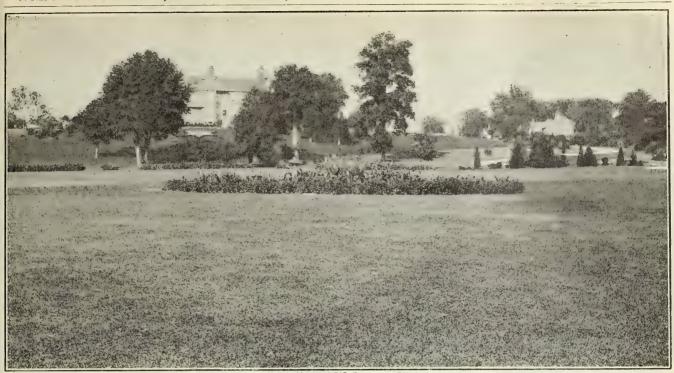

Maule's Steep Slope Mixture.

This is for banks, terraces, steep or exposed slopes and bare spots in general; in fact, for any place, however dry, stony or barren. It will produce a sod that is absolutely proof againstheat or drought, and that cannot be injured by cold. The grasses produce strong, spreading roots, thus preventing heavy rains from washing them out; will withstand exposure, thrives on shallow solls, and at the same time produce a rich, velvety green turf throughout the season. I recommend, however, the same fair treatment elsewhere asked for; that is, semi-annual top dressings of fertilizers or manures, in order to maintain the vigor of the grasses. Quart, 30 cents; 2 quarts, 50 cents, 5 quarts, \$1.10, postpaid. By express or freight, not prepaid, peck, \$1.25; bushel (15 pounds), \$4.50.

Quantity of Seed to Sow.

1	quart	will	sow a	plot	15	X	20	feet	300	square	feet.
	peck								2000	6.6	6.6
1	bushel	6.6	"1	acre l	100	\mathbf{x}	108	66	10800	4.6	6.6
lα	4.6	6.6	66.1	66 6	ong	~	200	4.6	42681	4.6	6.6

If intended for renovating an old lawn, about half the above quantities are sufficient for the given spaces.

FAIR GREEN SOWN WITH MAULE'S FAIR GREEN GOLF MIXTURE.

Maule's Fair Green Golf Mixture.

This mixture is compounded to produce a tough sod that mixture will produce a rich green turf; a turf which asks only are not hurt by constant mowing and ceaseless wear. This 4 bushels, \$10.00; 10 bushels, \$23.50; 100 bushels, \$2.25 per bushel.

will resist tramping and hard usage. Year after year I have for a semi-annual top dressing of fertilizer to last indefinitely. supplied this seed to the most prominent golf clubs in the Seed should be applied in liberal amounts; fully 75 pounds country. It is made up mainly of hardy, low growing, creeping per acre. Quart, 25 cts.; 2 quarts, 45 cts.; 5 quarts, \$1.00, postpaid. By grasses, which thrive under adversity; that is, grasses which express or freight, not prepaid, peck, 75 cents; bushel (15 pounds), \$2.75;

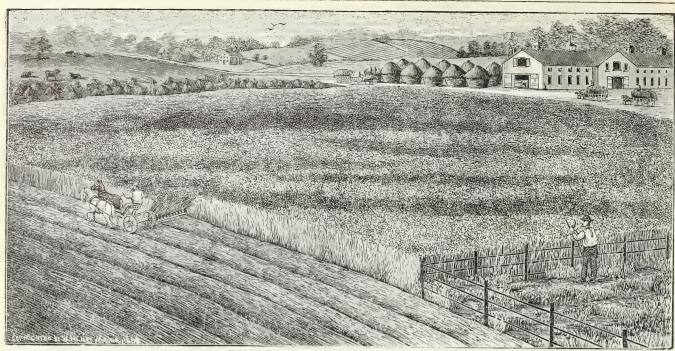

Maule's Putting Green Golf Mixture.

It is impossible to have a putting green too much like a passed through a fine screen. With a proper preparation of low-growing grasses and have only to urge upon the owners of secured than with Maule's Putting Green Golf Mixture, at the golf grounds to see that the putting greens are regularly rate of fully 20 pounds to 10,000 square feet. Qt., 30 cts.; 2 qts., fertilized twice a year (early spring and late fall) with finely 50 cts.; 5 qts., \$1.10, postpaid. By express or freight, not prepaid, peck, ground bone meal; or (in the autumn) with rotted manure \$1.50; bushel, (20 pounds), \$5.00; 5 bushels, \$22.50; 10 bushels, \$42.50.

piece of velvet, and I have been careful in the preparation of the soil, in advance of growing the seed, and with good after this mixture to select the finest blended and most hardy of the treatment, no better or more beautiful results can possibly be

PUTTING GREEN SOWN WITH MAULE'S PUTTING GREEN GOLF MIXTURE.

FIELD OF MAULE'S PERMANENT PASTURE GRASS.

Three Permanent Pasture Mixtures. It is true beyond all question that a mixture of grasses produces a better mowing field and subsequent permanent pasgrasses produces a better mowing field and subsequent permanent pasture than a mere combination of timothy and red clover. The former will last five times as long as the latter. Timothy "runs out" in a couple of years or so, while a good permanent pasture will last ten or even twenty years. This has been frequently and forcibly shown by experience. My completed mixtures are sold in two parts, one containing grass seeds and the other clover seeds, to be sown separately, on account of their different weights. The grass seeds may be sown in spring or fall the clover seeds preferably in the serving. In preparing spring or fall; the clover seeds preferably in the spring. In preparing the permanent pasture grass mixtures I employ mainly Kentucky Blue, Timothy, English Rye, Italian Rye, Red Top or Herd, Orchard, Tall Meadow Oat, Meadow Foxtail, Meadow Fescue, Hard Fescue, Tall Fescue, Rough Stalk Meadow, Canadian Blue, Awnless Brome, Creeping

Bent, Sweet Vernal, etc. In the clover mixture I employ Red, Mammoth, Alsike and White. A few of these components will disappear in two or three years, but the others are absolutely permanent. I vary the proportions to suit different situations.

Maule's Permanent Pasture Mixture for Light and Sandy Soils. —Use at the rate of 56 pounds (4 bushels) per acre. Bu., \$2.75; 4 bus., enough for an acre, \$10.00. The suitable clovers are included.

Maule's Permanent Pasture Mixture for Average Soils .general use, everywhere. Sow at the rate of 42 lbs. (3 bus.) per acre. Bu., \$2.50; 3 bus. mixed grass seeds and 10 lbs. mixed clover, \$9.00.

Maule's Permanent Pasture Mixture for Heavy Soils.—Use at the rate of 42 pounds (3 bushels) per acre. Bushel \$2.50; 3 bushels mixed grass seeds and 10 pounds mixed clover seeds, \$9.00

Pasture mixtures are shipped by express or freight, not prepaid.

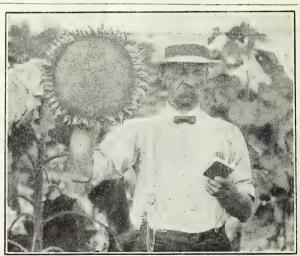

MAMMOTH RUSSIAN. - Flowers 18 to 20 mannuth Russian. — Flowers 18 to 20 Inches in diameter. Very showy, but mostly grown for the large amount of seed produced. Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts., postpaid. By express or freight, not prepaid, qt., 25 cts.; pk., 60 cts.; bu., \$2.00.

SUNFLOWERS.

Sunflower seed is one of the best egg producing foods for poultry; the leaves make excel-

best egg producing foods for poultry; the leaves make excellent fodder, being relished by all kinds of stock. The stalks, which grow very large, make excellent fire wood. It can be sown any time before the middle of July. Plant in hills 3½ to 4 feet apart each way; or in dirills, 6 quarts will sow an acre.

BLACK GIANT.—This magnificent sunflower produces even larger heads than the Mammoth Russian, producing more seed per acre than any other variety. The seeds are short, plump, well filled with meat, and have a thin shell. Specimens have been grown measuring 9 feet in circumference. It is something wonderful and is extremely profitable to grow. An acre is good in which to let hogs and cattle run in summer for shade and nourishment if not wanted for seed. Pkt., 10c.; pt., 25c.; qt., 45c., postpaid. By expead, quart, 35c.; pk, \$2.00.

BLACK GIANT SUNFLOWER.

wish to impress upon all my friends and customers that while my main office in Philadelphia is 1711 Filbert Street, if at any time they should forget my street address, a letter addressed Wm. Henry Maule, Philadelphia, is always sure to reach me. Receiving as I do 5,000 to 6,000 letters some days, there is not a Post Office in any County in the United States that does not know MAULE, so if this catalogue becomes mislaid all any one has to do is to remember three words, "Maule's Seeds," and "Philadelphia," and they can reach me just as quickly as if they gave my full address, Wm. Henry Maule, 1711 Filbert St., Philadelphia, Pa., U. S. A.

WM. HENRY MAULE, PHILADELPHIA, PA. "PLANET JR." FARM AND GARDEN TOOLS. complete catalogue containing a full line of Planet Jr. implements mailed free upon application. Planet Jr. No. 25 Combined Hill and Drill Seeder, Double Wheel Hoe, Cultivator and Plow. As a drill it is almost identical with the Planet Jr. No. 4 Drill, and is thoroughly substantial and accurate in sowing all kinds of garden seeds in hills or drills. As a Wheel Hoe it is identical with the Planet Jr. No. 12 Double Wheel Hoe, the very best machine on Planet Jr. No. 25 Complete Price \$13.00.

chine on the marchange from drill to wheel hoe takes but a moment. Price, \$13.

Planet Jr. No. 4 Combined Seed Drill, Single Wheel Hoe, Cultivator and Plow.

This is the most popular combined tool made. It combines in a single implement, a first-class hill-dropping seeder, a single wheel hoe or weeder, a cultivator and plow.

The hopper holds two quarts of seed, which can be sown in continuous rows, or dropped in hills, at 4, 6, 8, 12 or 24 inches apart.

The drill is detached and the tool frame substituted

substitut e d by removing but one bolt. It then becomes a single wheel hoe. Price, \$10.50. As a drill, \$8.50.

Planet Jr. No. 12 Double Wheel Hoe, Cultivator and Plow.

The No. 12 runs either astride or between the rows; kills all the weeds and leaves the earth in fine shape.
It's so easy to work.
The No. 12 has a pair of 6-inch hoes, a pair of plows for opening or covering, and a set of 4 all steel cultivator teeth.
The tools

The tools shown are what gardeners use most and others can be added. Price, \$6.50

Planet Jr. No. 17 Single Wheel Hoe, Cultivator and Plow.

For easy gardening, and at the same time clean and perfect gardening, no tool is the equal of this No. 17 Wheel Hoe. It is suited to all kinds of garden cultivation and all garden crops. You can do more and better hoeing with it in one day than you can do in 3 days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit.

Sprayers, Insect Destroyers and Garden Tools.

AUTO-SPRAY No. 1.

AUTO-SPRAY No. 1.

AUTO-SPRAY No. 1. — Works automatically for 6 to 15 minutes, according to the nozzle opening. Charged in 15 seconds by a few strokes of the plunger, and two pumpings will usually discharge the entire contents. Convenient and durable. Useful with Bordeaux mixture and other solutions. Holds 4 gallons; a practical sprayer for potatoes, tobacco, small fruits, vineyards, poultry houses, etc. The Auto-Pop nozzle cannot clog and can be regulated to throw any gradation of spray. By express or freight, not prepaid. Galvanized steel reservoir, with Auto-Pop nozzle, complete, \$6.00. With brass reservoir and Auto-Pop nozzle, complete, \$7.50. EXTENSION PIPE. — Made of solid brass. Two feet in length. Several lengths of pipes may be screwed together and the nozzle elevated for spraying trees, vines, etc. By express or freight, not prepaid. 40 cents each. BRASS ELBOW. — Used in conpipe for spraying cucumbers or other low growing vines. Made of heavy brass. 40 cents each, postpaid.

THE TRI-JET SPRAYER.—Sultable for use on potatoes, tomatoes and all low-growing plants. Capacity, I quart of liquid. It may also be used for blowing dry powdered insecticides, such as buhach, slug shot, and Parisgreen. By express, not prepaid, with galvanized reservoir, 50c.; with brass reservoir, 55c.
TENNENT SPRAYER.—For applying insecticides, or spraying plants. Blows powders as well as liquids. Useful and convenient. 50c. each, postpaid.

LENOX PLANT SPRAYER.

LENOX PLANT SPRAYER.—
With this a fine spray may be thrown
under, over or upon the foliage, using
any liquid insecticide or poison. Very
convenient and effective for house or
garden plants. 50c. each, postpaid.

JUMBO INSECT POWDER
GUN.—Suitable for a person having
only a few plants to treat. Holds four
ounces of powder. Handy for dusting
Buhach or any other dry Insecticide.
25 cents each, postpaid.

BUHACH.—The great California
insect killer. Sure death to cabbage
worms, bed-bugs, liee, mosquitoes, fleas,
cockroaches, gnats, files, rose-bugs, beetles, moths and ants. Its death-dealing
effect is swift and certain, even if reduced
in strength from four to ten times its
bulk with flour or air-slaked lime, or if
applied in water. Entirely non-poisonous and harmless to all creatures except
insects. 2-ounce can, 25 cents each;
five 2-ounce cans, \$1.00, postpaid.

HAMMOND'S SLUG-SHOT.—
For the destruction of potato bugs, chinch bugs, rose bugs and slugs, cureulio and all lice, worms or caterpillars. By express or freight, not prepaid, 5-lb. package, 30c.; 10-lb. package, 50c.; 25 lbs. or over at 4½e. per lb. Tin canister, with perforated top that unscrews, filled with slug-shot, 25c, each, postpaid.

SULPHO- TOBACCO SOAP.—
This is a powerful agent for the destruction of all bugs and insects. One or two applications is sure death to all plant insects. 3-ounce cake, makes 1½ gallons of prepared solution, 13c. each, postpaid. 8-ounce cake makes 4 gallons of prepared solution, 28c. each, postpaid. "The Window Garden," a booklet giving valuable information on the cultivation of plants and the extermiantivation of plants and the extermian-tion of insects, with each cake

BUG DEATH.—An efficient insectide which contains no deadly poisons. Now largely used instead of Paris green, more safe, just as effectual; can be used on all plants, trees or vines dry, just as it comes from the package, or it can be mixed with water and applied with a sprayer. Bug Death kills all insects, and also prevents blight and acts as a fertilizer. By express or freight, not prepaid, 1 lb., 15c.; 3 lbs., 35c.; 5 lbs., 50c.; 12½ lbs., \$1.00; 100 lbs., \$7.50.

50c.; 12½ lbs., \$1.00; 100 lbs., \$7.50.

BORDEAUX MIXTURE.—
Ready for immediate use as soon as
dilute1 with nineteen parts of water; that
is, a 1-quart can will make 20 quarts of
solution. Best known remedy for grape
rot, potato blight and the blights which
affect tomatoes, melons and other things
in the garden. The stock solution in the
closed can will retain its strength for a
long time, and may be used as needed.
Bordeaux Mixture in this form, in connection with a Tri-Jet sprayer (mentioned on this page) makes it possible
for the smallest garden to enjoy the
benefits that follow spraying. By express or freight, not prepaid, 1-quart can,
40 cents; 1-galon can, \$1.00.

40 cents; l-gallon can, \$1.00.

COPPER SULPHATE. — (Blue Stone or Blue Vitriol.) For making Bordeaux Mixture. It comes in crystals and dissolves easily in water. The new formula calls for 5 pounds of copper sulphate, 5 pounds of unslaked lime, and 50 gallons of water. Lime can be had anywhere. By express or freight, not prepaid, per pound, 12 cents: 10 pounds, \$1.00; 25 pounds, \$2.25. Special prices on larger quantities.

postpaid.

25c. cach.
postpaid.

IMPROVED CHAMPION LEG
BAND.—Made of aluminum, in one piece; two
sizes. Large size for Asiatics, turkeys, etc. Small size for all light breeds of poultry. Bands numbered it to 100. Per dozen, 15c.; 25 for 25c.; 100 for 75c., postpaid.

CAPONIZING INSTRUMENTS.— Poultrymen can double their profits by caporizing their chicks. Capons always bring fancy prices in market. The operation is very simple. Full directions sent with each set of instruments. Frice, \$2.50 per set, postpaid.

For

For

paid.

GAPE WORN EXTRACTOR.

Very valuable in removing gape worms from young chicks. 25c. each,

worms from young chiers. Soc. Car., postpaid.

NEVERSLIP HEDGE
SHEARS.—The shear with a serrated edge, will not slip when cutting and is self sharpening. Made of the best quality English steel. By express, or freight, not prepaid, 8-inch, \$2.00; 9-inch \$2.50; 10-inch, \$3.00.

\$2,50; 10-inch, \$3.00.

PRUNING SHEARS.—A No. 1 in quality. Forged entirely of steel; blade of best cuttery steel. Excellent spring. 8½-inch, 75 cents cach, postpaid.

GARDEN TROWELS.—Forged steel, the strongest made. 5-inch blade, 45 cts.; 6-inch blade, 45 cts.; 6-inch blade, 50 cents cach, postpaid.

ACNE ASPARAGUS RUNCH-ER.—A buncher with a movable head piece for regulating the length of the bunch and adjustable knife guard, automatic catch for binding any size bunch, By express, not prepaid, \$1.75 each.

HAZELTINE WEEDER.

EXCELSION WEEDER.

WEED SLAYER

HAZELTINE HAND WEEDER. Best solid steel blade, sharpened on all ends; in general use; durable; 30 cents each, postpaid.

EXCELSIOR HAND WEEDER. Very useful for weeding seed beds, stirring soll in hot beds, cold frames, etc. 25 cents each, postpaid.

LANG'S HAND WEEDER. A band passing over the fingers gives perfect use of the hand for pulling weeds, without having to lay down the tool. The best weeder for onion growers. 25 cents each, postpaid.

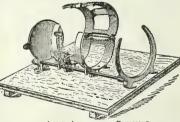

THE REDDICK MOLE TRAP.—All the old traps boiled down into a better one at one-third the old price. This trap embraces

This trap embraces all the good points found in high-priced traps. It is simple, durable and practical. Easily set and does not get out of order. Sure death to moles. By express, not prepaid, 90 cents each.

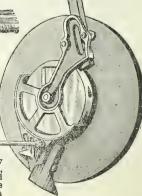

CONCAVE POTATO KNIFE.
CONCAVE POTATO
KNIFE.—For cutting seed
potatoes. With this knife
\$2 to \$3 per acre may be
saved in seed and time.
One man can do the work of
two. Full directions with
each knife. 30c.
each, postpaid.

EUREKA SEED DRILL.-Will open a furrow and distribute all small seeds, such as beet, cabbage, carrot, celery, lettuce, onion, radish, spinach and turnip, with perfect regularity, and also covers the seed after sowing. Useful for hotbeds or kitchen garden. By express, not prepaid, \$1.00 each.

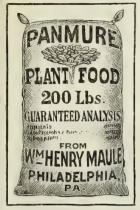

ACME ASPARAGUS BUNCHER.

EUREKA SEED DRILL.

Panmure Plant Food

An Absolutely Unexcelled Fertilizer

For the Window Garden For the Greenhouse For the Family Garden

Guaranteed Analysis:

Ammonia, 4 per cent. Available Phosphorie Acid, 8 per cent. Actual Potash, 7½ per cent.

For the Flower Garden For the Business Garden For the Farm

When I bought land in southern New Jersey, a few years ago, for seed growing and testing purposes, I had a fertilizer prepared for my own particular and exclusive use. It was made on a special formula, from high-grade materials, without a pound of make-weight or make-bulk stuff in it. It was planned for myself, and not intended for sale. It has been used long enough for me to now truthfully say that it has added hundreds and even thousands of dollars to the value of my own crops, both at Panmure, New Jersey, and at Briar Crest, Pennsylvania.

This excellent fertilizer contains enough ammonia to insure plants a quick start, enough phosphoric acid for all seed growing or grain growing purposes, and enough potash to give flavor to fruit and brilliance to flowers. It is not only well and liberally supplied with plant foods, but these foods are perfectly balanced. The great secret of the success of Panmure Plant Food, however, lies in the fact that every one of its ingredients is a high-grade and first-class article. It was a lucky formula that I selected for my Panmure trial grounds, and it is this good luck that I am now offering to share with my friends.

For greenhouses, conservatories, win-For In-door Gardening. For greenhouses, conservatories, window gardens, hot beds, frames, etc., Panmure Plant Food will be found entirely satisfactory as a stimulating and permanently helpful top dressing, or it may be mixed with the soil. It is used dry or mixed with water. I recommend its application in the dry state, in comparatively small quantities, at intervals of a month, as a top dresser.

For Out-door Use. For all gardening operations I recommend the use of Panmure Plant Food at the rate of 1,000 to 2,000 pounds per acre, in connection with a liberal amount of stable manure, or else upon sod spaded down or plowed under. may sound like a large amount of high-grade fertilizer to use, but it is no more than is applied by the commercial gardeners and truckers near the great cities. These truckers expect to grow two or sometimes three crops in a season, and to get a gross yield from their land of \$500 to \$1,000 per acre. It is better to make several applications of fertilizer during a year than to put it all in at one time.

For Extensive Trucking. For extensive trucking or farm gardening, where operations are conducted on an intermediate scale between gardening and farming, I recommend the use of 800 pounds of Panmure Plant Food per acre. This amount will give grand results, in connection with stable manure, on such crops as tomatoes, beans, peas, sweet corn, etc. For potatoes I recommend 1,000 pounds per acre.

For General Farming. For general farm crops I recommend 300 to 400 pounds per acre of Panmure Plant Food. This fertilizer is absolutely the best for farm purposes within my knowledge. It will give grand results on wheat, oats, corn and hay, and also on meadows, mowing fields and pastures. I have tested it upon almost every farm crop, in my Panmure trials, and have been myself surprised at the results.

For the Lawn. Panmure Plant Food is constructed for both quick and permanent action. It is, therefore, an admirable thing for grass. I have used it with the most excellent results on grass, clover and forage plants. It produces a rich, green, healthy color, and a vigorous growth. It is just right for the lawn, and may be used in spring, summer or autumn. A 10-pound package of Panmure Plant Food is quite sufficient for four square rods of lawn.

Worthy of Trial. I wish all my friends to try at least a package of Panmure Plant Food during the coming season, for it certainly is a model fertilizer in all respects, both in quick action and in lasting qualities. It is not only a starter but a pusher. It is not a hot fertilizer, though I recommend that it be mixed well with the soil, in order to extend the action of the roots.

Prices at first glance may seem high, but I can safely say, without reserve, that Panmure Plant Food, when applied intelligently, will be worth several times as much as the ordinary commercial fertilizer that is generally made to sell and from which results are so infinitesimally small as not to be discerned by the purchaser; and I can assure my friends that they will make a mistake unless they give Panmure Plant Food a trial this season.

Prices of Maule's Panmure Plant Food.

Window Garden Package. Nearly a pound. Enough for a small window garden for a whole season. 25 cents postpaid.

10-pound Bag. By express or freight, 50 cents.

25-pound Bag. By express or freight, \$1.00.

50-pound Bag. By express or freight, \$1.75.

100-pound Bag. By express or freight, \$3.00.
200-pound Bag. By express or freight, \$5.00.
Ton of 2,000 Pounds, \$40.00, f. o. b., Phila. Five tons, \$175.00.

(Express or freight charges to be paid by purchaser.)

Soil Foods or Fertilizers.

Bone Meal. For top dressing to lawns, pastures and meadows; also for use in the vineyard and about fruit trees and bushes. The Practical Farmer

=== Established 1855 =====

It is unique in Agricultural Journalism. It contains the other Departments named below. T. B. Terry's all the departments relating to crop growing and stock raising, and each department so thoroughly covers the ground that it is better than the average publication which is specially published for that particular branch. Agriculture, Stock and Dairy, Veterinary, Garden, Horticulture and Poultry are each under the editorial supervision of trained and practical men in their particular branches; men who have devoted their lives to that one phase of farm or garden work, and who are recognized leaders in their specialties. The result is that the Garden Department, for instance, gives the practical ex-

Health Hints have given him a National reputation and are published exclusively in The Practical Farmer.

The Query Department is the strongest and most helpful in the whole Agricultural Press. Here is the clearing house for the knotty questions that are constantly arising in the farm and garden operations of its thousands of subscribers, and to which the best thought and experience of its trained editors and other high authorities is given. Every week answers that cover the whole range of farm, garden and stable are published, and the 52 numperience and every day results of all that is latest bers of the year will be found a veritable encyand best in gardening. The problems that perplex clopedia of agricultural information, each year's the gardener day by day are elucidated and ex-numbers making a complete agricultural library. plained, and the hard places made smooth. What These departments and the Five Special Departis true of the Garden Department is true also of ments described below make The Practical Farmer

A DOLLAR PAPER AT HALF PRICE TO MAULE CUSTOMERS.

A good farmer is a good buyer. We believe in educated farming. If every farmer in the United States was a reading farmer our sales would be doubled and trebled in a single year. Being thus interested we naturally investigate and compare the merits of agricultural papers, and we must say that

The Practical Farmer

of Philadelphia is the best farm paper, and we believe should be in every farm home. The Practical Farmer is a paper with a purpose.—That purpose the elevation and improvement of American agriculture. It is a farm paper of the farmer, for the farmer and by the farmer. It has five special departments composed exclusively of contributions from its farmer subscribers, on every phase of every matter connected with running a farm. This makes it different from any other farm paper, and better than any other farm paper. You can read every other agricultural paper in America, and yet you will find The Practical Farmer indispensable in your daily farm work. Mr. L. H. Cooch, who is the owner of and carries on a 500-acre farm, is its editor. Mr. T. B. Terry, the well-known Ohio farmer, writes exclusively for its columns. Mr. T. Greiner Jos. Meehan and other well-known men edit the various departments. It has a more complete system of answering inquiries than any other agricultural journal. Subscription \$1.00 per year. By a special arrangement made with the publishers, 50 cents will pay for a year's subscription.

Wm. Henry Maule, Philadelphia, Pa.

Send your remittance direct to The Farmer Co., Market and 18th Sts., Philadelphia, Pa.
Or include it with your seed order and I will hand it to The Farmer Co.

Fees for Money Orders drawn on Domestic Form

Maule's Flower Seeds

My old friends will notice the minute they open this book as far as this, a tremendous change. It consists of an entire and thorough revision of my Floral Seed Department, entailing months of work, a lot of traveling, etc. With enlarged type, all the varieties culled out that were not of superior merit, with all of the new sorts added that are worthy of a place in this book, I must say it is most satisfactory to me personally. Compare this department with that of any other house in the world, and you will find a most up-to-date list, containing every thing good in the floral line that can be successfully produced from seed, and I am proud of it. I will be disappointed if this department in my 1910 seed book does not double the returns of my 1909 book. Do not forget that my principle,

"Your Money Back if Not Satisfied"

applies to flower seeds as well as to every other department of this book. Maule's Seeds are so exceptionally good that they are sure to please you, and with such a guarantee, even the most inexperienced gardener can send his order for flower seeds to "1711" with the confidence that if he does not obtain satisfactory results his money will be cheerfully refunded.

Maule's Mixture of All the Best Spencers.

On the back of the first cover page will be found a beautiful picture of all the best of the new Spencer Sweet Peas. There is no question that the Spencer type of Sweet Peas have been more liable to sport than any other class of sweet peas offered. At the Sweet Pea Show held in London the past season I saw about 125 different varieties of Spencer Peas, and I made up my mind when visiting this Show that in my 1910 Seed Book I would only list the fourteen best and truest of the Spencers (See page 164), and put all the other varieties I had growing into a superlative mixture, and this is it. More than fifty different types of Spencers will be found in the Mixture illustrated on my cover, and to tell the truth I really think on account of the sporty character of the Spencers this is the most satisfactory way to offer them. This mixture is superior to any thing ever offered in this beautiful flower.

Packet, 15 cents; 2 packets, 25 cents.

Maule's Phenomenal Pansies.

In connection with the Spencer Sweet Peas on the back of my front cover, I thought a fitting companion picture would be my Phenomenal Pansies. It has been very nearly ten years since I first offered and named the Phenomenal Pansy and it is still unsurpassable for wonderful size, colors and blending. This lovely large pansy has excited admiration in the homes of a hundred thousand of my customers. It combines in common with the Madam Peret those captivating wine-red shades that are so rare among flowers, and are well illustrated on the back of my last cover. When ordering your vegetable seeds, if you order nothing else in the flower seed line, you should at least include a packet of the Spencer Sweet Peas and these Phenomenal Pansies for the good wife or daughter. They will be delighted with them.

Packet. 20 cents; 3 packets, 50 cents; 1=8 ounce, \$1.50; ounce, \$10.00,

One dollar will purchase packet and ounce packages of Flower Seeds to the value of \$1.50.

N. B. Remember this discount applies only to seeds in these quantities, and no other. No discount whatever is allowed on bulbs, plants, small fruits, nor on 1-4 lbs., pounds, pints, quarts or bushels.

A BIRD'S EYE VIEW OF PANMURE TAKEN FROM TOP OF THE WATER TOWER

ABRONIA

TINCTORIA KELWAYI. Dense bushy habit; 15 inches high; large, daisy-shaped flowers of golden yellow color. Packet, 10 cents.

A Suggestion Young Folks

Thousands of the sons and daughters of my customers will look over this seed book this winter. Why not make up a flower seed club among your friends? You have no idea, with one or two packets here and one or two packets there, how quickly it amounts to a considerable order.

1,000 packets of flower seeds at 5 cents each, equal \$50.00 1,000 packets of flower seeds at 10 cents each, equal \$100.00

Total amounts to \$150.00 for which you need only remit \$100.00 (as stated elsewhere in this book, \$1.00 buys \$1.50 worth of seeds in packets) so you will not only make considerable money in selling these packets, three or four or more to a family in your neighborhood, but you will also absolutely secure some of that \$1,000 to be awarded July I, 1910, for club orders.

A good opportunity for schools to make some extra money.

ANTIRRHINUM, MAJUS

MAJUS. Flowers of large size, which are pro-duced on long spikes. Height 2 feet. Tall mixed. Packet, 5 cents. PINK PRINCESS.

This new pink snapdrag-on is one of the best and prettiest so far intro-duced. It is of medium height, and forms a showy, compact plant, with numerous flower stalks or spikes. The bloom is profuse and con-tinuous, but its main tinuous, but its main charm is the exquisite beauty of its clear pink color. It is one of the color. It is one of the best for bouquet making d cutting. Packet, 10 cents.

See Mountain Beauty.

ANTIRRHINUM

Tender Biennial

Snapdragon. One of the most charming of old-fashioned flowers. The antirrhinum is a biennial, and blooms well the second season, but succeeds also as an annual.

SUN GOLD. Foliage an intense canary yellow. Height of plant, 5 inches. Flower rosy white marked with carmine. Packet, 10 cents; 3 packets, 25 cents.

QUEEN VICTORIA. Pure white. Great vigor of growth and profusion of bloom. Desirable for bonquets. Packet, 10 cents; 3 packets, 25 cents.

TOM THUMB. Finest dwarf, mixed. One foot. Packet, 5 cts.

MAJUS YELLOW. Pkt., 10c.

MAJUS PINK. Pkt., 10 cts. One of the most Snapdragon.

ANTIRRHINUM, PINK PRINCESS

AQUILEGIA

Hardy Perennial

Luxuriant in any Columbine. Columbine. Luxuriant in any good soil; suitable for the open garden or rock work. Plants I to 2 feet high. Culture easy.

Packet, 20 cents. SPRENGERII. Emerald Feath-

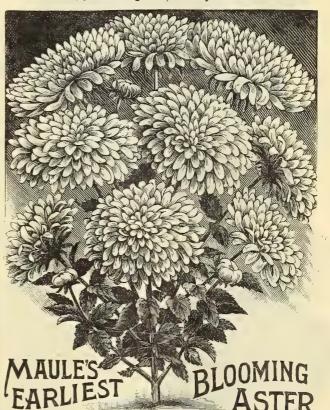

ASPERULA

Hardy Perennial

Maule's Superior Asters

(Queen Margarets.) Hardy Annual

MAULE'S EARLIEST BLOOMING. Blooms in

MAULE'S EARLIEST BLOOMING. Blooms in July, two weeks earlier than the tall growing types. Of open spreading habit, producing large flowers on long stems. 1½ feet high. A very distinct and valuable cut flower aster for florists. Sold in separate colors. White. Packet. 10 cents; ¼ ounce. 50 cents; ounce. \$1.50. Blue. Packet. 10 cents; ¼ ounce. 50 cents; ounce. \$1.50. Crimson. Packet, 10 cents; ¼ ounce. 50 cents; ounce. \$1.50. All colors, in mixture. Packet, 10 cents; 3 packets, 25 cents; 4 ounce 40 cents; ounce, \$1.25. DAYBREAK. One of the newer asters, but among the most popular now on the market. The color is a very delicate pink. The plant is about 2 feet high, producing an abundance of Targe flowers on long and graceful stems. Packet, 10 cents; 3 packets, 25 cents.

COMET NEW QUILLED. A decided novelty. A very beautiful very beautiful Comet aster, growing about 1½ feet high. The centre of the bloom consists of white quilled florets, artistically arranged and highly effective, in contrast with the exquisite rose-colored outer petals. One of the most charming of the new asters.

most charming of the new asters. Packet, 10 cents. LARGE ROSE FLOWERED. Plant 24 in ches high, of pyramidal shape and robust habit. Flowers large, brilliant, very double and regularly imbri-cated. All colors mixed. Packet, 10 cts.

Packet, 10 cts.

E. J. Malone, 119 Greenside Ave., Canonsburg, Pa.—I have had such grand luck with my asters this year, I feel it fitting that you should share the honors with me, and first I want to thank you for the first-class seed you sent me. I have never seen a finer display of asters anywhere than I am enjoying now. Plants attained a height of 2 feet, and a number will reach 3 feet, with a profusion of various colored flowers which resemble the "mums." I am more than pleased with results and am willing to compete with any amateur for size and beauty.

ASTER, VIOLET KING.

VIOLET KING. In color a soft violet-lilac, in size the peer of the grandest chrysanthemum, of branching habit with vigorous growth, stems long and stiff. In form the flower is distinct from any other variety, petals longer and broader, while the centre is curied and incurved, completely covering the crown.

Height 2 feet. Pkt., 10 cts.

NEW COMET CROWN.

This heautiful aster grows.

ASTER, NEW COMET CROWN.

Height 2 feet. Pkt., 10 cts.

NEW COMET CROWN.
This beautiful aster grows to a height of about 15 inches. The flowers are very large (3 to 6 inches across), and of the true Glant Comet type, composed of long, graceful petals and resembling the most exquisite Japanese chrysanthemums. The centre of each flower is pure white and the outer nortion rose pink. Pkt., 10 cts.

PURITY. Much like Daybreak, except the color is pure, spotless white. It grows to a height of about 2 feet, and the globular flowers are borne abundantly on graceful stems. Packet, 10 cts.

NEW JAPANESE OR TASSEL. Of pyramidal growth, about 18 inches high; bearing on long stems, 40 or 50 flowers averaging 5 inches acress, composed of wavy and twisted needleshaped petals. The colors range through all shades of pink, white and pale blue.

Packet, 10 cents.

SUNLIGHT. The first really good yellow aster. The plant is of medium height, and in form resembles the tall Chrysanthemum aster. The abundant flowers are about 3 inches in diameter, and are of the so-called Jewel type. Admirable for bedding. Packet, 10 cents.

GLORIA OR BUTTONHOLE. Flowers 1½ inches across, pure white with a beautiful scarlet margin. As many as forty open flowers baye been counted on a single plant. Packet, 10 cents.

GLORIA OR

anthemum, and a truly magnificent aster in all respects. It has long stems and is admirable for cutting. Mixed. Pkt., 10 cts. DWARF WHITE QUEEN. A distinct and handsome pure white aster, 8 or 10 inches high, each plant bearing 20 to 30 large double flowers, which almost hide the foliage. Pkt., 10c. OSTRICH PLUME. A magnificent white aster with flowers 5

aster with flowers 5 inches across. It resembles Glant White sembles Glant White Comet, but the petals are both longer and narrower; so loosely arranged as to rival the best Japanese

LADY. A beautiful new class, having sword-shaped foliage of a pleasing light green color. The plant is of very graceful habit. The flowers are white and rose, large and handsomely formed. It is an exceedingly free bloomer. Packet, 10 cents.

NEW HOHENZOLLERN. The largest flowered of the Comet asters; nearly 6 inches in diameter; quite similar in form to a Japanese chrysanthe mum, and a truly magnificent as-

arranged as to rival
the best Japanese
chrysanthemum. Graceful and desirable. Packet, 10 cents.

PÆONY FLOWERED DWARF. Grows only 12 inches high;
neat, compact habit, blooming profusely. Flowers large and perfectly
double. Colors peculiarly rich and brilliant. Strongly recommended
for planting in beds or masses. All colors mixed. Packet, 10 cents.

ASTER, PÆONY FLOWERED DWARF.

NEW VICTORIA. Flowers large and distinguished by an elegant and regular overlapping of the petals. Each plant bears from 10 to 20 flowers, with the appearance of a pyramid. All colors mixed. Pht., 10c. KING HUMBERT. An exquisite aster of the Comet type, pure white and very early. Its characteristics are the large size of the flower (4 to 5 inches across) and dwarf habit of growth; 8 to 12 inches in height. The globular flowers are of true long petaled type, and are showy. Should be included in every collection. Packet, 10 cents.

NEW GIANT COMET. These MEW GIANT COMET. These desirable large-flowered asters attain a height of 12 to 15 inches. They are quite early bloomers and quite distinct from all others. The double flowers are sometimes 3 or 4 inches across, with long wavy and twisted petals forming a loose half globe, resembling Japanese chrys-anthemums. I offer them in nine separate colors:

Pure White. Packet, 10 cents. Dark Violet. Packet, 10 cents. Sulphur Yellow. Pkt., 10 cts. Bright Crimson. Pkt., 10 cts. Azure Blue. Packet, 10 cents. Peach Blossom. Pkt., 10 cts. Pure Rose. Packet, 10 cents.

Pure Rose. Packet, 10 cents.
Reddish Lilac. Packet, 10 cts.
The Bride. Exquisite white, changing to rose. Packet, 10 cts.
Mixed. All the beautiful colors and tints found in this fine class, representing upwards of 15 distinct sorts. Pkt., 10c.; 3 pkts., 25c.; ¼ oz., 35c.; oz., \$1.25.

SEMPLE'S NEW BRANCH-ING. These admirable asters give late flowers, blooming just before the chrysanthemums. The tendency to form numerous branches gives the class its name. The flowers are 4 inches in diameter, borne on long stems and are rich and showy. Petals both long and broad, and more or less twisted and curled, and more or less twisted and curled.

and more or less twisted and curied, causing the flowers to resemble chrysanthemums.

Pure White. Packet, 10 cents; 4 ounce, 50 cents; ounce, \$1.50.

Flesh Pink. Packet, 10 cents; 4 ounce, 50 cents; ounce, \$1.50.

Rose. Packet, 10 cts.; 4 ounce, 50 cts.; ounce, \$1.50.

Crimson. Packet, 10 cents; 4 ounce, 50 cents; ounce, \$1.50.

Lavender. Packet, 10 cents; 4 ounce, 50 cents; ounce, \$1.50.

Blackish Blue. Packet, 10 cts.

All Colors Mixed. Over 20 shades.

Pkt., 10c.; 4 oz., 30c.; oz., \$1.00.

ANTIVERSARY MIXTURE
OF THE NEWEST ASTERS.
This was illustrated in colors on the
front cover of my 1997 Seed Book,
and from the numerous reports received gave universal satisfaction.
This is a mixture of all the best
sorts that can be secured and
blended to suit the most critical,
containing the best and choicest
varieties offered, and embracing
Comets, Semple's New Branching,
Victoria, Chrysanthemum Flowered and Pæony Flowered. Mixed,
all colors. Packet, 15 cents.

IMPROVED GIANT EMPEROR. Flowers of great size, very
double, fine form, brilliant colors;
one of the most desirable; robust
growth; 24 inches high. Mixed
colors. Packet, 10 cents.

growth; 24 inches high. colors. Packet, 10 cents.

ASTER. NEW INVINCIBLE.

NEW INVINCIBLE. A superior race in every way. The plants
are of very healthy, robust branching growth, about 2 feet high, producing, on long stems, massive
preony-shaped flowers of perfect
form and faultless outline, and exceedingly double to the very centre.

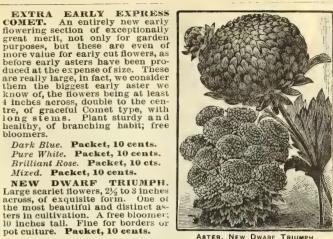

Packet, 10 cents.

MISS ALICE ROOSEVELT. A
new aster of the Victoria type; 18
inches high. Flowers 4 or 5 inches
across; a blending of primrose and
fiesh pink; massive and showy, with
overlapping petals; double clear to
centre; 25 to 40 flowers to a plant.

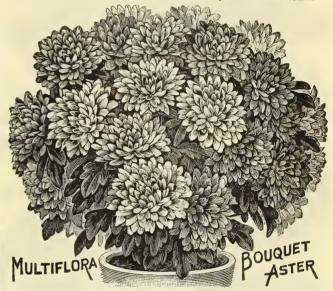

CHRYSANTHEMUM FLOWERED, DWARF. Fine, large
double flowers, resembling chrysanthemums, and valuable on account of profuse flowering when
others are done; plant 12 inches
high. All colors mixed. Packet,
10 cts.; 1/4 oz., 35 cts.; oz., \$1.25. NEW INVINCIBLE. A super-or race in every way. The plants

One of each of the follow-

BACHELOR'S **BUTTON**

See Globe Amaranth

BALLOON VINE

Hardy Annual Climber

A rapid growing climber, attaining a height of 10 to 16 feet. Bears small white flowers, followed by inflated seed pods, hence the name. Pkt., 5 cts.; oz., 20 cts.

BALSAM Tender Annual

Lady's Slipper. A favorite, quick growing annual, producing large, brilliantly colored flowers. The blooms are borne along the stem, among the leaves, and frequently the whole upper part of the plant is a mass of color. Height 15 to 20 inches. The Lady's Slipper is of easiest culture, and succeeds in any rich soil. It is well to sow the seeds thickly, in a temporary row, and then to transplant to permanent quarters. This makes the plants strong and stocky, and insures the greatest number of double flowers. My baisams cannot be excelled.

GOLIATH. This is a new balsam or lady's slipper of remarkably robust growth, throwing up a main stem, often 4 feet high. The lower portion of the stem is well covered with side branches, giving the plant a sturdy ing the plant a sturdy bush form. All branches are filled with bush for m. All branches are filled with very large double flowers of a salmon plak color, producing an effect as rich as it is charming. Goliath carries the largest and most perfect flowers yet developed in this old-fashioned bedding plant, and it should find a place this year in all annual gardens. All the balsams rejoice in good soil, and are improved by being once or twice transplanted from the original seed bed. This new variety should have ample space, as it occupies much room with lateral branches. Packet, 10 cents; 4 ounce, 30 cents; ounce, \$1.00.

BALSAM, GOLIATH.

cially adapted to cemetery work. Not excelled by any white balsam in the world. Packet, 10 cents; 3 packets, 25 cents.

DOUBLE DWARF MIXED. 15 inches high. Pkt., 5c.; oz., 30c. SPOTTED ROSE FLOWERED. A group of beautiful double balsams with spotted flowers of many shades, Pkt., 10 cts.; oz., 75 cts.

BALSAM APPLE

BARTONIA Hardy Annual

AUREA. California Gold-a Bartonia. This bright en Bartonia. This bright and showy annual grows I to 3 feet high and bears beautiful golden blossoms all summer. Succeeds well in a warm, sunny position. Do not transplant. Packet, 5 cts.

BEGONIA

Tender Perennial The fibrous rooted begonias

The fibrous rooted begonias are cultivated mainly for their foliage; the tuberous rooted sorts for their brilliant blossoms. Suited to greenhouse culture or to the open air during warm weather.

ERECTA CRISTATA. This is a very interesting single flowered strain of the tuberous rooted begonia. Flowers are large and extremely varied in color, including many shades. The most characteristic feature, however, is the curiously bearded or crested petal.

most characteristic feature, however, is
the curiously bearded or crested petal,
as shown in the illustration. Excellent
for pot plants or garden bedding,
blooming all summer. Mixed colors.

Packet, 15 cents.

VERNON. Plants covered with flow
ers of a brilliant deep carmine with a
brightyellow centre. Packet, 10 cents.

VULCAN. Similar to above, with
brightest searlet blooms. Pkt., 10 cts.

REX. Fibrous rooted. Ornamental
leaves, dark green, bronze red, etc. All
sorts mixed. Packet, 25 cents.

TUBEROUS ROOTED HYBRIDS.
Handsome single and double varieties.

Handsome single and double varieties.

Fine mixed. Packet, 20 cents.

QUEEN ANNA. A new fibrous rooted begonia noted for its profuse production of bandsome plnk flowers an inch across. The bright yellow stamens make the flowers attractive and showy. Foliage rich in appearance; growth strong. Packet, 10 cents.

BELLIS See Daisv.

Mrs. C. Stinson, Lyons Station, Ind.—My flower seeds did fine. Zinnlas and Nasturtiums could not be excelled for bloom.

William Dickey, Mt. Morris, N. Y.—I think your seeds are the best in the world; my Asters were the best in town.

BIGNONIA

Hardy Perennial Climber

made almost self-sup-porting. Usual height 10 to 30 feet.

GRANDIFLORA Flowers orange red; short tube. Pkt., 10 cts.

BIRD OF PARADISE **FLOWER**

Tender Perennial

This striking and attractive flower has lately become widely popular. The blossoms are of a rich golden yellow, about 2½ inches in diameter, produced in large trusses, the most striking feature being the long, incurving stamens and pistils, of a beautiful, bright crimson color. Seed should be soaked in warm water and started indoors or under glass, in a light, sandy soil. A sunny situation is required, in dry and very warm soil, and no water other than the rains will be needed after the plants are established.

Packet, 10 cents. This striking and at-

BITTER SWEET Hardy Perennial Climber

A handsome twining shrub grown for the beauty of the orange colored seed pods and scarlet coating of the fruit. Pretty in autumn. Elegant for clinging to walls, trees, etc. Packet, 5 cents.

BLACK EYED SUSAN

See Centaurea

BLUE BOTTLE

BOLTONIA GLASTIFOLIA

BLUE DAISY

Tender Perennial

Grows about 1½ feet high, of branching habit, producing an abundance of clear, sky blue flowers. Very pretty for summer decoration in the garden, and equally desirable for winter blooming. Seed should be started in the house in shallow boxes containing rich garden soil, covered with a sprinkling of sand or leaf mould, kept moist in a warm situation. Packet, 10 cts.

BLUE SPIREA

See Caryopteris

BOLTONIA

Hardy Perennial

GLASTIFOLIA. Six feet high, with immense numbers of white flowers nearly 1 inch in diameter. Resembling the native aster. Blooms from August until frost. A desirable plant. Packet, 10 cents.

BOSTON IVY See Ampelopsis.

BRACHYCOME

Tender Annual

Swan River Daisy. A compact, pretty annual, growing about 8 inches high, and flowering freely during the summer. Flowers blue or white. Sow seed in the open ground, after the weather is warm, or start in boxes or frames and transplant. Excellent flower for cutting MIXED. Packet. 5 cents.

BRAZILIAN MORNING GLORY See Ipomoea

BROWALLIA

Hardy Annual

Amethyst. A very handsome annual about 18 inches high, completely covered during the summer with blue or white flowers. One of the best bedding plants, and equally satisfactory for window culture. The shade of blue is intense and uncommon. Browallias grow freely in any rich soil. Sow seed in August for winter blooming. Packet, 5 cents.

BUTTERFLY RUNNER BEAN

Tender Annual Climber

This new variety is fully equal to the varieties of Scarlet Runner Bean, which occupy a prominent place among climbing plants for arbors and trellises, but is more distinct and surpasses them in the beauty of its flowers, which are of exception-al large size. The pret-tily waved wings are of the standards salmon rose. These two colors on the same flower make a striking and agreeable contrast.

Packet, 10 cents.

CALLIOPSIS

Hardy Annual

Hardy Annual
A showy annual formerly classed under the name of Coreopsis, which see. The Calliopsis is half hardy, but not a perennial. It makes a quick growth, and produces beautiful foliage. It is one of our brightest and best summer bloomers. Gold and maroon of the most brilliant hues are the prevailing colors. The seeds should be sown in early spring where plants are to remain

spring where plants are to remain.

DWARF COMPACT. A new
and desirable dwarf strain. Several
shades of color. Packet, 5 cents.

CALLIOPSIS, HYBRIDA SUPERBA

CALLIOPSIS, RADIATA "TIGER FLOWER."

RADIATA "TIGER FLOWER." New dwarf compact variety, 6 to 8 inches in height, producing an abundance of blooms during the entire summer; in fact, the plant is never out of bloom. Flowers large, reddish brown, with golden yellow tiger-like markings at the tips of the petals, not unlike some of the orchids. A great number of the flowers have twisted petals. Packet, 10 cents.

Hilda Thomas, Tullahoma, Tenn.—My Nasturtiums from Maule's Seeds were the largest I ever saw. They remained through the entire summer and fall. I picked my last blossoms on Thanksgiving day.

CALLIOPSIS, TOM THUMB BEAUTY.

TOM THUMB BEAUTY. A very showy, low growing, compact bush, covered with golden yellow flowers with deep crimson centres. Can be used with fine effect in beds, borders or used for massing. Height 6 inches. Packet, 10 cents.

CAMPANULA

Hardy Perennial

Hardy Perennial

Bellflower, Canterbury Bell. Favorite, old-fashioned, hardy plants. Beautiful and constant bloomers.

DOUBLE WHITE. A variety of the form known as Peach Bells. It is a magnificent perennial, perfectly hardy, and will be welcomed by all lovers of its class. It grows about 2 feet high, and in June and July bears showy spikes of large, double, pure white flowers. The bloom is very striking in appearance, making it one of the most beautiful of the bellflowers. It comes true from seed, and is worthy of general culture. The plant is unexcelled for the hardy perennial border, and the spikes cannot be surpassed for cut flowers. Pkt., 15 cts.

CARPATICA. Six inches to 1 foot.

CARPATICA. Six inches to I foot. Blue and white mixed. Blooms the whole season. Packet, 5 cents.
CHOICEST MIXED. Embraces all the popular single and double sorts.
Packet, 10 cents.

Hardy Biennial Campanula

CUP AND SAUCER. Flower 3 inches long; saucer 3 inches across. Blue, rose, white, lilac, etc. Packet, 10 cents.

MEDIUM. A biennial plant (two years), blooming best the second year; 2 feet; splendid mixed; single and double varieties. Packet, 5 cents.

BELLFLOWER, DOUBLE WHITE.

CAMPANULA, MEDIUM

CANARY BIRD FLOWER

Tender Annual Climber

An attractive climber, growing about 10 feet, bearing hundreds of beautifully fringed, yellow, bird-like flowers, having a fancied resemblance to a bird with its wings half expanded. A pretty vine for the window or for a sheltered location out of doors.

Pkt., 5c.; oz., 25c.

CANDYTUET, NEW ROSE CARDINAL.

CANDYTUFT

A beautiful and useful annual plant of the easiest culture; suitable for the border or garden. Sow early in spring. Height 1 foot.

EMPRESS. Exceedingly fine strain, with large, pure white, spiked flowers. Extensively used for bedding. Packet, 5 cts., oz., 25 cts.

LARGE FLOWERING HYBRIDS. Very dwarf; only 9 inches. Packet, 10 cents; ounce, 25 cents.

CARMINE. Large umbels of rich carmine red. Pkt., 5c.; oz., 30c. UMBELLATA DUNNETTI. Dark crimson. Pkt., 5c.; oz., 40c. NEW ROSE CARDINAL. Beautiful and very desirable, bearing numerous spikes of handsome rose cardinal flowers. Packet, 10 cts.

HYACINTH FLOWERED. The white flowers are in a large spike rather than a head. Very showy. Packet, 5 cents; ounce, 40 cents.

NEW DWARF CANDYTUFT, LITTLE PRINCE.

NEW DWARF, LITTLE PRINCE. This charming little candytuft grows only about 6 inches high, and is a variety of especial merit.
The very massive spikes are pure white. For best effect it should be
planted in rows or in masses. Packet, 10 cts.; ounce, 30 cts.
MIXED. All shades in finest mixture. Pkt., 5 cts.; oz., 25 cts.

Hardy Perennial Candytuft

IBERIS SEMPERVIRENS. A charming evergreen border plant. White; I foot. It blooms early and magnificently. Packet, 10 cents.

CANNA

Indian Shot Plant. Stately and highly ornamental plants, for both flowers and foliage. They attain a height of 2 to 5 feet and may be grown singly or in masses. Leaves green or brownish red; flowers, scarlet, crimson, yellow, cream, etc., variously marked. For roots see the index. Cannas are easily grown from seed. At Briar Crest, recently, seed sown March 28th bloomed freely before July 15th.

CANNA, NEW LARGE FLOWERING, FRENCH AND AMERICAN. CANNA, NEW LARGE FLOWERING, FRENCH AND AMERICAN. Not so tall as the old-fashioned sorts, but with flowers of great beauty; everywhere popular. These seedlings vary in color, ranging through all shades of yellow and orange to richest crimson, scarlet and vermilion.—Some plain, some spotted. My mixture contains seed from all the best new French and American varieties. Packet, 15 cts.; 0z., 35 cts. MIXED. All sorts, sizes and colors. Pkt., 5c.; 0z., 15c.; ¼ lb., 50c.

CARNATIONS

Hardy Perennial

Hardy Perennial

CARNATIONS AND PICOTEES. In the flower group known as Dianthus Caryophillus. Picotees are carnations with white flowers, trimmed or spotted or edged with some other color. The so-called carnations have within recent decades developed into types of rare beauty and fragrance. The Marguerite carnations are among the best of the class. Most of the carnations are quite hardy, surviving the winter if given a slight protection. No flowers are more lovely. Seeds sown thinly in the open ground, in spring, will bloom the first season.

FINEST MIXED. PKt., 10 cts
CHABAUD'S PERPETUAL EARLY FLOWERING. This charming carnation may be classed and treated as an annual. It resembles the Marguerite carnation in exquisite beauty and in early blooming habit, but is perpetual growing or perennial. Large flowers. All colors mixed. Packet, 15 cents.

CARNATION MAMMOTH FLOWERING MARGUERITE

Half Hardy Perennial Carnation

Half Hardy Perennial Carnation

MAMMOTH FLOWERING MARGUERITE. I regard these glorious flowers as the best of all the so-called pinks, especially for the open garden. The Marguerite carnation is ready to bloom in a few weeks from the sowing of the seed, and is the most profuse bloomer of the whole group of pinks. The plants are of compact and robust growth, but of dwarf habit. They are easily managed, and make the best of bedding plants. They may be treated as annuals, or wintered (under some protection) in the open air. They make admirable window plants, and may be potted for this purpose in the autumn. The best plan, perhaps, is to sow fresh seed every spring, so as to always have vigorous young plants for summer, autumn and winter blooming. The flowers are extremely fragrant. The size of bloom is 2 inches, or even up to 3 inches. The colors include rose, white, scarlet, yellow, etc. Some are plain and some striped. All are excellent. All colors.

Rose. Packet, 10 cents.

White. Packet, 10 cents.

FINEST MIXED. All the above in a grand mixture.

Packet, 10 cents; ¼ ounce, 40 cents; ounce, \$1.25.

CARYOPTERIS

Tender Perennial

Blue Spirea, Japanese Beni, Mustache plant. Showy, tender perennial plants, 3 feet high, bearing along the stem opposite clusters of feathery flowers. Foliage and flowers fragrant. Of easy culture.

MASTACANTHUS. Violet blue. Packet, 5 cents.

CASTOR OIL BEAN

See Ricinus.

CATCHFLY

Hardy Annual

An easy growing, free flowering, annual plant, producing dense umbels of white, red or rose colored blossoms. The plant is partly covered with a glutinous moisture, hence the name "catchfly." An old

worlte much improved.

MIXED. All colors. Pkt., 5c.

CELOSIA

Hardy Annual

Cockscomb. This showy annual plant of many forms is of easiest culture, and is one of the most brilculture, and is one of the most brilliant and effective of the summer and autumn bloomers. The flowers are borne in great masses of various shapes, from that of a cock's comb to that of a feather or plume. The colors are striking, from the most vivid red and crimson to the richest yellow and orange.

GOLDEN PRIZE. A new and beautiful orange colored cockscomb. Shape and size of head quite similar to Rosy Gem; a royal companion to it. Packet, 10 cents.

CRISTATA. All the best cockscomb types mixed. Pkt., 5 cts.; 02., 75 cts.

PLUMOSA. Plumed or feathered type mixed. Pkt., 5c.; 02., 50c.

ROSY GEM. Remarkable for its comparatively low growth (10 to 15 inches) and for the great size of its flowers. Nearly half the height at maturity consists of the rich, rosy, magnificent floral mass known as the cock's comb. No celosia can excel this one for dazzling beauty. Packet, 10 cents.

THOMPSON'S MAGNIFICA. A beautiful sort of the feathered type. The habit of growth and general aspect are indicated in the illustration. The height

growth and general aspect are indicated in the illustration. The height is 2 to 3 feet. The colors include golden yellow, flery scarlet, purple, salmon, blood red, etc. It is exceedingly pretty and showy. Pkt., 10c.

SPICATA. This distinct and showy celosia is a native of India. Plants are erect and grow 3 feet in height, branching freely, each stem terminating in a round slender pointed spike of bloom, 3 to 4 inches in length and one-half inch in diameter. The florets at first are a soft bright rose color, changing to silver white, so that a fully developed spike resembles a slender silver plume with a bright carmine tip. Pkt., 10 cts.

CENTAUREA IMPERIALIS AND CYANUS.

CENTAUREA IMPERIALIS AND CYANUS.

GIANT MARGUERITE SWEET
SULTAN. While this new and royal
form of Sweet Sultans may be nothing
more nor less than a very large type of
what I have been selling for years, still
there are many florists who claim that
it is a totally novel and distinct strain.
It certainly outclasses its predecessors
in size of plant and boldness of flower.
The plant attains a height of 4 or 5 feet.
The immense white, fragrant blossoms
are borne on stems sometimes 2 feet
long. They make magnificent cut flowers, lasting for several days in water.
Packet, 10 cents.

CYANUS MINOR. Corn Flower,
Bluet, Blue Bottle, Ragged Sailor. One
of the most famous of the old-fashioned
flowers. It grows in any situation, and
bloo ms continuously. Excellent for
cutting. It is a hardy annual, coming
up year after year from self-sown seed.
There are a variety of colors, including
blue, rose and white. Height about 2
feet. Mixed. Pht., 5 cts. oz. 25 cts.
CYANUS DOUBLE. Globular heads.
Many pretty colors. Mixed. Packet,
5 cents; ounce, 35 cents.

Hardy Perennial Centaure.

Hardy Perennial Centaurea

GYMNOCARPA. Dusty Miller.
Silver foliage; 10 inches. Pkt., 10 cts.
CANDIDISSIMA. Broad, white
leaves; 1 foot. Packet, 10 cents.

Giant Marguerite Sweet Sultan.

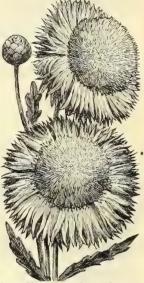

CENTAUREA

Hardy Annual

Under this head are embraced several popular flowers. Centaurea imperialis is the Sweet Sultan. Centaurea cyanus is the Corn Flowers on much esteemed in Germany, and now grown everywhere in America. Another is the so-called Dusty Miller. Most of them are annuals.

annuals.

IMPERIALIS. Imperial Sweet Sultans. A splendid type of annual centaurea now widely popular. The fragrant blooms are 2 or 3 inches across, the disc of the flower being somewhat flat, surrounded by tubular rays with fringed margins, the whole effect being extremely soft and attractive. Height 1 to 2 feet; easily grown. Excellent for bouquets. Various shades of yellow, white, rose, lavender, etc. Packet, 10 cents.

CENTROSEMA

Hardy Perennial Climber

Butterfly Pea. A hardy perennial vine of great beauty. It blooms in July, bearing inverted pea-shaped flowers, 1½ inches across, of a rosy violet color, with a broad feathered marking through the centre. Flowers profuse.

CHINESE PRIMROSE

CHRYSANTHEMUM

Hardy Perennial

Hardy Perennial

The single annual chrysanthemums are extremely showy and effective. They are daisy like in shape, and are much used for cut flower purposes. The perennial sorts are both single and double. All are easily grown from seeds. Taken collectively, they embrace many colors. The single annual chrysanthemums are calied Painted Daisies. One of the single perennial chrysathemums bears the name of French Marguerite or Paris Daisy. The double perennial sorts, from China and Japan, include the most brilliant of the late autumn flowers.

DUBLE OSTRICH FEATH-ER. This is a fine Japanese strain, producing handsome double flowers with highly ornamental petals. The seedling plants will bloom the first

with highly ornamental petals. The seedling plants will bloom the first season, thus enabling the cultivator to pick and choose the most valu-able specimens for preservation and permanent culture.

Packet, 15 cents.

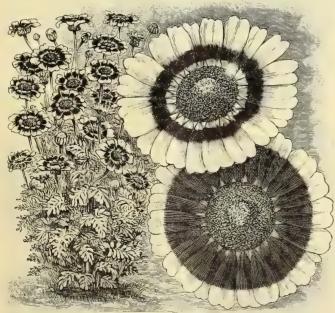

FRUTESCENS
GRANDIFLORA.
French Marguerite or
Paris Daisy. A single
perennial growing 1 foot
high, bearing pure white
flowers with yellow centre. Packet, 10 cents.
LARGE FLOWERING CHINESE AND
JAPANESE. All the
large flowering chrysanthemums, the glory of
autumn, are perennials.

harge nowering chrysanthemums, the glory of autumn, are perennials. Some are single and others double. Some are better suited to out of doors culture than others. As a rule, they are hardy. The color range is almost endless, though red, yellow and white flowers predominate. I have only to say that my Chinese and Japanese chrysanthemum seed is of the choicest strain, with endless possibilities of high merit. Finest mixed. Pkt., 20c.; 3 pkts., 50c.

Dorcas L. Hoxsie, Ghent, N. Y.—I had a splendid garden from your seeds, also some very handsome flowers in spite of the long drought.

CHRYSANTHEMUM, CHINESE AND JAPANESE.

CHRYSANTHEMUM BURRIDGEANUM, TRICOLOR HYBRIDS, MIXED

BURRIDGEANUM, TRICOLOR HYBRIDS, MIXED. well formed and lasting; making a pretty appearance when used as a bedding plant. Fine for cut flowers. These hybrids were obtained from the well known Burridgeanum variety and are decidedly better in all respects. Hardy annual. Packet, 10 cents.

Hardy Annual Chrysanthemum.

Hardy Annual Chrysanthemum.

BRIDAL ROBE. Plants grow about 1 foot high; the finely cut foliage is almost hidden by the mantle of pure white double flowers, which cover the entire plant so much that a bed of this looks like a drift of snow. It will be in great demand as a bedding plant, and also makes a good cut flower. The petals of the flowers are closely set and resemble to some extent a finely formed, large flowering, double daisy.

Packet, 10 cents.

GOLDEN FOLIAGE. Has finely cut foliage, with leaves of a beautiful golden yellow color. Dwarf, bushy habit. Flowers daisy-like, zoned and charming in appearance. Packet, 5 cents.

SINGLE FINEST MIXED. Painted Daisies. These make a beautiful display. The daisy like flowers are handsomely marked, usually in bands or rings of many colors. Packet, 5 cents.

CHAMELEON. Bears daisy like flowers in summer and autumn. Ground color of flower light coppery bronze, with bright purplish crimson zone and golden circle. Later the bronze color changes to yellow. Packet, 5 cents.

BABY GOLDEN

BABY GOLDEN GLOW. Golden Queen. A most charming an-nual, growing about 15 to 18 inches high, bearing scores of bright yellow double flowers. The plants begin to bloom al-most as soon as set in the open ground, affording an almost unlimited supply of cut flowers. One of the best bedders. Likened to Golden Glow on account of color shape and profusion of bloom. Pkt., 10 cts.

FANCY MARKINGS. An exceptionally choice mixture of selected sin-gle large flowering new sorts. Beautifully marked.

CHRYSANTHEMUM, BABY GOLDEN GLOW. MIXED. Pkt., 10 cts. Chrysanthemum, Baby Golden Glow. CORONARIUM. Finest double sorts mixed. Packet, 5 cents.

CINERARIA Tender Perennial

Cape Aster. A favorite, free flowering greenhouse or window plant, the shades including blue, purple, crimson, maroon, etc. Many varieties produce flowers with a clear white eye. Height I foot; flowers 2 inches across, or more.

FINEST MIXED. Large flowering varieties. Packet, 25 cents.

CLARKIA

Hardy Annual

A charming annual; 1 to 2 feet high. Colors rose, white, red, etc. A profuse and continuous bloomer. Culture easy.

ulture easy. MIXED. All varieties. Pkt., 5c.

COREOPSIS

Hardy Perennial

This is a hardy form of calliopsis. The coreopsis is one of the most showy of yellow flowered hardy perennials. The height is 2 to 3 feet, and it bears a profusion of bright colored flowers all summer. The flowers are 2 to 8 inches across. Culture easy, will thrive anywhere.

SUNSHINE. Best coreopsis grown. Every spring it reappears in vigorous and graceful form. Packet, 10 cents, ounce, 35 cents.

LANCEOLATA. Bright gold. Very rich and extremely desirable.

Packet, 5 cents; ounce, 25 cents.

COSMOS

Hardy Annual

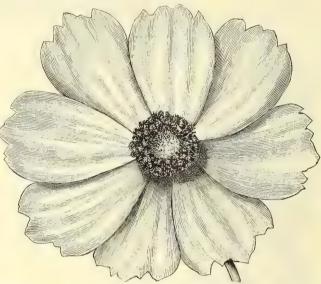

Hardy Annual

A tall, graceful, showy annual, enjoying the widest popularity. It has been developed into a variety of shapes and colors. Three to six feet high. Blooms profusely in late summer and autumn. The season of bloom can be lengthened by starting the seeds in frames or window boxes, in early spring. Excellent for cut flowers.

NEW GIGANTIC ORCHID FLOWERING, LADY LENOX. This, the latest development of this popular autumn flower is a forerunner of a new race of cosmos. The flowers are immense, 6 to 7 inches in diameter, with wide overlapping oval petals of an exquisite shade of shell pink. The flower is borne on long stems, making them exceptionally desirable for cutting. Plant grows 4 to 6 feet high. Pkt., 10c. GIANTS OF CALIFORNIA. This strain is remarkable for the great size and clear color of its flowers. The plants or bushes grow 6 feet high, and each is a mass of feathery foliage, studded all over with long stemmed flowers. On account of its great size and development the plant requires a long season and the seed should be sown early. It is a hardy sort, however, and is not injured by ordinary frosts, and continues to bloom until the advent of really severe weather. All sorts mixed. Packet, 10 cents; % ounce, 35 cents; ounce, 60 cents.

EARLY DAWN. A new strain, blooming early. Whith a tinge of rose; 4 feet high. Very desirable. Packet, 10 cents.

MARGUERITE FRINGED. Petals fringed in a way suggesting marguerites. Flowers 2 or 3 inches across. Colors white, red, pink. All colors mixed. Packet, 10 cents.

COSMOS, NEW EARLY BLOOMING GIANT FANCY.

NEW EARLY BLOOMING GIANT FANCY. In this strain, which has been selected and re-selected with great care and pains, will be found the finest forms of cosmos thus far developed. It is a noole mixture or collection of large flowered forms, embracing all colors, such as white, pink, crimson, white tinted rose, etc. The great flowers, borne in abundance on long and graceful stems, are sometimes 6 or more inches across. Some blooms are nearly flat and cone shaped, with petals variously cut and fringed. Certain of the fringed forms resemble California poppies, with broad petals of great elegance and beauty. For best results this magnificent type of cosmos should be started very early, as it requires a long season for full development. If sown under glass or in the window box it will bloom in early autumn, and the gorgeous flowers will continue long after the advent of frosts. The above in separate colors.

Pink. Packet, 10 cents.

Crimson. Packet, 10 cents.

Pink. Packet, 10 cents. Crimson. Packet, 10 cents. White. Packet, 10 cents.

MIXED, All colors. Pkt., 10 cts.; ½ oz., 30 cts.; oz., 50 cts.

COWSLIP

See Primula.

Hardy Annual
Yellow Flowering Pea. A beautiful, low growing, bushy annual, with flowers of rich golden yellow, of true sweet pea form. The blossoms are borne in racemes; sometimes over 40 to one spike. The leaves are dark green, and the seed pods when shaken produce a sound like a child's rattle.

RETUSA. Packet, 10 cents.

CYCLAMEN

Tender Perennial

One of the choicest of all the greenhouse or window plants. Root bulbous in shape; foliage rich and heautiful; flowers bird like and fragrant. Colors white, pink, crimson, etc. Should be sown in light soll, containing leaf mould.

PANMURE DOUBLE CACTUS. An extra fine strain of this favorite type. Packet, 15 cents.

PANHURE EXTRA CHOICE LARGE FLOWERING DOUBLE MIXED.

PANMURE EXTRA CHOICE LARGE FLOWERING, DOUBLE MIXED. Dahlia culture is no small part of the work done at my Pan mure Seed Gardens, in Southern New Jersey. In addition to growing roots of the standard sorts, it is necessary to test all the leading and best introductions that make their appearance season by season. There are acres of blooming dahlias at Panmure every summer, and the different flowers make magnificent ribbons or belts of color. Indeed, it is doubtful whether there is a more choice collection of large flowering double dahlias in the world than at Panmure, and it is from these choice specimens that I save seed. Of course, I cannot guarantee color or type from seed procured in this way, but can safely remind my friends that highbred ancestry means high-bred progeny, and can, therefore, recommend this seed without reserve. It is certain to produce be autiful types, perhaps many that will prove rare or new. Packet, 15 cents.

DOUBLE EXTRA
FINE MIXED. Very
fine; about 20 varieties.

If your order amounts to \$1.00 worth of seeds in packets and ounces You must remit \$1.00

but you can select 50 cents extra and only remit the same amount.

DAISY, DOUBLE MIXED.

DOUBLE MIXED.
Including white and pink sorts. Pkt., 10c.
THE SHASTA. This is the finest of all the so-called moonpenny daisies. It is one of Luther Burbank's hybrids, the result of a cross between the common field daisy and a European sort. It is a perfectly hardy perenial, bearing flowers averaging 4 inches in diameter, on long, stiff stems. It blooms freely for several months, and the flowers remain fresh for two weeks or more after cutting. The petals or rays are pure white. The Shasta Dalsy is one of the most useful flowers for bouquets. Pkt., 15 cts.

DATURA Hardy Annual

Hardy Annual
Trumpet Flower. This popular plant with its grand blossoms, is worthy of highest esteem. The seed should be started indoors or under glass at the North, in order to hasten the blooming period. Give plenty of room to each plant—2 or 3 feet. The datura may be lifted in the fall and taken to the greenhouse for winter blooming.

CORNUCOPIA (HORN OF PLENTY). Flowers white and royal purple; 8 to 10 inches long, and 5 to 7 inches across the mouth, each appearing to be made up of three distinct flowers. The bloom is handsome and exceedingly fragrant. Plant 8 feet high. Packet, 10 cents.

GOLDEN QUEEN. Height and GOLDEN QUEEN. Height and extent of plant 8 feet. Flowers golden yellow, double, triple or quadruple, and as large as the flowers of Cornucopia. Rich, handsome and attractive. Packet, 5 cents.

DOUBLE WHITE. Exquisitely double and pure white. The shape and character similar to Cornucopia.

Packet, 5 cents.

DAHLIA, DOUBLE EXTRA FINE

DELPHINIUM

Hardy Perennial Larkspur

An old garden favorite. Seed sown in the early

An old garden favorite. Seed sown in the early spring will produce blooms the same year, but the flowers will be more profuse in subsequent years. The blue color of larkspur is almost unique among flowers in its clearness and intensity. See larkspur for the annual sorts.

ZALIL. A distinct and very showy hardy perennial yellow larkspur. The several branches or flower spikes are 8 to 10 inches in length. The flowers are of a most lovely and delicate shade of sulphur yellow, the color of a Marechal Niel rose, and are both be autiful and effective.

Packet, 10 cents.

CHOICE MIXED. Embracing all the best old sorts.

DIAMOND FLOWER Tender Annual

charming little plant for every A charming little plant for every window garden, growing only 2 or 3 inches high. The seed may be sown in the pots of other plants, resulting in a mass of minute green leaves and starry flowers which shine like diamonds. Colors white and violet blue. Packet, 10 cents.

DIANTHUS

Hardy Annual Pinks The annual and biennial sorts of

The annual and biennial sorts of dianthus flower freely the first year from seed. They are quite hardy, and often give a greater profusion of bloom the second year than the first. The seeds of all kinds of dianthus may be sown in the open ground, and thinned to stand 6 or 8 inches apart in the row. The plants spread rapidly, and make ornamental masses of growth. The colorings of these hardy pinks are exceedingly rich and varied and their beauty is scarcely surpassed by any flower of the garden. Their cultural requirements are simple, and they are in universal favor.

ROYAL PINKS. This magnificent improvement on Dianthus, Heddewigii has been given the name of Heddewigii Nobilis—the noble or royal Heddewigi, and the group well deserves the name of Royal Pinks, It is derived from selected forms of the popular single-flowering Japan pinks, producing blossoms of a new shape, the petals being curled, waved and twisted, each covering haif of another, and all beautifully fringed. The colors vary from white to intense red. The flowers are from 2 to 4 inches across, with large eyes, and are exceedingly showy and satisfactory. The plants are a foot or more in height and are unsurpassed for bedding purposes. Nothing among the annual, single-flowered pinks can excel this new and lovely strain. Pkt., 10c.

DIANTHUS, ROYAL PINKS.

DIANTHUS, HEDDEWIGH.

HEDDEWIGH. Double Japan Pink. Seed saved from the best

HEDDEWIGH. Double Japan Pink. Seed saved from the best double flowers only. Fine collection of colors. Pkt., 5 cts.; oz., 50 cts. IMPERIALIS. Double Imperial Pink. Fine mixture of colors. Packet, 5 cents; ounce, 50 cents.

MARVELOUS. The same as Dianthus Wonderful or Fringed Japanese Pink. The plants grow from 12 to 15 inches high, and produce large flowers 3 to 4 inches across, on stiff, upright stems. From a third to a half of the flower seems to consist of graceful fringes, turned and twisted in all directions, giving an appearance both pretty and unique. There is a wide color range. Dianthus Marvelous affords desirable material for bonquets, and cannot be excelled for bedding or border purposes.

Packet, 10 cents. purposes.
Packet, 10 cents.

CHINENSIS. China or Indian Pink. Finest double mixed. Pkt., 5 cts.; oz., 50 cts.
DIADEMATIS. Dladem Pink. True, fine extra double. My strain of this heautiful nink.

MOURNING CLOAK. A double dianthus of so dark a maroon as to be almost black. Every petal is faintly bordered with white, wholly relieving the flower of a sombre appearance. The size is about 2½ inches, and the texture is extremely rich. Pkt., 10 cts.

DIANTHUS, WHITE FRILLS AND MOURNING CLOAK

EVERY year I publish in my seed book several hundred extracts from letters received from friends and this year is no exception. Not one of the testimonials published last year appears in this year's book. I do not believe in using the same testimonials year after year as some seedsmen do, for after you have read them once, they certainly would not interest you again; so every year all of these testimonials scattered through my book are fresh and very much to the point, selected as they are from many thousands of letters of similar character received constantly through the year from Jan. to Dec.

Willis F. Patrick, Millville, N. J.—I wish to express my thanks for the superior quality of the Sweet Pea seed you sent me this spring. They began to bloom the last week in May, and at the present time (June 12th) they are a mass of flowers. I have grown Sweet Peas for eight years, but have never had any to equal yours.

Miss A. H. Callendine, Wellsburg, W. Va.—Your seeds are fine and I was much pleased with the results from those planted this year. The flowers are so large, and so many bright colors.

Mrs. J. S. Clark, Kansas City, Mo.—I have ordered plants and seed of you for a number of years. It has always been a satisfaction to me to know that when I plant seed purchased of you, I can depend upon getting the results desired.

Mrs. M. E. Slater, Lafayette, N. J.—I have planted your garden and flower seeds for fifteen years, and have found them true to name, and otherwise satisfactory.

David Zerphey, Mt. Joy, Pa.—Maule's Seeds are good. I have customers who come for miles to my greenhouse for plants from your seeds.

Harold J. Staples, Biddeford, Me.—I have bought Maule's roses before, and those of other houses, and Maule's roses always surpassed all others.

Fred J. McCann, Norwalk, Cala.—I congratulate myself on having the prettiest flowers in the neightorhood; every seed came up, and my asters are the finest ever grown around here.

George A. Easterday, Fergus Fails, Minn.—Your seeds gave perfect satisfaction. My aster bed was a wonder in itself.

DIANTHUS. PLUMARIS. SINGLE AND DOUBLE.

Hardy Perennial Garden Pinks

PLUMARIS. A great improvement over the charming, time-honored inhabitant of old-fashioned gardens. The flowers of this new type are much larger, and are borne more profusely on shorter, stiff stems. In these new pinks we have a large variety of colors and markings; the color, of course, refers to the centre of the flower, the remainder being white or blush with a band of color near the margin, and almost every color known is shown to some degree. They are excellent, hardy, perennial garden plants; vigorous, about 1 foot high, and flower profusely during spring and early summer. The flowers are beautifully fringed. Also called grass, border, feather or spice pinks.

DOUBLE. Mixed colors. Packet, 15 cents.

SINGLE. Mixed colors. Packet, 15 cents.

DIGITALIS

Hardy Perennial

Foxglove. Especially useful among shrubbery and in half shady places, though it grows equally well in open situations. Long racemes of beautiful flowers. Colors, purple, white, yellow, rose, etc. Some are beautifully spotted. Height 3 or 4 feet. Much admired.

GLOXINIAFLORA. An improved strain, with handsomely marked flowers. Packet, 10 cents.

VERY FINE MIXED. All shades and markings. Packet, 5 ets.

DIMORPHOTHECA AURANTIACA.

DIMORPHOTHECA AURANTIACA

Hardy Annual Aptly called the African Gold Daisy. A rare and extremely showy annual from South Africa, destined to become a great favorite on account of its very easy culture and beautiful flowers. The single daisy-like flowers are 2½ inches in diameter, are of a unique glossy terracotta orange, which brilliant coloring is rendered the more conspicuous by the dark disc surrounded by a black zone. The plants grow from 12 to 15 inches high and are very profuse flowering. Well adapted for groups or borders, producing the pretty flowers very soon after being planted out in the ground in sunny situations and will continue to flower during the entire summer. Packet, 15 cents.

DOLICHOS

Tender Annual Climber

Tender Annual Climber

Hyacinth Bean. A rapid growing annual ctimber bearing clusters of white and purple bean-shaped blossoms. Fifteen feet. Desirable.

NEW SCARLET. A dolichos with fine scarlet blossoms, followed by silver white seed pods, which are as showy as the magnificent flowers. Recommended for porch, trellis or where a climbing vine could be used. Very showy when planted in connection with Dolichos Daylight. Will attain a growth of from 12 to 15 feet in a season. Packet, 5 cents.

LABLAB MIXED. White, red and purple flowers. Pkt., 5c.; oz., 20c. SOUDAN PURPLE. A decorative climber, much earlier than Dolichos Lablab and also much more floriferous. The twining stems are of an intense purple, and the long spikes of flowers are of a brilliant rose. Stands heat well and is invaluable for covering trellises, etc.
Packet, 10 cts.; ounce, 25 cts.

Packet, 10 cts.; ounce, 25 cts.

DOLICHOS. SOUDAN PURPLE

DAYLIGHT. Daylight is the newest and best form of this beautiful climbing vine, with bolds pikes of pure white flowers. The height is 8 to 10 feet, the flowers appearing from base to summit. The foliage is rich and attractive. The flowers, which resemble sweet peas in shape, are succeeded by broad, yelvety. creamy white pods. This climber is an excellent one for trellises and fences; highly satisfactory in almost any situation, if given good soil. Pat. 5 cts.; oz., 20 cts. DAYLIGHT.

BUSH DOLICHOS Tender Annual

THE BUSH. I offer a bush form of the well known Daylight Dolichos, with the same enormous spikes of pure white flowers, but without the climbing habit of growth. This compact and ornamental plant grows less than 2 feet bigh; flower stands upright a foot above the foliage. Packet, 5 cts.; ounce, 20 cts. foliage. Packet ounce, 20 cts.

Mrs. J. C.Wheeler, Homer, N. Y.—The pansy seed you sent me all grew, and the flowers were beauties.

MIXED. All colors. Packet, 5 cents.

EVERLASTING FLOWERS

Hardy Annual

See Globe Amaranth, Helichrysum, Acroclinium, Xeranthemum, tc. I offer here all varieties in a mixture. Pkt., 10 cts.; oz., 50 cts.

EVERLASTING PEA Hardy Perennial Climber

Hardy Perennial Climber

Hardy Sweet Pea. A showy, perennial climber, attaining a height of 6 to 8 feet when trained upon a trellis or arbor. It blooms most freely the second season and afterward, requiring no winter care or protection. The flowers are large, bright and exceedingly showy; not fragrant but admirable for bouquet making. Adapted to rock work, fences or rough places. Colors, rose, whitr, etc.

SPLENDENS. The Pride of California. A grand new everlasting pea, with large clusters of brilliant rosy red flowers. An extremely handsome climber. Packet, 10 cents.

MIXED. All colors. Packet, 5 cents; ounce, 25 cents.

FERNS

Tender Perennial

Seed slow to germinate, sometimes a month or more. Sow in shallow boxes, with an extremely light covering of crushed and sifted moss. Keep moist and shaded. Ferns love a light, sandy soil, well enriched. CHOICEST MIXED. From a fine collection. All sorts. Pkt., 15c.

Mrs. Glen T. Babson, Seward, Neb.—I am much pleased with the new arrangement of the catalogue. Have always considered the "Specialty Leaves" a greater

annoyance.

Mrs. N. B. Garner, Lynchburg, Va.—My orders have always been promptly and correctly filled and I have found your seeds and bulbs to be just as represented.

My flowers always yield well in quantities and richness of color.

GERANIUM, FINEST VARIETIES MIXED

Geranium, Zonale, Mixed.

ZONALE. Thirty years ago I hesitated very much about offering geranium seed in my catalogue. Since that time, however, all the leading hybridizers of the world have been doing their best to improve the seed of this flower that is so popular the world over, and usually raised from cuttings. Today my Zonale geranium seed is infinitely superior to any I have ever offered, being carefully selected from only the best and largest flowers. Mixed. Packet, 20 cents.

GERBERA JAMESONI

Half Hardy Perennial

Also called Transvaal Daisy, on account of the large, single, daisy-like flowers; all are at least 4 inches in diameter, on stems 18 inches long. The color is a brilliant scarlet. Requires protection during the winter. Packet, 10 cents.

GILIA

Hardy Annual

Free blooming dwarf, for massing in beds: 6 to 12 inches high.

DICHOTOMA. About 8 inches high, and densely covered with large, pure white flowers. Highly ornamental as a border plant or in beds. Packet, 10 cents.

MIXED. Packet, 5 cents.

GILLIFLOWER

See Matthiola: also Stocks.

GLOBE AMARANTH, FINE MIXED

GILIA, DICHOTOMA

GLADIOLUS Half Hardy Perennial

Can be grown to bloom the first season from seed, producing good bulbs for second year's blooming.

JAPANESE HOP

Hardy Annual Climber
VARIEGATED. A charming
climber, attaining a growth of 20 to
25 feet in a few weeks. The leaves
are beautifully marked and varie
gated with white, yellowish green
and dark green. Not injured by
insects or by heat, and the vine
retains its beauty until frost.
Pkt., 10 cts.; 3 pkts., 25 cts.

Hardy Perennial

The showiest of the "Flags" and extensively used in the hardy border. Seed from a large collection. Mixed colors. Packet, 10 cents, 14 ounce, 25 cents.

JAPANESE KUDZU VINE

Jack and the Bean Stalk. An ornamental and rapid growing climber. Experience abundantly proves the Kudzu Vine to be a highly interesting novelty.

It comes from Japan, the land so productive of curious and ornamental flowers. It is a beautiful climber, remarkable for its great vigor of growth and its handsome flowers. The blossoms are large and in panicles somewhat like wistaria, but larger in size and with better clusters. The color is of a pleasing shade of purple. The follage is luxuriant, somewhat like the leaf of a bean. The vine is extremely rapid and dense in growth, making the Japanese Kudzu Vine of great value where a quickly produced shade is wanted. An eminent horticulturist and prominent landist and prominent land-scape designer has it growing over the front of his house, and pro-nounces it a nounces it a veritable "Jack and the Bean Staik" vine. It is per-fectly hardy, in-creasing in size and beauty year after year; fine for arbors, verandas, etc.

Packet,

JAPANESE KUDZU VINE. "JACK AND THE BEAN STALK."

JAPANESE MAIZE See Zea Japonica

Mrs. M. B. Johnston, Whittle Springs, Tenn .- All seeds perfectly satisfactory.

Sweet Peas very fine and very early.

Mr. Chas. W. Reese, Westminster, Md.—The flower seeds I got of you last year were certainly true to name and exceptionally good.

Tender Perennial

A dwarf, branching pot plant, very useful for winter decoration. Small, oval-shaped leaves, and a great profusion of handsome, bright scarlet berries. One foot. Always admired. Packet, 10 cents.

JOB'S TEARS Hardy Annual Grass

An ornamental grass, with broad, corn-like leaves and hard shining seeds of peculiar appearance, giving the plant its name. Two feet, Packet, 5 cents; ounce, 10 cents; 4 pound, 20 cts.; pound, 60 cts.

JOSEPH'S COAT

See Amaranthus.

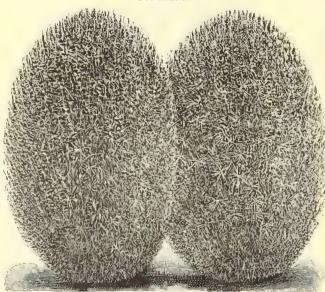

KAULFUSSIA

Hardy Annual

A charming annual, growing only 6 inches high. For edging and bedding. Mixed colors. Packet, 5 cents.

KENILWORTH IVY

See Linaria.

KOCHIA OR SUMMER CYPRESS

KOCHIA OR SUMMER CYPRESS

Hardy Annual

This beautiful annual hedge plant is rapidly coming into prominence. It grows 2 to 2½ feet high and resembles a closely clipped ornamental evergreen. The globe-shaped or pyramidal bushes are close and compact, and of a pleasing light green color. The plant may be grown singly or in the form of a hedge or background. In early autumn the whole bush becomes carmine or blood red, hence the name of Mexican Fire Plant, Burning Bush, etc. It is also called Belvidere, Standing or Mock Cypress. Flowers small and numerous but not conspicuous. The beauty of the plant is in its shape and colors. Worthy of high recommendation. Packet, 10 cents; 3 packet, 25 cents.

LADY'S EAR DROP See Fuchsia.

LADY'S SLIPPER See Balsam.

LANTANA

Tender Perennial

Tender Perennial

Shrubby plant, I to 3 feet high, bearing flowers of various shades and colors, including orange white and pink. Especially adapted to greenhouse or window culture, though thriving nicely in the garden in summer. Start indoors.

MORNING GLORY

Hardy Annual Climber

ROCHESTER. A new and magnificent morning glory. The vines make a growth of 12 to 20 feet, with leaves 8 to 10 inches in size. The splendid flowers are 4 to 5 inches across, of a deep violet blue, shading to azure and edged with white. Borne in clusters of from three to five, and are very showy. Packet, 10 cents; 3 packets, 25 cents.

NEW MAMMOTH JAPANESE, MIKADO. A new giant type, with peculiar and handsome colors, shapes and markings. It is a development or evolution from the highest form of Japanese Morning

NEW MAMMOTH MORNING GLORY MIKADO

Glory, and represents the acme of beauty thus far secured in this graceful and favorite flower. The colors are exceedingly rich, and the texture of the blossom is thick and heavy, indicative of high breeding. Flowers 4 to 5 inches across. The Japanese do not willingly part with their best morning glories, and this one is a great prize. Pkt., 10 cts. IMPERIAL JAPANESE, DOUBLE MIXED. This is the same rare and curious strain that I have sold for some years as part of a mixture. I now separate the double sorts from the single sorts. The flowers will not be all double, although the seed is pure for there is always a tendency to revert. Characterized by peculiar colors, shapes and markings.

always a tender and markings. The shades include white, pink, crimson, illac, etc. The leaves vary in size and form. Pkt., 10 cts. IMPERIAL JAPANESE, SINGLE MIXED. My single mixed

single mixed single mixed have a wide and truly remark able range of markings, unexcelled by any other strain. The shades and colors are year. The shades and colors are various — white, pink, lilac, rose, bronze, garnet, crimson, etc. There is leaf variation that cannot fail to please. Easy of growth, and quick to come into bloom. Sometimes the flower comes flower comes in 3 weeks from seed. Pkt., 5c.; ounce, 20c.

IMPERIAL JAPANESE MORNING GLORIES

Hardy Annual Bush Morning Glory

PIGMY. A superior type, growing in compact, bushy form, from 8 to 12 inches high. Flowers are produced so freely that at times the plant is almost hidden by the blossoms. Recommended for pot culture and for outdoor planting as a border plant. The short runners ought to be pinched back to about 6 inches; this will induce a sturdy, upright growth and the plant will flower more profusely. Easy to grow and very showy. The flowers are of good size and texture and of most all the colors known among morning glories. Packet, 15 cents.

Hardy Perennial

Forget-me-not. One of the daintiest and most delicate of all the garden favorites. Quite hardy. It succeeds best in rich, moist soils.

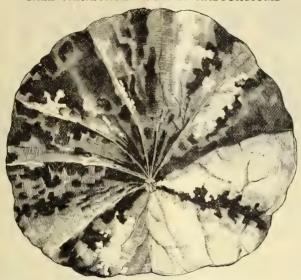

ROYAL BLUE. This splendid forget-me-not assumes an upright shape, reaching a height of 6 to 12 in ches. Flowers large and deep blue. Packet, 10 cents.

ALPESTRIS. Dwarf, blue, flowering freely the first year. Pkt., 5c.
GRANDIFLORA. An improved strain with large beautiful flowers, which appear in great numbers.
Palustris. True blue, white and yellow eyes. Flowering best the second year. One foot. Pkt., 5 cts.
DISTINCTION. A new and interesting form of forget-me-not, with the true everblooming habit. The plants grow to a height of 5 to 7 inches. Exquisite azure blue.
Packet, 10 cents.

NASTURTIUMS

Hardy Annual

TALL VARIEGATED LEAVED NASTURTIUMS

A LEAF FROM VARIEGATED QUEEN NASTURTIUM.

NEW TALL VARIEGATED QUEEN. See illustration of a leaf. The plant has a most striking aspect, as each leaf is variegated in a distinctly different degree with yellow, white and green, so that no two appear alike. The leaves are not quite as large as the ordinary tall varieties, yet the plant is of very vigorous growth and should be allowed ample room for development, as more variegations appear to be where the plant has the most room. The flowers are of a charming shade of rich scarlet maroon, deeper in color at base of petal. Comes entirely true from seed. Packet, 10 cents; ounce, 35 cents.

NEW TALL VARIEGATED CRYSTAL QUEEN. The leaves are light green, heavily blotched and striped with white, and also occasionally with yellow. Flowers vary from clear light yellow, to a very light straw color; in both shades the lower petal is self colored, while upper petals are daintily marked with a fine brown streak.

Packet, 10 cents; ounce, 35 cents.

VARIEGATED QUEEN WILHELMINA. Rich, rosy scarlet flowers, extremely effective against the beautiful speckled, veined and marbled white on green foliage. An acquisition. Packet, 10 cents.

VARIEGATED TALL, MIXED. A fine assortment of colors, exquisitely set off by the variegated foliage. Pkt., 10 cts.; oz., 25 cts.

DWARF VARIEGATED LEAVED NASTURTIUMS.

VARIEGATED QUEEN OF TOM THUMBS. Grows in a neat, rounded bush about 10 inches high. Each leaf marbled with silvery white. Flowers rich purplish crimson, and are shown to great advantage among the richly variegated foliage. Packet, 10 cents.

VARIEGATED SCARLET DWARF. Dwarf, compact growth, flowers bright scarlet. Leaf variegated. Exceptionally showy. Packet, 10 cents.

VARIEGATED DWARF, MIXED. A great many colors have been obtained for this mixture, and it is very showy. Each leaf finely marbled with silver white. Packet, 10 cents; ounce, 25 cents.

LOBBIANUM CLIMBING NASTURTIUMS

LOBBIANUM CLIMBING NASTURTIUMS

The so-called Lobbianum varieties (Lobb's climbing nasturtiums) have smaller, neater and more profuse flowers than the Majus or tall sorts. The vines attain a length of 6 or 8 feet.

ASA GRAY. Cream yellow; very desirable. Packet, 5 cents; ounce, 15 cents; ½ pound, 45 cents.

BLACK PRINCE. Deep, blackish, glossy purple, deepening later into velvety black; foliage rich and dark. Packet, 10 cents; ounce, 25 cents; ½ pound, 75 cents.

CROWN PRINCE OF PRUSSIA. Large flowers and free blooming. Rich, dark blood red. Pkt., 5 cts.; oz., 15 cts.; ½ lb., 45 cts.

FIREFLY. Dark orange yellow, spotted with bright scarlet. Packet, 5 cents; ounce, 15 cents; ½ pound, 45 cents.

IVY LEAVED. Salmon to scarlet color. Leaves with light veins, somewhat shaped like ivy. A fine novelty. Packet, 10 cents.

KING CARDINAL. Dark blood red; very handsome. Packet, 5 cents; ounce, 15 cents; ½ pound, 45 cents.

PRIMCOSE. Cream white, spotted with maroon; fine. Packet, 5 cents; ounce, 15 cents; ½ pound, 45 cents.

PRINCESS VICTORIA LOUISE. Cream white, spotted with deep scarlet; finely veined. Pkt., 5 cts.; oz., 15 cts.; ½ lb., 45 cts.

SCARLET GEM. A handsome bright scarlet variety; showy. Packet, 5 cents; ounce, 15 cents; very showy. Packet, 5 cts.; ounce, 15 cents; ½ pound, 45 cents.

SPITFIRE. Brilliant scarlet; very showy. Packet, 5 cts.; ounce, 15 cts.; ½ pound, 45 cents.

15 cts.; ½ pound, 45 cents.

LOBBIANUM CLIMBING, MIXED. A grand mixture. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 30 cts.; pound, \$1.00.

MAJUS OR TALL NASTURTIUMS

The tall nasturtiums are well adapted for ornamental purposes. They should have sticks or other supports, or may be trained over rock work, or allowed to ramble over the ground.

BUTTERFLY. This large thowering nasturtium is equally as desirable as Cræsus, flowers frequently measuring 3 inches across. The plants are noted for their handsome light green foliage. Flowers lemon yellow, marked with red. Pkt., 10 cts.; oz., 20 cts.; ½ lb., 60 cts.

CAPRICE. Extra large and very profuse. A wide range of colors and markings. Mostly rich dark shades. A single plant frequently bears flowers of more than one type; hence the name. Packet, 5 cts.; ounce, 15 cents; ¼ pound, 45 cts.

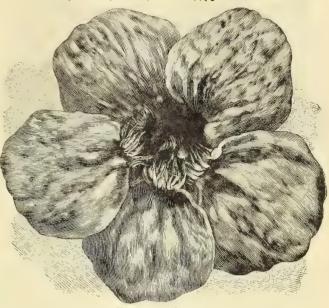

CRIMSON. An improved form of a large flowered crimson nasturtium. Packet, 5 cents; ounce, 15 cents; ½ pound, 45 cents.

CHAMELEON. Some flowers self colored, some blotched, some striped, some bordered; and the same plant produces more than one color. Wholly distinct from Caprice. Pkt., 5c., oz., 15c.; ½ lb., 45c.

CRŒSUS. The originator claims it is the finest he has ever had in nasturtiums. Primrose to orange, marked with crimson and brown red. Large flowers in abundance. Pkt., 10c.; oz., 20c.; ½ lb., 60c.

PRINCE HENRY. Light yellow, marbled with red.

Packet, 5 cents; ounce, 15 cents; ½ pound, 45 cents.

NASTURTIUM, JUPITER

NASTURTIUM, JUPITER.

JUPITER. This grand novelty is of California origin, and introduces a new race among giant nasturtiums. The bright green leaves are of almost colossal proportions, being 5 to 8 inches across. The flowers measure 3 to 3½ inches in size, and are borne on long stems in great profusion. The color of Jupiter is a bright golden yellow, overlaid with orange in the crinkled throat. It has been called orchid-like in its striking and unique appearance. Pkt., 10c.; oz., 20c.; ¼ lb., 60c. MOONLIGHT. A beautiful pale straw; an exact counterpart in size and shape of Sunlight. Pkt., 5 cts.; oz., 15 cts.; ¼ lb., 45 cts.

PEARL. Light cream colored flowers. Packet, 5 cents; ounce, 15 cents; ¼ pound, 45 cents.

SCHILLINGHI. Yellow with maroon blotches. Pkt., 5c.; oz., 15c. SUNLIGHT. Large golden yellow blossoms, so profuse as to almost conceal the foliage. Flowers 3 inches across. Packet, 5 cents; ounce, 15 cents; ¼ pound, 45 cents.

VESUVIUS. Salmon rose, with dark leaves. Packet, 5 cents; ounce, 15 cents; ¼ pound, 45 cents.

VON MOLTKE. Bluish rose, odd and handsome. Packet, 5 cts.; ounce, 15 cts.; ¼ pound, 45 cts.

MAJUS, CHOICE MIXED. This contains a very good mixture of all colors known among nasturtiums and cannot fail to please. Best tall varieties. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; lb., 75 cts.

HYBRIDS OF MADAME GUNTER.

HYBRIDS OF MADAME GUNTER

A climbing class distinguished by richness and variety of color. Foliage especielly handsome. Vines thrifty and floriferous. The tints include red, salmon, rose, yellow, etc., in many combinations. Some flowers are self colored (only one color); some mottled, blotched or margined. All are handsome. Finest mixed. Packet, 10 cents; ounce, 20 cents; ¼ pound, 50 cents; pound, \$1.50.

GOLDEN QUEEN, TOM THUMB

TOM THUMB, MIXED

MAJUS OR TALL "IVY LEAVED" NASTURTIUMS

Star-like pointed leaves of deep rich green, veined with white, has a marked resemblance to the hardy Eng.ish Ivy. Flowers of medium size and distinct form.

GOLDEN GEM. Flowers a rich golden shade of orange yellow.

Packet, 10 cents; ounce, 25 cents; ½ pound, 75 cents.

FLAMINGO. Flowers orange scarlet; the two upper petals marked with fine brown lines. Pkt., 10c.; oz., 25c.; ½ lb., 75c.; lb., \$2.50.

TALL IVY LEAVED, MIXED COLORS. This is a splendid mixture of many colors. Pkt., 10c.; oz., 25c.; ½ lb., 75c.; lb., \$2.50.

DWARF "IVY LEAVED" NASTURTIUMS

GOLDEN BUTTERFLY. It is a bush or dwarf form of the ivy leaved or climbing type. The color is a golden orange; hence the name of "Golden Butterfly." The flowers are larger in size than most ivy leaved nasturtiums, and are beautifully notched at the edges and fringed in the throat. Packet, 10 cents.; ounce, 25 cents.

DWARF IVY LEAVED, MIXED COLORS. A glorious mixture; contains a remarkable range of colors. Packet, 10 cents; ounce, 25 cents; 1/4 pound, 75 cents; pound, \$2.50.

TOM THUMB OR DWARF NASTURTIUMS

The dwarf or Tom Thumb nasturtiums are among our most popular plants. They resist heat and drought and grow vigorously and flower freely all summer and fall. One foot high. Plant the seed 1 inch deep

plants. They resist heat and drought and grow vigorously and flower freely all summer and fall. One foot high. Plant the seed 1 inch deep and thin to 6 or 8 inches apart.

ARDOISE. Ground color a pure bright orange, with markings of slaty maye and chocolate brown. Pkt., 5c.; oz., 15c.; ½ lb., 45c.

BRILLIANT. A new and very showy nasturtium. Dwarf and compact. A profuse bloomer. Pkt., 5 cts.; oz., 15 cts.; ½ lb., 45 cts.

CHAMELEON. Different colored flowers on the same plant. The same as the climbing form of the Chameleon, except in the habit of growth. Packet, 10 cents; ounce, 20 cents; ½ pound, 60 cents.

EMPRESS OF INDIA. Flowers of most brilliant crimson. Plant bushy, with dark foliage. Pkt., 5 cts.; oz., 15 cts.; ½ lb., 45 cts.

GENERAL JACQUEMINOT. Nearly as rich in color as the celebrated Jack Rose. Pkt., 5 cts.; oz., 15 cts.; ½ lb., 45 cts.; lb., \$1.50.

GOLDEN MIDNIGHT. The contrast between the extremely dark colored flowers and the clear golden yellow foliage is most exquisite, for the flowers are of such intense deep maroon that they appear to be almost black. A novelty of decided merit. Packet, 10 cents.

GOLDEN QUEEN. A beautiful golden flowered nasturtium of English origin. Packet, i0 cts.; ounce, 25 cts.; ½ pound, 45 cents.

LA FRANCE. Rose colored, the tint of La France rose; exquisite. Packet, 5 cents; ounce, 15 cents; ½ pound, 45 cents.

PEARL. Light cream color. The nearest approach to a white nasturtium yet obtained. Pkt., 5 cts.; oz., 15 cts.; ½ lb., 45 cts.

RUBY KING. Pink shaded with carmine. Very rich. Packet, 5 cents; Ounce, 15 cents; ½ pound, 45 cents.

Cream with wine red. Packet, 5 cts.; ounce,

PRINCE HENRY. Cream with wine red. Packet, 5 cts.; ounce, 15 cts.; 4 pound, 45 cts.

SPOTTED KING. Dark yellow; brown spotted; dark foliage.
Packet, 5 cents; ounce, 15 cents; 4 pound, 45 cents.

TOM THUMB. FINEST MIXED. All the leading and best dwarf sorts. Pkt., 5 cts.; oz., 10 cts.; 4 lb., 25 cts.; lb., 85 cts.

LILIPUT OR BABY NASTURTIUMS

A distinct type of Lobbianum nasturtiums, smaller than the Tom Thumbs. Flowers of various showy colors, in clusters. For borders, massing or pot culture. Pkt., 5c.; oz., 15c.; ½ lb., 40c.; lb., \$1.40.

NASTURTIUMS, NEW GIANTS OF CALIFORNIA.

DWARF NASTURTIUMS

NEW GIANTS OF CALIFORNIA. These pretty nasturtiums are of the Tom Thumb or dwarf type, as to plant, but extra large as to flower. The blooms are not of such mammoth size on the Atlantic as on the Pacific slope, but they are well worthy of culture here. All colors mixed. Pkt., 5 cents; 0z., 15 cents; ½ 1b., 50 cents; 1b., \$1.50.

Maule's Tall Peerless Nasturtium

This is a mixture of superior large-flowered tall or climbing nasturtiums, first offered in 1905, and planted by thousands of my customers to their great satisfaction. I have this year included in the mixture everything essential to a full range of color, marking and floral shape, and cordially recommend it for use in all situations where dwarf nasturtiums would not be preferable. Nothing can excel the wealth, richness and variety of Maule's Tall Peerless Nasturtiums for trellis, brush or rockery planting, nor surpass them in freedom and profusion of bloom. The illustrations tell something of the floral types. Packet, 10 cts.; ounce, 20 cts.; 1/4 pound, 50 cts.; pound, \$1.50, postpaid.

NEMESIA

Hardy Annual
STRUMOSA SUTTONII. Remarkable for free flowering qualities and duration of bloom. Colors include creamy white, deep orange and carmine. Suitable for edging, rock work or for pot culture.
Packet, 5 cents.
GRANDIFLORA, MIXED. The colors include several shades of rose, orange, purple, etc. Pkt., 10c.

NEMOPHILA

Hardy Annual

Love Grove. A bright-colored annual. Colors blue, white and shades. Of compact habit; I foot high. Blooms freely in cool places and not too rich a soil.

FINE MINED. All colors.

Packet, 5 cents.

AFFINIS. Three feet AFFINIS. Three feet high, lears sweet smelling, large, white, tubular flowers, open morning and evening. Pkt., 5c.

SANDERÆ. A recent introduction of this most shows an unal

introduction of this most showy annual. Plant grows about two feet high, of branching, bushy habit, carries the carmine flowers in clusters, and gives continuous display of brilliant flowers through summer and autumn.

mer and autumn.

Packet, 10 cents.

SANDER E HYBRIDS. The plant and flowers are similar to the popular fragrant, white flowering Nicotiana Affinis, but the flower of this new hybrid is much larger, measuring at least 2 inches across, remains open all day, and the plant is literally ablaze with the brilliant and the plant is interary ablaze with the brilliant hued flowers from base to summit, thousands being borne on a single plant during the season. Easily grown from seed, Easily grown from seed, commencing to flower in a few weeks from sowing, thriving in a sunny position in any good garden soil. All colors mixed.

Packet, 10 cents.

NICOTIANA

Hardy Annual

Highly ornamental and desirable annual plants, with handsome foli-age and delightfully sweet scented

flowers.

SYLVESTRIS. A strong growing annual; 3 to 5 feet. Flowers star-shaped, fragrant, pure white and having tubes 6 inches long. This plant, in rows or masses, makes a fine background for bright

makes a line background for bright blooming plants of any kind. Packet, 5 cents. SUAVEOLENS. Dwarf; only 1 or 2 feet high. Flowers white and sweet scented. Available for decor-ative use against higher foliage or against walls, and a charming thing for the purpose.

Packet, 5 cents.

Mrs. L. H. Wyatt, Trenton, Tenn.—Received the rose bushes in fine condition. They and the seeds did well in spite of 14 weeks drought.

Cyrus Williams, Turney, Mo.—We had great success with your seeds this year. Your dwarf na turtiums were a wonder to all who saw them.

H. E. Johnston, 554 Russell St., Detroit, Mich.—My garden this year was the best I have ever had. My asters from your seed were lovely. I gave away 52 large bunches, and every one thought them the most beautiful they had ever seen.

Mrs. Nancy A. Phillips, Osceola Mills, Pa.—Your seeds reached me in excellent order last spring, and I had good success with all of them. I was more than pleased with my Wild Flower Garden and dablias, on which I received a great many compliments.

many compliments.

L. A. Brumskin, Titusville, N. J.—I am more than delighted with the splendid lot of seeds you sent me, and you may add me to your list as a satisfied customer.

Mrs. M. J. Michener, Kennett Square, Pa.—Maule's Seeds are the best I ever planted, they could not be more perfect in quantity or quality. I wish you could see a Boston fern I bought of you three years ago; it's immense.

Mrs. D. W. Miller, 1227 N. 3rd St., Springfield, Ill.—I am pleased to tell you that I received First Prize at the Illinois State Fair this week for the best collection of pansies. They were grown from your Prize Mixed Pansy seed, and were admired by thousands of people.

NIGELLA

Hardy Annual

A compact free flowering annual bedding plant with finely cut, feathery foliage and curlous seed pods. The flowers are bright and showy. Of easiest culture. Height of plant, I to 2 feet. Seeds may be sown in the open border or bed in earliest spring, as the plants are quite hardy. An old-fashioned favorite, known by various popular names. Colors, blue, white, purple, etc.

HISPANICA. Love in a Mist. Blue, white

in a Mist. Blue, white and purple.
Packet, 5 cents.
D A M A S C E N A.
Devil in a bush. Blue and white flowers.
Packet, 5 cents.
MISS JEKYLL. A new large free flowering variety of this well known garden approach ing variety of this well known garden annual. In the finely cut fernlike foliage nestles hundreds of lovely double bright blue flowers, 1½ inches across. Height of plant 1 to 2 feet. Plants are quite hardy and seed can be sown in the bed or border in the earliest der in the earlies spring. Pkt., 10 cts.

NIGELLA. MISS JEKYLL. LOVE IN THE MIST

NOLANA

Hardy Annual Trailer

Little Bell. Sow where it is to remain. Suitable for baskets and rock work. Free flowering. Packet, 5 cents.

NYMPHAEA ODORATA

Hardy Perennial Aquatic

The favorite sweet scented pond lily. Sow seed in a pan of rich soil, cover with sand to hold soil in place, and submerge the pan in a tub of water or in a shallow pond. Protect against muskrats. Flowers 3 or 4 inches in diameter, borne on the surface of the water along with the floating leaves; deliciously fragrant. Packet, 15 cents.

ORNAMENTAL GRASSES

Hardy Perennial

I offer here a mixture embracing pampas grass, zebra grass and other choice ornamental sorts. Packet, 10 cents; ounce, 25 cents.

OXALIS

Tender Perennial

Beautiful, bright little plants, with attractive leaves and flowers. Half trailing in habit. Suitable for hanging baskets, vases and edgings. Pink, yellow and white. Mixed, Packet, 5 cents.

PAMPAS GRASS

Half Hardy Perennial

GYNERIUM ARGENTEUM. A native of South America. Very beautiful. Roots require winter protection or can be lifted and stored. Twenty years ago I sold more packets of Pampas grass than all other ornamental grasses combined. I believe it is once more coming to the front. Pkt, 10c.

PANSY GERANIUM

See Geranium.

Tender Perennial Climber

Passifiora. Corulea. Prettiest of all vines for greenhouse or window culture, Flowers of complex structure; deep blue; highly attractive. Packet, 10 cents.

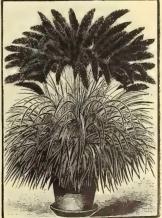

PURPLE FEATHER GRASS

Tender Perennial
A beautiful and popular ornamental house plant of easy culture. As useful for hall or table adornment as a palm, and having the advantage of rapid and vigorous growth. The graceful, narrow, recurving leaves are overtopped by elegant feathery plumes a foot long. Heads borne from July until frost, and the whole plant is eventually velied in a purple cloud; Pkt., 10c.

PYRETHRUM

Hardy Perennial

Hardy Perennial
Feverfew. (Matricaria is also
called Feverfew.) The pyrethrums
are handsome, herbaceous garden
plants, about 2 feet high, bearing
daisy-like or aster-like flowers, 3 or
inches across, of bright colors, including red, pink, white, etc.
ROSEUM GRANDIFLORA.
Most popular large flowering sort.
Packet, 10 cents.

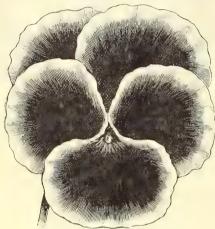

PURPLE FEATHER GRASS.

Maule's Giant Pansies

FOR many years, in fact, ever since I have been in business, I have given particular attention to pansy seeds until I really think I have as good strains of pansies as can be found anywhere in the world; all sterling sorts and of the richest colors. Pansies demand good soil and plenty of moisture and are almost perfectly hardy. A number of peo-ple are accustomed to sowing pansy seeds only in the fall, but for years I have been deluged with letters extolling the size and color of the flowers raised from my seeds sown in the

spring sown seeds have been so remarkable that this is one reason why the demand for this beautiful and popular flower increases with me so much every year, until some varieties I have to grow by the hundred weight. I do not think you can make a mistake on any variety that you may select from the following list, whereas my Phenomenal pansies, so well illustrated on the inside cover of this seed book, I consider superior, in every way, to any other mixed pansies now offered. The flowers should be picked frequently and conspring. I really think that the results obtained from my stantly to encourage the development of the buds.

PANSY, GIANT EROS.

GIANT EROS.

GIANT EROS.

The chief characteristic of this variety is just like that of the well known Glant Freya, that the back of each bloom has the same broad margin as the front side, while the dark velvety centre is shining through, so that a bed of this lovely pansy has the appearance of being especially full and rich flowering. This peculiarity renders pansy Eros most valuable for groups and bedding, giving them a uniform imposing aspect from all sides. This grand novelty produces very large flowers of a deep velvety brown color, with a broad golden yellow margin. Pkt., 15 cts.; 2 pkts., 25 cts.

GIANT PSYCHE.

GIANT PSYCHE.

The ground color is pure white, but each petal is heavily blotched with velvety violet. Excels in beauty of coloring, shape and number of magnificent blooms. Each flower is elegantly curied and undulated. A beautiful separate color of the Ruffled Masterpiece type. Packet, 10 cents; 3 packets, 25 cents.

GIANT RAPHAEL.

A spiendid type of Bugnot's pansies, of large size, perfect form. Flowers 2 to 2½ inches in diameter. Ground color, light blue with a dark violet blotch on each petal, surrounded with a halo of beautiful dark ray-like veinings.

Packet, 20 cents; 3 packets, 50 cents.

PRESIDENT CARNOT. This is a most magnificent variety. The margins of the petals are clear white, while each centre is heavily blotched with rich violet blue. The mar-

PANSY, PRESIDENT CARNOT

PANSY. GIANT

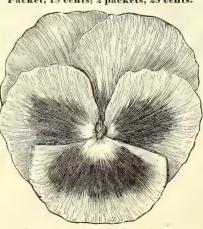

PANSY, GIANT ADONIS

GIANT ADONIS.

This is an exquisite pansy. It is light blue in color, with cream and dark blue decided markings on the lower petals. It is one of the pretiest of the very large flowering varieties.

Packet, 15 cents; 2 packets, 25 cents.

PANSY, GIANT EMPEROR FRANZ JOSEPH.

PANSY, GIANT MASTERPIECE.

GIANT MASTERPIECE.

GIANT MASTERPIECE.

(Ruffled Pansy.) This grand pansy is remarkable for having its petals waved or folded, as shown in the illustration. The flowers are large and round. Each petal has a dark blotch, and there is usually a light edge or border. Unique. It is highly fashlonable everywhere. Packet, 15 cents; 2 packets, 25 cents; 4 ounce, \$2.25; ounce, \$8.00.

GIANT EMPEROR FRANZ JOSEPH.

The plants are of compact habit, while the flowers are a very large size; pure white with a blotch of brilliant violet blue on each petal.

Packet, 15 cents; 2 packets, 25 cents.

IMPERIAL GERMAN.

This mixture is composed of uniformly large flowering, finely formed, named varieties, of every known shade, and contains a wonderful variety of colors. The plants are of neat, compact growth and flower freely from earliest spring until late autumn. It includes the solid or self colored, all shaded varieties, bordered or edged, each with a distinct rim of blue, white or yellow, striped flowers, those with clear, distinct eyes. Five spotted on almost every colored background, also dark and light marbled varieties are all blended in proper proportions. I have spared no expense to secure the newest, richest and finest uniformly large flowering Imperial German pansies for this delightful mixture. Packet, 10 cts.; ½ ounce, 60 cts.; ½ ounce, \$1.00: ounce, \$3.50.

PANSY, GIANT RAPHAEL!

ILLUSTRATION OF MAULE'S PRIZE MIXED PANSIES.

A dark wallflower colored pansy, embracing exquisite shades of brown, snuff, burnt sienna, etc. One of the prettiest and most pleasing of the large pansies. Pkt, 10 cts.; 1/4 oz., \$1.00. **MAULE'S** Popular 35-CENT PANSY Collection

PELARGONIUM

See Lady Washington Geranium.

PENTSTEMON

Hardy Perennial

Favorite perennials growing 2 to 3 feet high. Flowers white, pink, scarlet, blue, etc., spotted and marked.

PERENNIAL PENTSTEMON. Safely hardy in some situations but generally called half hardy. Will bloom freely the first year, if planted early. A good assortment of mixed colors. Packet, 5 cents.

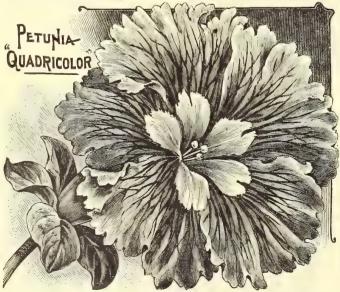

PETUNIA

Hardy Annual

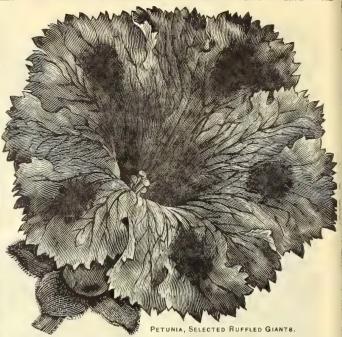

No annual flower is more widely used than the petunia. It begins to bloom early, and lasts the whole season, until killed by frost. It succeeds best in a rich soil and sunny situation. Some petunias are of a trailing habit and some are quite erect. Many are deliciously fragrant.

DOUBLE EXTRA LARGE FLOWERING. Maule's Superb Double Extra Large Flowering petunias are without doubt the finest ever offered to the public. For years I have made a specialty of this strain, constantly improving it by selection. The flowers assume greater, size and richness as time elapses, and the type ever becomes more desirable. In color, shape, markings and texture it is all that can be desired. The numerous petals are more or less foided, fringed and shaded and the result is a flower of unexcelled quality and beauty. The plant is strong, stocky and vigorous, and foliage pleasing. Packet, 20 cts.

QUADRICOLOR, NEW MAMMOTH SINGLE. This is a remarkably fine addition to the class of giant flowered single petunias. The four colors implied in the name are bright rose, lustrous carmine, deep blood red and a decided yellow. The outer portion is rose, the veins are carmine and the throat is blood red. Radiating from the throat in a large proportion of the blooms are five handsome yellow blotches, making a more or less regular star, and producing a decidedly novel and interesting effect. Color combination is pleasing: the veining of the petal is exquisite and indicates high breeding. Pkt., 20 cts.

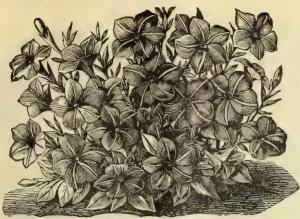

BELLE ETOILE. Beautiful, large-floweréd, striped and blotched petunias of the most symmetrical shape and form; sure to please. **Packet, 10 cents.**

HOWARD'S STAR. This grand Petunia constitutes a beautiful class, developed by selection from an old type. Flowers 2 to 2½ inches in diameter, of fine texture, with more or less veining. Ground color a crimson maroon. In the centre of each flower is a five-rayed star of light blush pink or white. Height of plant, 1½ to 2 feet. Altogether novel and superior. Free blooming; sometimes 100 flowers on a single plant. One of the most attractive for bedding, window boxes or backet. 10 cents: 3 packets. 25 cents. borders. Packet, 10 cents; 3 packets, 25 cents.

AN ILLUSTRATION OF A SINGLE PLANT, SHOWING PROFUSION OF BLOOM OF PETUNIA, NEW HYBRIDS, MIXED.

NEW HYBRIDS, MIXED. The seed which I offer under this name is a fine mixture of all the handsomest and best single petunias, dictuding sorts that are striped, blotched and mottled. These hybrids are unexcelled for beds and borders. Pkt., 10 cts.; ½ oz., 25 cts.

SINGLE LARGE FLOWERED. Very large flowers 3 to 4 inches across. Blotched and veined in the most grotesque and beautiful combinations, but not fringed. Mixed colors. Packet, 20 cents.

PHACELIA

Hardy Annual

A highly interesting hardy California annual, much branched and of spreading habit. Flowers excelent for bouquets. Blooms in about 8 weeks from planting and continues flowering until late fall; 9 inchebligh. Also known as Whitlavia. CAMPANULARIA. Blue with white spots in the throat. Pkt., 10c. ALBA. White. Packet. 5 cts.

PHLOX DRUMMONDII

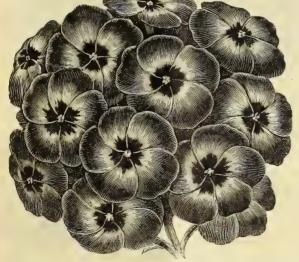

Hardy Annual

Hardy Annual

The annual and perennial phloxes are not rivaled among garden flowers in brilliancy of bloom. They are strong growing, healthy plants, with pretty foliage, and belong in every garden. I offer the old fashioned favorites as well as the newest types. The annual phloxes are all of the Drummondii type, and enjoy wide esteem. The perennial sorts should be taken up and the roots separated and set in new soil at least once in three years.

once in three years.

PHLOX DRUMMONDII, BRIAR CREST SELECTED LONG BLOOMING.

bedding plants. This splendid race of half-dwarf annual phloxes cannot be overpraised for brightness and beauty. The plants are always lavishly covered with large flowers of the most brilliant hues. The flower type is shown in the illustration. Nothing better for bedding purposes is listed in this catalogue. These phloxes are less than a foot high, and are of neat growth. They succeed everywhere, and are in universal favor for swmmer flowering purposes. They are quite hardy, but are to be treated as annuals. They come into bloom quickly from the seed, and cover a long period, until cut down by frost. The colors include pure white, deep and showy red, rose with white eye and other shades; excellent for vases, pot-plants, hanging baskets, etc., or for bedding. I sell all the colors in a choice mixture, embracing over fifteen sorts. Finest mixed. Packet, 10 cents; ¼ ounce, 30 cents; ounce, \$1.00. BRIAR CREST SELECTED LONG BLOOMING.

PHLOX, GRANDIFLORA MIXED.

GRANDIFLORA, MIXED. Best large flowered varieties in superb mixture.

Best large flowered varieties in superb mixture.

Packet, 10 cts.; ounce, 75 cts.

DOUBLE YELLOW. Valuable. About 65 per cent. of the flowers are double. A greater percentage of double flowers are produced when planted in light, sandy soil.

Packet, 10 cents.

DOUBLE WHITE. A profuse bloomer of great value, as it comes at a season when white flowers are specially desirable. About 65 per cent produce double flowers. Pkt., 10c.

COCCINEA. Large; brilliant scarlet. Packet, 5 cents.

FIMBRIATA. Fringed. Many shades. Packet, 5 cents.

STAR OF QUEDLINBURG. (Cuspedata.). Large flowers, with curiously pointed and toothed blossoms, of all shades and markings.

Packet, 10 cents.

SPLENDID MIXED. Very fine mixture of various annual types. Packet, 5 cents; ounce, 75 cents.

DWARF PHLOX DRUMMONDII

NEW PHLOX, BUNCH OF ROSES.

New Phiox, Bunch of ISABELLINA. A splendid, new dwarf annual phlox, with large, bright primrose yellow flowers. Very showy. It is of compact growth and free flowering habit. Quite novel and distinct, and of great nromise. Pkt., 10c.

FIREBALL. Brilliant scarlet's inches. Pkt. 10c.

SNOWBALL. Pure white; 8 inches. Packet, 10 cents. NEW LARGE FLOW-ERING CICILY. This is a distinct and charming strain of the dwarf large flowering annual phlox. The individual florets as well as the broad rounded head of flowers are of very large size. Colors vary from light Illac through various shades of red and purrle, while nearly all have a large distinct white eye in the centre. Packet, 10 cents.

SUPERB MIXTURE. All shades, colors and markings; 4 to 6 inches. Pkt., 10c.

All shades, colors and markings; 4 to 6 inches. Pkt., 10c.

Thousands of Miles from Home.

Frederico C. Varela, Teneriffe, Canary Islands.—It has been my privilege to receive your splendid catalogue, which in my opinion is one of the test I have received from the U.S. The illustrations are fine, the distribution of matter is c'ever; but above all the honesty of the text, and the unpretentious way in which you have brought forward the merits of your seeds is absolutely convincing, and any one perusing your catalogue is sure at least to give you a trial.

PHLOX. STAR OF QUEDLINBURG. FIMBRIATA AND SPLENDID MIXED.

BUNCH OF ROSES. BUNCH OF ROSES.
The individual florets are large and vividly rose colored, with a darker spot of rose towards the base, while the centre of the flower is pure white. It is uniquely similar in apparature of the spot of the uniquely similar in appearance to a Briar Rose, and the large clustered heads are very suggestive of the name selected. Remarkable bloomer. Pkt., 15 cts.

W. B. Kenny, Springfield, Mass.—I had the lest flower bed this year from your seeds that I have ever had. Peo,le come every day to look at my beautiful flowers

PHLOX, HARDY PERENNIAL.

HARDY PERENNIAL. Of late years beds and clumps of these beautiful phloxes are becoming more and more fashionable on suburban and country places near the large cities. All the leading landscape gardeners are using them extensively on new places. As a rule, for quick results, roots are purchased, which will be found offered in the bulb department of this catalogue. The seed I offer is saved from a very fine collection at Panmure, and gives most excellent results. A single packet of my seed should produce 50 or more plants, so with a very small investment, another year you should have plants well worth anywhere from \$10.00 to \$15.00. All colors mixed. Packet, 15 cents.

PICOTEES

See Carnations.

PINKS

See Dianthus.

PLATYCODON

Hardy Perennial

Chinese Bell Flower. One of the best hardy perennials, producing very showy flowers during the whole season. They form large clumps, and are excellent for planting in permanent borders or among shrubbery; easily raised from seed. (See also page 179.)

MARIESI. Large, open, bell-shaped flowers of a rich violet blue, also most rivaling the splendid Jackmanli Clematis in beauty. Plant very dwarf and compact. See among summer flowering bulbs. Pkt., 10 cts.

GRANDIFLORA MIXED. Grow somewhat taller than above. An exceptionally large flowering variety. Large steel blue or purple flowers. Packet, 10 cents.

PLATYCODON, MARIESI

POPPY Hardy Annual

Hardy Annual

A showy and easily cultivated annual. Quite hardy. A favorite everywhere. Flowers of various sizes, shapes and colors, both single and double. Always conspicuous and brilliant. Adapted to any and every garden soil. Average height 2 feet. Seeds should be sown where the plants are to remain.

FAIRY BLUSH. Beautifully fringed, pure white, tipped with rosy cream, shaded at base with light lemon. Very double and of great size, some measuring 10 to 12 inches in circumference. Pkt., 5c.; oz., 30c.

DOUBLE DWARF PHONY FLOWERED. Flowers of enormous size, perfectly double, resembling a pæony, and ranging through many shades of purple. red. pink, yellow and white. Always admired.

Packet, 5 cents; ounce, 25 cents.

Very beautiful. Packet, 5 cents; ounce, 25 cents.

Hardy Annual Poppy

Hardy Annual Poppy

NEW SINGLE
PEONY FLOWERED, ADMIRAL.
This new annual poppy
is of great beauty and is
characterized by large,
round flowers of glistening white, with a broad
band of bright brilliant
scarlet around the top
of each petal. The
unique combination of
these colors produces a
magnificent contrast
and is very rarely found.
Packet, 10 cents.

DANEBROG. Very
showy, large flowers of
brilliant scarlet, with a
silver spot on each petal,
forming a white cross.
Pkt., 5 cts.; oz., 25 cts.
GLAUUM, TULIP
POPPY. Beautiful
vivid scarlet, blooming
abundantly. Form like
tulip. Packet, 5 cents.

MISS SHERWOOD.
Satiny white, shaded on
the fringed margin with
deep salmon rose; 2½ feet
high. Packet, 5 cents.

SINGLE PEONY FLOWERED, DAINTY LADY. Very large
flowers, 4 to 5 inches across, of a charming rosy mauve, with a large,
shining dark metallic blotch at base of each petal. An entirely new
color in poppies. Packet, 10 cents.

POPPY, FEATHER BALL:

FEATHER BALL. This remarkably handsome annual poppy grows 2 feet tall, and is always admired. It is a free bloomer. The flowers when fully expanded look like a ball of feathers, and are of marvelous purity and beauty. The floral size is about 5 inches across. WHTE FEATHER BALL. Packet, 10 cents. PINK FEATHER BALL. Packet, 10 cents. SCARLET FEATHER BALL. Packet, 10 cents. FEATHER BALL. All colors mixed. Packet, 10 cents.

One packet of each of the three named Featherball Popples, for only 25 cents, postpaid.

Hardy Perennial Poppy

Hardy Perennial Poppy
ORIENTAL PERENNIAL HYBRIDS. Great
flowers of gorgeous brilliancy.
For brightness of color nothing can eclipse these beautiful
Oriental perennial poppies.
The colors range from soft
flesh and rose to most brilliant
dazzling scarlet and richest
maroon purple. Flowers enormous; 6 inches across. Mixed.
Packet, 10 cents.
HARDY PERENNIAL.
Unrivaled for permanent beds.
Flowers 6 to 9 inches across.
Plants 3 to 4 feet high. Finest
mixed. Packet, 5 cents.
ICELAND. A hardy perennial, blooming the first season. The flowers resemble
crushed satin, and are fragrant. They bloom freely
during a long period. Satisfactory as cut flowers, if cut
as soon as they open. Mixed
colors. Packet, 10 cents.

POPPY, ORIENTAL PERENNIAL HYBRIDS.

POPPY. SHIRLEY

SHIRLEY. Bright tissue-paper-like appearance. Makes a delightful plant alongside of grass borders and paths. Single flowered. Mixed colors. Packet, 10 cents; ounce, 50 cents.

POPPY, DOUBLE CARNATION.

DOUBLE CARNATION. This spendid poppy produces large carnation-like flowers, and is most excellent for massing or borders, flowers being very double. It is one of the most beautiful varieties grown, and I offer a very fine range of mixed colors. **Pkt.**, 10 cts.; oz., 40 cts.

Tender Perennial Primula

BABY PRIMROSE. Primula Forbesi. An exquisite little primrose for pot culture. Rosy lilac, with yellow eye. Blooms a few weeks after the sowing of the seed. Packet, 15 cents.

OBCOMICA. Primula obconica. A favorite plant for window or conservatory. Flowers white shading to lilac, with the true primrose fragrance. A profuse bloomer. Packet, 10 cents.

PRIMROSE. Primula Chinensis. Chinese Primrose. Profuse bloomers and among the finest and most popular of the winter and spring flowering window or greenhouse plants, doing well in cool rooms. They are 8 or 10 inches high, and the flowers are variously cut and fringed. Separate colors, as follows:

White Packet, 25 cents.

White. Pure white. Packet, 25 cents.

Kose. A delicate shade. Packet, 25 cents.

Crimson. A rich color. Packet, 25 cents.

Blue. A violet blue. Packet, 25 cents.

FINEST MIXED. This is both delightful and graceful when in flower, and makes a useful decorative plant for the house or conservatory. All shades and colors. Flowers, self colored, zoned, eyed and striped. Packet, 20 cents.

PORTULACA, SINGLE LARGE FLOWERED, MIXED.

PORTULACA

Hardy Annual

Rose Moss. A favorite for edgings, rock work, etc. Thrives best in rich light loam or sandy soil. Blooms profusely from early summer until autumn. Only 6 inches high.

SINGLE LARGE FLOWERED MIXED. All colors; many striped and variegated. Packet, 5 cents; ½ ounce, 25 cents.

GRANDIFLORA. Double-flowering portulaca. Colors of most brilliant shades, including white, yellow, salmon and carmine. Seed saved from perfect double flowers, resulting in gorgeous masses of color. Bloom remains open all day. Packet, 10 cents; ½ ounce, 50 cents.

POT MARIGOLD

See Calendula.

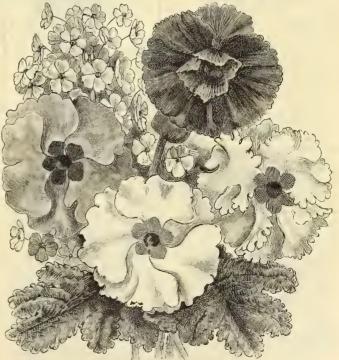

PRIMULA

Hardy Perennial

Hardy Perennial

The genus Primula includes three groups that are famous among florists—Auricula, Polyanthus and Primrose. Sow seed in spring and keep young plants shaded during summer.

NEW HARDY BLUE. A beautiful blue flowered type of the popular English Primrose. Perfectly hardy. This is excellent for naturalizing in shaded nooks or for planting in the hardy border. Pkt., 25 cts. AURICULA. Primula Auricula. A fragrant hardy perennial. Many rich colors. An extremely free bloomer and a favorite; 6 in. Pkt., 10c. POLYANTHUS. Primula elatior. Showy, hardy perennial, blooming in early spring. Pot or out-door culture; 9 in. Single. All colors. Pkt., 5c. COWSLIP. Primula veris. A pretty, spring-flowering perennial. Colors include shades of yellow, brown, etc. Fine mixed. Pkt., 5 cts. ENGLISH PRIMROSE. Primula vulgaris. The wild English flower; color, light canary yellow, fragrant. Hardy perennial. Pkt., 5c.

PRIMULA PRIMROSE. CHINENSIS, FINEST MIXED.

QUEEN MARGARETS See Asters.

RAGGED SAILOR

RICINUS

Tender Annual

Castor Oil Bean. A stately and highly ornamental tree-like annual plant; 6 to 14 feet high. Very effective as a foliage plant. Highly desirable for centres of beds or for backgrounds.

ZANZIBARENSIS. The handsomest strain of castor oil bean. Leaf sometimes 2 feet across, with stem rising 10 to 14 feet. Four varieties in a mixture—green, copper brown, brownish purple and bronze. Finest mixed. Packet, 10 cents; ounce, 40 cents.

RED HOT POKER See Tritoma.

ROSE MOSS See Portulaca.

ROSE OF SHARON

See Althaea.

ROSE SEED

Hardy Perennial

Midget roses. Only an inch across; mostly double. They are borne in clusters, and embrace all the tints of the larger roses. The blossoms are followed by bright red hips or seed pods that are very pretty. The bush grows only 10 inches high, and begins to bloom a few weeks after the seed is sown

ed is sown. LITTLE MIDGET. Pkt., 15c.

Mrs. Bert Wolverton, Millville, N. J. Our flower garden was more beautiful this summer than ever. The asters were handsome.

RUDBECKIA, BICOLOR SUPERBA.

ROSE, LITTLE MIDGET

RUDBECKIA

Hardy Annual
BICOLOR SUPERBA. A fine, free-blooming cone flower, about 2 feet high, forming a dense bush. The cone or disc of the daisy-like bloom is brown, and the florets or rays (petals) golden yellow. At the base of each petal there is a patch of velvety brown, producing a handsome and rich effect. The long-stemmed flowers are excellent for cutting.

Packet, 5 cents.

Hardy Perennial Rudbeckia

PURPUREA. Great Purple Cone Flower. A fine hardy perennial, flowers, reddish purple, 4 inches across, with cone-shaped brown centre. Blooms midsummer to late autumn. Packet, 5 cents.

GOLDEN GLOW. A handsome hardy perennial rudbeckia with double yellow flowers. See the bulb department.

Mrs. Albert White, Fenton, Mich.—My asters and balsams from your seed were a grand sight; pansies are beauties, and the salpiglossis is a marvel.

SALPIGLOSSIS

Tender Annual

Painted Tongue. Annual. Height, 18 inches to 2 feet. Pretty. Flowers 2 to 2½ inches across, with odd and beautiful velvety markings.

NEW HYBRIDS MIXED. Exquisitely veined and marbled. Red, pink, purple, blue, yellow, white, etc. Packet, 5 cents.

EMPEROR. A new variety less spreading than the older types. Flowers larger, more richly colored and more numerous than any other salpiglossis. Mixed colors. Packet, 10 cents.

SALVIA (SCARLET SAGE), DROOPING SPIKES.

SALVIA Tender Annual

Mrs. Jas. Kearney, Woodsville, N. H.— From the aster seed purchased from you this year I had some of the most beau-tiful asters I have ever seen.

SALVIA, BONFIRE

SALVIA, FARINACEA. "THE SILVER SAGE."

FARINACEA. (The Silver Sage.) Appears to run altogether to flower, like Salvia Drooping Spikes. The tall silver lavender or blue spikes rise in great numbers above the foliage. A handsome bedding plant, for groups, borders or massing. Pkt., 10 cts.; 3 pkts., 25 cts.

SANVITALIA PROCUMBENS

Hardy Annual

Of dwarf compact growth, for massing in beds, edges of borders, vases or hanging baskets. The plant is completely covered all summer with showy double flowers of a bright yellow. Packet, 5 cents.

SCABIOSA, DWARF DOUBLE MIXED.

SCABIOSA, CHERRY AND WHITE.

SCABIOSA

Hardy Perennial

Hardy Perennial

Known as Mourning Bride, Sweet Scabious, Pincushion Flower, etc. One of the most desirable of the border plants, and greatly improved within recent years. Some sorts are annual and some perennial.

CAUCASICA. Handsome hardy perennial. Plants 24 to 30 inches high, growing very large white flowers, which are valuable for bouquets. Blooms from June until frost. Packet, 10 cents.

CHERRY AND WHITE. One of the most beautiful varieties of this attractive flower. Perennial and usually hardy.

Packet, 10 cents; 3 packets, 25 cents.

JAPONICA. Forms dense bushy plants 3 feet high and about 2 feet through. Flowers lavender blue, 2 to 2½ inches across, borne on long, stiff wiry stems. A hardy perennial variety from Japan. The plants produce an enormous crop of bloom from the end of June until late in the autumn. Packet, 10 cents; 3 packets, 25 cents.

Hardy Annual Scabiosa

NEW LARGE FLOWERING SWEET PEAS FINEST

Each season I sell thousands of pounds of mixed sweet peas to customers desiring to have a little of everything good, and who want to purchase in bulk. This year my mixture contains more than 75 varieties, embracing every color and It cannot be too highly recommended. Packet, 5 cts.; ounce, 10 cts.; pound, 20 cts.; pound, 60 cts.; 4 pounds, \$2.00, postpaid.

WHITE SPENCER New Giant Spencer Sweet Peas

ASTA OHN SPENCER. The best lavender selection, of true Spencer type. The blossoms are large, waved or fluted, delicately tinted or suffued with mauve. The stems are long and stiff, with frequently four blossoms to a stem. Pkt., 10e. BEATRICE SPENCER. It is fully as large as Countess Spencer, with wavy standard and large wings. Ground color white, tinted with soft pink and buff on the standard. Each wing has a blotch of brighter pink near the base. One of the most delicate and dainty varieties. Packet, 15 cents.

CAPTAIN OF THE BLUES SPENCER. Larger than Countess Spencer and of fully as perfect form; standard, purple; wlugs, blight blue. A bright, striking variety, and decidedly new in Spencers. Packet, 15 cents.

COUNTESS SPENCER. Delicate soft pink, shading deeper at edges of petals, the blossoms are waved or futured, so much that they have a fluffy appearance. Stems are long, without exception four blossoms to the stem, and they all face one way. Packet, 10 cents; ounce, 20 cents; ½ pound, 50 cents; pound, \$1.50.

FLORENCE MORSE SPENCER. Delicate blush with pink margin. Very large blooms, similar to Princess Victoria. Stems long, usually four blossoms to a stem. Packet, 10 cents; ounce, 25 cents; ½ pound, 75 cents.

HIGHEROES MORSE SPENCER. The unusual large wings make the flower application of the stem of the stem of the second of a pronounce of the second of the enormous flowers are fulled, waved and crinkled of a pronounce of the second of the

One Packet of each of the New Giant Spencer Sweet Peas FOR ONLY 75 CENTS, POSTPAID.

SIX NEW GIANT FLOWERING SWEET PEAS

AUDREY CRIER. A lovely shade of salmon pink, very large, standard and wings perfectly formed, and most beautifully waved, with a majority of four flowers to a stem. Packet, 10 cents; ounce, 35 cents; ½, pound, \$1.25.

BEACON. One of the most distinct bicolors. The pure white wings make a fine contrast against the bright red standard. Pkt., 10c.; oz., 25c.; ½ lb., 75c.

BLACK BIRD. The nearest approach to a black sweet pea, usually bears three or four flowers to a stem. Absolutely fixed. Pkt., 10c.; oz., 25c.; ½ lb., 75c.

EARL CROMER. Well expanded flower, crimson lake in color, the back of the standard being overlaid with a pleasing red chocolate, the inside of standard and wings shaded with a soft lilac. Pkt., 10 cts.; oz., 25 cts.; ½ lb., 75 cts.

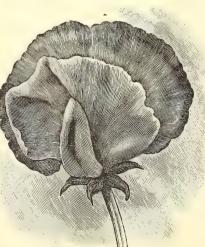

REGINA. This is a giant Black Michael, a much stronger grower and larger flowers. Grand for exhibition. Packet, 10 cts.; ounce, 25 cts.; ½ lb., 75 cts.

UNIQUE. Flowers white striped with light blue; of medium size and semi-hooded form. Packet, 10 cents; ounce, 25 cents; ½ pound, 75 cents.

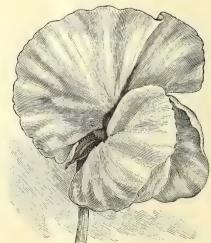

One packet of each of New Giant Flowering Sweet Peas FOR ONLY 25 CENTS, POSTPAID.

SWEET PEA, PRINCESS VICTORIA.

SWEET PEA. MENIE CHRISTIE.

SWEET PEA, PRIMROSE SPENCER.

SWEET ROCKET

Hardy Perennial

Bearing purple or white flowers. Plants 2 or 3 feet high. Flowers fra-rant. This is a splendid old-fashioned favorite. Double fine mixed. Packet, 5 cents.

SWEET SULTANS

See Centaurea Imperialis and Marquerite.

SWEET WILLIAM, MAMMOTH HOLBORN GLORY

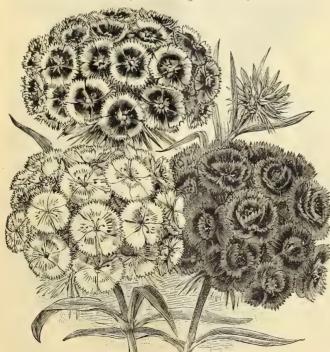

SWEET WILLIAM

Hardy Perennial

Well known, free blooming, old-fashioned favorites, now greatly improved. They produce masses of lovely, brilliant, sweet scented flowers through a long period, making a splendid effect in beds. Two feet high. Should be replaced by new seedlings, every few years, in fresh soil.

MAMMOTH HOLBORN GLORY. A beautiful new strain with large single flowers, compact habit of growth. Single florets have measured over 1 inch across. Embraces many shades and markings. Two feet high. Finest mixed. Packet, 10 cents.

FINK BEAUTY. An exquisite shade of pure pink. Large, single flowers in immense umbels; 18 inches high. Packet, 15 cents.

SWEET WILLIAM, FINE DOUBLE MIXED.

FINE DOUBLE MIXED. A splendid strain; all colors. Pkt., 10c. AURICULA EYED. A highly ornamental, single flowered strain with large eyes; height 2 feet; all colors. Packet, 5 cents. FINE SINGLE MIXED. Beautiful shades and markings. Pkt., 5c.

WILLIAM, HARDY ANNUAL

SWEET WILLIAM,
HARDY ANNUAL.
This new type begins to
bloom in early summer
from spring sown seed;
continues in flower for
weeks. Habit of plant
the same as the perennial varieties, produces
fine heads of bloom of
various colors. White,
crimson, rose pink, etc.,
many of which are
broadly edged with
white; all are very fragrant. One of the finest
novelties of the season.
FINEST MIXED.
Packet, 15 cents.

SWEET WOODRUFF

See Asperula.

TAGETES

See Marigold.

(BLACK EYED SUSAN. THUNBERGIA.

THUNBERGIA

Tender Annual Climber

Black-Eyed Susan. An ornamental, rapid growing climber; an old favorite. Excellent for vases, trellises, rustic work or greenhouse decoration. Flowers buff, orange, white, etc.; height 5 feet. Fine mixed.

Packet, 10 cents.

TIGER FLOWER

See Calliopsis.

TORENIA

Tender Annual

Available for vases, hanging baskets or out of door purposes; 6 to 12 inches high. Very free flowering. Start in window or greenhouse.

MIXED. Colors blue with yellow centre, white with rose centre, etc.

Packet, 5 cents.

TRANSVAAL DAISY

See Gerbera.

TRITOMA

Hardy Perennial

Red Hot Poker. Torch Flower. Blooms from August until late autumn. Very showy in beds or masses.

UVARIA. Varies from yellow to scarlet. Packet, 5 cents.

HYBRIDA EXPRESS. The earliest to bloom. Some of the seedlings of this class will flower the first year, if sown early. An interesting and valuable strain. Packet, 10 cents.

TROPAEOLUM

See Nasturtium.

TRUMPET CREEPER

See Bignonia.

TRUMPET FLOWER See Datura.

UMBRELLA PLANT

Tender Perennial

CYPERUS ALTERNIFOLIUS. As handsome and graceful as a palm, yet of easiest culture. It will grow and flourish in rooms that have only partial light. It needs rich soil and much water. Pkt., 10c.

VALERIANA

Hardy Perennial

Hardy Perenmai

Hardy heliotrope. A showy perennial border plant, producing large corymbs of red and white flowers suitable for bouquets or decorations. Very fragrant, resembling heliotrope. Two or three feet. Should be generally grown, as it succeeds almost everywhere.

MIXED. Rose and white. Fine.

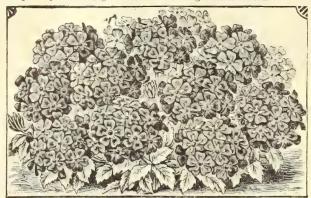

Packet, 5 cents.

VERBENA

Tender Perennial

Indispensable for bedding purposes. Flowers white, scarlet, red, crimson, purple, etc. Verbenas raised from seed are usually fragrant. To hasten bloom it is better to start the seed indoors. The plants should stand about a foot apart in the open ground, and the flowers should be cut frequently. Seedling verbenas are stronger than others.

VERBENA, BURBANK'S MAYFLOWER

BURBANK'S MAYFLOWER. Arbutus scented. This verbena is BURBANK'S MAYFLOWER. Arbutus scented. This verbena is of bright and pleasing shades of pink, of extraordinary size and free blooming habit. Its chief claim to popularity, as developed by Mr. Burbank, is its fragrance, which resembles the Trailing Arbutus or Mayflower. This fact gave it its name. It is very desirable for bouquets and decorative purposes, and is unsurpassed as a bedder. It was originated by Mr. Burbank by a long continued selection from sweet scented sorts. The type is now quite well established. Packet. 10 cts.

PERBENA, AURORA BOREALIS

Packet, 5 cts.; 1/4 ounce, 35 cts.

Mrs. Clara Hartwick, Condersport, Pa.—Rose bushes received in splendid condi-tion. We have purchased seed from you for 25 years, and have never had failure, either in flower or garden seeds, or plants.

either in flower or garden seeds, or plants.

Frank H. Platt, New York City.—The result of your collection of sweet peas has exceeded my expectations. Planted with three separate lots from other seedsmen, yours are the only ones that make a showing; and I want a dozen named varieties to put in where others did not come up.

Roderick McDonald, Eagle, Alaska.—About two weeks ago I received from any interest you to know that after coming nearly 5,000 miles to within 150 miles of the Arctic Circle, they are all growing, and some bave leaves almost half an inch long. The packing was moist when I received them, which is remarkable at this season of the year.

E. A. Poynter, Steele, Ala.—Euclosed find an order for garden and flower seeds.

received them, which is remarkable at this season of the year.

E. A. Poynter, Steele, Ala.—Enclosed find an order for garden and flower seeds. Several of my neighbors, seeing the excellence of my flowers and vegetables from your seeds, have joined me in this order. Theirs burned out with a little dry spell, while mine are the talk and admiration of the country. People in passing stop to admire both my flower and vegetable gardens.

W. R. Savage, Blowing Rock, N. C.—My seeds and caladiums came duly to hand, and I am sending you another order. I want the quarter pound of nasturitums for a lady who keeps a summer hotel here. She asked me to order nasturitums for her, and when I told her I was ordering entirely from Maule this year, she exclaimed: "Maule's nasturtiums, they are the most beautiful in the world."

COMMANDANT MARCHAND. The flowers are remarkably large, of a dark purplish red color, and are produced in great abundance. Elegant for massing or borders. Packet, 15 cents.

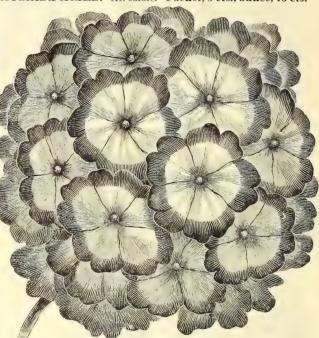

VERRENA. COMMANDANT MARCHAND.

VERBENA, HYBRIDA MIXED

HYBRIDA SCARLET. Brilliant; fine for bedding. Pkt., 10 cts
HYBRIDA WHITE. Fine for bouquets. Packet, 10 cents.
HYBRIDA MIXED. All colors. Packet, 5 cts.; ounce, 75 cts.

VERBENA, BRIAR CREST MAMMOTH FANCY.

BRIAR CREST MAMMOTH FANCY. Unexcelled for size, beauty and diversity of markings. Unsurpassed for richness of color and profusion of bloom. Some of the individual florets are nearly as large as a silver half dollar, and all are much above average size, making effective masses of color in the bed. As to hue, some are self colored or solid, some are striped and some are variegated or mottled. Some have eyes and some have zones or rings of contrasting shades. All are brilliant and desirable.

Purple. Packet, 10 cents.

Pink. Packet, 10 cents.

FINEST MIXED. Embracing all sorts, including the eyed and variegated verbenas. Pkt., 10 cts.; ¼ oz., 40 cts.; oz., \$1.50.

Cousin of Mine

moved to McAllen, Hidalgo Co., in the Southern part of Texas a couple of moved to McAllen, Hidalgo Co., in the Southern part of Texas a couple of years ago, and last year, knowing I was in the Seed business, sent me a small order amounting to about \$2.00, as he thought he ought to have a garden. This was the result: The town where he was located did not know Maule's Seeds, and I did not have a single customer in the place, but the results he obtained were so astonishing and everybody so pleased with them, that my cousin, Mr. Fred W. Maule wrote me in regard to it, and stated he thought he could sell Maule's Seeds, although he was engaged in the lumber business. His first order was for \$2.64, this was followed with an order for \$376.89, his next order was \$370.54, the next \$162.41, and \$141.05, making a total of \$103.53 worth of Maule's Seeds althoughed by the July 1, 1909. in a small town in Texas, which I had Seeds disposed of up to July 1, 1909, in a small town in Texas, which I had never heard of when my cousin went there to reside, and at that time had a population of a little more than one bundred. These orders entitled Mr. Maule to the second cash club prize of \$150, July 1, 1909. The above facts only illustrate how the demand for Maule's Seeds is constantly growing, although it is an exception to have less than \$3.00 from a post office one year, and over a thousand dollars the next.

VINCA, PERIWINKLE

VINCA

Tender Perennial

Periwinkle. A tender perennia plant blooming the first season. Adapted to window or open garden, making a fine show in the border; 18 inches high. Flowers 1½ inches

ROSE. Packet, 10 cents. WHITE. Packet, 10 cents. MIXED. Packet, 5 cents.

W. B. Worthen, Little Rock, Ark.—The 300 California Privet plants arrived in splendid condition, and being so much finer plants than I expected, I desire to express my appreciation.

Mrs. E. Van Hoose, Montmorelos, Mexico.—All of the buibs came through nicely, and are large and fine. I certainly appreciate your selecting them with such care. You do not know the pleasure I derive from my flowers, and I am sure Maule is the best seedsman and florist to be found anywhere; anyway I have always had better treatment and more satisfactory plants than from any other seedsman.

VIOLA, IMPROVED TUFTED PANSY.

VIOLA

Hardy Perennial

VIRGIN'S BOWER

See Clematis.

VIRGINIA CREEPER

See Ampelopsis Quinquefolia.

WALLFLOWER

Half Hardy Perennial

Bears long spikes or heads of exquisitely fragrant flowers. It is very ornamental in the border or in forming groups. Sow thinly in shallow drills in early spring. Colors yellow, brownish, purple, etc.

DOUBLE MIXED

WALLFLOWER, SINGLE PARISIAN.

SINGLE PARISIAN. This variety is extremely early. Sown in cold frames in March, this plant is in full bloom before the end of September. The magnificent golden yellow flowers are exceedingly welcome for bouquets as well as for bunching, especially at that late season when the florists shop usually contains nothing but chrysanthemums. Packet, 10 cents; 3 packets, 25 cents.

DOUBLE MIXED. The best double German sorts.

SINGLE MIXED. Fine mixture. Very desirable. Packet, 5 cts.

WHITE ROCKET

See Candytuft: also Sweet Rocket.

See Phacelia.

WILD **CUCUMBER** VINE

WHITLAVIA

Hardy Annual Climber

Hardy Annual Climber
A quick growing climber.
This is one of the quickest
growing of all the annual
vines, and a great favorite. It
is decidedly graceful and
pretty in general effect, as
seen upon a trellis or a fence.
Vines sometimes attain a
length of 20 or even 30 feet in
a season. The fragrant white
flowers are followed by prickfly seed pods. The pods or
fruits are always interesting
to children, "who love to
make them burst." Makes
the quickest growth and
shade of any vine I know of.
Pkt., 5 cts.; ½ oz., 15 cts.;
oz., 25 cts.

WISTARIA

Hardy Perennial Climber

Of great value on arbors, trees or buildings. Bears great panicles of purple or white blossoms in profusion in spring. One of the most satisfactory of the hardy climbers. I offer a mixture of the best blue and white Chinese sorts. Packet, 10 cents.

Mrs. Ward C. Howe, New Haven, Conn.—My flower seeds did splen-didly. I picked sweet peas the last week in October.

XERANTHEMUM

Annual Everlasting

Beautiful, free blooming annual, I foot high; highly prized as an everlasting. Large, double, globe-shaped flowers. Seeds germinate easily in the open ground. White, purple, yellow. Fine mixed; all colors.

Packet, 5 cents.

YELLOW CHAMOMILE

See Anthemis.

YELLOW FLOWERING PEA See Crotalaria.

YOUTH AND OLD AGE

See Zinnia.

ZEA JAPONICA, QUADRI-COLOR.

ZEA JAPONICA Hardy Annual

Hardy Annual
QUADRI-COLOR. This is a four
colored Japanese maize—green,
white, pink and rose. It is exceedingly effective and graceful as a
foliage plant, either for centres or
backgrounds. Packet, 10 cents.
QUADRI-COLOR PERFECTA.

This is a more dwarf growing variety than the above, with the same beautiful markings. Excellent for a low background. Packet, 15 cts.

ZEBRA GRASS

See Eulalia Japonica.

ZINNIA

Hardy Annual

Youth and Old Age. Bedding plants; 1 to 2 feet high. Suited to all situations and soils. The bloom is always gay and profuse, and the color range endless. No flowers are more showy. Sow seed in open ground, and transplant or thin out of try some of the following named

to 1 foot apart. I urge my friends to try some of the following named varieties, keeping the sorts separate from each other for the best effects.

ZINNIA, MEXICAN HYBRID.

als, as shown in the illustration, entirely relieving the flower of its former rigidity or stiffness of aspect. The new fringed zinnia blooms quite as freely and continuously as the ordinary type. The colors in the fringed class now embrace all the usual zinnia tints. All colors zinnia tints. All colors. Finest mixed. Pkt., 10c.

ZINNIA, GIANT FLOWERING.

GIANT FLOWERING. An excellent variety for cut flowers, as these immense flowers are borne on long, stout stems. One of the best variety for backgrounds and massing. This variety includes all the best and largest types, and cannot be excelled in beauty of flower or

Mrs. Chas. Meyer, Deep River, Conn—All your seeds have done well for us the past year; we had beautiful sweet peas and pansies and our nasturtiums were fine. W. M. Balch, Parrottsville, Tenn.—From the bulbs purchased from you last April, I have grown the most magnificent plants of Orinoco Banana, 10 and 12 feet high, with great spreading leaves 5 feet long. This is by far the most magnificent ornamental summer plant for the lawn I have ever seen. My specimens are the wonder and admiration of all who see them.

Classification Flower Seeds.

ZINNIA, NEW FRINGED.

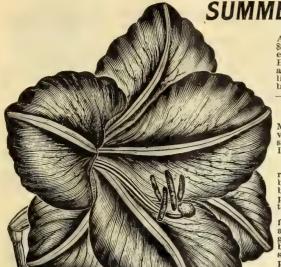

Annuals, Hardy Annuals and Tender Annuals attain full growth from seed, flower and die in one year.

Biennials, Hardy Biennials and Tender Biennials grow from seed one year, bloom and die the next, though some varieties bloom the first season when sown early.

Tender Perennials last for several years, blooming annually; must be taken indoors during winter.

Hardy Perennials and Half Hardy Perennials last for several years, blooming annually after the first season, though some varieties bloom the first season if sown early.

Please note I not only give the proper botanical names of the various flowers, but also have given, wherever possible, the common every day names of each flower in alphabetical order, which will be of great help to my friends in making up their lists.

AMARYLLIS, VEITCHII SEEDLINGS.

AMARYLLIS, VEITCHII SEEDLINGS.

VRITCHII SEEDLINGS. The remarkable hybrids produced from seed by celebrated English specialists will add to the fame and popularity of the amarylis. The flower size has been increased to a foot in diameter, and the colors have been so improved and varied as to be almost beyond belief. In them we find this of white, pink, rose, orange, scarlet, crimson and maroon. Some are flaked, mottled or striped, and some are of solid colors. In a thousand plants, a thousand different flowers may be found, and a dozen bubb selected at random will insure a wide variety of color.

40 cents each, 2 for 75 cents, postpaid.

JOHNSONII. Very large flower, of a rich crimson scarlet color, each petal striped with white. This is very desirable as a pot plant, and is highly recommended. 30 cents each; 2 for 50 cents; \$2.75 per dozen, postpaid.

EQUESTRIS. Also known as Barbadoes Lily, or Gloriosa Lily. A splendid type of amaryllis, with flowers 4 to 5 inches across. The color is a brilliant orange scarlet, with exquisite green and white throat. Valuable as a pot plant or for bedding purposes.

SUMMER FLOWERING BULBS, ROOTS, ETC.

I am probably doing today one of the largest trades in Summer Flowering Bulbs in America. The annual sales of this department ten years ago were very little over \$5,000; and while my seed business has doubled in that time this department has done even better, as at a rough guess I should say that last year I soid over \$25,000 worth of Bulbs and Roots. I think this emphasizes the quality of the stock I am sending out, and nothing further need be said except that with every order for Bulbs, a copy of my little pamphiet "Bulb Culture" will be enclosed, so that no one need fail to have the best of success if they follow the directions given therein.

AMARYLLIS. The Royal Lilies.

AMARYLLIS. The Royal Lilies.
FORMOSISSIMA. Also known as Scarlet Mexican and Jacobean Lily. Of extremely rich, velvety, crimson color. It is a free bloomer, and succeeds well either in pots or in the open ground. It can also be bloomed in water, like a hyacinth.

15 cents each; \$1.25 per dozen, postpaid.

VITATTA. A most handsome variety of amaryllis. It has immense flowers and is a continuous bloomer. The color of the flower is a white ground, beautifully penciled and striped with red and pink, making a beautiful and dazzling combination. 40 cts. each; 2 for 75 cents, postpaid.

HALII. Produces in early spring attractive foliage until about August when foliage ripens off and disappears; in about a month's time or less great flowering scapes rise to the height of 2 feet, bearing clusters of delicate lavender pink blossoms of great fragrance. This will do well in all places, and increase profusion of bloom from year to year. 25 cts. each; \$2.25 per doz., postpaid.

ATAMASCO OR FAIRY LILY.

Beautiful, dwarf, bulbous plants, quite similar in form to amaryllis, and easily cultivated. They thrive in any good garden soil. They bloom all summer, and are invariably admired; make admirable pot plants. Good cut flowers.

WHITE. Large, beautiful, pure white.
5 cents each; 45 cents per dozen, postpaid.

ROSBA. Clear, rosy pink; handsome, flow-rs. 5 cts. each; 45 cts. per doz., postpaid. SULPHUREA. Superb, clear yellow flower. Very handsome.

5 cents each; 45 cents per dozen, postpaid.

This new bulb is simply a revelation to all who have tried it. It is much like an amarylis, with a strong bulb which starts growth as soon as potted, bearing its bright golden yellow flowers in clusters of 4 to 6. Deliciously fragrant, it is sure to please; a quick bloomer. Bulbs can be potted any time during the winter or spring or in the open ground.

15 cents each; \$1.25 per dozen, postpaid.

ISMENE CALENTHA GRANDIFLORA.

Related to amaryllis; very desirable. Flowers snowy white and of novel form. Buds bloom quickly. A superior pot plant or planting in the open ground. Strong bulbs.

15 cents each; \$1.25 per dozen, postpaid.

ISMENE CALENTHA GRANDIFLORA.

GIANT WHITE SPIDER LILY

This magnificent lily bears many tall flower stalks, each surmounted by 8 to 12 large, white, deliciously sweet flowers, and blooms for several weeks. They are highly prized by florists for floral designs on account of their delicate fragrance and chasteness. The evergreen leaves afford a beautiful ornament during the winter among other plants. Admirably adapted for pot culture; will flower from six to eight weeks.

25 cents each; 5 for \$1.00; \$2.25 per dozen, postpaid.

ONE OF EACH OF THE ABOVE 12 SORTS ONLY \$1.75, POSTPAID.

SAUROMATUM GUTTATUM.

The Monarch of the East.

The magnificent flowers of this most interesting plant, are produced from dry bulbs, without bulb being placed in water or soil. Does equally as well planted in open ground. Simply place the large, round bulb on a table or shelf in a warm room and flower will begin at once; in three weeks time a most curious flower develops, 16 to 24 inches long, tipped red and yellow, the inner part equally as brilliant. Entirely different from any other flower known. After flowering, plant in open ground, where it throws up elegant dark green umbrella shaped foliage, leaves frequently reach a height of 3 feet. In the autumn when the leaf fades, bulb should be lifted out of the soil, cleaned up and placed in a dry condition in a warm room, where the previous year's display may be repeated. Extra size, strong blooming bulbs, 25 cents each, 3 for 60 cents. Smaller size, 15 cents each, 2 for 25 cents, postpaid. The magnificent flowers of this most interest-

LILY OF THE VALLEY.

A beautiful pure white flower of exquisite bell shape. Perfectly hardy. Plant in a shaded place, that is slightly moist. 5 cents each; 6 for 25 cents; 45 cents per dozen, postpaid.

TUBEROSE.

Excelsior Dwarf Double Pearl. The best sort; 24 to 30 inches high. Not as tall as the old double Italian, but yields longer spikes. Flowers large, full double and extremely sweet, 5 cents each; 6 for 20 cents; 35 cents per dozen; 40 for \$1.00; \$2.50 per 100, postpaid. By express, not prepaid, \$1.25 per 100.

ABEL GORGET. 4 feet. Immense trusses, with fine, open, orange scarlet flowers. An erect grower, with very dark green foliage.

15 cents each; \$1.25 per dozen, postpaid.

BLACK PRINCE. 5 feet. A fine, new, dark canna. Intense dark, velvety maroon. Very large flower; green foliage and good bloomer.

15 cents each, \$1.25 per dozen, postpaid.

CHARLES HENDERSON. 4½ feet. One of the best bedders. Bright crimson, centre slightly penciled golden. A good bedder.

15 cents each; \$1.25 per dozen, postpaid.

CHICAGO. 4½ feet. Bright vermillion scarlet, with splendid flower trusses. Widely popular, especially in the West.

15 cents each; \$1.25 per dozen, postpaid.

DR. NANSEN. 2½ feet. Clear, pure yellow. A constant and abundant bloomer. The petais are thick and durable, retaining color and freshness in all weather. 15 cents each; \$1.25 per dozen, postpaid.

JULIUS. 4 feet. A golden orange color; a tint almost unique among cannas. The trusses of large blooms appear to advantage just above the handsome light green foliage. 15 cts. each; \$1.25 per doz., postpaid.

RICHARD WALLACE. 4½ feet. In color a pleasing shade of canary yellow, flowers exceptionally large. Carried well above the green foliage in upright branched trusses. An ideal bedder, of very vigorous growth.

15 cents each; \$1.25 per dozen, postpaid.

TRIUMPH. 4 feet. A handsome shade of deep rich crimson; large flowers in finely built trusses, borne erect on strong stems. Makes a fine display. 15 cents each; \$1.25 per dozen, postpaid.

Maule's Magnificent Dahlias for 1910.

DAHLIA, JACK ROSE.

NEW AND RARE DAHLIAS

NEW AND RARE DATILIAS

ETHEL MAULE. (Show.) First offered in 1901. The finest, largest flowering white show dahlia known. Dwarf in habit, and one of the first to bloom, and most prolific. No sort is more admired on my trial grounds, and it is one of the most conspicuously elegant dahlias in my entire collection. Good strong roots, 75 cents each; 2 for \$1.25, postpaid.

JACK ROSE. (Decorative.) Unquestionably the most important addition to the decorative class of dahlias. In color a brilliant crimson—red, rich and glowing. On account of the close approach in color to the popular General Jacqueminot Rose, hence its name Jack Rose. The habit of the plant is dwarf and compact, producing its flowers with the greatest freedom on long, stout stems; flowers measuring five or more inches in diameter. As a cut flower it is one of the best. 50 cents each; 3 for \$1.25, postpaid.

MADAM VAN DEN DAEL. (Decorative.) A magnificent dahlia of immense size and beautiful form. Color shell plink, with deeper pink markings. Petals most artistically arranged on long stems. 40 cents each; 2 for 75 cents, postpaid.

MRS. CHARLES TURNER. (Decorative.) Color pure yellow. The long, wide twisted petals are full to the centre, with long stems holding the flowers up well above the foliage. A strong

DAHLIA, VIRGINIA MAULE.

flowers up well above the foliage. A strong grower and a profuse bloomer. 30c. each; 2 for 50 cts.; \$2.75 per doz., postpaid.

MRS. ROOSE-VELT. (Decorative.) The acknowledged peer of any large flowering dahila, Perfectly double, of great size. A delicate pink, shaded to a soft clear pink.

cate pink, shaded to a soft clear pink. Flowers on long stems, making it a superior sort for cut-ting. 30 cents each. SYLVIA. (Decor-ative.) White, shaded soft pink on outer petals. Flowers 4 to 6 inches in diameter. 25 cents each; \$2.25 per doz., postpaid.

DARLIA, VIRGINIA MAULE.

DAHLIA, 20TH CENTURY.

BEGONIA, DUKE ZEPPELIN

BEGONIA, DUKE ZEPPELIN.

Duke Zeppelin Begonia. This is one of the most gorgeous and bright of the tuberous-rooted begonias. The color is a pure, intense vermilion scarlet. It is a dwarf but strong plant, attaining a height of 8 to 10 inches, throwing up many stems of flowers from June or July until frost. Flowers are double and afford a continuous display of color. It bears the sun well, and is a desirable sort for outside culture. 25 cents each; 3 for 60 cents, \$2.25 per dozen, postpaid.

Purchase your money order or register your letter at my expense.

TUBEROUS-ROOTED BEGONIAS.

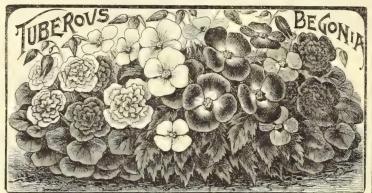

Mixed. All colors. 5 cts. each; 6 for 25 cts.; 45 cents per dozen, postpaid.

Mixed. All colors. 10 cts. each; 6 for 50 cts.; 90 cents per dozen, postpaid.

New Crested. The New Crested Begonia (single) is of a distinct and novel type, there is a dense tuft or crest of twisted threads, producing a unique appearance, 25 cents each; 3 for 60 cents; \$2.25 per dozen, postpaid.

Bertini Sunproof. A new single tuberous-rooted begonia, with crimson red flowers. Admirable for pot culture. The color contrast between the showy flowers and the apple green foliage is especially pleasing. 25 cents each; 3 for 60 cents; \$2.25 per dozen, postpaid.

Giant Tree Begonia. A fine new variety, of Mexican origin; as beautiful as it is novel. It has such an upright, sturdy growth that I call it the Giant Tree Begonia. It attains a height of 1½ to 2 feet, and bears grand single flowers of bright carmine rose. It delights in full sunshine, and will flourish in any good soil. It is a prolitic bloomer, lasting well into the autumn. Suitable for pot culture, large beds or groups. 25 cents each; 3 for 60 cents; \$2.25 per dozen, postpaid.

BEGONIA. TYPE OF SINGLE AND DOUBLE VARIET

SPECIAL.

For 75 CENTS

I will send postpaid one each of the following begonias:

NEW CRESTED. BERTINI SUNPROOF. GIANT TREE and DUKE ZEPPELIN.

APIOS TUBEROSA.

Sometimes called Tuberous-rooted Wis-taria. A valuable and desirable tuberousdesirable tuberousrooted twiner, resembling wistaria in form
of leaf and flower, but
smaller. Grows to a
height of 8 to 10 feet.
Dies to the ground
each winter, but the
tuberous root is perfectly hardy. The
numerous clusters of
deep purple, peashaped blossoms have
a strong, delicious vioa strong, delicious vio-let fragrance. A val-rock work. 5c. each;

uable vine for trellis or rock work. 6 for 25c.; 45c. per dozen, postpaid.

AFRICAN LILY

Scarlet. The most showy of all the phloxes. 15c. each; \$1.25 per dozen, postpaid.

Special Offer.

One each of the above four Phloxes for 50 cents, postpaid.

PERENNIAL PHLOX

ORINGCO BANANA

ORINOCO BANANA.

A handsome plant for window, conservatory or lawn. It will thrive in a large pot or tub, or may be set in the open air, in very rich soil. It is not hardy. Unexceiled for sub-tropical effects. It delights in a warm, sunny situation, and requires plenty of moisture and food. My customers report very satisfactory results with this ornamental plant. It is showy in the window garden. 20c. each; 3 for 50c., postpaid.

Produces a large, luxuriant clump of evergreen foliage, surmounted by 30 or 40 flower stalks, of large, bright blue or white flowers. Blue or white, either color, 15 cts. each; 2 for 25 cts., postpaid.

BUTTERFLY LILY.

Forms a dense clump 3 or 4 feet high, producing a mass of fragrant, pure white flowers large in clusters. 15c. each; \$1.25 per dozen, postpaid.

TRITOMA, PEITZERI.

TRITOMA.

Also called Red Hot Poker, Flame Flower, Torch Lily. Very showy and briliant.

Uvaria. Flowers are rich ochre red or orange red. Blooms August to November.

20 cts. each; \$1.75 per dozen, postpaid.

Pfitzeri. The everblooming Flame Flower. Color, rich orange scarlet. Blooming heads, 12 inches long. 25 cents each;

3 for 60 cts.; \$2.25 per dozen, postpaid.

THE BLACK CALLA

NEW YELLOW CALLA. Mrs. Roosevelt.

A remarkably strong grower, producing in great numbers exquisite clear, light yellow flowers, on extra long stems. The dark green foliage is spotted or blotched with white, making it as conspicuous and attractive as a Fancy Leaf Caladium and as admirably adapted to outside cultivation. 35 cents each; 2 for 60 cents, postpaid.

THE YELLOW CALLA. (Richardia hastata.)
Flowers of a light color. Beautiful and desirable, Quite similar to the ordinary white calla, except in color of flower, which is a light lemon yellow. A very pretty calla. 25 cents each; 3 for 60 cents, postpaid.

THE FRAGRANCE CALLA.

A sweet-scented white calla, with the fragrance of violets and lilies. Of medium size and compact growth. It blooms profusely and multiplies rapidly. The foliage is unique, being handsomely fluted.

15 cents each; 2 for 25 cents; \$1.25 per dozen, postpaid.

THE LEOPARD CALLA. (Calla dioscorides.)

The splendid flower of the Leopard Calla often measures 15 inches in length, and is covered with spots. The color is olive green or yellow, marbled and blotched in the most intricate manner. The texture is heavy and rich. Grown with ease. 25 cents; 3 for 60 cents, postpaid.

THE OLD WHITE CALLA. (Richardia Æthiopica.) The White Calla or Lily of the Nile is one of the best of all our window bloomers. The plants should be kept dormant from April until October, and then repotted in good soil, in a 4 or 6 inch pot.

20 cents each; 3 for 50 cents; \$1.75 per dozen, postpaid.

THE LEOPARD CALLA

THE BLACK CALLA. (Arum sanctum.)

The roots of the Black Calla or Solomon's Lily come from Jerusalem, in Palestine, and hence each is a souvenir of the Holy Land. The flower is a foot long and 7 to 9 inches across. The color is of the richest velvety black Large roots, 25 cents each; 5 for \$1.00. Smaller roots, of size ordinarily sold as first size, 15 cents; 2 for 25 cents; \$1.25 per doz., postpaid.

LITTLE GEM CALLA.

A compact plant, with an abundance of dark green foliage. Truly an ever-bloomer. It can be brought into flower in the autumn and then carried into the house, and made to produce flowers all winter. Twelve inches high. Flowers snow white in color. 15 cents each; 2 for 25 cents; \$1.25 per dozen, postpaid.

LITTLE GEM CALLA

THE RED CALLA. (Arum crinitum.)

This peculiar calla is almost hardy. The flower is very large and showy, of a dark red or purple brown color and rich texture; and more or less motified or spotted. The leaf shape is almost star-like.

35 cents each; 2 for 60 cents, postpaid.

THE SPOTTED LEAF CALLA.

This magnificent calla has glossy, dark green leaves dotted with numerous white spots. The flowers are pure white, with black centres, and are very beautiful. The plants grow and bloom easily and freely. Strong roots, 15 cents each; 2 for 25 cents; \$1.25 per dozen, postpaid.

SPECIAL OFFER. I will mail, postpaid, one strong root of each of these callas (9 in all) for \$1.50.

ANEMONE JAPONICA. (Japanese Windflower.)

These beautiful wind flowers offer an agreeable These beautiful wind flowers offer an agreeable surprise to those having a bed of them for the first time. Start to bloom early in August and continue until cut down by frost. Excellent for cutting, lasting for several days. Grow 2 to 3 feet high. Perfectly hardy if covered with leaves or short manure during the winter. Can be used for solid beds or as a border plant, or clumps planted in the hardy border. Whirlwind. Large, semi-double flowers, pure white, very free flowering. 15 cents cach; 2 for 25 cents; \$1.25 per dozen, postpaid. Elegans. A de icate shade of pink. 15 cts. each; 2 for 25 cts.; \$1.25 per dozen, postpaid.

Rudbeckia, Golden Glow.

One of the best yellow flowers ever introduced, and now universally grown. No flower ever had a more rapid or wider popularity. It is herbaceous (not shrubby) dying to the ground after frost, but is perfectly hardy. It attains a height of 6 to 8 feet, and produces a wealth of yellow flowers 2 to 3 inches across, as double as a rose. 15 cents each; 2 for 25 cents; \$1.25 per dozen, postpaid.

POPPY ANEMONE.

(The Irish Anemone.)

Extremely pretty and perfectly hardy, producing flowers year after year. Flower stalk I to 2 feet high. Flowers 2 or 3 inches in diameter, or even larger. Unsurpassed for cutting; foliage handsome. Available as a house plant for winter blooming. Poppy Anemone will bloom the first season from seed. I can furnish the seed. See Index. under Flower Seeds. Double St. Brigid. Very double flower. Beautiful shades and colors. Vigorous growth.

5 cents each; 45 cents per dozen, postpaid.

BABOON FLOWER

Were these to be offered as the Blue Gladiolus they Were these to be offered as the Blue Gladiolus they would no doubt create a grent sensation, and why not; most people would really take them as such, and indeed many of the varieties are far more beautiful and interesting. The six petaled flower are often alternately white and blue; sometimes the three upper petals are blue and the lower ones white, others striped, blotch d and bordered blue. Deen crimson, magenta, rose, violet, purple, lavender and mauve colors are all represented. Grown as a house plant, putting 4 or 6 bulbs in a not or outdoors.

Mixed Colors. 10c. each; 90c. per doz., postpaid.

DOUBLE POPPY ANEMONE

Gladiolus. Panmure Extra Fine Mixed.

In handling gladiolus, I import bulbs as well as raise them. The best growers of the world contribute to my stock. It is impossible to sell out all the stock which I carry, but at the end of every season there are many choice odds and ends, or left-overs, including great numbers of high priced varieties. Each season I plant these desirable novelties at Panmure and bloom them. In the rich, well tilled soil they make rows of bloom that are bright and beautiful, and the following spring I offer these same bulbs in mixture to my friends. They have been 'proved at Panmure,' and I know every one to be a treasure. The sorts can no longer be sold under separate names, but that fact merely lowers the price without affecting the real value and beauty of these handsome flowers. The bulbs are strong and healthy. 4 for 10 cts.; 25 cts. per doz.; 50 for \$1.00; \$1.75 per 100, postpaid. By exp., not prepaid, \$1.25 per 100. In handling gladiolus, I import bulbs as well

GLADIOLUS.

Maule's Select Named Varieties.

New Prize Show Sorts.

The following varieties are selected from a long list of named Gladiolus, and are without exception large flowering sorts. These bulbs will all bloom this coming season.

Mrs. Francts King. In color a light scar-let, which attracts attention at once. The ex-panded flower is from 4 to 5 inches across, and 4 to 6 flowers are open at one time. The growth is vigorous and the bloom brilliant. 10 cts. each; 90 cts. per dozen, postpaid.

America. A beautiful soft shell pink color, tinged lavender; growth and habit perfect; an ideal bedder. Flowers large and spreading, all facing one way.

15 cts. each; \$1.25 per dozen, postpaid.

lily, producing its large, fragrant
yellow flowers during July and
August in great profusion. Plant
grows about 3 feet high. Perfectly
hardy. 15 cts. each; 2 for 25 cts.;
\$1.25 per dozen, postpaid. HYACINTHUS CANDICANS.

CYCLAMEN, HARDY.

HARDY CYCLAMEN. These desirable bulbs bloom easily and quickly. If treated as a perennial it should have a warm situation, on well-drained land. Pink and White. Either color, 15 cts. each; 2 for 25 cents; \$1.25 per dozen, postpaid.

2 for 25 cents; \$1.25 per dozen, postpaid.
FUNKIA SUBCORDATA. Plantain Lily. Of easiest culture. Attractive border plants even when not in flower. Foliage massive. Flowers pure white, lily-like and borne on a graceful stem, which arches from the profusion of bloom. 15c. each; 2 for 25c.; \$1.25 per dozen, postpaid.

NYMPHÆA, ODORATA GIGANTEA.

NYMPHÆAS.

Odorata Giganten. The well-known fragrant water lily, whose white blossoms are so widely popular. It is only necessary to set the roots in the mud, in similar situations with other aquatic plants, where the water is sluggish. The roots will live outdoors over winter. 15 cents each; 2 for 25 cents; \$1.25 per dozen, postpaid.

\$1.25 per dozen, postpaid.

Allium Neapolitanum.

The large clusters of pure white flowers keep in excellent condition for several weeks. Place 4 to 6 bulbs in a pot. 6 for 15 cts.; 25 cts. per dozen; \$1.25 per 100, postpaid.

SCARLET FREESIA.

A charming bulbous-rooted plant. It bears brilliant carmine crimson flowers. Plant at least 6 in a pot or group. 6 for 15 cts.; 25 cts. per dozen; \$1.25 per 100, postpaid.

CALADIUM ESCULENTUM, ELEPHANT'S EAR.

CALADIUM, FANCY LEAVED.

No other summer foliage plant equals the Fancy Leaved Caladium in rich and gorgeous, yet soft coloring. They are of easy culture. Thrives in pot or box or shady situation. The root should be set in rich sandy loam. The handsome leaves are spotted and variegated with white, pink, scarlet, etc. Not hardy. 20c. each; 3 for 50 cents; \$1.75 per dozen, postpaid.

CALADIUM **BSCULENTUM.** Elephant's Ear.

CALADIUM, FANCY LEAVED.

CRINUM. KIRKII.

Usually produces two flower stalks, each bearing a dozen magnificent, fragrant flowers. The petals are white, with a deep reddish purple stripe through the centre of each. Succeeds in pot or open ground. Large bulbs, 25 cents each; 3 for 65 cents, postpaid.

IPOMŒA PANDURATA VINE.

Large satiny white flowers with a pink tinted throat shaded deeper in the tube. A most rapid growing vine. The vine branches freely from the ground up. The deep dark green, heart-shaped leaves overlap each other, so as to form a dense screen.

10 cents each; 3 for 25 cents, postpaid.

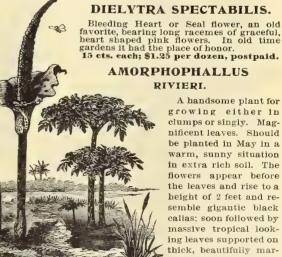

Madeira or Mignonette Vine.

This is an old favorite climbing vine, of rapid growth, with fleshy, heart-shaped, light green leaves and clusters of pure white, fragrant flowers. A free and constant bloomer. Suitable for trellis, rock work, etc. 5c. each; 6 for 25 cents; 45 cents per dozen, post-paid

JAPANESE FERN BALL.

This exquisite fern is rooted in moss, and requires no earth. Simply necessary to supply it with water once a day. In full growth the beautiful foliage extends outward in every direction, as shown. It will live for years, alternately growing and resting. Small balls, 5 inches in diameter, 35 cts. each; 2 for 60 cts., postpaid. Large balls, 7 to 9 inches in diameter, 60c. each; 2 for \$1.00, postpaid.

AMORPHOPHALLUS RIVIERI.

A handsome plant for growing either in clumps or singly. Magnificent leaves. Should be planted in May in a warm, sunny situation in extra rich soil. The flowers appear before the leaves and rise to a height of 2 feet and resemble gigantic black callas: soon followed by massive tropical look-

bled stems. Extra large bulbs, 35 cents each; 2 for 60 cts., postpaid.

GLOXINIAS.

BULBS, MY SELECTION, SHIPPED AFTER MAY 1st, FOR

I made this offer for the first time in 1904. My customers are so delighted with their bargains and tell so many of their friends about the liberality of the offer that each season I dispose of a large number of these popular \$1.00 Buib Collections. The proposition in a nutshell follows: Every year, May 1st, I have several thousand bulbs on hand, for it is an absolute impossibility to

sell out everything. This year I propose to distribute at least part of this surplus among my friends in the following manner: Send me \$1.00 any time before May 1st, and I will book your order for 100 choice bulbs, my selection, to be filled in rotation as received, after May 1st. In no case will bulbs be sent whose retail value is less than \$3.00. January orders will be filled first, then February, then March, etc. The first orders will receive the best selection, although the April orders will receive three times their money's worth. The February orders may get ten times what \$1.00 would buy if purchaser made the selection. Many of the bulbs will be worth 10, 15 and even 25 cents each. The package will have to go by express, purchaser to pay transportation charges.

Remember, please, that this offer is for surplus bulbs only, and hence I must select the varieties. Packages vary in size, and I do not prepay transportation charges. Buyers who prefer to do so can send 25 cents extra, and I will deliver without additional cost.

MONTBRETIAS MONTBRETIAS.

Showy and desirable perennials of easy culture. Set bulbs 4 inches apart and 1 inch deep. MIXED. All sorts, 3 for 5 cents; 15 cts. per dozen; \$1.00 per 100, postpaid.

Antholyza Æthiopica.

Fury Flower. Foliage upright and sword-like. Produces several spikes 15 to 20 inches high, bearing large, bright flowers; yellow and red handsome and showy plant. 10 cts. each; 3 for 25 cts.; 90 cts per doz., postpaid.

HARDY GARDEN LILIES.

HARDY GARDEN LILIES.

ROSE, HELEN GOULD

Baby Rambler Roses.

The Three Best Bedding Roses Ever Introduced.

THE CRIMSON BABY RAMBLER. (Mad. Norbert Levavasseur.)
It resembles Crimson Rambler in its flowers, but instead of being a climber is a dwarf, compact, erect-growing bush, only 12 to 24 inches high, and is a true ever-bloomer, bearing splendid trusses of 15 to 25 bright crimson flowers, produced freely the whole growing season, outclassing in this respect any rose of any type known, the plart never being out of bloom from early spring until stopped by hard frosts late in the autumn. If grown in doors it will flower the year around.

THE PINK BABY RAMBLER. (Baby Dorathy.)
In size, habit of growth and abundance of bloom it is just like the Crimson Baby Rambler, except that the blossoms are a beautiful shell pink of the Dorothy Perkins shade. Blooms the entire summer, frequently 100 blossoms open at once on a single bush.

THE WHITE BABY RAMBLER. Schneewitchen (Snow Witch.)
Similar in growth to the Crimson Baby Rambler, with the same great
production of magnificent flowers, which are pure spotiess white in
color and are produced the entire season, in large candelabra-shaped
trusses, entirely bardy, and a very pretty variety.

1 year, 15 cents each; 4 for 50 cents; \$1.25 per dozen, postpaid. Extra size, 20 cents each; 3 for 45 cents, postpaid. By express, not prepaid, 2 years old, 35 cents each; 3 for 90 cents; \$3.50 per dozen; 3 years old, 60 cents each.

SPECIAL. One of each Three Baby Rambler Roses only 35 cents, postpaid. By express, not prepaid, 2 years old, only \$1.00.

crumpled petals. Any of the above, 20 cents each, or the 3 for only 50 cents, postpaid.

FERN, THE PHILADELPHIA LACE.

Ferns.

FERN. THE PHILADELPHIA LACE
FERN.
THE PHILADELPHIA LACE FERN.
This has the Maiden Hair Fern effect on a Boston Fern frond. As beautiful and as easy to grow as the former, with the sturdiness and habits of the latter. The pinnæ are so finely divided that it resembles a piece of fine lace; the fronds are large and have a cushion-like appearance. It forms a beautiful specimen and is greatly admired, as no other fern has the same delicate, lace-like appearance. 25 cents each; 2 for 45 cents, postpaid. By express, not prepaid, 40, 75 cents and \$1.00 each.

CYRTOMIUM FALCATUM. One of the hardiest of house ferns; a native of Japan. Bold striking leathery foliage of a rich dark green. Rapid growth. 15 cts. each, postpaid.
PTERIS ALBA LINEATA. Very pretty, highly decorative and is the one best adapted to house culture of all the variegated ferns. A broad band of white is plainly marked in the middle of each frond. 15 cts. each, postpaid.
PTERIS WILSONII. A robust and compact grower; the ends of the fronds are beautifully crested. Easy to grow and a handsome house plant. 15 cents each, postpaid. By express, not prepaid, 40 cents each.

MAIDEN HAIR FERN. Always in demand for table and house decoration. It thrives nicely in almost every living room or parlor. Exceedingly graceful in appearance, and grows more beautiful year by year. Easily grown and highly satisfactory. 15 cents each, postpaid. By express, not prepaid, 40c. each.
BOSTON FERN. A most beautiful fern for growing in pots, vases or baskets. It thrives under ordinary conditions, requiring very little attention. The fronds grow 2 to 3 feet long and arch in a graceful manner. 15c. each, postpaid. By express, not prepaid, 30c. each.

Special Offer. One of each of the above Six Magnificent Ferns, ONLY 75 CENTS, POSTPAID.

Moonflowers.

IPOMŒA NOCTIFLORA. A rapid growing fragrant climber, making 15 to 20 feet. Flowers large, white. 15c. each; 2 for 25c.

THE BLUE MOONFLOWER. This has fragrant, pale sky blue flowers and is a vigorous climber. 15 cents each; 2 for 25 cents.

Cissus Discolor.

Also known as Trailing Begonia, etc. A beautiful vine-like plant for window garden or hanging basket. Foliage green and silvery white on the upper surface and reddish on under side. Tender. 15 cts. each, postpaid.

Passion Flower.

NORTHERN CROSS. A magnificent climbing vine, grows 8 to 10 feet the first season. Flowers 5 inches across, and show a well defined raised cross in the centre, surrounded by a beautiful halo of sky blue rays, underlaid with rosy pink and white petals. 15 cents each; 2 for 25 cents, postpaid. Larger plants, 20 cents each, postpaid.

Impatiens.

SULTANA. Rosy carmine: a constant bloomer. 10 cents each, postpaid. EVENING STAR. New. Clear white flow-

15 cents each, postpaid.

American Wonder or Ponderosa Lemon.

One of the grandest indoor fruits ever in-One of the grandest indoor fruits ever introduced. It is perfectly adapted to the window garden. May be grown with entire satisfaction in a 6-inch pot. Deep green leaves and fragrant, waxy flowers. Fruit very large and handsome; juicy and excellent for flavoring or lemonade. 20 and 35 cents each, postpald. Bearing size, By express, not prepaid, 50, 60 and 75 cents each.

Orange.

OTAHEITE. This is decidedly the best orange for house culture. It grows in dwarf, bushy form, and bears white, fragrant blossoms and golden fruit. Of superb decorative value. 15 and 20 cents each, postpaid. Bearing size, By express, not prepaid, 35, 50 and 75 cents each.

JAPANESE GOLD ORANGE (KIN KAN.) Desirable in every way; bears miniature golden yellow colored oranges about the size of a Damson plum, skin thin. The fruit is excellent for preserving or crystallizing. Flower attractive, about the size of a tuberose and as delightfully fragrant. Requires very little care and is easily grown. Starts to bear when quite small and is covered with blossoms and fruit every year. Nice plants, 75c. each, postpaid. Larger plants, By ex., not prepaid, 75c. and \$1.25.

Oleanders.

Fine, hard wooded house plants; popular; valued for splendid, fragrant flowers. WHITE. Large snow white blossoms, very double and sweet. PINK. A fine rosy pink, blossoms very large. YELLOW. Handsome large flowers.

Any of the above, 20 cents each, or the 3 for 50 cents, postpaid.

FUCHSIA, TRAILING QUEEN

Six Beautiful Fuchsias. One of each of the following 6 Fuchsias, for only 65 cents, postpaid.

TRAILING QUEEN. Wine color, with bright carmine sepals. This beautiful fuchsia is quite peculiar and pleasing in its habit of growth. Instead of assuming the ordinary upright or bush form it droops or trails to such an extent that it is practically a vine. It continues to grow and branch until a large mass of graceful foliage has been produced, which offsets the profusion of large flowers. Very useful for all shaded or partly shaded situations, especially in pots or hanging baskets or for rock work. 15 cents each, postpaid.

ELM CITY. Sepals rich crimson. Corolla deep purple and very double. This fuchsia is free flowering and easy to grow. 15 cts. each.

JUPITER. Extra large, very double flow-

JUPITER. Extra large, very double flower; long deep tubes with wide, handsome corolla; bright scarlet carmine. 10 cts. each. LADY IN WHITE. This is a most perfect and chaste variety. Flowers are double and pure white. Fine weeping tree form. 15 cents each; 2 for 25 cents, postpaid.

15 cents each; 2 for 25 cents, postpaid.
PHENOMENAL. Tube and petals bright
reddish crimson; corolla bright purple flamed
with scarlet. Flowers very double, fine and
extra large. 10 cents each, postpaid.
SPECIOSA. (The True Winter Bloomer.)
Color, rich carmine rose. One of the best and
very easy to grow. 10 cents each, postpaid.

Cape Jessamine.

A pretty low evergreen shrub with thick glossy leaves and waxy white flowers of delicious sweetness. Hardy in the South. Must be taken to the house or conservatory during the Winter. 20 and 25 cts. each, postpaid. By express, not prepaid, 35 and 50c. each.

Palms.

THE FAN PALM. One of the best for the house. Will thrive in any ordinary room, regardless of heat, cold, dust or drought. Elegant, fan shaped, dark green leaves, beautifully fringed. Needs no coaxing or special care. 25 and 35 cents each, postpaid. By express, not prepaid, 50 cents each.

WASHINGTON WEEPING. Will thrive almost anywhere. Elegant fringed, fan-shaped leaves. The drooping fringes of the mature plant are very graceful. Good strong plants, 15 and 25 cents each, postpaid. By express, not prepaid, 35 cents.

KENTIA. The hardiest and best all around palm for general house purposes. 25c.and 35c., postpaid. By ex, not prepaid, 60c. each.

OSTRICH FEATHER. Exceedingly graceful and desirable. The developed plant always attracts attention. 25c. and 35c. each, postpaid. By express, not prepaid, 60c. each.
One of each of the four palms, for 75 cents, postpaid.

One of each of the four palms, for 75 cents, postpaid.

Manettia Vine.

THE BARGAIN COUNTER.

For the benefit of customers who desire only a few plants each year, I have arranged these Flowering Plant Bargain Counter offers, which are cheap only in price, as better rooted plants cannot be had for double the money. Thousands of these collections are annually sent out to the entire satisfaction of my customers.

THOUSAND BEAUTIES OR TAUSENDSCHON ROSE.

THOUSAND BEAUTIES OR TAUSENDSCHON ROSE.

THOUSAND BEAUTIES OR TAUSENDSCHON ROSE.

The first time, a limited number of these plants and it proved to be the rose novelty of the year. The flowers appear in large clusters, after the opening the color is partly bright red and partly bright rose, turning soon to a steel blue. The color is best described by saying that it resembles that of early violets. Its yellow stamens contrast very prettily with the blue color of the rose. This variety is a strong grower, has shining green follage and few thorns. It has not been troubled with mildew and is classed among the hardlest climbing roses, withstanding the winters very successfully. This rose is the result of years of effort by experts and should be welcomed with the greatest interest by all lovers of the garden. Be the first in your neighborhood to show this grand new novelty.

35 cents each; \$3.50 per dozen, postpaid.

Maule's Three Sensational Climbing Roses.

42 Cents, Postpaid.

THOUSAND BEAUTIES. Surpasses all other climbing roses of this section in growth, foliage and beauty of blossoms. The flowers measure about two inches across and are borne in large clusters of ten or more from the beginning of June until the end of July. As the colors embrace every conceivable tint of white and yellow blended with rose and carmine, which are the predominating colors, each cluster is a bouquet in itself. Has few thorns, handsome foliage and is a vigorous, hardy grower. A fine rose for pergolas, bowers, trellises, porches, or anywhere that a strong climber is desired. Just the rose to transform an unsightly old building into a thing of beauty. 20 cents each; \$2.00 per dozen, postpaid.

PHILADELPHIA RAMBLER. The most magnificent hardy crimson climbing rose in existence. Color rich, deep, dazzling crimson. Flowers 2½ inches across and perfectly double, borne in great clusters, completely covering the bush. Holds its color longer and is far brighter and more intense than the old "Crimson Rambler," which adds greatly to its value. A very abundant bloomer, the plants being entirely covered at times with large, rich, crimson clusters. A strong, quick grower, with handsome foliage; perfectly hardy, and requires no winter protection. Sure to create a sensation wherever grown. Valuable for covering fences, porches, screens and trellises. 20 cents each; \$2.00 per dozen, postpaid.

per dozen, postpaid.

THE BLUE ROSE. This grand, new climbing rose surpasses all others of recent introduction in

NURSERY STO LARGE AND SMALL FRUITS.

TREES. BUSHES. VINES. PLANTS.

This is another growing department of this business, and every year I am constantly adding a great many new customers. I find that my friends after once trying me with an order for Small Fruits, Trees, etc., are invariably sure to come back. My stock this year is particularly choice and can be unconditionally recommended. Everything is of course sold as usual under the Certificate of the New Jersey State Entomologist. Plants and Trees by mail are a special feature of my business, and prices are most reasonable for goods shipped in this way, size and grade of stock taken into consideration. I cannot send stock by mail unless it is so quoted in this book.

Guarantee. I guarantee my stock to reach the buyer in good condition; but I cannot guarantee it to grow, as this is something over which I have no control; but when stock is received in good condition,

and by some mischance it does not grow, on receipt of evidence to this

effect, I will replace the plants at half price the following year.

Shipping Season. This commences about March 1st, and continues Southern orders by special arrangement can be until about May 10th. shipped at once from first class stock carried through the winter in my enlarged cellars.

Claims. All claims must be made immediately on receipt of goods. at which time they will be carefully adjusted, as my guarantee of Your Money Back if not satisfied—applies to this department, as well as every other in this book.

Packing. All goods are packed free, and I use the utmost care in packing to insure the stock being received in good condition, everything being correctly labeled.

PEACHES.

Ripening in the order given. See prices below.

NEW MAULE EARLY. Ahead of other extra earlies; tested; better than the Sneed. Ripens July 1st. Color a clear white; overspread with bright red; flesh white. Not a perfect freestone, but as near as any early peach. Fruit hangs well without rotting, and ships well. Vigorous grower and heavy cropper, and certain to be profitable. 25 cents each, \$2.50 per dozen, postpaid. By express, not prepaid, larger size, 1-year old, same prices.

MISS LOLO. Extremely early; large size; white skin; red cheek. CARMAN. Cream white or pale yellow color, with deep blush.

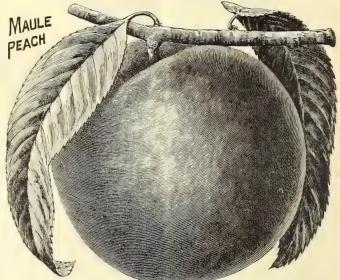

TRIUMPH. Extra early; almost a freestone; the freestone sorts are late bearers.

TRIUMPH. Extra early; almost a freestone; the freestone sorts are late bearers.

MOUNTAIN ROSE. Very profitable; large; skin white, nearly covered with a rich red; flesh white, slightly stained at the stone. August. CRAWFORD'S EARLY. Large, oblong, yellow, fine red cheek. RAY. A new peach of remarkably quick growth. Flesh white with red blush tint. A splendid shipper. The original tree has borne 16 successive crops without a failure. 25c. each; \$2.50 per dozen, postpaid By express, not prepaid, larger size, l-year-old, same prices. NIAGARA. Medium early. Large; yellow with red cheek; juicy. McINTOSH. Large size; white flesh; free freestone; good quality. Strong grower, heavy bearer. September.

OLDMIXON. A fine, large, productive variety succeeding in all localities, and well deserving of the high favor in which it is held as a market variety. Yellowish white skin with a deep red cheek; flesh white, but red at the stone, tender and rich. Early September bearer. STUMP. Large, white, with bright red cheek; juicy; productive and profitable. Early September bearer.

CAPTAIN EDE. Large, yellow. September bearer. Fine; hardy. ELBERTA. Large, yellow. September bearer. Fine; hardy. ELBERTA. Large, yellow, with red cheek; flesh yellow. Sept. CROSBY. Rounding form, slightly flattened, bright orange yellow. An abundant bearer. September.

CRAWFORD'S LATE. Large, yellow with red cheek

flesh deep yellow, juicy.

CHAIR'S CHOICE. Large and beautiful; late; yellow with red cheek, flesh firm.

GLOBE. Very large, firm and excellent; juicy. Sep-

tember.

LORENTZ. Frost proof. The best late sort. Yellow flesh of superior quality.

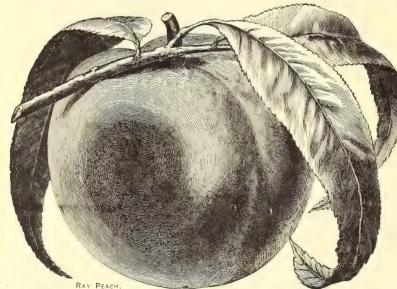

BEER'S SMOCK. Fruit medium to large; skin yellow, mottled with red. September.

KLONDIKE. Large size, white skin, red cheek, white flesh freestone. October.

IRON MOUNTAIN. Hardiest sort. Creamy white, freestone. Late

freestone. Late.
SALWAY. Large; yellow, mottled, with a red cheek; sweet, luscious flavor.

All the Peach Trees on this page will be furnished at the following prices, excepting the New Maule and Early Ray: Mail size, 1 to 2 feet, 15 cents each; \$1.25 per dozen, postpaid. By express, not prepaid, medium size, 3 to 4 feet, 20 cents each; \$1.50 per dozen, \$9.00 per 100; extra size, 4 to 6 feet, 25 cts. each; \$2.25 per dozen; \$11.00 per 100.

Maule's Ideal Fruit Collection.

BARTLETT PEAR

Maule's Novelty Small Fruit Collection.

24 Newest and Best Plants for \$1.75, Postpaid.

6 Fendall Strawberries. This is a seedling of the well known William Belt. Of strong, vigorous growth; clean and healthy. The berries are probably larger than those of any other known variety and are of a delicious flavor. Wonderfully productive; has yielded at the rate of 16,800 quarts to the acre. Bearing season from May 25th to July 4th. Plants of great beauty and symmetry of form; throwing out many runners, which root splendidly in a short time. The roots excel those of any other strawberry we have tested.

6 Heritage Strawberries. Plant very large, of heavy texture, deep rooted and extremely free in fruiting. Fruit begins to ripen about early mid-season and continues long after other varieties are gone. The berry is dark, shining crimson in color to the center; has perfect blossoms and is very large from first pickings to much above the average size for main crop.

perfect biossoms and is very large from first pickings to much above the average size for main crop.

6 King Red Raspberries. The earliest raspberry. Round; medium size; light crimson color; moderately firm and of excellent quality. This is a seedling of the Thompson and ripens about the same time, but is larger and more productive.

3 Blower Hardy Blackberries. An iron-clad variety that never winter kills. A mammoth grower and enormously productive. Berries large and luscious.

1 North Star Currant. Wonderfully prolific and of remarkably vigorous growth. Stems of fruit thickly set; average 4 inches in length. Fruit very sweet and rich; fine for desert and unequaled for jelly. Bears early and is extremely hardy.

1 McKinley Grape. A new early white grape. The fruit is large, nearly round, very sweet, of excellent quality and is borne in large, compact bunches. Color green at first, turning to pale yellow when fully ripe. A good shipper and remarkable keeper.

1 Ulster Prolific Grape. Bears small to medium, compact clusters. Fruit dull copper color and of good size, quality rich and excellent. Very productive, a strong grower, a fine shipper and keeper.

All these new plants, 24 in all, only \$1.75, postpaid.

All these new plants, 24 in all, only \$1.75, postpaid.

BLACKBERRIES.

ELDORADO. Fruit large and of exceptional quality and productiveness. Late. 10 cents each; 50 cents per dozen, postpaid. By express, not prepaid, \$3.25 per 100; \$30.00 per 1000.

ERIE. One of the largest; thrifty, hardy and productive. Fruit, jet black. 10 cents each; 50 cents per dozen, postpaid. By express, not prepaid, \$2.75 per 100; \$25.00 per 1000.

RATHBUN.

per 1000.

New Jersey State Board of Agriculture.

Office of the State Entomologist.

New Brunswick, N. J., September 10, 1909.

Certificate No. 33, 1909.

THIS IS TO CERTIFY that I have investigated the sources of the nursery stock grown for, purchased or dealt in by Wm. Henry Maule at Hightstown, in Mercer county, New Jersey, and have found the same satisfactory. That all such stock has been inspected where grown, and is accompanied by an official certificate to the effect that it is apparently healthy and free from San Jose Scale and other injurious insects.

This certificate is valid until June 1 1910.

John B. Smith, State Entomologist.

NURSERYMAN'S DECLARATION.

I HEREBY CERTIFY that the plants in this parcel are a portion of those inspected and covered by the above certificate, or are such as were obtained by me under certificate that they were properly inspected where they were grown.

To STATES requiring fumigation—ONLY, I further certify that all the stock in this shipment has been properly fumigated in a house approved by the State Entomologist and in accord with directions given by him.

WM. HENRY MAULE.

GRAPES.

AMERICAN. Hardy and very ornamental. Fruit pungent when green, but sweet when ripe, after frost.

25c. each; \$2.50 per doz., postpaid.

Holt's Mammoth Sage.

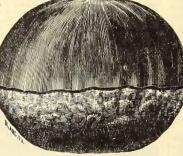

This useful plant, which produces leaves of great size, should be in every garden. Plant vigorous. It is really the only variety of sage worth extensive cultivation and in every way desirable. Very hardy; does well in all sections. 10 cents each; 3 for 25 cents. 50 cents per desirable. 25 cents; 80 cents per dozen, postpaid.

ENGLISH WALNUT

AMERICAN NATIVE SWEET CHESTNUT

JAPAN MAMMOTH CHESTNUT

Golden Mayberry.

An improved mayberry perfected by Luther Burbank. It is of sturdy growth, ripening before strawberries. It produces large, goldenyellow berries which are sweet and luscious. 15 cents each; 2 for 25 cents; \$1.25 per dozen, postpaid.

Japanese Wineberry.

A fine berry for preserving. Perfectly hardy. Canes covered with a hairy growth, as also is the calyx. The calyx eventually opens and turns back, presenting the beautiful fruit, which in appearance is quite similar to a red raspberry. The fruit has a sprightly, sub-acid flavor. 10 cts. each; 3 for 25 cts.; 80 cts. per dozen, postpaid. By express, not prepaid, \$5.00 per 100.

One of each of the above four superior hardy berries only 35 cents, postpaid.

Logan Berry.

A cross between the raspberry and the blackberry. Enormously productive: fruit as large as the largest blackberry, of quite the same shape. Color, a rich dark red. Fine for the table, and for jelly and jam is without an equal. 15c. each; 2 for 25c.; \$1.25 per doz., postpaid. By exp., not prepaid, \$9.00 per 100.

Strawberry-Raspberry.

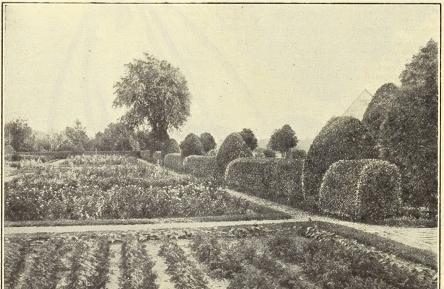

A Japanese novelty. A spreading, low growing bush. It bears its fruit in branching clusters at the tip end of the stems. Fruit is the size and shape of a strawberry, with the melting flavor of the raspberry, and is grand for preserving. 15 cents each; 2 for 25 cents; \$1.00 per dozen, postpaid. By express, not prepaid, \$2.00 per 100.

CALIFORNIA PRIVET — The Best Hedge Plant.

A 20-YEAR-OLD PRIVET HEDGE AT BRIAR CREST. SHOWING A SECTION OF FLOWER SEED TRIALS.

Absolutely Free from Insects.

I have a fine lot of good strong, well-rooted plants to offer at the following prices: 12 to 18 inches, not branched, \$3.50 per 100, postpaid. The following sizes. By express, not prepaid:

100 1.000

12 to 18 inches, not branched \$3.00 \$25.00 18 to 24 inches, branched 4.00 35.00 5.00 45.00 2 to 3 feet, well branched

Remove the unsightly fence. Increase the value of your property by planting a California Privet hedge. It will do almost as well on poor soil as on good, in all situations and under all conditions.

It is a vigorous grower, with leaves of a good rich shade of green, almost an evergreen, the leaves (in the latitude of Philadelphia) remaining on the branches until almost Christmas.

Insects never attack it, and it never grows dull, but holds its beautiful green foliage throughout the season.
